Senator Vest also spoke of the trend toward creating new committees to meet new situations, rather than relying upon the regular standing committees, in this case to remove rivers and harbors legislation from the Senate Commerce Committee and to assign it to a new committee on Internal Improvements. Vest recalled that "years ago, under the pressure of public opinion and the exigencies of the time, this Senate created a Committee on the Mississippi River and its Tributaries, and the argument was made that the Commerce Committee could not consider this great question on account of the river and harbor bill absorbing all its functions, and that a special committee should be created. It was created, and what has been the result? . . . The record shows that nothing has been done . . . Not one dollar has come from this special committee, not one single measure which has given relief to the people of the West upon this great question." Public business would not be facilitated by the creation of new committees, said Senator Vest, but by the diligent attention on the part of the committees already created.

Here Senator Vest offered an argument that has been at the root of many Senate reforms over the years, the most recent being in 1977, that a number of Senate committees had grown too large and needed to be reduced. In 1884 there were six standing committees of the Senate that had never considered a bill, resolution, or any other type of business. "They are all sinecure committees," Vest pointed out. "They were created simply to give secretaries to members of the Senate and a committee room."[19]

Senator Vest was echoed by Senator Richard Coke of Texas, who also objected to removing river and harbor legislation from the Commerce Committee. The problem was not that the Commerce Committee was inefficient, Coke asserted, but that the river and harbor bills never reached the Committee on Commerce from the House, where they originated, until the last eight or ten days of the session. To create a new Senate committee would not expedite matters at all. "It is well known, Mr. President," said Senator Coke, "that bills are passed much more rapidly and with much more facility through the Senate than through the House on account of the difference in the constitution of the two bodies, the one small and compact and the other large and unwieldy. It is also well known that with the expiration of every Congress large numbers of bills which have passed the Senate die on the Calendar of the House from non-action. I cannot see the good to be accomplished by increasing the number of committees, with the additional attendant expense, in order to increase the number of Senate bills to be ignored and permitted to expire without action in the House." [20]

As usual, in Senate debates, there was another side to be heard, and Sen-

ator William Frye of Maine responded to Senators Vest and Coke. The Committee on Commerce should not spend its time waiting for the House to act, said Frye, but should begin studying river and harbor matters from the very moment the session began. "The Senator from Texas says the committee has ample time—," Frye noted, "the Committee on Commerce meets once a week, I believe on Thursday at 10:00 o'clock—ample time; only a week per session for the river and harbor bill! Show me, Mr. President, where the Committee on Commerce has undertaken in that ample time to relieve American commerce, to restore our commerce to the ocean, to do those things that ought to be done in the interest of the whole country." [21]

As the debate continued, Senator John R. McPherson of New Jersey rose to report this interesting memoir of his committee service: "There are many committees in this body that have little or nothing to do. Committee-rooms are provided them, clerks of committee. The same machinery, the same necessary expense is attendant upon a committee doing no service as is required for a committee doing a large amount of service. During three years of my service to this body I had the honor to be assigned to duty upon the Committee on Manufactures. During that period of three years we never met but once. We were hastily called together one morning by the chairman of the committee to consider a bill which by some accident had been referred to us. No sooner had the consideration commenced than a messenger from the Committee on Finance appeared at the door and demanded that the bill be sent to the Committee on Finance, it being a revenue bill and properly belonging to that committee, and his authority showed the fact that the previous day the bill had been taken from the Committee on Manufactures and assigned to the Committee on Finance by order of the Senate. During these entire three years, with the exception of this one bill to which I have alluded, the Committee on Manufactures had no bill, no resolution, no legislative matter of any character referred to it." [22]

Mr. President, in these days when United States senators must contend with conflicting committee and subcommittee schedules and demands upon their time, we may look back nostalgically upon the days when a senator could be assigned to a committee that conducted no business at all; although I seriously doubt that any currently serving senator would ever tolerate such a situation as Senator McPherson described. It is not at all surprising, however, to find that the Committee on Manufactures' only bill was wisked away by the clerk of the Committee on Finance. By comparison to the Committee on Manufactures, which did not meet and which did not consider legislation, the Finance Committee was an exceedingly powerful and busy committee, with jurisdiction over the national debt, currency, banking, and revenue. It was an amalgamation of today's committees on the Budget, Banking, Housing and Urban Affairs, and Finance. It handled the two most controversial areas of legislation in the late nineteenth century: currency and tariffs. It was not for nothing that the most powerful men gravitated toward the Finance Committee, and that Finance Committee members became the most influential senators. Henry Clay, Daniel Webster, and John C. Calhoun all chaired the committee before the Civil War. After the war the chairmen of the Finance Committee generally served as their party's leaders on the Senate floor, in the days before officially designated majority and minority leaders. From 1865 to 1900 the list of Finance chairmen included Republicans William Fessenden, John Sherman, Justin Morrill, and Nelson Aldrich, and Democrats Thomas Bayard and Daniel Voorhees.

Senator McPherson mentioned the clerk of the Finance Committee, which brings up another measure of the Finance Committee's stature. Beginning in the 1840s, the Senate authorized the Finance Committee to employ a clerk. When, in 1857, the Senate decided to extend this privilege to all standing committees, clerks were employed at a salary of $6.00 a day for every day the Senate remained in session. The clerk of the Finance Committee, however, was retained on an annual salary of $1,850. This was a reflection of the scope of its work, work which increased dramatically during the Civil War when the first national paper currency was issued, and when revenue needed to be raised to support the war effort. In the years after the war, the committee handled the tariff legislation which played such an important role in the industrialization of America. Although the Constitution provides that revenue bills should originate in the House, it does not limit the Senate's ability to add amendments, which the Finance Committee did on a regularly expanding basis. In 1872, for example, the House sent over a bill repealing the tariff on tea and coffee. The bill was four lines long. The Senate then added twenty pages of amendments. I shall not go into further detail on the work of the Finance Committee, but I do refer my colleagues to the excellent committee history it published in 1981, which is very much a model history of a Senate committee, rich in detail and handsomely illustrated.[23]

Mr. President, in discussing the committees of the Senate, I think I should say a few words about the party committees as well as the standing committees. In the years following the Civil War we find party steering committees developing as a means of building party regularity and ensuring efficient handling of business in the Senate. The Republicans in 1874 and the Democrats in 1878 appointed ad hoc committees to recommend schedules of business for their respective party caucuses. During the 1880s, these committees were formalized as the Republican and Democratic Committees on the Order of Business, generally known as Steering Committees. Because the committees were strictly party creations, they filed no formal Senate reports nor did they maintain records, so their exact dates of creation and early membership remain obscure.

The Steering Committees' control of the schedule required party members to consult with them before attempting to raise any matter on the Senate floor. The Steering Committees also requested committee chairmen to submit lists of bills which warranted immediate attention, and then notified the caucuses of the nature and the order of bills to be considered, frequently making recommendations on party policy concerning those measures. During the 1890s such strong party leaders as Republican William Allison and Democrat Arthur Pue Gorman used the Steering Committees as instruments of party power, to keep their members unified behind the party's legislative program.[24]

In many ways, however the strength of the Senate committees during these years militated against party unity, and frustrated legislative/executive relations. Here let me refer once again to Woodrow Wilson's classic study, *Congressional Government*, published in 1885. Wilson, as we know, was an astute historian and political scientist who left academia for politics and was eventually elected President of the United States. This study was his doctoral thesis, at Johns Hopkins University. Although there is no record that he ever made the thirty-mile train ride from Baltimore to Washington to observe Congress in action while writing this study, this does not diminish the value of his word.

Quoting Lord Rosebery, Wilson called the Senate "the most powerful and efficient second chamber that exists." But at the same time, Wilson found that its committee organization denied leadership and disintegrated the Senate. Each committee was an independent barony, with powers of "overlordship" of the executive departments. "The Committees are not recognized constitutional superiors of Secretary A. or Comptroller B.," wrote Wilson, "but these officials cannot move a finger or plan more than a paltry detail without looking to it that they render strict obedience to the

wishes of these outside, uncommissioned, and irresponsible, but none the less authoritative and imperative masters."[25]

To summarize, Mr. President, during the period from 1845 to 1900 the work of the Senate expanded greatly, and so did its committees to handle that work load. New standing and special committees were appointed, more clerks were hired, more rooms were acquired. More bills and resolutions were considered, more amendments written and debated. The business of the Senate grew to match a geographically, economically, industrially expanding nation. But as many of these committees grew in power and influence, they created new problems of their own. They became magnets for lobbyists and special interests seeking to influence legislation, whether by legitimate or illegitimate means. They also became stumbling blocks for reform legislation. By the end of the nineteenth century the Senate was recognized as the most powerful arm of the Federal Government. Yet it was also seen as a "Millionaire's Club" that blocked legislation and frustrated the will of the people. By 1900 a dynamic new reform movement was getting underway which would bring great changes to the government as a whole and the Senate in particular. Committee reform became a major issue of twentieth century political debate. But this is another story, deserving attention in detail, and I shall save it for another chapter in the history of the United States Senate.

Thus ends my 61st statement on the United States Senate.

Mr. President, I ask unanimous consent that the footnotes to "Senate Committees, 1845-1900," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNEMPLOYMENT INSURANCE SYSTEM

Mr. DIXON. Mr. President, today a subcommittee of the Senate Finance Committee conducted hearings on our unemployment insurance system, which is, of course, of great importance to the millions of Americans without jobs.

I submitted a statement to the subcommittee for its record, and now submit that same statement for inclusion in the CONGRESSIONAL RECORD.

The statement is as follows:

STATEMENT OF SENATOR ALAN J. DIXON BEFORE SENATE FINANCE SUBCOMMITTEE ON SOCIAL SECURITY AND INCOME MAINTENANCE—S. 1589

I would like to take this opportunity to thank the distinguished Chairman of the Subcommittee, Senator Armstrong, for holding hearings on S. 1589, a bill to provide alternative state unemployment triggers, which is a matter of deep concern to many of us.

The broader issue is our unemployment insurance system. To call it a system is somewhat of a misnomer, because it does not function smoothly and effortlessly. We have to keep tinkering with it. Many of us have been involved in the band-aids which have been applied to this "system." But our ultimate goal, I believe, is to serve people who need our help. I know that you all are aware of the situation in which we find ourselves today. That is why we are participating in this hearing. However, for the record, I would like to give the perspective of my State of Illinois, and others in similar circumstances: states with high total unemployment rates or TUR, and ever decreasing insured unemployment rates, or IUR.

As you know, Illinois, Michigan, Ohio and many other states have triggered off extended benefits or EB. In fact, only five states remain eligible to pay these benefits.

We have attempted to address this issue many times in the past year. Several members of the Finance Committee have joined in such efforts.

My State of Illinois is no longer eligible to pay EB under the existing formula, because we have dropped to an IUR of 5.22%, which is 114% of the prior two years. As you know, the requirement is 6% or 5% if the rate is 120% of the prior two years.

What this means in real terms, is that during the third week of June, an unemployed worker who qualified for the maximum benefits available could be assured of protection under the formula for a total of 53 weeks of benefits, including 26 weeks of regular benefits, 13 weeks of EB and 14 weeks of federal supplemental compensation or FSC.

With the drop in the IUR during the fourth week in June, that same unemployed worker would be eligible for only 38 weeks of coverage.

I think it is worth reviewing the circumstances leading up to the implementation of the FSC program last September. Then, as now, states with the highest total unemployment rates in the country were triggering off EB.

The FSC program was adopted to cope with this problem, since the trigger increases implemented by the Reconciliation Act of 1981 were becoming effective at that time, and repeal, although attempted, of that and the change in calculating the IUR was not possible.

The FSC answer was meant to assure that unemployed workers in those states which had triggered off would still receive the same number of weeks of benefits to which they were entitled before the state became ineligible to make payments. You will recall the "grandfathered" states and major attempts made to accommodate everyone who had an interest in the matter.

In the present situation in which we find ourselves, however, unemployed workers in Illinois, as well as others who were at one time eligible for EB will receive one week less of FSC than they used to under EB, and will shortly slip to three weeks less.

The FSC program, as it is currently structured, allows the maximum benefits to be paid to unemployed workers in states with an insured rate of over 6%. Therefore, we experience a double penalty: no EB and two weeks less of FSC.

What do we tell our unemployed workers who depend on these benefits when they ask why they are only eligible for 38 weeks of benefits? Statistics don't provide an answer in situations like this. These people are looking for a way to keep a roof over their heads. They are looking for a way to continue to meet their basic needs for survival. Yet we are forced to tell them that the law is the law, and we're sorry, but that's the way it is.

It doesn't have to be that way. It wasn't that way. In 1971, under President Richard Nixon, there was a temporary extension of the EB program to 52 weeks in states with insured unemployment rates in excess of 6.5%. That was at a time when the national unemployment rate was only 6%!

In 1974, under President Ford, there was a 26-week FSC program, offering a total of 52 weeks of coverage, at a time when the national unemployment rate was only 7.1%!

In 1975, there was a total of 65 weeks available, when the national unemployment rate rose to 8.8%.

Those past levels of single digit unemployment look pretty good when faced with 10% as of June of this year. But when you consider the states with unemployment rates in excess of 11%, it becomes apparent that we are not addressing the matter in the compassionate way that our colleagues did in the past.

The Administration has estimated that only four states will be eligible to pay EB by the end of the year. I wish we could say this is because only four states out of 50 would

be experiencing serious levels of unemployment. Unfortunately, that will not be the case.

Our bill offers a new approach to this dilemma. It doesn't repeal existing law. It merely allows an opportunity for states to qualify for the EB program and the maximum weeks of FSC based on total unemployment rather than insured unemployment.

If a state has had over 11% unemployment, surely that is a sign of distress. Our bill would alleviate that distress by allowing a state the option of using a different method of qualifying for EB, if a state cannot meet the current triggers, and 14 weeks of FSC. Estimates indicate that eight states have or soon will trigger off EB, while at the same time suffering an unemployment rate in excess of 11%. That doesn't make sense!

By addressing the problem as S. 1589 does, we are assuring that states with the greatest need are able to pay the total allowable number of weeks of benefits. That does make sense!

It is truly unfortunate that we must continue to deal with this system in a piecemeal fashion. The Federal-State Unemployment Insurance programs are patched up whenever an emergency presents itself. I am grateful to have this opportunity to express the sentiments of many who would like to see this unwieldy situation changed. The system should truly be a system which responds in critical times. It does not do that now.

We look forward to working with this Committee to find a solution to this recurring problem, so that at long last we can provide some real answers. It is time to tell the millions of unemployed in this country that our laws can respond to them, that the system works and that we understand.

ARTHUR M. WIRTZ

Mr. DIXON. Mr. President, last week in Chicago, Mr. Arthur M. Wirtz, a very wise, very honorable man, passed away.

Mr. Wirtz contributed greatly in many different ways to the city of Chicago, the State of Illinois and to this Nation.

He excelled in diverse worlds: business, sports, entertainment. In all those worlds, he was known as a man of integrity and exceptional ability.

He excelled in his private life, as well. His devotion to his wife, Virginia, was such that he never recovered from her death last New Year's Eve. His children—sons Bill and Mike and daughters Cynthia and Elizabeth—felt his very special love and knew that for Arthur Wirtz, family was the most important thing in the world.

He will be greatly missed by the community of which he was such a significant part.

I am proud, Mr. President, that I was able to call Arthur Wirtz my friend.

MESSAGES FROM THE HOUSE

At 12:16 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House insists upon its amendment to the bill (S. 675) "to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes," and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. PRICE, Mr. BENNETT, Mr. STRATTON, Mr. NICHOLS, Mr. DANIEL, Mr. MONTGOMERY, Mr. ASPIN, Mr. DELLUMS, Mr. DICKINSON, Mr. WHITEHURST, Mr. SPENCE, Mrs. HOLT, Mr. HILLIS, and Mr. BADHAM; from the Permanent Select Committee on Intelligence, only when differences regarding intelligence-related activities are under consideration: Mr. BOLAND, Mr. MINETA, Mr. MCCURDY, Mr. ROBINSON, and Mr. STUMP; as additional conferees for consideration of section 1030C and 1030D of the Senate bill, and modifications thereof committed to conference: Mr. PERKINS, Mr. HAWKINS, Mr. FORD of Michigan, Mr. BIAGGI, Mr. ERLENBORN, and Mr. GOODLING, be the managers of the conference on the part of the House.

MILITARY PROCUREMENT AUTHORIZATION, 1984

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 675.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendment to the bill (S. 675) entitled "An Act to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Price, Mr. Bennett, Mr. Stratton, Mr. Nichols, Mr. Daniel, Mr. Montgomery, Mr. Aspin, Mr. Dellums, Mr. Dickinson, Mr. Whitehurst, Mr. Spence, Mrs. Holt, Mr. Hillis, and Mr. Badham; from the Permanent Select Committee on Intelligence, only when differences regarding intelligence-related activities are under consideration: Mr. Boland, Mr. Mineta, Mr. McCurdy, Mr. Robinson, and Mr. Stump; as additional conferees for consideration of section 1030C and 1030D of the Senate bill, and modifications thereof committeed to conference: Mr. Perkins, Mr. Hawkins, Mr. Ford of Michigan, Mr. Biaggi, Mr. Erlenborn, and Mr. Goodling, be the managers of the conference on the part of the House.

Mr. BAKER. Mr. President, I move that the Senate disagree to the amendments of the House on S. 675, agree to the request of the House for a conference on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. SIMPSON) appointed Mr. TOWER, Mr. THURMOND, Mr. GOLDWATER, Mr. WARNER, Mr. HUMPHREY, Mr. COHEN, Mr. JEPSEN, Mr. QUAYLE, Mr. EAST, Mr. WILSON, Mr. JACKSON, Mr. STENNIS, Mr. NUNN, Mr. HART, Mr. EXON, Mr. LEVIN, Mr. KENNEDY, Mr. BINGAMAN, and solely for the consideration of section 1030(c) Mr. STAFFORD and Mr. PELL, conferees on the part of the Senate.

IN TRIBUTE TO FORMER SENATOR LEN B. JORDAN OF IDAHO

Mr. STENNIS. Mr. President, I rise to recall to the memory of this Chamber a dear friend of mine, the late Senator Len B. Jordan of Idaho. Senator Jordan devoted his life to the service of his country. He served with highest distinction as a member of the Armed Forces, as a State legislator, as Governor of his State of Idaho, and as a Member of this body for 12 years.

I recall his memory not in praise for he needs none. I speak to express my deep appreciation for his service, which I bear witness to, and to express to his dear wife Grace how much Len's friendship meant to me, and how I will miss his association.

Senator Jordan was a man of highest character. His honor and integrity were the bedrock of a great public service career. A man with great capacity, a man of commitment and purpose, he by example represented the values of this great country.

One quality of Senator Jordan which I particularly admired was his very practical approach to the problems of our Nation, to his region, and to his State. I knew Senator Jordan when he was Governor of Idaho. As a new Senator and as a member of the Public Works Committee, I visited there on business concerning his State, and was impressed at that first meeting with his unusually fine understanding of his people, their economy, and the related problems that went with the problems of that time. Later, when Senator Jordan joined the Senate, he carried out his legislative duties with the same practical approach.

Senator Jordan was a great American of uncommon character and courage. Grace, his wonderful wife, gave some insight into the development of the character of each of them in one of the books she wrote about their life during the Depression years out in a very rugged part of the West. Living in total isolation, rearing and schooling their children, undergoing great hardships, during a very difficult economic period they worked eight back-breaking years to build a thriving ranch. This book, entitled "Home Below Hills Canyon," is the story of the building of a great family—building the qualities that made America great.

The Jordans were an inspiration to me. They brought the finest qualities to the service of their neighbors, their community, their State, their Nation. Most of all, they offered a friendship to treasure. I will always hold their friendship dear.

To Grace Jordan and the other members of her family, I extend my heartfelt sympathy in their earthly loss. At a time of great physical stress and strain in my own life, Grace Jordan sent me a message of strength and encouragement when she wrote me a two-word paragraph which said, "Hold on." Her words sustained me then and now, and in admiration I return the same greeting to her, "Hold On, and may God continue to bless and sustain you along the way."

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR EXTENSION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended to 1:35 p.m. under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I wish to say to those who may be listening in their offices and elsewhere that at about 1:35 p.m. or as soon as we can get the principal Senators who are involved in the controversy in the Chamber and available I intend once more to make a motion to proceed to the consideration of the agriculture target price bill.

I had hoped that as a result of circumstances that occurred since last Friday it might be easier to get this bill up and dispose of it, but I have to confess that I am by no means sure that will happen.

But in any event, Senators should be on notice that I will attempt to reach that bill as soon as the principals involved are here and available and that should be about 1:35 p.m.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

H.R. 2760—TO AMEND THE INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1983

Mr. BYRD. Mr. President, at the request of a Senator on this side I ask for the first reading, in accordance with rule 14, of a message from the House on H.R. 2760.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (H.R. 2760), to amend the Intelligence Authorization Act for Fiscal Year 1983 to prohibit United States support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America.

Mr. BYRD. Now, Mr. President, I ask for the second reading of the bill.

Mr. BAKER. Mr. President, I object to further proceedings.

The PRESIDING OFFICER. Objection having been heard, the second reading will occur on the next legislative day.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. I thank the minority leader and I thank the Chair.

Mr. President, as I indicated earlier, at about this moment I would try to get to the agriculture bill, and as soon as we can get the chairman of the Committee on Agriculture on the floor—I understand he may be in the cloakroom—I will proceed with that.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, I believe the time for morning business has expired, has it not?

The PRESIDING OFFICER. Time for morning business has expired.

Mr. BAKER. Morning business is closed?

The PRESIDING OFFICER. Morning business is now closed.

Mr. BAKER. I thank the Chair.

CRITICAL AGRICULTURAL MATERIALS ACT

Mr. BAKER. Mr. President, as I have announced earlier, it is my intention to try to reach the agriculture target price bill, H.R. 2733 at this time. I was apprised of the fact that I would have objection if I ask unanimous consent to proceed at this time. In a moment I will make a motion to that effect.

The distinguished chairman of the Committee on Agriculture is within earshot and has sent word he is prepared for us to proceed.

Therefore, Mr. President, I move that the Senate turn to the consideration of H.R. 2733, the agriculture target price bill.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, this House bill before us, despite what the first 11 pages deal with, is an effort to get at some present law under the Farm Act of 1981.

The first 11 pages of H.R. 2733 deal with the research, development, and demonstration in the production and manufacture of guayule rubber, and to broaden such program to include other critical agricultural materials.

So the bill itself does not on its face seem to have anything to do with the Farm Act of 1981. It is not until you get to the bottom of page 11 that you see that suddenly the bill shifts gears completely and starts dealing with agricultural matters covered under that last comprehensive Farm Act we passed in 1981.

These are not sound reasons for attaching the amendments to the 1981 Farm Act, which most of the Senate Committee on Agriculture, voted to do. I did not happen to be one of them who favored it, and several of us opposed it but, nevertheless, the majority vote prevailed and this was kicked out to the floor dealing with target prices in agriculture, and some further authorization for export money, CCC money, Commodity Credit Corporation money, to enhance agricultural exports.

Why use this particular bill? Well, the idea was it would be easy to pass a House-passed bill with this rider dealing with target prices attached. Pass it in the Senate rather quickly, their game plan called for, and send it over to the House, hoping they will do something in the next couple of days, and then the Secretary of Agriculture would be given some authority he now lacks under present law and some authority he seeks to lower target prices for grains, that is, wheat and corn and other feed grains and for upland cotton and rice.

I do not believe that ought to happen, Mr. President. There are a substantial number of us who have been in direct communication with agricultural people in our States, and there are a substantial number of us who do not believe it should happen. The bill should be put aside, and if there is merit to the argument advanced by the Secretary of Agriculture, it can be considered in September after thorough perusal and thorough consideration by the principals who are involved, and those principals are the farmers themselves who grow the grains and produce those grains, and those cotton people who produce cotton, and the rice producers. Those are the principals who ought to have a thorough input into what is being proposed, and advise us here in the Senate on how they feel before we consent to the types of changes the administration is asking for.

Now, specifically, the administration, in the case of wheat, would like to have repealed two sections dealing with target prices on wheat. One covers the 1984 crop and the other covers a 1985 crop.

Now we put that into specific language in the 1981 Farm Act because we did not want to leave it to the discretion of the Secretary of Agriculture. We were plotting out what should be a farm program for several years. And, on the theory that the producers ought to know what they could expect in some aspects of a wheat program or corn program or upland cotton program or rice, we determined it wise to put it into the law itself. We were specific on what the target prices would be year by year.

Let me turn to the payment-in-kind (PIK) program.

The administration has approved the PIK program on their own authority based on statutes that give discretion and authority to the Secretary of Agriculture. And the PIK program has been much more costly than they anticipated and probably has not done as much as they anticipated to bring down supplies.

Let me say very clearly that I sympathize with the Secretary of Agriculture on his sincerity and his diligence and his efforts to handle the farm program as best he could. But I did discourage the Secretary of Agriculture instigating the PIK program until he was sure—until he was sure—that it would do more than just put money into farm producers' pockets and could relate it as a sound program on a supply side, sound agricultural policy improving agricultural producers' income, not just by giving them a check, or the commodities which they turn into a check, to enhance their bank accounts and to help them meet their debts, but that in the long run it would work out to be sound agricultural policy for the entire country.

I personally am dedicated to the idea and to the principle that, because we are such a strong country in producing agricultural products, we should continue to do so and to use those agricultural products, the abundance that we have, for foreign trade, for Food for Peace, and for help to our friends and allies around the world.

I would rather see more food used in Central America and less armaments. I would rather see more of the dairy surpluses that are in Federal warehouses right now going to the hungry in America and the hungry in friendly countries. And we would not have to look any farther than across the Rio Grande into Mexico.

A few weeks ago, we had an immigration bill right out here on this Senate floor. And we commiserated with the fact that so many people out of Mexico come into our country because they are desperate, economically desperate, trying to find a job, trying to find any means of earning a little bit of money which they either take back to Mexico or send back to help their families to survive.

Now I would rather see some of our abundance of food supplies going right down to Mexico right now. The President, to his credit, a few weeks ago did send some relief in food products to Mexico. But let me tell you, those many millions of hungry people who reside in that country can use much more.

That is my philosophy. I believe we ought to use this abundance to help people that are hungry around the globe, to satisfy the needs of those countries who would like to trade with us. I commend the President for starting up the new agreement with the Soviet Union on the sale of wheat, corn, and soybeans. I think that is fine. I encourage the Department of Agriculture and the President and the entire administration to do much more along those lines in selling agriculture products to other countries that can use our product.

Mr. President, I ask unanimous consent that I may yield to the distinguished chairman of the Finance Committee and the senior member of the majority on the Senate Agriculture Committee without losing my right to the floor.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Kansas.

Mr. DOLE. Mr. President, I appreciate my colleague from Montana yielding. I would like to comment in general on the current situation facing us. If we do not do something in the next couple of days, we probably are not going to pass any farm legislation before the recess.

I certainly understand the deep feelings that some have with reference to certain provisions. We have a dairy program that is being held hostage to the outcome of this debate. Most farmers support the dairy compromise hammered out by a number of our colleagues. But I think it has been appropriate to tie these issues together up to this point.

I guess what we need to find out sooner than later is whether or not we are going to pass any legislation at all. It is fairly obvious the House will be leaving, if not on Wednesday, on Thursday. If we intend to pass legislation, it will have to come tomorrow or sometime early on Wednesday if we intend to go to conference.

Those of us from farm States have a particularly heavy responsibility. We have seen the cost of farm programs go from $4 billion in 1981 to $21 billion in 1983, plus another $12 billion for the PIK program. And now some are saying that we cannot tighten up the cost of those farm programs.

The proposed freeze on target prices would affect primarily wheat, and Kansas is the No. 1 wheat State. But I believe that most farmers in my State are more concerned about towering interest rates and keeping inflation down than they are with the specific levels set forth in the PIK program, in target prices, and in other Federal programs.

We have to make a choice. Last December, when we tried to pass legislation to authorize the PIK program, we were not able to bring it up. Now some who prevented it consideration are faulting the PIK program.

The PIK program certainly has not been perfect. It has cost billions of dollars. We are seeing a number of stories now, that I think are not particularly accurate, criticizing the fact that bigger farms are getting bigger payments. Well, that is the nature of farm programs and has been over the years. If you have a lot of acreage, whether you are an individual or corporation or partnership, and you set aside a large part of that acreage, you are going to get a bigger payment than someone with smaller acreage. So it is not a very fair argument, but it is a criticism of incentive-based farm program, particularly one like PIK.

I might add, Mr. President, that the growing attractiveness of farm pro-

grams is resulting in a major increase in wheat production in nontraditional regions. As the incentives to participate have become expanded, so has the wheat acreage base in many States in the Southeast and in California. Much of this additional base has resulted from double-cropping or irrigation. Its impact on the competitiveness and price of wheat produced in the traditional Wheat Belt—from the Dakotas to Texas and in the Northwest—has been to shut small one-crop farmers out. Before we agree to spread farm program incentives out to all qualified producers, we must take into account who benefits from them and who really isn't helped that much.

Mr. President, I would like to comment briefly on where we stand in the effort to allow the Senate to consider and vote on the proposed target price freeze. I have listened carefully to many of my colleagues in the Senate argue that freezing target prices would take up to $4 billion out of the farm income safety net. However, it would seem to me that if we do not get a target price vote this week, then we are going to be responsible, directly or indirectly, for the future—or lack of future—of farm programs.

I think it might be well to review the record during the 1981 farm bill debate. Target prices were retained in the Senate Agriculture Committee by one vote. They were retained on the Senate floor by two votes. The entire farm bill passed the House of Representatives by just two votes. It would seem to me that if those of us from farm States are not willing to tighten the cost of farm programs a little bit, we may endanger approval of another farm bill in 1985. If, in fact, we are concerned about the budget deficits as we proclaim daily in speeches, if we are concerned about increasing interest rates, and they are going up right now, if we are concerned about inflation, and if we are truly concerned about the wheat or corn or dairy producers in our States, then we have a responsibility to get a handle on some of the spending and it must be across the board.

I would emphasize that the target price concept went squeaking by in the Senate Agriculture Committee by a vote of 8 to 7 in April 1981. The Senator from Kansas voted for target prices. The Senator from Montana voted against target prices. It makes it very difficult for those of us who are trying to be responsible and to support reasonable farm programs to be prevailed from taking up this provision.

At an appropriate time, the Senator from Kansas will put into the RECORD a number of articles and editorial comments from newspapers across the country. Some are not particularly well written. Some are based on inaccurate information. But being accurate is not a requirement when you write editorials.

Whether it is a piece in the Washington Post called "Our Unaffordable Farm Programs"; in Newsweek, "A Bumper Crop of Subsidies"; in the New York Times, "What PIK Spells"; in Financial World, "PIK Sending the Wrong Signal"—or other articles such as "PIK and Choose Among the Farm Stock," or "Farmers Are Getting Soft,"—there are a host of articles that do not properly characterize farmers, farm families or even the debate on this particular legislation. However, if those of us from farm States are truly concerned about the farm program in the next few years, we must pay attention to these written comments.

We can argue all day long that a major share of commodity loans are repaid, and they are. There are still other outlays. We still must borrow money to make the loans as well as the payments.

This Senator is convinced that most farmers are not looking for payments from the Federal Government.

What the Kansas wheat producer prefers, and I think the preference is shared by producers of other commodities—whether feed grains, corn, or dairy—in other States, are markets and exports. Just 4 days ago, we had an announcement that indicates that we are going to finally end the nightmare of the Carter grain embargo of 1980. We have a new long-term grain agreement, a 5-year agreement effective October 1, with the Soviet Union on wheat and feed grains. We were told this morning that the package will be worth $8 billion in exports—$8 billion.

Also over the weekend, on Saturday, it was announced that agreement has been reached on textile import quotas with the People's Republic of China. Once signed, I believe we will see the Chinese coming to the U.S. wheat and corn markets and renewing purchases of our commodities. These are the areas where we really should be focusing—on trade and on exports.

There are a number of things in the past 2½ years that have been done by this administration to benefit the American farmer. First of all, the President kept his promise and lifted the grain embargo imposed by President Carter in January of 1980. Second, just this past week, as I mentioned, we concluded a new long-term grain agreement with the Soviet Union. We have also passed a number of laws that deal with estate taxes and other tax provisions that help the American farmer.

The PIK program, though it is widely criticized by those off the farm, has literally been a lifeline and a life preserver for many American farmers and their families.

We must be responsible. It cannot be politics as usual. These programs are going to self-destruct unless those of us from the farm States are willing to make some of the corrections ourselves.

Last Friday evening, the Secretary announced what he would do for wheat farmers in a PIK program if there is a freeze and if there is no freeze on target prices.

I am not certain that the Secretary's figures on cost and participation are accurate. One thing you learn is that such projections—by other Congress or by the administration—are often not accurate.

According to the Secretary's comparison of the two program options, if the wheat target price increases to $4.45 per bushel—in other words, no freeze for the 1984 program—then total program costs for fiscal year 1983 to fiscal year 1985 are going to run about $9.3 billion.

If we freeze the target price at $4.30, the level for 1983, then the program costs is projected to be slightly higher, at $9.6 billion.

In both cases, the wheat program is going to cost a lot of money. Much of it will be in the form of loans, as the Senator from Montana may point out, and many of the loans are paid back.

It would seem to me that the best deal for the American farmer would be to freeze the target price and take the high option proposed by Secretary Block last Friday.

I ask unanimous consent to make a part of the RECORD the Secretary's announcement, the announcement on the long-term grain agreement, and also a number of the articles and editorials I have referred to. I will select only a representative sample of these articles on farm program costs because it would cost a lot of money to reprint them all.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

USDA ANNOUNCES PROVISIONAL DETAILS FOR 1984 WHEAT PROGRAM

Washington, July 29—Secretary of Agriculture John R. Block today announced options for the 1984 wheat program, pending program legislation presently under consideration by the Congress.

Block listed general guidelines for next year's program on July 1 which permitted farmers to make preliminary planting decisions and financial commitments for their crop, while the Congress continued deliberations on target price freeze proposals.

"Since legislative action on the proposed target price freeze is now before the U.S. Senate, it is up to the Congress to decide which option they want to choose," Block said. "It is important to get this issue resolved in order to assist farmers in making their management decisions."

He listed the following 1984 wheat program options:

If new legislation freezes the target price at $4.30 per bushel, the acreage reduction requirement will be 25 percent and there

will be a payment-in-kind program of 10 to 25 percent for farmers who divert additional land. The payment-in-kind compensation will be 80 percent of the program yield.

If Congress does not freeze target prices and the target price automatically escalates to $4.45 per bushel, the acreage reduction requirement will be 30 percent and there will be a payment-in-kind program of 10 to 20 percent for farmers who divert additional land. The payment-in-kind compensation will be 75 percent of the program yield.

Producers participating in the payment-in-kind program and having both reserve and regular loan grain would be required to make their reserve grain available for PIK. Those farmers who have neither will be eligible for participation in the payment-in-kind program by volunteering to harvest for payment-in-kind.

In addition:

Land taken out of production must be devoted to a conservation use. This land must be acreage that would have been devoted to small grains or row crops in 1984.

The national average loan and purchase rate will be $3.30 per bushel. The Food and Agriculture Act of 1981 permits the loan rate to be set at this level since the season's average price for the 1983 crop is expected to be less than 105 percent of current loan rate.

Block said the current loan rate is above market clearing levels and places U.S. producers at a competitive disadvantage in world markets. "This reduction will begin to restore competitiveness in world markets and send a signal to our export competitors that we will no longer maintain a 'high price umbrella' which allows them to undercut us in the world market," Block said.

1984 WHEAT PROGRAM—CROSS COMPARISON OF PROGRAM OPTIONS

	Estimated 1983/84	1984/85 [1]	1984/85 [2]
Participation [3]	75	72	53
Acreage Harvested [4]	61.0	69.5	72.0
Production [5]	2,437	2,580	2,635
Ending stocks [5]	1,601	1,664	1,704
FOR [5]	575	786	855
CCC [5]	165	320	336
Farm price [6]	$3.60	$3.35	$3.30
Net producer returns [7]	$6.8	$5.5	$4.9
Program costs:			
Fiscal year 1983 [7]		$4.0	$4.0
Fiscal year 1984 [7]		$2.7	$2.5
Fiscal year 1985 [7]		$3.0	$2.9
Fiscal year 1983–85 [7 8]		$9.6	$9.3

[1] 25 percent ARP; 10–25 percent PIK; 80 percent comparison; $3.30 loan; $4.30 target.
[2] 30 percent ARP; 10–20 percent PIK; 75 percent comparison; $3.30 loan; $4.45 target.
[3] Percent.
[4] Acres in millions.
[5] Bushels in millions.
[6] Dollars per bushel.
[7] Dollars in billions.
[8] May not add due to rounding.

Ambassador William E. Brock, U.S. Trade Representative, and Secretary of Agriculture, John R. Block announced today that the United States and the USSR have concluded a new Long-Term Grain Agreement (LTA). The Agreement will commence October 1, 1983, and will cover five years.

Under its terms, the USSR will purchase from the United States 9 million metric tons of grain annually in approximately equal quantities of wheat and corn. Up to 1 million metric tons of the minimum could be satisfied by Soviet purchases of 500,000 metric tons of soybean and/or soybean meal. If this soybean/soybean meal option is exercised in any year, the minimum of wheat and corn for that year will be 8 million metric tons. During any year of the Agreement, the Soviet Union may purchase 3 million metric tons of wheat and corn in addition to the minimum of 9 million metric tons without prior consultation.

The general framework of the new Agreement follows that of the original LTA that was signed in 1975.

The Agreement was reached on July 28 in Vienna during the third round of negotiations regarding a new LTA. The U.S. negotiating team was lead by Ambassador Robert E. Lighthizer, Deputy U.S. Trade Representative. Daniel G. Amstutz, Undersecretary of the Department of Agriculture was the senior official for the USDA on the team. Formal signing of the Agreement will take place in late August.

The current Agreement that expires on September 30, 1983, called for a minimum annual purchase of 6 million metric tons of wheat and corn by the USSR, and provided an option for the Soviet Union to purchase an additional 2 million metric tons per year. The original Agreement covered a 5-year period beginning in 1975. It was extended for a 1-year period on two occasions.

LEMON-AID—THE NEED TO FIX FARM POLICY

(By David Pelzer)

In Washington and the hinterlands alike, word is spreading that the government's farm program may be a lemon. The prospect of farm price supports of $21 billion and overall agricultural subsidies of $38 billion (including PIK outlays and farm credit funding) is souring government officials on what some consider welfare for farmers. The secretary of agriculture, for example, has called the present program "unworkable."

The consumer-oriented press is starting to question why the public must pay farmers more for food in the grocery store because of supply restrictions and then pay them again to restrict planting.

The steep budget figures are receiving ardent attention from both the adminstration and Congress this summer. Secretary Block has called together 60 top farm and food industry leaders for an agricultural summit meeting in mid-July to discuss the long-term future of federal farm policy. The discussions there and in other forums are expected to bring proposals for widespread change into the 1985 farm bill debate.

Among the heavy hitters brought into the fray is David Stockman, federal budget director, known as the man with the hatchet when it comes to escalating budgets.

This fiscal year, Stockman said in testimony before the Joint Economic Committee, "we are spending more for farm subsidies than we are for welfare for the entire poverty population of this country. . . . (The $38 billion) is more than what was spent during the entire previous administration. . . . We are giving away more money to the farmers of this country than anyone ever conceived of giving away before. And it's one of the reasons why we have the deficit that we have."

Stockman, who himself grew up on a Michigan fruit farm, was immediately reminded by Senator James Abdnor (R., S.D.) that current net farm income, when adjusted for inflation, is lower than it was in 1933, in the midst of the Depression.

Few in the administration would argue that times are tough on the farm. Their point is that the government should no longer be in the business of supporting farmers or other industries through guaranteed prices or other subsidies.

"Current farm programs have been out of touch with market reality, (and) have encouraged production completely out of line with market demand," charged Robert Delano, president of the American Farm Bureau Federation. Delano holds that today's farm programs are "geared to the expectation of ever-higher inflation and a weak dollar," conditions that no longer exist.

Edward Schuh, economist at the University of Minnesota, holds that our current commodity programs were designed in the 1930s "when trade was relatively unimportant to U.S. agriculture" and when the international economy operated under fixed exchange rates which made the value of the dollar constant. In the 1980s, with large budget deficits and a tight Federal Reserve fiscal policy, the dollar is likely to remain strong, Schuh said. The commodity programs are counterproductive, he added, for they encourage excess production and price floors that are too high for the world market. Hence, other countries can undersell us, and the problem perpetuates itself.

Delano and Schuh, along with other agricultural leaders, appeared in May before the Joint Economic Committee of Congress to offer recommendations on what course farm policy should take in the "post-PIK era."

Secretary Block and others in the Reagan Administration view the Payment-In-Kind program as a bridge to lead farmers from government coffers to the market as their primary income source. Block, with support from the Office of Management and Budget, would like to start by lowering loan rates and freezing target prices in order to reduce direct payments in 1984. The USDA estimates that such a freeze would save $4 billion through the next two fiscal years.

Congress, however, holds the power on deciding the target price issue, which is legislated as part of the farm bill. Congress is still divided on the issue, and will be holding hearings this summer to decide whether price levels will indeed be frozen.

EVEN FARMERS POLES APART

One reason for Congress' hesitation in cutting price supports is due to pressure coming from farm groups that support current policy. Their analysis of the problem and solutions for it are poles apart from those who favor the "no government involvement" approach. In congressional testimony, these groups blamed the worldwide recession, international credit problems, foreign protectionist measures and the U.S. embargoes as the cause of high carryover stocks and low farm prices.

"Our analysis shows that nearly one-half of the problem has occurred because of a decline in exports," testified Wayne Boutwell, President of the National Council of Farmer Cooperatives. "You cannot blame the current surpluses on our existing farm program," he held.

Instead of freezing target prices or lowering loan rates, representatives of the National Farm Coalition and the National Farmers Union proposed an "aggressive" supply-management system that would offer "more price stability," or a safety net, to farmers. This would include a guaranteed minimum income per-bushel "in order to make planting decisions for markets which may not materialize," said Wayne Nelson of the National Farm Coalition.

In a recent survey conducted through AGRI-STAR, AgriData Resources' business

and marketing electronic information service, large-scale producers disagreed as to what role government should play in assuring adequate farm income. Although farmers with gross sales of $100,000 or more receive nearly half of the government's direct payments to farmers, many respondents expressed opposition to future government assistance. Yet others opted for increased or expanded PIK benefits, payments for farmers with highly erodable soil, or other entitlement programs.

FOUR POLICY OPTIONS

Washington will be faced with a major battle over these conflicting interests in the months to come. Federal policymakers have four possible paths to choose from:

1. Stay the course of current policies, using set-asides and currently legislated levels of increasing price supports and target prices. .

2. Use the stick approach to control supply by using mandatory production control programs.

3. Lower loan rates and target prices are below current levels, and phase out the Farmer-Owned Reserve.

4. Explore alternative ways for the government to support farm income, such as revenue insurance or greater use of tax credits.

If agricultural policy stays on the same course, the farm price support budget may well stay above $10 billion per year, a level that could fuel the taxpayer revolt. And, given a strong dollar abroad, price support levels above the world price would make our exports less competitive than ever.

Supply management advocates hold that mandatory controls would make supply more predictable, and thus prices less volatile. Given the basic philosophy of the current administration, however, this approach smacks of too much government control, and should be considered at best a last-resort option.

The administration, of course, is pushing hard for the third option, which it says is needed to bring an outdated agricultural policy into the 1980s. If the price support system is readjusted with a market-oriented bent, the loan may work as strictly a last-resort safety net, inches from the ground. Such a support program operates currently in soybeans, where, advocates say, the market and not the government has the most say in determining prices. The practice of growing crops especially for the loan rate would disappear.

Block's summit meeting—and next month's Farm Futures—will be exploring the fourth avenue of other ways the government might help support farm incomes.

GOVERNMENT "HELP" INEVITABLE?

Resistant farm groups may swing a big enough stick in Congress, however, to at least force a compromise, whereby current support levels may eventually be frozen rather than phased out altogether. Given the vast power of the farm lobby and the government's farm policy over the last 50 years, this possibility should not be counted out.

"I wish that there were some way the government could say out of agriculture," said one producer in response to the electronic survey. "However, with the past history of government in agriculture, that is not really possible."

Still, a fundamental change toward government involvement in farmers' income appears unavoidable. Regardless of how farmers themselves feel, enough clout is building in Washington to view the farm program as a brokendown vehicle in need of a permanent fix.

A BUMPER CROP OF SUBSIDIES

The statistics are boggling: government subsidies to farmers will explode to $21 billion this year. Even more amazing is that those subsidies will just about equal the total earnings of American farmers this year. There is clearly something terribly wrong down on the farm—and in Washington. So last week Agriculture Secretary John Block called together 75 leaders of agribusiness, labor and politics to discuss the mess. After two days of closed-door sessions, Block emerged to announce that everyone agreed the United States needed a new farm policy—but no one had any bright ideas how to stop the hemorrhage of federal money, improve the lot of farmers and start whittling down enormous surpluses of food products.

INDEFENSIBLE

The budget-busting agriculture subsidies are becoming a very sore point to the Reagan administration and a juicy political issue for Democrats. The subsidies totaled only $3.5 billion when Jimmy Carter left office (chart), and even Block calls the current outlays "indefensible." The Senate might vote as early as this week on a compromise farm bill that would allow the administration to freeze grain and cotton subsidies for the next two years. In a surprising about-face, even farmers support the bill, although they admit it's only a half step. "We're in a deep hole on agriculture and agriculture policy," says Washington agriculture consultant John Schnittker, a former Johnson administration official. "We're there half because of bad luck and about half because of incompetence on the part of the administration."

The administration admits that it never dreamed of a $21 billion farm-subsidy price tag. But it got into trouble by not believing its own rhetoric about controlling inflation. The four-year farm bill passed in 1981, which forecast spending only $3 billion a year on subsidies, was based on an assumption that farm prices would continue to rise. But farm prices didn't go up—because of soft export demand, higher yields and lower inflation—and the farmers asked the federal government to buy their crops at the artificially high prices. As a result, the federal government was committed to buy megatons of grain, cotton and dairy products for billions of dollars.

The administration created the Payment-in-Kind (PIK) program to help reduce the surpluses and curb overproduction. Under the program, farmers who agreed to take some of their land out of production were paid by the government out of surplus stocks. The administration says the program was a great success: 80 million acres were idled, stockpilers got some breathing room, prices rose a bit and farmers got some extra money in their pockets. Dick Bishop, a farmer in Iowa, agrees. He idled 280 of his 500 crop acres and now feels confident enough about his future to buy a $60,000 tractor and hoe. "I can make as much money in the PIK program as I could farming," he says.

Critics say PIK has been the administration's biggest agricultural disaster, a $12 billion boondoggle. Most farmers took only their poorest land out of production, so harvests have not dropped dramatically. Even supporters of PIK say the program would have to continue for at least another year to make a serious dent in the surpluses—and with such a high price, no one is betting on an extension.

POLITICS, POLITICS

In the short run, administration officials and farmers agree that the United States must reduce surpluses and raise prices by revitalizing exports. The compromise Senate bill includes $600 million for export promotion. But the American Farm Bureau Federation and almost every farmer interviewed by Newsweek also favor the freeze on "target price" subsidies and a 10 percent reduction in loan price-support levels for wheat, a position that most would have considered heresy a short time ago. They point out that the high-price guarantees have encouraged overproduction, which they fear will ultimately depress prices. And they have a political reason as well. "We feel that either we take the initiative to get our house in order or someone will come along and wipe out these programs altogether," says Ross Korves, a Farm Bureau Federation economist. A freeze would save only $3 billion to $4 billion, but agriculture officials say it is an important psychological step toward a more sensible farm policy.

A sensible new farm policy will be a difficult task, because it will have to be developed in the heat of Campaign '84. Last week, on the same day Block opened his summit, the Democratic National Committee announced the formation of an agricultural council to expose what it considers Reagan's "farm policy flimflam." Government involvement in agriculture has become so deep—and so expensive—that the pendulum may finally be swinging back toward a more open market. But for now the Democrats have one thing in common with the Republicans: no new ideas.

[From the New York Times, July 25, 1983]

WHAT P-I-K SPELLS

"Payment-in-Kind"; when it was first proposed last year, it sounded like a painless way to reduce farm subsidies and at the same time unload old surpluses. But the program has yielded only marginal economic benefits, and, as politics, PIK, as it is called, has proved to be an f-l-o-p.

Such failures are almost inevitable as long as we try to make farm programs all things for all people. Only when Government clearly defines its role as the stabilizer rather than supporter of farm income, and only when farmers are reconciled to living with free markets, are we likely to manage a successful farm policy.

Last year, farm policymakers seemed trapped. With agricultural prices badly depressed, farm interests were pressing for more Government help. But the traditional way of aiding farmers, crop supports, would have added billions to the deficit and millions of tons of food and fiber to the bulging national stockpile.

Enter the Agriculture Department's "payment-in-kind" scheme. Under PIK, farmers would be paid for reducing their crop acreage, thus eliminating surplus production. But instead of money, the payment would be in wheat, corn and cotton from Government stockpiles.

Consumers, too, would benefit because prices would not be affected: The grain and cotton release to the market would compensate for reduced production. the net gain to farmers would come from savings on fertilizer, seed, pesticide and labor.

Unfortunately, PIK worked better on the drawing board than on the back forty. Far

more acreage than anticipate has been idled, forcing the Government to foreclose on farmer-held surpluses for payment and raising the cost of the program. But because of good weather and superintensive cultivation, production will be greater than anticipated.

The results: farmers are anxious that surpluses dumped on the market will depress prices; budget-cutters worry that farm supports will cost at least $21 billion this year, and liberals are angry that some farmers will each receive more than a million dollars this year not to work their land.

A smaller PIK program might have quieted unrest in the farm belt without arousing opposition in Congress. But PIK could never have been more than a political solution to a political problem. No matter how carefully fine-tuned, this gimmick could not long reconcile the demands of farmers for larger incomes with the demand of taxpayers for smaller farm subsidies and the demands of consumers for lower food prices.

Must the farmer's gain be either the taxpayer's or consumer's loss? One could imagine an alternative: an agricultural policy with the goal of efficiency. Such a policy would use crop supports and acreage restrictions only to slow swings in prices.

Over the long run, farmers who couldn't make it in the free market would cease to be farmers. True subsidies would be paid only to poor farmers, and only in ways that would discourage small, inefficient farms.

Such a policy prescription grates in a society that still thinks of farming as a way of life rather than an industry. But it might grate less than spending $21 billion a year in a vain attempt to satisfy 6 percent of the population.

OUR UNAFFORDABLE FARM PROGRAMS

(By Fred H. Sanderson)

Once again, American taxpayers find themselves in the familiar position of paying farmers to restrict production so as to raise prices to consumers. Only this time the bill is a staggering $22 billion in fiscal year 1983 alone, up from less than $4 billion in the Carter years.

The steps taken so far to stem the mounting tide of surpluses have proved inadequate. Dairy products are being bought up by the government at the rate of $2.5 billion a year despite the freezing of support prices. This year's massive "payment in kind" program will reduce grain and cotton production by one-fourth, but there will be no lasting effect in redressing the balance between demand and supply.

All agree that U.S. farm policy is at a crossroads, but there is no agreement on the route to take. The more hard-nosed farm groups call for continued price supports buttressed by tighter production controls. But mandatory controls, which would avoid heavy budget costs, have been rejected time and again. Twenty years of experience with voluntary supply control have shown this approach to be ineffective or exorbitantly expensive or both. Furthermore, any kind of unilateral supply management by the United States makes it that much easier for our foreign competitors to undercut our prices and to steal our markets.

An alternative approach billed as "self-financing" of surplus disposal by the farmers-would introduce a dual price system that restricts supplies and raises prices to domestic consumers while surpluses are dumped abroad at whatever price they will bring. Experience with sugar in the European Community and tobacco in the United States has shown that this approach does not solve the problem of surplus production: it merely shifts the costs of surplus disposal from the budget to the domestic consumer. It continues to protect inefficient producers and to delay structural change. And it is no more compatible with GATT than are export subsides financed by the tax payer

Export subsidies, no matter how financed, are no solution because they will be matched by our competitors. And while a case can be made for subsidizing exports to poor countries and to developing countries in temporary financial difficulties, the principal beneficiaries of any generalized export subsidy contest will be the communist countries and already affluent countries in the Middle and Far East.

Since the United States has a competitive advantage in most farm products, its organizations accept this proposition in the abstract, but that has not prevented most commodity groups from seeking to preserve various forms of protection, subsidization and cartelization. It has taken a major explosion of farm support costs to put these vested interests on the defensive.

The Reagan administration, with the support of at least one major farm organization, favors the phasing out of those aspects of the existing commodity programs that support producers' returns above long-term market-clearing levels. This includes not only loan rates (price guarantees) but also the target prices that are the basis for deficiency payments as well as other incentives that are proving excessive in the less buoyant markets of the 1980s.

An opportunity for basic reform will present itself when the comprehensive farm legislation comes up for renewal in 1985. The new legislation should recognize that massive income transfers to the farm sector—which in any event benefit mainly the large farmers who need them least—are no longer justified.

We should retain only those elements of our farm programs that protect farmers against extreme short-term instability. This includes federal crop insurance and the Farmers' Home Administration as a lender of last resort. Loan rates should serve as a safety net, but at levels no higher than the variable costs of production. Because of the difficulty of getting agreement on relevant costs, it would probably be best to link the loan rates to a moving average of market prices.

The farmer-owned grain reserve should be managed to serve stabilization purposes only. It could be made more cost-effective than the present program, which gives farmers the benefit of any rise in prices while the government bears virtually all the storage and interest costs. To avoid being placed in the position of the residual supplier in periods of worldwide glut, the United States should resume negotiations to get its fellow exporters, including the European Community, to share with it the burden of market stabilization, by means of a coordinated reserve policy.

Legislation along these lines would serve the public interest and still provide adequately for the economic security of the American farmer.

Mr. DOLE. My final point is that we also have a dairy package which some of us would like to move ahead. Our dairy farmers are satisfied that we have a good compromise. It does not save as much money as some would like.

Mr. MELCHER. Will the Senator yield?

Mr. DOLE. Yes.

Mr. MELCHER. Would the Senator be willing to back this Senator, the Senator from Montana, in a motion to proceed immediately to the dairy bill before proceeding to the one we are on, Calendar No. 261, S. 1529, and set debate on this motion aside until after we have passed the dairy bill?

Mr. DOLE. That is certainly an option.

Mr. MELCHER. If the Senator will join with me, I will meet with the majority leader and make that suggestion as soon as he can return to the floor. I think we ought to move the dairy bill. It is a separate bill. It has been setting on that calendar ahead of this one. It is ready to roll. Let us move it. I do not think we would have to worry about getting its passage in between now and 4:30. Let us move the dairy bill.

Mr. DOLE. I think that is an option we might consider. Why does not the Senator from Montana join with us and put the package together? Why should we wait?

Mr. MELCHER. I will respond to the Senator from Kansas by saying that I am consistent with what the Senate Agriculture Committee did, and what the Senator from Kansas and the distinguished chairman of the Senate Agriculture Committee did. We all agreed that we would put the dairy bill out pronto. Let us get it out on the Senate floor. Let us get it passed. Now we are taking up this bill on target prices, which came out of committee by an 8-to-7 vote. We knew it would be controversial. We knew it had to be debated extensively. We are taking it up before we take up the dairy bill. I am willing to set this bill aside, not the bill but the motion to proceed to consider the bill, and move directly on to the dairy bill. I do not think the dairy bill has any enemies here. We can pass it this afternoon.

Mr. DOLE. Would we have to amend the dairy bill?

Mr. MELCHER. We would not amend the dairy bill, as the Senator knows, without continuing this discussion. I am not trying to put the two together. If Secretary Block likes the dairy bill, and I think he does, a little bit——

Mr. DOLE. Not much.

Mr. MELCHER [continuing]. We will pass it. We will have the administration backing us on something.

If they want to tangle it up with reopening up the farm bill of 1981, all they have to do is proceed as we are going. If we are going to go into this bill, the one we are on right now on target prices, we are going to reopen the 1981 Farm Act and we are going to talk about a lot of things that could be improved in that act that would be helpful. But it is silly for us to stand

on the Senate floor and say we are going to do all that this week. If we are going to send it over to the House and they are going to act on it it seems unlikely we are going to lay a bill on the President's desk within a matter of days after both the House and the Senate have recessed. We know that is not going to happen.

Mr. DOLE. Mr. President, I think the important thing is that we know where the responsibility is if the target price freeze does not happen. The Secretary has announced at least to the wheat farmers what the program is going to be if we freeze target prices and what it is going to be if we do not freeze target prices. The Senator from Montana is saying that we are not going to finish the bill this week. I assume he is therefore accepting responsibility for choosing the second acreage reduction and PIK option by saying we are going to have a target price freeze.

Maybe that is the best deal for the American wheat producer. It is a close call in some areas.

Mr. MELCHER. If the Senator will yield again, we are talking about pretty heavy stuff. Reference was made to PIK. The record shows the Secretary of Agriculture trotted up here in the latter days of December and said he wanted a PIK program, he wanted us to pass a bill that they had pieced together over the last several days between Thanksgiving and the middle of December, and they wanted it passed right now. I said, "Well, you are running a chance, Mr. Secretary, of telling us to buy a PIK in a poke. Why not open the poke so we can see what is in there and let the farmers of this country look at it? If it is so good, we will pass it in January."

I remind the Senator that, during the course of that discussion with the Secretary of Agriculture in December, the question was raised in a pertinent way on whether the $50,000 payment limitation would apply to PIK commodity payments. At that time, the Secretary thought it probably would; it might need a portion in the PIK bill to absolve the $50,000 payment limitations from PIK payments.

When the Secretary chose, in January, to implement the PIK program, he did so on the basis that the $50,000 payment limitation in law would not apply to the PIK payments. We asked him what the Solicitor's opinion on that was and the rationale that advised him of that. We were told we would get that. We have not gotten it yet. We have not gotten the Solicitor's opinion on why the $50,000 payment limitation would not apply to PIK payments.

Mr. DOLE. As I understand it, the Senator from Montana has written the Attorney General on that.

Mr. MELCHER. I have written the Attorney General and I would like an answer. I do not know why we have all these solicitors, all these lawyers working in the Department of Justice and every department we have and we cannot get their legal argument on interpreting the law. If they have violated the law or if they have placed those PIK payments in jeopardy, who is going to be hurt? Is it the United States that is going to be hurt or is it the producers that receive those PIK payments? We are entitled to know that.

We cannot get the answers out of the Department after months and they come up here and ask us to pass a bill, which is, after all, a major part of that 1981 Farm Act, affecting corn and wheat, upland cotton and rice producers; they come in, in the waning days prior to a recess and say, "Well, if you pass it here, we have it iced in the House, we have it greased over in the House." I can hardly believe that.

I would like to address the issues of American agricultural policy and have them debated here and in the House and come up with the best solutions we can. I believe the Senator from Kansas, and I know the chairman of the Committee on Agriculture, who is present on the floor, and other members of the Senate Agriculture Committee feel the same way I do about doing that. It is a question now of whether we should be stampeded into a major a revision of that 1981 Farm Act without some other matters being considered. I do not believe that is possible just on short notice, with this short time. I doubt if it is possible for the House to act on something on that short notice.

I am willing to debate all of this in September. I think we can take the time and should take the time. American agricultural policy is very fundamental to what the rest of this country is doing. Frankly, if they want somebody to blame on not doing it in a slap-dash, haphazard way, blame me. I take pride in that kind of blame. I want to do it very deliberately and I want to do it with thorough consideration by the principals that are involved, that is, with agricultural producers and see whether or not we can have a stronger policy for agriculture.

I thank the Senator for yielding and being disrupted from this thoughts.

Mr. DOLE. Mr. President, I appreciate the Senator's remarks and he is right. Last year, when the PIK program came up, the Senator from Montana—for reasons that are certainly well known to him and probably sound as far as he is concerned—prevented the Senate from legislating on PIK. The Secretary then took it upon himself to announce the PIK program on his own authority. Some of the provisions are being questioned and no one quarrels with that. Now here we are, 8 months later, trying to bring a little sanity into the costs of farm programs. The Senator from Montana, who certainly has every right, says we are not going to do that; that we are not going to do anything.

Up until recently, there was a lot of talk that if we could just get the Secretary to announce both programs, option A and option B, then we could move the bill in the Senate because we would know what the production program would be. The Secretary hesitated in doing that because he was afraid it would look as if he was trying to intimidate the farmers by saying, if you do this, you get A; if you do this, you get B. Now he had made that announcement. I think we have to make a choice.

The Secretary is required by law to announce the wheat program by August 15. It seems to me that, since everything is out in the open now, we should proceed to choose. Farmers certainly have a right to make their own choices.

Farmers are never all going to agree on one farm program. Some want high loan rates, some want quotas, some want referenda, others do not like the Government involved at all, some do not like target prices. It is pretty hard to get agreement on farm legislation.

This seems like a pretty good bill to this Senator. When we got to conference on the 1981 farm bill and tried to figure out the target price levels, there was not a single Senator in either party who thought the inflation rate was going to come down as rapidly as it did. So we put the target price levels up because of the inflation rate. I frankly believe the target prices were set too high. Inflation rates are down, interest rates are down. Why not make an adjustment in the law to reflect current conditions?

The conditions are not as they were in 1981. If, as a result, the program is too generous, and we have a chance to save $3.6 billion without doing violence to the farmers of this country, then it ought to be done.

Some equate helping farmers with how much money you can spend. Target prices, loan rates, diversion payments—there is a lot of money in the farm program and some of it is justified. We must restore and maintain a sound farm economy. But I do not believe that Government can or should become obligated to the point of saying that farmers—or any other businessmen—are not allowed to fail.

I understand there are 15 to 20 amendments pending in the event that a bill comes up—whether it is the dairy bill, the target price freeze, or whatever it might be. It may be that we are not able to accomplish anything this week at all. But the farmers should know that there was an effort to accomplish something. Farm legislation has now been on the Senate floor for a week and nothing has been

accomplished. Maybe we cannot accomplish anything today or tomorrow or Wednesday or Thursday. Certainly, we can do nothing after the House and the Senate recess until sometime in September. That would disadvantage many in the farm community—particularly winter wheat producers.

The dairy industry would like us to move on their legislation. At this point, however, it is hard to say if we will make any progress. We took care of those programs which had to be taken care of first and there is no leverage left to correct the one program where we are trying to reduce the cost of the program a little bit.

I must say that with the announcement of the production restraints in the 1984 program, the wheat target price level, whether it is $4.30 or $4.45, is not all that important.

I was discussing the target price concept earlier today with one of my colleagues who does not have much agriculture in his State. He was a little nonplussed to think that we may be paying wheat farmers 65 cents a bushel in a deficiency payment because of the target price. Some would say, "Well, if the PIK program had worked as expected, we wouldn't have to make deficiency payments."

The problem is that we have had very good weather in wheat areas. We had some of the highest yields in history in the State of Kansas. Notwithstanding the PIK acreage that has been taken out of production in our State, we produced nearly the same amount of wheat this year as we did a year ago.

The PIK program has not had the same impact on wheat prices that it has had on corn prices. Farmers in corn areas are not so concerned about the target price freeze because their market price has gone up. It is the hope of those of us from wheat States that with the long-term Soviet grain agreement and, hopefully, renewed purchases by the People's Republic of China, we may see a big move in the market price for wheat and other grains.

But even if that should happen, we have a responsibility for farm programs. We have in effect a nonpartisan approach in our committee. It has been that way as long as this Senator has served on the committee. Whether it was Senator Talmadge or Senator HELMS, we have generally tried to operate on a consensus basis, not according to whether we are Republicans or Democrats or whether we represent wheat or rice or cotton or peanuts.

It would seem to me, as one Senator from a wheat State and an area that might be affected, that we ought to be willing to support the administration. We should take into account the number of other administration initiatives which will help to offset a freeze on target prices by strengthening market prices through exports, and not through larger Government payments.

Mr. President, I ask unanimous consent that information be printed in the RECORD that reviews the importance of the PIK program, PIK costs by commodity, and the distribution of PIK commodities by States.

Just to cite my own State, for example—and these are preliminary figures—PIK commodities to be distributed in 1983 amount to about $385 million. The largest State was Iowa with $988 million, followed by Illinois with $838 million, and Texas with $831 million. The document also contains other information that I think might be helpful to some who are reading the RECORD or who are involved in the debate.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DOLE HAILS NEW U.S.-SOVIET GRAIN ACCORD

WASHINGTON.—Senator Bob Dole (R-Kan.) today hailed the conclusion of a new long-term grain agreement with the Soviet Union as "the end of a long quest to restore the unquestioned reliability of the United States as a supplier of agricultural exports to the world market."

"The appreciable increase from six to nine million tons of wheat and corn in guranteed annual sales reflects recognition by the Soviet Union that the U.S. is and will remain a principal source for meeting its agricultural import needs," said Dole, who has played a key role in reestablishing a grain trade dialogue between the two superpowers.

The new five-year agreement was announced by Deputy Trade Representative Bob Lighthizer, the chief of the U.S. delegation, following three days of negotiations in Vienna, Austria. Both sides agreed to raise the minimum for Soviet annual grain purchases from 6 to 9 million tons, and the maximum from 8 to 12 million tons. The Soviets will have the option to substitute 500,000 tons of soybean or soybean meal purchases for one million tons of grain required under the minimum. Purchases are to be roughly divided equally between wheat and corn. Additional sales beyond the 12 million ton maximum would require consultation by both sides, as under the existing agreement negotiated in 1975. The new agreement will take effect upon expiration of the 1975 accord on October 1, 1983.

"I want to congratulate Secretary Block, Ambassador Brock, and their deputies in Vienna, Bob Lighthizer and Undersecretary Dan Amstutz, on the successful conclusion of these negotiations," Dole continued. "U.S. farmers could have received no better news than the announcement of a new and improved grain agreement with the Russians."

"Some of us have worked long and hard for over three years to reverse the negative trend in U.S.-Soviet trade relations since the 1980 grain embargo," Dole stated. "I am glad to have played a part in getting both sides together. In my three meetings with Soviet Ambassador Dobrynin and during my visit to Moscow last November, I became convinced that the Soviets were prepared to be a reliable customer if we were ready to return to our role as a reliable supplier," Dole added. "It it clear that both sides have kept this commitment and followed their own economic best interests in reaching this important accord."

LTA ANNOUNCEMENT DENOTES END OF CARTER EMBARGO, SAYS DOLE

WASHINGTON.—Kansas Senator Bob Dole said today that yesterday's announced long-term grain agreement (LTA) with the Soviet Union represents "the end of a long nightmare of government interference in grain exports started by President Jimmy Carter's embargo of 1980."

"There are those, including some of my friends in Kansas, who found ways to justify the Carter embargo on foreign policy or national security grounds," said Dole. "But President Reagan has kept his word to the American farmer—he ended the grain embargo and he has finally closed the Pandora's box of government intervention and threats of intervention in agricultural trade which Jimmy Carter opened three years ago."

"Those of us who have consistently supported renewed grain trade with Russia have done our best during the past three years to rebuild the tattered reputation of the United States as a reliable supplier," said Dole, the ranking Republican on the Senate Agriculture Committee.

"The Carter embargo was a devastating blow to our farmers," said Dole. "But we can now see light at the end of the tunnel."

DOLE COMMENDS LONG-TERM AGREEMENT NEGOTIATORS—"DISASTROUS CARTER EMBARGO IS OVER"

WASHINGTON.—Following a special briefing today, Kansas Senator Bob Dole joined other members of the Senate Agriculture Committee in commending the U.S. negotiators who concluded talks last week on a new five-year grain agreement with the Soviet Union.

"Obtaining a 50 percent increase in guaranteed Russian purchases of U.S. wheat and corn was a significant accomplishment—particularly when both countries have big crops this year," said Dole.

Senator Dole's comments followed a Senate Agriculture Committee briefing by Deputy U.S. Trade Representative Bob Lighthizer and Under Secretary Daniel Amstutz, to top U.S. Department of Agriculture (USDA) official on the negotiating team, on the details on last week's three-day session in Vienna, Austria.

The new agreement, which takes effect October 1, raises minimum annual Soviet purchases from 6 to 9 million tons and allows the maximum level of exports without prior consultation to increase from 8 to 12 million tons. The guaranteed sale of wheat and corn were negotiated up from 3 to 4 million tons each, with Soviet discretion to substitute 500,000 tons of soybeans or soybean meal for the balance of 1 million tons.

"With this agreement, farmers can look forward to another avenue for selling their produce, something they haven't had for a few years. We are all glad the disastrous Carter grain embargo is now over—President Reagan should be commended for fulfilling his promise to end the embargo and to repair the tarnished image of the United States as a reliable trading partner," Dole added. "The American farmer is still picking up the pieces of Jimmy Carter's mistaken policy but at least now there is the stability—and the hope—this new LTA brings."

IMPORTANCE OF PIK

PIK is an Administration initiative that is pumping *$8.7 billion* into the farm economy on top of regular programs. Its impact in reducing stocks of corn, cotton and rice has been essential to current improved prices. In the absence of PIK, scheduled target price increases would be insignificant in supporting farm income.

PIK COST BY COMMODITY

If only a wheat PIK is implemented in 1984, the total cost will be close to $10 billion. The book value of PIK commodities in 1983 is $8.7 billion, divided as follows:

	Millions
Corn and sorghum	$5,300
Wheat	2,050
Cotton	1,000
Rice	350

PIK DISTRIBUTION BY STATE

Comparison of the value of 1983 PIK commodities with total ASCS payments in 1982 (the previous year):

[In millions of dollars]

	1983 PIK value	1982 ASCS payments
State:		
Iowa	988	216
Illinois	838	118
Texas	831	640
Nebraska	601	276
Minnesota	554	102
Indiana	419	58
Kansas	385	279
California	371	135
North Dakota	329	200
Oklahoma	286	127
Arkansas	211	119
Mississippi	190	104
Montana	121	116
North Carolina	116	16
Kentucky	108	13
Total (all States)	8,747	3,749

INCREASES IN REGULAR PROGRAM COSTS

Following are increases in CCC outlays by Fiscal Year:

[In billions of dollars]

	1980	1981	1982	1983 [1]
Nonrecoverable outlays:				
Deficiency payments	0.1	.....	1.2	2.6
Diversion payments	.1	.....	.....	1.3
Disaster payments	.3	1.0	.3	.1
Storage payments	.3	.....	.7	1.0
Total	.7	1.1	2.2	5.0
Recoverable loans (commodity and storage facility):				
Loans made	4.2	5.8	11.5	13.6
Loans repaid	6.0	5.7	4.6	4.7
Total (net)	(1.8)	.1	6.8	8.9
Dairy program	1.0	1.9	2.2	2.1
All other	2.9	.9	.4	5.1
Total CCC outlays	2.7	4.0	11.6	21.1

[1] Estimate.

Mr. DOLE. Mr. President, I certainly have no criticism of the Senator from Montana; he is within his right as is any other Member of the Senate to have a totally different view on what we should do in agriculture. We are seeking only to make one modest change. Only yesterday, we were advised that interest rates are starting to inch back up, primarily because Congress is not willing to face up to reducing spending. Here is an opportunity to reduce spending by about $3.6 billion over the next 3 years. I believe that the announcement of the long-term Soviet grain agreement, the resolution of the textile dispute, and some other administration initiatives will offset most of the impact which the target price freeze might have. But primarily, it would be an indication that Congress has the will to cut spending. If Federal spending is too high in any program, whether it is in defense or in agriculture, we ought to take a look at it. We ought to restrain the growth of spending. It is pretty hard to argue that we are not spending a great deal of money in farm programs. It can even be argued that the cost of farm programs under conservative Ronald Reagan have more than quadrupled since President Carter left office.

We can argue all we want that higher costs do not reflect renewed prosperity on the farm. PIK and other programs probably have done a great deal for the American farmer. They may have been necessary. But if we are not willing to put our foot on the brake when agriculture programs are out of hand, then it is pretty hard for us to say with a straight face that we ought to reduce some other program that does not benefit our State.

It is the opinion of this Senator that there is still enough of a willingness on the part of Democrats and Republicans in the farm area to reach a compromise. I would hope we could do it late today or tomorrow morning so that the House could have a chance to work its will and maybe have a conference report before the Congress adjourns for the August recess sometime later this week.

I thank the distinguished Senator from Montana for yielding me time without losing his right to the floor.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MELCHER. I thank the distinguished Senator from Kansas for his remarks. I think it throws a lot of light on the subject matter we are discussing. He has been a veteran of the Agriculture Committees in the House and the Senate for a rather important and critical time over the past 20 years.

I surely would love to save some money for the taxpayers in the cost of the farm program, and since the PIK program is a major part of the costs for the farm program now we ought to look at it. I said in December, when the Secretary of Agriculture pressured immediate passage of a bill, in outlining the PIK program I said that maybe he had a PIK in the poke and why did he want to rush it so fast. In just cost, it is very clear that PIK is the most costly of all farm programs any Secretary ever envisioned.

When he refused to act in this Senate in December, it is fair to say, on behalf of the Secretary, that he was very dubious, if he waited until January when the House and Senate came back into session, whether Congress would very quickly get a piece of legislation enacted into law dealing directly with PIK. So he used his own authority under existing statutes. Over the course of 30 years Congress has given to the Secretary of Agriculture very broad authority. So he used his own authority to put PIK in motion.

The Secretary sent out regulations in the Federal Register, and, having those in there for the sufficient comment period, he immediately, even prior to the end of the comment period, began to institute a PIK program through the county ASCS offices throughout the country. If costs were the only criteria, it has been a raging failure. But costs are not the only criteria on farm programs. It is a question really of whether or not it is espousing agriculture policy that in the long run enhances the U.S. position.

Without having read them all, I well understand the editorials the Senator from Kansas has described which are critical of agricultural problems right now. They are wondering whether we are not paying a lot of money out of the Treasury that is not accomplishing very much. I have to say that I agree that PIK is not accomplishing a great deal.

The Secretary of Agriculture met with us the other evening at 6 o'clock, right over there, off this Senate floor, in the Vice President's room, and outlined what he called plan A and plan B—they are like Tweedledee and Tweedledum—for a wheat program: Plan A if we pass the bill freezing target prices, or plan B if we do not pass the bill freezing target prices. There is not much difference in the cost of either.

The Secretary was very candid and frank. He said, "I'm not suggesting that there is much difference in the cost of either one." It is inconsequential, and he could not say for sure which one cost more and which one cost less.

As to PIK, he said that under plan A for the wheat farmer, they could put from 10 to 25 percent of their acreage into PIK; under plan B, from 10 to 20 percent into PIK. It is a difference of 5 percent—and neither one for sure. So there is not much difference between those two proposals.

The real question is, What about the cost? Concern is expressed by the Senator from Kansas that we might witness attack on all farm programs which the public finds to be so much in disarray and in such ill-repute that none would be available for American agriculture. Is that truly a valid concern? I would say that, yes, it is a con-

cern, and I share that concern. But I think we had better start back on what is the real concern, as being enunciated by those editorials to which he is referring.

They are referring to costs for farm programs that do not produce much of anything, neither farm income for the producers—that is, for more than 1 year—nor do they seem to lead this country in the right direction for sound agricultural policy.

There is a great deal of concern on my part that we are jeopardizing just that. PIK was highly successful in one aspect. It put a lot of money into the pockets of agricultural producers of those commodities it covers—wheat, corn, upland cotton, and rice. It put a lot of money into their pockets immediately, and they certainly could use it.

However, in doing so without the payment limitations applying, we are reaping a harvest of bad comment, that in the public's judgment, serious questions on whether it is sound agricultural policy to be sending commodities, payment-in-kind, worth a quarter of a million dollars, a half-million dollars, a million dollars, or more, to individual farm operators. That is No. 1.

That does create a very unfavorable attitude on the part of many in the public who resent it and believe it is an unwarranted handout. Many of the public ponder that if large PIK payments are not a handout, why was it not held to a limitation so that the PIK payments could help a great number of family farms—that is, small operators, farms and ranches operated by families—rather than one big operation to the tune of a million dollars?

Let me rephrase that. The public has a great deal of concern over what they view as an overpayment to some large operations many of which are owned by corporations or conglomerates. They wonder why the American agricultural policy, as set in Congress, does not go directly at the problem of helping family farmers. If so, how many more family farmers could PIK payments help if the Department of Agriculture would limit the payments, rather than huge payments going to some farms that are owned by big outfits or corporations or conglomerates, where the payments to one operation of this type may be a quarter-of-a-million dollars, a half-million dollars, a million dollars, or more, for PIK?

It behooves all of us not just to criticize. We are given the privilege of being on the Senate floor, representing our States, with the idea that we will act constructively and, if possible, in a very positive way for sound agricultural policy.

First of all, the cost: PIK will cost $12 billion for the current year. The Secretary of Agriculture speaks about a group of costs for farm programs that totals $21 billion. He says that does not include PIK. That $12 billion for PIK will be in addition to the $21 billion.

You have to look at what the Secretary is saying, then, to determine whether you agree with the types of expenditures that add up to $21 billion.

Of that amount the Secretary describes the first item is $5 billion for payments farmers receive, and that includes so-called target prices, which translate into what is called deficiency payments, which is the makeup of the market price and the actual sale price of the commodities covering a portion of the crop—not all the crop, but a portion of it.

This $5 billion in direct payments also calls for diversion payments and additional payments and for producer storage payments. This covers the first $5 billion.

The next item, which is the largest item of this $21 billion, is $8.9 billion—for all practical purposes, I will round it off and say it is $9 billion—of net lending. That money is not lost, but is recovered. That money is repaid. These are loans that are guaranteed by the Commodity Credit Corporation—that is the Government—on commodities on which the producer wishes to get a loan, rather than sell the commodity during the time of low price. Those loans are repaid. As short a time ago as 1980, the CCC—that is, the Government—actually made a profit from the small fee it charges for guaranteeing those loans. But that item of $9 billion to guarantee those loans which are repaid in less than a year is a big item of the $21 billion.

Another item of the $21 billion is $2.1 billion for dairy—that is, for the dairy surplus, buying up the milk and converting it into powdered milk, cheese, or butter, which goes into Federal storage. That is what that program is costing.

Then they list all others of the $21 billion as $5.1 billion. Well, "all others" covers a whole variety of things. A lot of it is credit. A lot of it is payments on storage. A lot of it deals with other aspects of the broad array of agricultural products this country producers, and which from time to time over the past 30 years have been reviewed in Congress; and we have resoundingly said that we are going to keep those programs because they work or because they enhance the availability of supplies for consumers and are in the public interest.

What is unanswered right now is simply this: Has PIK cost us too much money? And the answer to that is yes, it has. Has the PIK program produced much as sound agricultural policy for this country? The answer to that is no, it has produced very little.

The third natural question is can we use PIK in such a way that it will enhance as a national policy American agriculture over the course of time? And the answer to that is, "Probably yes" but with some constraints and with some innovative ideas on how PIK is handled and used by the Department of Agriculture.

Let me give you a couple examples of that. Right from the outset probably all of us on the Agriculture Committee, said, "Well, could we not use PIK payments, payment in kind, for conservation work?" And the answer to that is yes, but we have not done it yet.

I dare say that over the course of time, that is probably one of the best opportunities this country has in order to catch up on lapsed but very vitally needed conservation work on American farms and ranches.

The second example of how we could better use PIK, is could not PIK be used, with a surplus commodity, to enhance or subsidize the sale of a surplus agricultural product from this country to a foreign country?

The answer to that is, "Absolutely yes." PIK for this purpose has only been used once, to my knowledge, so far, and that was with the Egyptian wheat sale where bonus amounts of wheat were actually given from Federal warehouses by the Credit Commodity Corporation, to the millers who milled the wheat and sold the flour to Egypt to subsidize the sale in order to match subsidized sales of flour from European countries.

So there are ways of using PIK that are very advantageous as long-term policy for this country.

The type of policy that we need for agriculture in the United States I think is really very easily understood.

First of all, we should do what comes natural here in the United States. What comes natural here in the United States is what we have done all throughout the life of this Republic.

Jefferson often spoke of it, prior to the time we had the Government in place and prior to the time he was President of the United States. He spoke of it prior to that time, he spoke of it during his administration, and he spoke of it afterward.

That is the capability of the United States to grow an abundance of agricultural products which would be more than the need for domestic consumption and would be the bulwark of our capability for foreign trade.

To do what comes natural means that we grow the food products and if we have an abundance of supply for American consumers, after all the necessary food here, then after that we sell the surplus commodities abroad.

We have added another concept during our lifetime. That is of sharing the abundance of food here in America over and above what was needed for domestic consumption, over and above what was actually sold abroad

to other countries. We have added the concept of "food for peace." The concept that even preceded that was enunciated by Herbert Hoover shortly after World War I. Hoover proposed sending food products to the starving people wherever they may be in the world and he administered the program.

Herbert Hoover's concept of using food products to help people abroad was accepted, developed, and used. Food for Peace came on later, a little more specific in certain areas, but it did not disturb the concept that Herbert Hoover developed shortly after World War I, and it still fits today. It fits this year and it will fit next year, and I dare say it will fit throughout all of our lifetime, the lifetimes of our children and grandchildren. When people are hungry and we have an abundance we supply them with some food. If they can pay for it in a currency that is not worth very much we accept that and then on occasion, sometimes where the starving have no money we still supply the food. That is good, sound agricultural policy.

There is a basic flaw in PIK when it is used as broadly as it has been used this year, and that flaw is this:

It attempts to curtail production too much. There are none of us who are going to argue that we should spend $12 billion to get a 200-million-bushelless wheat crop than we would have had otherwise. There are none of us who are going to argue that a reduction of 200 million bushels of wheat, that cuts down only slightly on supply, out of a crop of 2.6 billion bushels, that even if you get a reduction in corn and feedgrains, in order to bring down these surpluses a little bit, we want to spend as much money as we spent to get that very slight reduction in surplus grain supplies.

Returning to what the Secretary of Agriculture was telling us on Friday last over there in the Vice President's room, I asked the Secretary if the stronger corn price was principally due to the use of PIK for the reduction of corn production in the Cornbelt. The Secretary as usual was very candid and very frank and he said:

> No, I would not describe it that way. I think that the use of PIK did curtail some planting of corn and that that had some bearing on improving the price of corn, strengthening the price of corn, but that the main reason that the price of corn is higher now is because of the threat of drought, of diminished supply in most of Illinois, eastern Iowa and other parts of the Cornbelt.

So I do not think in the longrun PIK as it was used this year would be a very sound policy because we do not get very much out of it for what we pay.

But that kind of large expenditure, $12 billion is not what PIK is proposed for next year. We all understood, I believe, that PIK as it was used this year was just a one-shot deal for that amount of money. PIK can be a lot more successful than it has been if it is used in a more limited way and I would hope it would be more successful if we used PIK as a means of enhancing conservation and enhancing foreign sales of American agricultural products.

We are not kidding anyone or at least I am not kidding anyone. The big cost of the farm programs that is being talked about, whether it is in the Department of Agriculture or here in Congress or the public at large, is principally, this year, due to the huge amounts of PIK payments.

(Mr. COCHRAN assumed the chair.)

Mr. MELCHER. It has to be modified.

If we are going to freeze target prices, as is recommended by the administration, it is true that those people who are involved, whether it is wheat, corn, or Upland cotton or rice, want to know what their crop program is going to be for the next year's crop. For wheat the Secretary has well laid that out in two options. There is option A if we freeze target prices or option B if we do not freeze target prices.

For wheat producers I dare say it really is not going to make much difference, but if I accurately assess what I view to be the consensus of opinion of the wheat producers in my State, most of them are going to feel that we had better hold off and see what else happens during the next coming weeks, and perhaps even after that, and not freeze target prices.

I mentioned that corn prices are much better. Actually if corn prices would hold where they are right now, there would not be any deficiency payments. In that case the target price for corn would not be of much consequence to corn producers because the target price which triggers a deficiency payment occurs only in those instances where the producers receive less for corn they sell than what the target price is. So if this corn price holds up anywhere near to where it is at right now, a deficiency payment or target price has no bearing on the next coming corn crop.

Wheat is a different situation. Wheat is now selling at about $1 bushel lower than what the target price is for this current crop year. It is too early to ascertain yet whether the announcement of the long-term agreement with the Soviet Union on their purchases of wheat and corn and soybeans over the next several years will stimulate and strengthen the wheat market. But it is absolutely true that wheat producers are in a pretty tight financial situation. That is true.

Imagine producing your major crop on your farm where, even if you have a very good yield, you are still faced with a market where you sell it at at least a dollar below what it is costing you to produce each of those bushels. So if you are an operator who has 10,000 bushels of production you can just write it down if the market does not improve you would have a net loss of that wheat production of at least $10,000. That is not even breaking even on these farms. Naturally these farmers are trying to do more than just break even, so that they can pay bills and send their children to college or help them go to college, whatever their expenses are, to take care of them. That is what they are trying to do and if you were in their shoes you would be doing the same as they are attempting to do.

I think wheat producers are very, very cautious this time in sending word to their Senators saying, "Whatever you do, I want you to be careful in any action to lower that safety net you have got in the law." That is what we call these target prices, safety nets. They are not going to tell us to lower target prices when they are really concerned about whether or not they are going to have a market situation next year on next year's crop that begins to put them in the black again, so instead of knowing they are having to pencil out how much further they are going into debt they can actually pencil out how much they are coming out of debt and how much their operation actually netted in the block. That is what they are hoping for next year—that their operation is going to be such that they not only will produce a crop but will have a market that will allow them to get a price for their wheat that actually shows they are not losing ground but gaining ground on their debts.

Much is always said about farmers that they do not want a handout. You can write that down and carve that out in granite, "They do not want a handout." They do not want to get their livelihood out of the U.S. Treasury. They want to get it out of the marketplace. They want to be producing for the market and getting their pay that way. A lot of farmers are not very happy about the fact that they have to rely on a target price to trigger a deficiency payment in order to hold their operation together. They resent it. I personally do not advocate that as good, long-term policy. I advocate that the marketplace be such that we know that is going to be sufficient that given a usual crop the farmers are going to get their cost of production out of the market by marketing and selling their commodities in the marketplace plus a profit without the need of Government program payments. That is what they really want.

For American agriculture, it is the only long-term sound policy. But we seem to have an extreme difficulty in getting there.

Of late, when we talk about wheat in particular, farm producers look at it this way, and there is a lot of merit and truth to the way they see it: First of all, going back to the Carter embargo, they feel that was wrong, and I agree, it was wrong. It did not work out, and the producers of wheat really lost a lot in market sales and therefore lower prices. The same can be said of corn producers, too, and also soybean producers.

Second, the way the wheat producers look at it President Reagan was a little bit slow in ending the Russian wheat embargo.

Third, although they did not anticipate it, that is farmers did not anticipate it, they now view the action of the President in blocking a sale of the parts of the pipeline for natural gas being built from the Soviet Union to Europe as further compounding their problems in selling to the Soviet Union and the Iron Curtain countries that the Soviet Union frequently buys for. They view, that embargo on the parts for that pipeline as, interfering with the opportunity to create the circumstances where the Soviet Union and Iron Curtain countries would be better buyers for American grains and I think they are correct on that also.

Fourth, wheat producers, as I know them, at least in Montana, view PIK for wheat producers as being somewhat of a bailout, combination bailout for them, so those who participated in the program could have additional income but really view it as such a short-term policy as to ignore the more critical long-term policy of how we are going to develop more foreign sales of American grain.

I can add another point along the same line: Wheat producers in Montana, and I suspect throughout the country, have been greatly alarmed by the argument that developed over the sale of Chinese textiles to this country which we are told amounted to about $22 million, which was blocked, and caused China to retaliate by ceasing to buy American grain. Now to the credit of the administration it is my understanding that the discussions in Geneva have resolved that difficulty and that we may be able to look forward, as the Senator from Kansas has earlier mentioned on the Senate floor this afternoon, to a renewal of great interest on the part of mainland China in buying American grain.

So what wheat producers would like is emphasis on developing these foreign sales, and that certainly points in the right direction, as far as I am concerned.

If the administration would spend a little more time on these problems of advancing American sales of agricultural products abroad, I feel, and I would guess that America agricultural producers feel, that we would be a lot better off.

Now, on our balance of payments, agricultural commodities account for over one-third of our foreign sales. And if you want to just look at the tail end of it, that means if it were not for American agricultural products being sold from this country, our balance of payments would be almost twice as bad as they are right now. We have a negative balance of payments.

There are two things to remember about that. These American agricultural products of wheat, corn, and soybeans are being sold for rather low prices. In the case of wheat, it is substantially below the cost of production. And so if the market were strengthened then the foreign sales abroad, when you figure how much wheat was sold, because you always figure it in dollars would be much greater with the same volume. That is item No. 1.

Item No. 2 is that we have a strong dollar. So, in relationship to how much foreign currency or foreign money will buy from us, we are in a weaker position. And that is part of enhancing these sales abroad of American grain, and part of what the administration should be doing, getting some adjustments in the relative value of the yen, speaking of Japan, as compared to the American dollar, and looking at the relative values of other countries' money, their currency, in relationship to the dollar; and getting some modification in that relationship so that our sales from the United States would be more attractive in terms of Japanese yen, West Germany's deutsche marks, or the currency of the Italians, or the Egyptians, or any of the rest of the countries that we trade with and hence sell American agricultural products to them.

Now, at this time, is it any wonder that farmers, who are, after all, in a position of not really doing very well economically, are saying to us:

All right, those of us who have participated in PIK this year, we really got sort of a windfall. But what about next year? We still have to be in business. You better be careful about what you do about changing any of the rules, changing the law, as it affects the agricultural policy and agricultural program for wheat, corn, upland cotton, and rice next year and the year after.

So, I really do not think what we are doing here on this Senate floor in saying let us not proceed to this bill is much of a mystery. As far as the dairy part of it is concerned, the dairy bill, which is on the calendar—it is the calendar number before this bill—anytime the majority leader would like to go to that dairy bill he just has to ask this Senator, and I suspect all of us who are debating this particular target price freeze question, to ask whether we will not yield and gladly support him in bringing up the dairy bill and promptly passing it. I would not hesitate to predict that there would not be any opposition to that at all.

Mr. HEFLIN. Will the Senator yield?

Mr. MELCHER. Yes, I am delighted to yield to my friend from Alabama.

Mr. HEFLIN. I wonder if the distinguished Senator from Montana, who has been a leader in the agricultural movement for a long time, would explain the primary reasons that we have had an escalation in each of the years, in 1982 to 1983 and 1983 to 1984 and then 1984 to 1985, of target prices.

At one time, if I remember correctly, there was the issue of tying it to some type of index relative to the cost of production, but that the Department of Agriculture did not like the idea of tying it to an index. And so they are the ones that came out and suggested that there be a flat figure each year. Was that for the purpose of realizing that the cost of production would go up? I wonder if the Senator might explain that a little bit.

Mr. MELCHER. Mr. President, when the 1981 Farm Act was adopted, many members of the House Agriculture Committee felt that there should be some adjustment in target prices to attempt to recognize the impact that the cost of production increases would mean for the several years that the target prices were being set in that bill.

I think it would have been the preference, not only with the members of the House Agriculture Committee but also with a substantial number of the members of the Senate Agriculture Committee, to tie those figures directly to what has been cataloged and documented year by year in the Department of Agriculture's data and information gathering facilities that they have called the cost of production index.

The Department of Agruculture did not seem to find favor with that, so we just arbitrarily used a figure of about somewhere between 3 and 4 percent increase in target prices for those commodities year by year, thinking that that would be some way of having a slight adjustment on what the producers were having to pay for additional costs.

I suppose it is not very easily understood by the public at large that target prices, if the crop is selling below that price, triggers a deficiency payment to make up the difference between the actual price received in the marketplace and the target price. I suppose it is hard for the public to realize that that only applies to a portion of any producer's crop.

For the wheat program that the Secretary says he is willing to announce for this coming year, 1984 crop for wheat, he would require that 25 to 30 percent of the base acres of any farm that produces wheat be diverted. That means it would not produce any wheat. It could only produce conserving crops; that is, crops that would en-

hance the value of the land in terms of conservation. It does not mean that they are going to sell anything off of that acreage. It means, to the contrary, that they will not sell anything off of that acreage. They might graze them or have something on there that would be of feed value for livestock in certain periods of time. But clearly speaking, for a wheat producer the diverted acreage is restricted to such an extent that it is just a conservation practice with no cash income from it.

Well, there is where 25 or 30 percent of your farm acreage is. It is in nonproduction. The theory behind this is that somehow we will get production down to about a balance of what is needed for domestic consumption and for foreign sales on food for peace and we will not have an overhanging surplus that depresses the market.

Then the wheat producer who is in the program has a normal yield of the rest of the farm find that he has to sell that below the average price, the farmer will get a deficiency payment. It does not cover the entire crop that could be produced if all the acres were planted.

You might think that is a little complicated, perhaps going a little backward. Why not produce it and, as I said earlier, have all the food needed for this country or available to foreign governments that wish to purchase from us, using the remainder for food for peace or those countries that have had droughts and where there is a lack of food.

Well, it seems that over the course of time, for over 25 years, we found ourselves quite often in the situation where the surplus is so great that it exceeds much of what we can use in any 1 year. That is why we have gone to programs of restraint, trying to get farmers to agree to produce less and to bring the supply more into balance with demand. That is the basic reason for it. That is the way deficiency payments work.

Mr. HEFLIN. Will the Senator yield to me for a few remarks?

Mr. MELCHER. Yes, I will yield the floor.

Mr. HEFLIN. I was interested in the minority views of Senator BOREN and Senator PRYOR published in the report on Target Prices, Export Initiatives, and Critical Agricultural Materials Act of 1983, which was ordered to be printed on June 23.

They start their views by saying:

We are deeply disappointed that the Senate Agriculture Committee has approved the administration's proposal to freeze the target prices for wheat, feedgrains, cotton, and rice at the 1983 levels, without first requiring the Secretary to announce the specifics of the 1984 program.

On Friday, about 3 o'clock, I believe, the Secretary announced optional programs for the 1984 wheat program, but he has not announced any program yet for feedgrains, cotton, or rice.

In the Secretary's announcement dated July 29, considerably after Senators BOREN and PRYOR expressed their disappointment, the Secretary of Agriculture announced provisional details for the wheat program.

WASHINGTON, July 29.—Secretary of Agriculture John R. Block today announced options for the 1984 wheat program, pending program legislation presently under consideration by the Congress.

Block listed general guidelines for next year's program on July 1 which permitted farmers to make preliminary planting decisions and financial commitments for their crop, while the Congress continued deliberations on target price freeze proposals.

"Since legislative action on the proposed target price freeze is now before the U.S. Senate, it is up to the Congress to decide which option they want to choose," Block said. "It is important to get this issue resolved in order to assist farmers in making their management decisions."

The Secretary's announcement covers only wheat. Still I have not heard anything about cotton, feedgrains, and rice.

He listed the following 1984 wheat program options: If new legislation freezes the target price at $4.30 per bushel, the acreage reduction requirement will be 25 percent and there will be a payment-in-kind program of 10 to 25 percent for farmers who divert additional land. The payment-in-kind compensation will be 80 percent of the program yield.

Then the news release says:

If Congress does not freeze target prices and the target price automatically escalates to $4.45 per bushel, the acreage reduction requirement will be 30 percent and there will be payment-in-kind program of 10 to 20 percent for farmers who divert additional land. The payment-in-kind compensation will be 75 percent of the program yield.

Producers participating in the payment-in-kind program and having both reserve and regular loan grain would be required to make their reserve grain available for PIK. Those farmers who have neither will be eligible for participation in the payment-in-kind program by volunteering to harvest for payment-in-kind.

In addition: Land taken out of production must be devoted to conservation use. This land must be acreage that would have been devoted to small grains or row crops in 1984.

The national average loan and purchase rate will be $3.30 per bushel. The Food and Agriculture Act of 1981 permits the loan rate to be set at this level since the season's average price for the 1983 crop is expected to be less than 105 percent of current loan rate.

Block said the current loan rate is above market clearing levels and places U.S. producers at a competitive disadvantage in world markets. "This reduction will begin to restore competitiveness in world markets and send a signals to our export competitors that we will no longer maintain a 'high price umbrella' which allows them to undercut us in the world market," Block said.

The purpose of a target price was originally established to tie into a diversion or an acreage reduction for planting and, therefore, the price that would be received for the crop would, in effect, be set at a certain level.

(Mr. HECHT assumed the chair).

Mr. HEFLIN. The PIK program comes along and, in effect, is a much more expensive program than the target price program or the target price increases that would take place.

As you would see here, in order to qualify under the base requirements for the target price program, the acreage reduction would be required to be 25 percent. That makes you eligible, if you go into the acreage reduction requirement of 25 percent and if the target prices are frozen.

The payment-in-kind program will be from 10 to 25 percent for farmers, who would divert additional lands. The payment in kind on that will be 80 percent.

In order to bring about less production, you are going into a much more expensive program under the PIK program than you are under the target price program. When you, in effect, give 80 percent of the program yield, the farmer can turn around and sell it on the market; as compared to the difference between market price and the target price, it is a lot more expensive relative to those additional acres.

Some people will say that the PIK program does not come out of the annual appropriation, but it does come out of assets of the Government or the CCC stocks, either current supplies or that they will purchase in the future to meet requirements under the PIK program. So, in reviewing the cost to the Government as to a target price program versus a PIK program, the PIK program is vastly more expensive.

Mr. President, the purpose of the PIK program is twofold. One of the prongs of this twofold program is to reduce production by the reduced acreage that is tilled. The other prong is to reduce surpluses that have accumulated in the Commodity Credit Corporation.

The PIK program is a much more expensive program than the target price program because you can see that to obtain either 10 percent diversion of land where it is not planted, or 25 percent, you would give the farmer 80 percent of the program yield from his historical basis yield.

The escalation in regard to target prices was based on the idea that if you would take out of production a certain number of acres, then the remaining crops that you grew would receive a certain price. If there is a difference between the market price and the target price, then, up to a certain amount, there could be compensation paid.

The increases were first thought to be tied to some type of index, an index that would truly reflect the additional cost of production, and the cost of production has been going up each year

and will continue to go up. While inflation is down over what is was, we are still going through inflationary periods. In wheat, it is very minor and certainly does not exceed the inflationary rate that is measured and reflected by the various indicators we have that we hear reports of on a monthly basis and on an annual basis.

The Secretary, in his news release last Friday, says that if Congress does not freeze target prices, the next step will be for it to go up a little bit in keeping with the inflationary rate of the cost of production, then acreage reduction would be 30 percent instead of 25 percent. Well, Mr. President, that takes out additional acreage of land; 5 percent additional acreage would be required to come out of production. That would be a less expensive 5 percent coming out than the 5 percent that would come out under a PIK program.

I do not understand here, where you have a PIK program, you have target price, the difference between market price and an established target price. On the other hand, under the PIK program, you either furnish 80 percent or 75 percent of the yield and you do not have to do anything other than grow grass, a little conservation practice. The difference between the target price of wheat and the market price, we shall say, will amount to 10 or 15 or even 20 cents a bushel.

On the other hand, under the PIK program, if you give a farmer, without his having to do any planting, 75 percent of his program yield, and if the price of wheat is $3 or $3.50, 80 percent of that figure, or 75 percent of that figure, is substantially more, a lot more money, and it will cost more.

The idea is, here we are trying to save money, but it seems to me that what we are really doing is substituting a much more expensive program in the long run for one that we have. Let us say someone grows 100 bushels of wheat on 2 acres of land and you give him 80 percent of that, which is 80 bushels, or you give him 75 percent of 100 bushels, which would be 75 bushels—put pencil to paper and then multiply that by the price per bushel. We will just say it is $3. Then, really, for those two acres at 80 percent at $3, you are giving him—the way it looks to me—at least $240.

But, on the other hand, if the target price on the 100 bushels is 10 cents a bushel or 20 cents or 30 cents, and you multiply it by 100 bushels, you are giving him $30.

The whole thrust is to take land out of production. You are giving him a tremendous amount of money under the PIK program. On the other hand, under the target price concept, the cost is very little. It looks to me like the target price approach is eight times as cheap as the PIK program.

I would like to see some sort of situation worked out with both PIK and taget prices, but we cannot be led to believe that we are really talking about saving money. What we have under this proposal is that it is going to end up in the long run costing more money.

As you make comparisons of figures, on the one hand you have the savings with conservation practices—they are hopefully good conservation practices—under the PIK program, and I am not saying the PIK program is bad because I think it has a lot of merit to it, but at the same time the cost is a lot more for the PIK program to the Government. And you cannot fool yourself; an asset is an asset.

The Commodity Credit Corporation is going to have to do some replenishing if it exhausts its supply.

We have heard the argument that we are trying to save money for the Treasury. I am a fiscal conservative, and I think we ought to try to save, but I believe that we are looking at a program on a comparison basis. When we weigh them in the balance, the PIK program will be eight times more expensive than the target price program. The proposal that is being made is that if you agree not to accept one penny, I am going to give you eight more pennies out of another pocket. That is about what we have on this program.

Now, to continue with the views of Senator BOREN and Senator PRYOR, they say:

> Despite the evidence that has been around for a year, it took this Administration until January of 1983 to recognize the need to implement a decent acreage reduction program. And, when they did recognize it, they implemented the most costly program that has ever existed. We still maintain that a paid diversion program would have been more cost-effective in the short-term as well as in the long run. And, we remind our colleagues that it is the long run situation that creates our budget deficits.
>
> In our opinion, it is extremely unfair to ask Congress to freeze target prices without knowing what the 1984 programs will be, particularly the 1984 wheat program.

As I read the press release from the Department of Agriculture, there is now a wheat program which says if target prices are frozen, it will increase the PIK program. That type of program, as I believe we can show on paper, is about eight times more expensive than the target price program.

> This becomes extremely important when one considers the fact that this Administration intends to lower the loan rates of these commodities to some extent. Indeed, if the proponents of this legislation were really serious about balancing our budget, they, too, would insist upon knowing what these loans are going to be. The fact of the matter is the only thing that adds to the deficit is the deficiency payment. The maximum deficiency payment is the difference between the loan rates and the target prices for the particular commodities.

I might divert from these views of Senators BOREN and PRYOR to mention the fact that if the PIK program works to reduce surplus, the price of commodities will go up. The target prices are set, so every time that surplus is reduced or production is reduced, it narrows the gap between the market price and the target price, meaning less exposure and less payment that would have to be made. This idea of growing for PIK seems to me to defeat one of the twofold purposes of the PIK program; that is, to reduce surplus. If you grow for it, then you are not reducing the surpluses that have accumulated in the past. Therefore, it seems that if you are going to reduce the supply, it is necessary that surpluses be reduced along with the production.

Therefore, if you grow for PIK, this would be a much more expensive method. You have already purchased in the past, either in the form of loan reserves or in the CCC, various crops, and that is where the surplus is. But if you are forced to grow for PIK, then, in effect, it is a program that fails to carry out one of the purposes of the PIK program.

Do not misunderstand me. I think the PIK program has been widely accepted. I think there are a lot of safeguards, and there are a lot of things about it that need to be corrected. The PIK program is basically a program that did not come from legislative authorization but came from the administration looking over past language and saying, "We can construe this broadly, and we have the authority to carry out a PIK program."

It may be that they are on shaky legal grounds in the elasticity that has been given to certain existing language which was not intended to apply to a PIK program, but the PIK program comes along and they use it.

There are certain other provisions of law USDA felt it should have which was brought before Congress, and did not pass. I supported the PIK legislation, but I thought it needed some additional safeguards.

PIK is on some shaky legal grounds relative to the interpretation it has been given. I hope we can add an amendment to an agricultural bill which will give legislative authorization to a PIK program and provide some safeguards. Safeguards are needed to prevent the disruption of a number of segments of our agricultural economy.

The price of corn has gone up rather remarkably in the last few months. It is playing havoc with the poultry industry, the cattle industry, and the hog industry. You have to buy feed grains to feed the poultry, to feed the hogs, to feed the cows. Also, there is the farm supply business. It needs some safeguards relative to this.

In Alabama, the restriction that you are limited to, a history of a base of 1981, means that a great number of farmers have not come under the PIK program because they did not grow wheat in Alabama until 1982. We nearly doubled the amount of acreage that was devoted to wheat from 1981 to 1982 and had close to a million acres in wheat in Alabama. Today, there is more acreage in wheat than in cotton, which is unusual, since Alabama always has been known as a cotton State. Next to soybeans, I reckon there is more acreage in wheat than any other crop.

We have an unusual situation of double cropping where protection is needed. Double cropping is where the Lord has blessed us with a long growing season, and we can plant one of wheat in the spring and then plant another crop, following it with a crop of soybeans. In some sections of Alabama they have followed a crop of wheat with other crops, such as cotton, and had remarkable success with it. Sorghum and millet are also used as second crops. In some places, they have planted one of wheat and followed it with a crop of peanuts. There is no allowance in the PIK program for this type of double cropping, and I think safeguards should be put in PIK legislation to take care of these unusual situations.

Back to what Senator BOREN and Senator PRYOR said:

The fact of the matter is the only thing that adds to the deficit is the deficiency payment. The maximum deficiency payment is the difference between the loan rates and the target prices for the particular commodities. If the Administration lowers the loan rates, it could, in effect, negate any and all savings of this legislation.

During the Committee debate, one of the proponents of this compromise legislation, which includes the funding for exports, argued that the increased exports would make up for the income lost as a result of this legislation. Under this legislation, $300 million would go to exports each year. According to a Chase Econometrics Study conducted for the National Association of Wheat Growers, wheat exports alone would have to increase a minimum of 44 percent, or 622 million bushels, above the current estimate for 1983 through 1984 to generate a season average price which would make up the difference in income lost by this legislation. There is no way that we will sell 622 million bushels for $300 million in exports, much less make up the differences for the income lost in other commodities.

Let us consider the export cost. The Commodity Credit Corporation will take the moneys that are supposedly saved from the freeze of the target prices and devote the first $300 million to the next program.

I am told that past export programs basically have worked to some degree but that, at present, the Department of Agriculture does not use all its funds that are available for export promotion. Therefore, you are adding to something that has not been fully used in the past and are expecting the same group who operate the Department of Agriculture to spend it.

In addition, it says that funds repaid under other export programs, and repaid to the Commodity Credit Corporation, are then to be used in the export promotion program. That means that all the moneys are not being saved.

I do not recall the exact figures, but it seems to me that in 1984, about 60 percent of the savings that would occur on the freeze in the target price was being taken up by this export concept.

As I understand it, the Department of Agriculture and the Secretary do not want this additional money for export promotion because they say that they already have an adequate amount. If that is true, I do not see why you are forcing this on them. If it can be used, and can be used to help increase export markets, that is one thing. But the Department of Agriculture does not seem to feel that they can make use of this money.

According to a Chase Econometrics study, in order to make up for the loss of money, you would have to sell 622 million bushels in exports, and they doubt seriously that this can be done.

So, it appears to me that this legislation is faulty in a lot of ways. It has its faults on a comparative basis with the PIK program, and it has faults within itself, in its language and in its directions, and if it cannot be used by the Department then that is cosmetic with the idea that you are giving something to the farmers in saying you are going to bring about increased markets.

Of course, if we can have a long-term grain agreement with countries that gives stability, and we do not go to using the embargoes again, that would do more than any one thing to help reclaim some of the markets that we have lost in the past.

Continuing with the views of the distinguished Senator from Oklahoma and the distinguished Senator from Arkansas:

It is also doubtful, considering the performance of this Administration in regard to exports, that the money allocated in this legislation will ever be spent. The Agriculture Department, according to the Wheat Outlook and Situation Report, is currently sitting on $750 million provided by Congress to use in the vital blended-credit program. Additionally, credit programs are being reviewed by OMB and it now appears that the blended-credit program will not be used to develop markets, but solely to respond to competition from the European Community. The track record of this Administration certainly does not illustrate a real interest in maintaining or increasing agricultural exports. For example, concessional agricultural exports under U.S. government financed programs totaled $1.27 billion in calendar year 1982, 9 percent less than those in 1981. Exports under P.L. 480 in 1982 were 11 percent below those of a year earlier. Partially as a result of this track record, U.S. agricultural exports fell to $18.1 billion during the first six months of fiscal year 1983, 17 percent below those of the same period a year earlier. Wheat shipments alone are 17 percent below a year ago, and cotton exports are a third below those of one year ago.

Proponents of this legislation have also argued that when the 1981 Farm Bill was enacted, inflation was at a much greater level and therefore the increases scheduled are inappropriate considering the current inflation rate. However, if we examine the wheat program alone, we find that the 1984 target price of $4.45 that is in current law represents only 60 percent of the June 1983 parity level for wheat, not the 1984 parity level. Further, $4.45 represents 59 per cent of the total cost of production, including land at the current value, assuming a meager inflation rate of 3 percent.

Now is obviously not the time to reduce the net income of our agricultural producers. Clearly, the American farmer, without knowing what the 1984 programs are going to be, is being asked by this legislation to pay for the administrative mishandling of our commodity programs by this Administration. We would urge our colleagues in the Senate to oppose this legislation.

These remarks are signed by DAVID L. BOREN and DAVID PRYOR.

The interesting views of Senator EDWARD ZORINSKY concerning this appear on page 37 of the report in which he says.

Accepting a freeze on target prices in exchange for only a vague export promotion scheme financed with funds cut from farm price support payments is not my idea of how to help the Nation's farmers.

Famers are tired of hearing about grandiose schemes to promote exports, especially when the Administration has failed to take other steps that could boost exports without sacrificing price support payments.

In the 1981 Farm Bill Congress authorized "such sums as are necessary" for carrying out an export expansion program. Not only are we going in circles—rubber-stamping something we authorized two years ago—but we are doing it at the expense of the farmer. We are proposing to take millions out of the pocket of the farmer to fund a program that is already authorized in the interest of expanding agricultural exports—the Export Credit Revolving Fund.

It is an insult to farmers' intelligence to ask them to give up income assured under the 1981 Farm Bill in favor of an export trade promotion program.

The Administration's proposed freeze would eliminate the minimal increases in target prices approved when Congress enacted the four-year farm bill in 1981.

For example, under the existing program, the corn target price would increase 17 cents 1984, to $3.03 per bushel, and 15 cents more in 1985. For wheat, the increase would be 15 cents in 1984, to $4.45 per bushel, and 20 cents in 1985.

Congress acted correctly two years ago when it voted to provide farmers this protection from inflation. To break faith with them now, in midstream, is grossly unfair.

He lists 19 organizations that are on record in opposition to the target price freeze:

The National Farmers Organization, the National Association of Wheat Growers, National Grange, National Milk Producers Federation, Grain Sor-

ghum Producers Association, National Peanut Growers Association, National Association of Farmer-Elected Committeemen, Cooperative League of the United States, National Rural Electric Cooperative Association, Women Involved in Farm Economics, known as WIFE. And while I am on that, I wish to talk a little bit about what a fine program that is.

The WIFE program is a program which involves women in agriculture to become more active in helping the farm operation.

Small farms remain the backbone of our farm economy.

The commune type of farming that exists in the Soviet Union has never proven itself to be successful. The commune type, where there is no profit motive and there are no family farm organizations or units involved, has proven itself to be ineffective, and the Soviet Union every year has to buy millions and millions of tons of grain in order to feed its multitude.

But in America we have the family farm, and we have the profit motive that has proven itself successful. It has been also one of our great sources of exports, and if we did not have farm products we would have tremendous deficits in our balance of payments with foreign countries and trade.

The WIFE organization met up here back a few weeks ago, and they had some outstanding leaders who were taking part in the farm program, and they are studying every aspect of it.

We have had wives interested in home economics, in cooking and canning in the past but now we have the ladies at home who are keeping the books and looking at every aspect of agriculture. In my judgment, a vast improvement in the individual farm, or individual farm operation, will occur because they are looking at the way dollars are spent. They are going to look at the cost of inflation, they are going to look at what the cost to the farmer may be under new tax laws.

I would like to say that we had this new tax law increasing user fees on trucks by 900 percent. Well, we got in the language after a long hard fight to limit it to trucks that were used less than 5,000 miles. A lot of farmers do not use it for 5,000 miles but there are a lot of farmers who do. This, of course, is going to mean an expense to farmers that they did not anticipate when the 1981 farm bill was written. They have got a 900-percent increase in user fees on trucks they bought, just to mention one aspect of this.

Well, the wives are certainly going to be looking forward and watching all phases of farm economics, and this is a great organization. It needs our support and I hope we all support women involved in farm economics.

I submit that deficiency payments are a more direct way to put money into farmers' pockets.

Quoting from Senator ZORINSKY:

We are saying we are going to increase exports. I think the farmers have had it up to their ears when they hear about we are going to increase exports.

Again quoting Senator ZORINSKY:

We have created agricultural sectors within the embassies. We have appointed special agricultural officers. We have a blended credit program, and now we are going to take more money away from the farmer and give him an even better export program.

What the farmer does not need is the kind of export programs we have been giving him thus far. And I think they would rather have the deficiency payments than to finance an export program by taking the money out of their pockets, creating a bigger export market for them so they can earn money based on how they have earned money up to now on the promises of increased exports.

You know, in our rural sections in Alabama there are a lot of things going on with regard to recreation. I was reminded about this by the George Brett incident. When we had rural baseball a good while back, sandlot baseball is what they call it in the city but we used to call it cow pasture baseball in the rural areas.

We had some small communities that would get together and they would play baseball. Over the years it was the function of the home team to supply an umpire. Well, that did not work out very well and we had to have an independent corps of umpires because they would always side with the home team.

In Alabama, up in the hill country, two communities, one known as Red Bay and the other as Vina wanted to play a baseball game. This was a number of years back, when we had cow pasture baseball, and Red Bay was reluctant to go because Vina had an umpire who would always call the close ones in favor of Vina against the visiting team.

But one day they went over there and played and the score was 2 to 2, and this notorious umpire had not ruled unfairly all day. In the ninth inning the score was tied 2 to 2 and Red Bay was at bat, and a batter came up and hit a home run. But in doing so he got turned around. Instead of running from first base to second base, to third base and then into home, he ran from homeplate to third base, to second base, to first base and then into home, and as he crossed homeplate and put his foot down on the plate the umpire called out "You are out. Vina wins the game 1 to 2, you untied the score." So every now and then we have a little humor about our various types of rural activities that go on.

But I think that really when you get into comparison here of this export program that it is a meaningless program relative to what good it is going to do with the farmer. You have existing programs and those existing programs need to be effectively operated, efficiently managed in order that we might see a better program in that regard.

I think there is merit in an export PIK program and the Senate Agriculture Committee designed one which is largely an incentive or a bonus to increase exports but I believe this program here—I do not agree altogether with Senator ZORINSKY about it but I believe we have got to make the existing program work, and to say that we are going to take money from the target price and transfer it to the export program, in my judgment has some real questions for the year 1984 and the year 1985.

Now to continue:

I also objected to the committee being forced to act on the administration's proposal without any detailed knowledge of the wheat and feedgrain programs for 1984.

Well now we have got those for 1984 for the wheat but we do not have them for feedgrains yet, so I think we need to know what the feedgrain, cotton, and rice programs are going to be.

Without these program details we would be unable to even guess what effect the committee decisions will have on farmers. In particular, I am troubled by the suggestion that the Agriculture Department may substantially reduce price support loan levels for 1984.

When this report was written the Secretary did not know it but he is aware now, USDA has already announced that it is going to reduce the loan levels for 1984.

This means the market price floor will sink, and I strongly believe that the impact of such a policy change should have been measured before the committee action to cut farm income by freezing target prices.

The compromise adopted by the committee would direct that $600 million of the savings from the $3.9 billion target price freeze would be placed into export credit revolving fund.

At this time, I yield the floor to the distinguished Senator from the State of Oklahoma, Hon. DAVID BOREN.

Mr. BOREN. Mr. President, I thank my colleague from Alabama. I commend him for the remarks which he has just made on the floor of the Senate. Every Member of this body is already well aware that the Senator from Alabama has been one of the most forceful spokesmen for the agricultural producers of this country of all the Members of the Senate. He has been an effective voice for all sectors of agriculture. He has been particularly influential in maintaining the peanut program for the farmers of his State. But he has never hesitated to speak out for all of agriculture and to call to our attention the desperate plight which the farmers of our

Nation now face. I wish to commend him once again for speaking out for the farmers of our country at a time when they are most in need of his help.

Mr. President, last week, I spoke in this Chamber about the necessity for knowing what the 1984 wheat program will be before the Senate considers legislation which would freeze target prices. At that time, I asked the Secretary of Agriculture to at least let us know what the options were, what the wheat program would be without a target price freeze and what the wheat program would be with the target price freeze.

On Thursday, the Secretary indicated his willingness to give us the options. The briefing was set up on the next day at 2:30 p.m. The briefing was later canceled and the briefing with some Members of the Senate did not occur until late Friday afternoon.

Mr. President, the options the Secretary presented at that time are certainly interesting. I have heard some comment that the choice was between a disastrous program and a totally disastrous program. After reviewing the options, I would have to say that there is not much difference between the two. They are both a blueprint for economic disaster for agriculture.

I will be sharing with our colleagues further comments on those options which are before us later on in our discussion of the pending motion to proceed. I had an opportunity over the weekend to discuss them with agricultural leaders in my home State and to also discuss the economic situation which the farmers in our State are facing.

I can only say that the proposals which have been made by the Secretary are viewed with grave concern in my State, a State where last year the farmers, all of the farmers in the State, had a total net income of approximately $1 million while they owe some $15 billion in debt just in my State alone.

Certainly, they all agree that the proposals which have been made will not address the critical economic situation that American agriculture finds itself in at the current time.

I ask unanimous consent that my remarks not be counted as a speech under rule XIX, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOREN. Mr. President, I see the distinguished senior Senator from Nebraska, Senator ZORINSKY, who is also one of the most effective spokesmen for agriculture in the U.S. Senate. He is one of the Members of the Senate who understands most clearly the subject of agricultural economics and certainly is as well qualified as any Member of this body to comment on the proposals which are before us. I am happy to yield at this time to my friend, the Senator from Nebraska.

(Mr. ABDNOR assumed the chair.)

Mr. ZORINSKY. I thank my colleague from Oklahoma, Senator BOREN. Certainly, with all respect to him and my colleague, Senator HEFLIN from Alabama, both of whom I serve on the Agriculture Committee with, these gentleman are knowledgeable. They have made a great many contributions to agriculture through their service on the Agriculture Committee and I think command a high degree of respect throughout the agricultural community for their vocal opposition to the current proceedings under the target price freeze proposal by the USDA.

Mr. President, accepting a freeze on target prices in exchange for only a vague export promotion scheme, financed with funds cut from farm price support payments, is not my idea of how to help the Nation's farmers.

Farmers are tired of hearing about grandiose schemes to promote exports, especially, and the administration has failed to take other steps that could boost exports without sacrificing price support payments. In the 1981 farm bill, Congress authorized such sums as are necessary for carrying out an export expansion program. Not only are we going in circles, rubber stamping something we authorized 2 years ago, but we are doing it at the expense of the American farmer today. We are proposing to take millions out of the pocket of the farmer to fund a program that is already authorized in the interest of expanding agricultural exports—the export credit revolving fund.

It is an insult to farmers' intelligence to ask them to give up income assured under the 1981 farm bill in favor of an export trade promotion program. The administration's proposed freeze would eliminate minimal increases in target prices approved when Congress enacted the 4-year farm bill in 1981.

Just let me briefly touch on the 1981 farm bill.

I sat with my colleagues, many of them who have spoken on the floor today, both in support and in opposition to the legislation we are considering today on the floor of the Senate. This goes back in my mind and my memory to thinking about a discussion we had here on the floor of the U.S. Senate with regard to social security, commitments to the elderly, commitments to the American people, and commitments to the credibility of the American Government itself.

Now, in 1981, sitting through many, many weeks of hearings and testimony from farmers, many of whom, out of their own pockets, contributed their annual savings or monthly savings to getting an airline ticket so they could, through the process of our democracy in this Nation, come to Washington, D.C. They looked for that bargain in the air fare. Currently it is around somewhere in the vicinity of $210 round trip, if you ask for the bargain price. But many of these people drove here because they could not afford an airline ticket. And once getting here, having the honor, the privilege, the ability as an American farmer to come and do what everybody else does in this wonderful land of ours, and that is to freely express their views as to the needs of American agriculture. I think we call it in our vocabulary a hearing. And they had that hearing. And they provided their input.

At the conclusion of the markup of the 1981 farm bill, we had a higher cost to our farm bill in the U.S. Senate than did the House of Representatives.

I, with many of my colleagues, voted to accept the higher priced version, which was the House of Representatives version.

Let me point out that the differential between the House bill and the Senate bill in 1981 on a 4-year farm bill was a differential of $400 million per annum. It was at that point, through the Office of Management and Budget, that this administration was convinced that they should threaten the acceptance of the House version of the agricultural bill with a veto if, in effect, the conference, conferees and Members of Congress decided to accept that version, the $400 million per year differential.

Let me cite an item that came right after that decision being a request to be made on the floor of the Senate. Just following that item came something called the Tennessee-Tombigbee Canal, which was $1.2 billion in expenditure, and the administration threatened no veto, threatened no language which would in any way offset its acceptance of the passage of that piece of legislation, in addition to the fact that shortly thereafter it was discovered in building a wind tunnel facility for the Department of Defense that after the facility was completed the compressors and the piping did not fit in the building. They had to tear it all out. That cost the taxpayers $335 million. And that was only for a mistake.

Let it be brought to the attention of the American people that annually we lose $1 billion in aircraft, military aircraft, and approximately 420 American airmen's lives through accidents. This country is not at war. I do not know how we could afford to go to war if we lose 1 billion dollars' worth of aircraft through accidents annually every year practicing those things that we need to become proficient in in the event of a military emergency.

I bring these numbers out, the long debate, the anguish we had, and the

fact that the administration appointed a blue-ribbon panel commission to evaluate the needs and the resolution of the social security problem because the administration obviously felt we had made a commitment to the elderly people of this country. I certainly agreed with that view and that philosophy.

Proposals were made. Very little was done to disturb the benefits that are received by the elderly of our Nation inasmuch as it was a covenant, a commitment, a vow made to the elderly people of this country that helped build this country.

Now let us get back to the 1981 farm bill and have that as a basis. Let us look at priorities. Where should agriculture fit in priorities?

I am not a great reader, but I have been in libraries and read the histories of nations. I find one thing in common as a common denominator for the erosion of nationalism, country, empire, domain, call it what you will. Any cohesion of society as we know it today vanishes when that entity, nation, country, or empire can no longer feed its own people.

I make this point in order to justify what I am about to say for agriculture as a priority.

I think many of us know, although many of us in this Chamber get up and speak as if we have never had to eat during the course of our life, and I think I would have a great deal of support in saying, that if this Nation could not feed itself we would not have to worry about problems being exerted upon the United States of America in foreign diplomacy from the outside. We would have our own internal problems to such a magnitude and extent that we would probably be spending more money rectifying the internal situation than we are with all the dollars that we are currently debating on the defense budget and the defense authorization bill, which we just concluded recently.

We made a promise to the farmers of America; we made a commitment to the farmers of America. I come from a family where, in the olden days—and I do not feel I am tremendously old, but I have seen enough of life to know the value of respect and to know the value of commitment—you knew the value of knowing that your handshake was your bond and your honor.

There is something that all the amount of money in this world cannot buy nor all the amount of money that this Government can appropriate, and now, as some of the speakers on this floor have said it is money that we do not have, it is money that the Bureau of Printing and Engraving will have to print for us, over and above money that we have to spend.

To me, your word is your bond and commitment. As a former businessman, if I went out and made a bad deal, I could not go back to the customer and say, "I have made a bad deal. I am going to change the parameters of what I told you I was going to be able to do." I felt that maybe tomorrow there would be another day and maybe I would be able to make that up or rectify it some day with another sale so that at the end of the year, if I was a good businessman and a good manager, I would be able to stay in business because my profit and loss sheet at the end of the year would be such that I would be on the profit side of the ledger, rather than on the deficit side of the ledger.

But even more important than staying in business, whether I stayed in business or did not stay in business, when it was all over everybody would be able to say, "He honored his commitment. He did not go back on his word."

I would like to say to my colleagues today that I think more is at stake with honoring these kinds of situations with the farm bill. I think we tamper with the lives of the American people daily. Is it any wonder they lose faith and confidence in a government that has made promises to its people?

I guess the point I am attempting to make is we begin work on another farm bill next year. The 1981 farm bill was a 4-year farm bill. It was not a great farm bill. It obviously did not accomplish all it sought to do because of the fact that the PIK program was needed last year. When were we told to pass the PIK program, as my colleague Senator MELCHER from Montana so vividly pointed out? During a lameduck session of Congress.

Many people in this country termed it a lamebrained session of Congress inasmuch as we squeezed in some mighty important legislation which now we are trying to change and attempting to change to a great degree.

At the meeting last Friday with the Secretary of Agriculture, Secretary Block, whom I respect and admire, and who certainly has a vast knowledge of agriculture, being a farmer himself, everybody in that room from the administration seemed to be appalled as to the cost of the PIK program.

Of course, they should be appalled as to the cost of the PIK program because when we asked them last year during the debate on the PIK program how much it would cost, they could not answer that question.

Any businessman who embarks on a program for a customer, for a constituent, for whoever, and does not have the answer to how much it costs should not be surprised in any way as to the cost of that program when that cost comes up. There is no such thing as that free lunch that many of us talk about here. It is quite obvious.

Mr. President, people say the agriculture program is costing $21 billion. That is a lot of money. At the last committee meeting that I was in, I brought that point up: "Does it really cost $21 billion, the expenditure of the U.S. agriculture budget?" Others said, "Well, no, not quite."

I said, "What do you mean by not quite?"

The answer was it so happens that about $9 billion of that is repaid by the loan support price system back to the U.S. Treasury.

I said, "Why don't we say $9 billion from $21 billion and use the net figure, rather than tell the people of America the outlay of this budget is $21 billion?"

Well, of course, both philosophies are right. The outlay is $21 billion and $9 billion does come back into the Federal Treasury. But because it does not come back into the Department of Agriculture, it is figured as a total outlay rather than any money being paid back into the budget of the USDA. But the last time I looked, those people in the Department of the Treasury that get paychecks and those people in the USDA who get paychecks; both those paychecks, I believe, are green-colored and both say "United States of America" on top of that Federal public, to the consumers of this country, to be able to be used in that manner.

I said, "You know, it is really unfortunate that the news media always print the total amount of outlay and never mention anything about any money being paid back." Of course, a license to do that resides in the fact that the money is not paid back directly from the loan into the Department of Agriculture so that they can deduct it from their outlay. It comes back to that strange country called the United States of America which seems to have no bookkeeping correlation with the farmers of America.

Going beyond that, Mr. President, I do not want to lay the blame for misinformation at the doorstep of the news media, because I hear during the debate on this piece of legislation—as a matter of fact, today—some of my colleagues referred to the fact that the cost of the USDA program was $21 billion. Some of them were in the room when I made that point.

Mr. President, the administration's proposed freeze would eliminate the minimal increases in target prices approved when Congress enacted the 4-year farm bill in 1981. For example, under the existing program, the corn target price would increase 17 cents in 1984 to $3.03 per bushel and 15 cents more in 1985. For wheat, the increase would be 15 cents in 1984 to $4.45 per bushel and 20 cents in 1985.

I should like to bring some clearer form of understanding to the consumers of America as to what increasing prices to a farmer does to their costs.

Today on the retail market a loaf of bread probably costs 80 to 85 cents per loaf. I suppose closeouts for day-old bread or adjustments for a more well-known bread can cost more or less depending on which supermarket, grocery store, or convenience food store you may stop at. But using the 80- to 85-cent range for a loaf of bread, what a farmer gets in cost out of that loaf of bread in the product that he raises, called wheat, is 2.5 pennies, which means if he were to double what he gets as a farmer for raising a bushel of wheat, the content of a loaf of bread would then accrue to the farmer the value of 5 cents or maybe 6 cents. And that loaf of bread should, but as you and I as consumers know better, would not then rise about 3 cents. In other words, today's 80-cent loaf of bread, if a farmer were to double the price of a bushel of wheat, should go to 83 cents.

Now, I would rather have an 83-cent loaf of bread and know it is a reliable loaf of bread and an ongoing loaf of bread than I would having that farmer not have the ability to continue in the business of raising that wheat for the bread of the Nation and then one day huge conglomerates and people we would be importing our wheat from and other nations wake up one day, as OPEC did, and decide that the American Government is no longer capable of providing its own food, let us get together and establish prices.

Then and only then would the housewives of this country understand what has happended to the farmers of America, because it would be conglomerates and other nations that would then set the prices for that loaf of bread on the shelves of our grocery stores in this country.

If we should have learned anything from the OPEC countries, it would be to make other nations dependent upon you to sell them your product as a reliable supplier, as a creditable supplier; the more dependent they become upon you, the more control you have over the price of that commodity, on which in effect you can establish a world cartel.

Now, Mr. President, the Congress acted correctly 2 years ago when it voted to provide farmers this protection from inflation. To break faith with them in midstream is grossly unfair.

Many farmers have gone out and borrowed money. I do not think this is unique to farming small business people. Families themselves have been known to borrow money from the banks that they deal with.

How do you borrow money and how do you sit down with a banker and explain how you are going to repay that money if it is not for known factors and also many unknown factors that enter into the equation or your ability to repay a loan?

Part of the factor equated into the borrowing capability of a farmer is promises that have been made in a 4-year farm program. The bankers read that program. They know what the farmer is expecting out of that program. That is why I say for the Federal Government to come along one day—and here it is 3 days before an August recess—and say all of a sudden we are going to change the rules or the parameters of that ball game I think would bring havoc into the credibility of the lending institutions of our country.

Mr. President, I ask unanimous consent to yield the floor to the distinguished majority leader without losing my right to the floor.

Mr. BAKER. Mr. President, I thank the Senator.

What I was prepared to do was to put us in a brief period for the transaction of routine morning business, which will take us off this motion. But instead of that, Mr. President, I am prepared to withdraw the motion. I think it is clear that we are not going to get very far with it at this point.

Mr. President, I do withdraw my motion to proceed.

The PRESIDING OFFICER. Without objection, the motion is withdrawn.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, in a moment, after the minority leader has a chance to arrive on the floor and other Senators who are principally involved, it is my intention to try to reach the Department of the Interior appropriations bill, but I will not do that for the moment.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business until 4:45 p.m. in which Senators may speak for not more than 2 minutes each.

Mr. METZENBAUM. Mr. President, I wonder if the majority leader would be good enough to hold that so the Senator from Ohio may gain the floor for the purpose of introducing a bill having nothing to do with the pending matter.

Mr. BAKER. The Senator can do that in morning business.

Mr. President, if the Chair grants the request, I would urge the Chair to recognize the Senator from Ohio for that purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. METZENBAUM in connection with the introduction of legislation are printed under Statements on Introduced Bills and Joint Resolutions.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

Mr. BAKER. Mr. President, as I indicated earlier, and as I have advised the minority leader, the chairman of the Appropriations Committee, the ranking minority member, and others who are principally interested in this matter, I ask unanimous consent that the Senate proceed to the consideration of the Department of the Interior appropriations bill, H.R. 3363.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

The PRESIDING OFFICER. The question is on agreeing to the first committee amendment.

Mr. BAKER. Mr. President, I believe we are not prepared to go forward at this moment. We will be prepared to do so in a matter of seconds.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The acting assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, the fiscal year 1984 Interior and Related Agencies appropriations bill as reported by the Appropriations Committee proposes new budget authority totaling $7,639,488,000. This is a decrease of some $442 million below the House-passed level, but an increase of nearly $930 million above the budget request.

As in the past, Mr. President, this bill impacts every State in the Union, whether through acquisition of lands for public purposes; continuation of energy, geologic, hydrologic, or wildlife-related research; operation of various programs created for American Indians; or maintaining Federal support for arts, humanities, and museums. Every Member of Congress has a stake in the passage of this bill, and I am hopeful we can complete this bill quickly on the floor, conference with the House, and bring back a confer-

ence report before the beginning of fiscal year 1984 which both the Congress and the President can support.

This latter point is extremely important to note, because the bill at $7.6 billion is nearly $1 billion over the President's request and thus stands precariously close to the maximum dollar level I believe the President will support. Perhaps more important is the fact that the Interior bill as passed by the House contained provisions which prohibited both coal leasing and the leasing of Outer Continental Shelf lands through fiscal year 1984. Should these provisions be included in the bill the conferees send to the President, we very possibly will see it returned with a veto. It is therefore extremely important that the Senate go to conference without such prohibitions in its bill.

As I indicated a moment ago, this bill does indeed have something for everyone, and I would like to take just a moment to outline what the committee has recommended for some of the more popular programs:

For Land and Water Conservation Fund, the committee has recommended $211,415,000 an increase of $146,544,000 over the budget request. This includes $75,000,000 for State grants under LWCF.

For Fish and Wildlife Service, the committee has recommended an increase of $15,998,000 over the budget, including full funding for the cooperative unit program, an additional $2,000,000 for FWS law enforcement and protection, and an additional $5,440,000 for hatcheries operations and maintenance.

For Historic Preservation, the committee has recommended a funding level of $26,000,000 while the administration had requested no funds.

For Geological Survey, Bureau of Mines and Surface Mining, the committee has recommended additional funds totaling nearly $40,000,000 including increased funds for earthquake and volcano hazard reduction research, energy hydrology studies, mapping, and full funding for the Mineral Institute program.

For Fossil Energy Research and Development, the committee has recommended $248,714,000, an increase of $154,714,000 over the budget request. This level includes $39,300,000 for continued work on fuel cells and $30,000,000 for ongoing magnetohydrodynamics research.

For Energy Conservation, the committee has recommended $333,481,000. This represents an increase of $259,104,000 and includes additional funding for building systems, waste energy reduction, industrial process efficiency, industrial cogeneration, vehicle propulsion R&D, electric and hybrid vehicle research, EPCA, schools and hospitals and weatherization grants, and the energy related inventors program.

For Indian Education, the committee has recommended $67,248,000, an increase of $66,005,000 over the budget request.

For Indian Health, more than $112,000,000 above the budget request has been recommended, bringing the total funding level to $734,151,000.

For the National Endowments for the Arts and Humanities, a total funding level of $273,000,000 has been recommended by the committee. This level is essentially the same as that provided in fiscal year 1983 and represents an increase of $35,800,000 above the budget request.

At this point Mr. President, I ask unanimous consent to have printed in the RECORD a table comparing the committee reported bill with the budget request and the House-passed bill for fiscal year 1984, and with the appropriated levels for fiscal years 1980 through 1983.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

1/ Includes amounts which were funded in PL 97-276.

Mr. McCLURE. Mr. President, I emphasize once again the extreme importance of approving this bill without increasing the funding levels to the point where we have no hope of getting a signed bill. I emphasize once again the extreme importance of approving this bill without adding restrictions or prohibitions on coal or OCS leasing, both of which will also make it nearly impossible to get a signed bill. Please keep in mind we all have something to gain or lose in this bill.

Mr. President, I would be happy to yield to the distinguished Senator from Louisana, the floor manager for the minority, to make whatever statement he may wish to make at this time.

Mr. JOHNSTON. Mr. President, I thank the distinguished chairman. I also thank him for his leadership in this measure.

Mr. President, the fiscal year 1984 Department of the Interior and related agencies appropriation bill as reported from the committee provides a total of approximately $7.6 billion in budget authority and $8.9 billion in budget outlays for Department of the Interior programs excluding the Bureau of Reclamation, for the U.S. Forest Service, many programs in the Department of Energy and for other agencies including the Indian Health Service, the Smithsonian Institution, and the Endowments for the Arts and Humanities. This Interior bill is under the ceiling established in conformance with section 302(b) of the Budget Act. This bill is necessarily $442 million under the House-passed measure which has been identified as a veto candidate because it totals $1.4 billion over the President's request and because of certain legislative provisions in the bill.

Mr. President, I would like to highlight a few of the items in this bill which are of special interest to the Members on this side of the aisle. The bill provides $136,415,000 for Federal land acquisition from the land and water conservation fund. Also from this fund, the bill provides $75,000,000 for assistance to State recreation programs. State grants for abandoned mine land reclamation are funded at $218 million and low income weatherization grants are included at $145 million, $105 million in the Bureau of Land Management, and nearly $6 million in the Fish and Wildlife Service for payments to local governments in lieu of taxes are also recommended by the committee.

The largest area of disagreement with the House is the off-budget funding of oil for the strategic petroleum reserve. The reserve currently has 340 million barrels stored in underground caverns. The House has included nearly $1.7 billion to permit a fill rate of 220,000 barrels per day. This rate is consistent with the minimum level established less than 1 year ago in the Energy Emergency Preparedness Act of 1982. In contrast, the Senate committee-reported bill would provide only $328 million in new budget authority to sustain an oil fill rate of 145,000 barrels per day. The Senate funding for oil is substantially lower than the House in part because of the smaller fill rate assumed and in part because the Senate version would make use of prior year unobligated balances in the off-budget oil acquisition account. The effect of the Senate committee recommendation would be to delay completion of the 750-million-barrel reserve by 2 years to 1991.

The House bill contains a number of prohibitions and legislative items which are not recommended by the Senate Committee on Appropriations. These items which have been stuck in the Senate version include: A prohibition on coal leasing; a prohibition on leasing several areas on the Outer Continental Shelf, including areas off the coasts of California, Massachusetts, and the gulf coast of Florida.

The Senate bill does include the House prohibition on leasing in wilderness and wilderness study areas. The Senate bill also includes a new provision which would permit the Bonneville Power Administration to enter into a financing agreement with some body other than the Washington Public Power Supply System for the completion of WPPSS units 2 and 3.

With that as a preface, Mr. President, I hope that we can proceed to consider this Interior appropriation bill in an expeditious manner, and I urge my colleagues to come to the floor as quickly as possible to offer any amendments which they may have.

Mr. President, let me highlight a few of the items in the bill which are of special interest to the Members of this side of the aisle.

First, the bill contains $136 million for Federal land acquisition from the Land and Water Conservation Fund. Also from this fund, the bill provides $75 million for assistance to State recreation programs. State grants for abandoned mine land reclamation are funded at $218 million, and low income weatherization grants are included at $145 million. $105 million in the Bureau of Land Management, and nearly $6 million in the Fish and Wildlife Service for payments to local governments in lieu of taxes are also recommended by the committee.

The largest area of disagreement, Mr. President, with the House is the off-budget funding of oil for the strategic petroleum reserve. The reserve currently has 340 million barrels stored in underground caverns. The House has included nearly $1.7 billion which would sustain 220,000 barrels a day. The Senate, on the other hand, would fund only 145,000 barrels a day. The Senate version would make use of prior year unobligated balances in the off-budget oil acquisition account, which accounts for the difference of the Senate-reported bill providing only $328 million while the House includes $1.7 billion.

The effect of the committee recommendation would be to delay completion of the 750-million-barrel reserve by 2 years to 1991.

The House bill contains a number of prohibitions and legislative items which are not recommended by the Senate Committee on Appropriations. These items, which have been struck in the Senate version, include a prohibition on coal leasing; a prohibition on leasing several areas in the Outer Continental Shelf, including areas off the coasts of California, Massachusetts, and the gulf coast of Florida.

The Senate bill does include the House prohibition on leasing in wilderness and wilderness study areas.

The Senate bill also includes a new provision which would permit the Bonneville Power Administration to enter into a financing agreement with some body other than the Washington Public Power Supply System for the completion of WPPSS units 2 and 3.

With that preface, Mr. President, I hope we can proceed to consider this appropriations bill in an expeditious manner.

I urge my colleagues to come to the floor as quickly as possible to offer any amendments which they may have to the bill.

Mr. McCLURE. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc with the exception of section 317 dealing with the Bonneville Power Administration, and section 112 dealing with the coal leasing program, and the bill as thus amended be regarded for the purpose of amendment as original text, and providing that no point of order shall be considered to have been waived by agreeing to this request.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Mr. President, reserving the right to object—and I do not intend to object—is it the intent of the managers of the bill to offer section 317 as a committee amendment?

Mr. McCLURE. Yes, it would be.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments agreed to en bloc follow:

On page 2, line 11, strike "$348,852,000", and insert "$359,014,000";

On page 72, line 14, strike "$6,500,000", and insert "$2,963,000";

On page 72, line 20, strike "$1,953,000", and insert "$1,683,000";

On page 80, after line 11, insert the following:

SEC. 316. The Senate finds that the Forest Service's proposal of March 15, 1983, to consider six million acres of the national forest for possible sale has met with considerable opposition; and the national forests are an important part of the national heritage of the United States; and the national forests provide and protect important resources; and the national forests provide and protect opportunities for recreation; and it is inconsistent with past unique opportunities for recreation; and it is inconsistent with past management practices to dispose of large portions of our national forests. It is, therefore, the sense of the Senate that it is not in the national interest to grant the authority to sell significant acreage of the national forest until such time as the Forest Service specifically identifies the tracts which are no longer needed by the Federal Government; inventories the tracts as to their public benefit values; provides opportunities for public review and discussion of the tracts; and completes all necessary environmental assessments of such sales.

SEC. 318. Notwithstanding any other provisions of law, the Secretary of the Interior is authorized and shall seek to acquire the private lands described in section 505(a) of the Act of November 10, 1978 (92 Stat. 3467), by crediting a surplus property account, to be established in the name of each landowner, in the amount of the acquisition price for such landowner's lands. The National Park Service shall update the existing appraisals for the parcels and, based on the approved appraised values, shall negotiate with the landowners for acquisition prices. Each owner may, using such credits in his surplus property account, bid, as any other bidder for surplus property, wherever located, in accordance with the Federal Property and Administrative Services Act of 1949. The Administrator of the General Services Administration shall establish each landowner's surplus property account and shall adjust the credits in such accounts to reflect

successful bids under this section. Title to the lands described in this section shall pass to the Government at the time of establishment of the surplus property accounts. The credits in any of the surplus property accounts may be transferred or sold in whole or in part at any time by the landowner to any other property, thereby vesting such property with all the rights of the landowner, and after such transfer, the landowner shall notify the Administrator of the transfer. At any time the Secretary may purchase the balance of any surplus property account subject to the availability of appropriated funds.

COMMITTEE AMENDMENT WITH RESPECT TO SECTION 317

Mr. McCLURE. Mr. President, I call up the committee amendment with respect to section 317 and I ask for its immediate consideration.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The question is on agreeing to the committee amendment.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Madam President, this amendment can very appropriately be called "son of WPPSS." WPPSS, as we all know, is the Washington Public Power Supply System situation which has just resulted in a $2.250 billion default, the largest default of its kind in the history of the Nation.

Now, what we find in section 317 is an effort to have the U.S. Congress deal with this matter in a manner to bail out rather indirectly the WPPSS situation.

Supporters of this will claim the obligations incurred by the son of WPPSS would not cost the Treasury a penny. While it is true when you look at the provisions the provisions would not result in any direct outlays in the near term, it is misleading to say it has no budgetary impact.

In order that we may understand what we are talking about, let me point out that this amendment is rather unusually drawn in the first instance because it provides that, in the manner described in the Senate committee report, the administrator of the Bonneville Power Administration may enter into certain contractual agreements, and it goes on to spell that out.

I must confess that I have not been in this body as long as some other Members, but I have been here long enough to know that never before have I seen legislation drafted to provide that the legislation really will tell you what it means by reading the Senate committee report, and I doubt very much whether or not it has ever before been proposed.

But suffice it to say when you read the language of the legislation, section 317, and the committee report you arrive at the conclusion that under this so-called authorizing legislation the Bonneville Power Authority is required to recover "the cost of producing and transmitting such electric energy, including the amortization of the capital investment allocated to power, over a reasonable period of years."

In other words, this new entity they are going to be creating is going to be having to look to Bonneville Power Authority for the necessary funding.

To date we should, therefore, take a look and see what the Bonneville Power Authority is all about and whether indeed it will be the responsibility of the BPA or whether it will be the responsibility of the taxpayers of this country.

I want to point out to my colleagues that to date the Federal investment in generating and transmission facilities in the BPA region, in the Bonneville Power Authority region, totals $7.8 billion. How much of that has been repaid? It goes back to something like—I do not know the number of years, 40 or 50 years, maybe a little less than that—Bonneville Power Authority has repaid only $638 million of that $7.8 billion figure.

In the past 10 years it has repaid only $43 million, and the agency has made no payments at all in the last 2 years nor is it likely to make any payments this year.

Under section 317, we would be creating a new entity that would obligate BPA for another $1 billion. BPA would again pay off those obligations before meeting its responsibility to pay back the Federal Government on previous BPA debts. BPA already owes the Federal Government about $1.8 billion, on which BPA is paying an average of 7.5 percent, and the BPA is paying something in the area of 3.5 percent on another $3.9 billion.

So the longer BPA owes the Federal Government the greater is the Federal subsidy for this facility, and you do not have to be a mathematical genius to figure out that if about $7 billion is still owed, and it is owed at lower rates than the Federal Government is paying, you find that the Federal subsidy is substantial.

Under this new proposal it would appear as if BPA is going to charge the ratepayers in order to pay back the Federal Government in connection with this WPPSS deal. But do not believe it because, as a matter of fact, they are not paying back that which they owe at the present time. So that is almost like some of our foreign debts at the moment, where the banks are not getting paid back; we give them more money on the theory that some day maybe it will be paid back.

The chief reason for BPA's inadequate repayments to the Federal Government is a 1965 decision by the Bonneville Power Authority to use a new method for repaying its obligations to the U.S. Treasury. According to a June 1983, decision by the Federal Energy Regulatory Commission, this new repayment method has shorted the Treasury from $740 million to $1.4 billion. And section 317 would exacerbate and aggravate that situation.

Said FERC, in arriving at this conclusion:

Given the substantial failure of Bonneville to reschedule its deferred principal and interest payments on a reasonable basis, it appears that this problem, if not correct, would result in a failure of Bonneville to meet its statutory obligations (to repay the Federal investment).

In short, FERC concluded, as has the General Accounting Office in a draft report, that there is increasing possibility that the Bonneville Power Authority will default on its present obligations to the U.S. Treasury.

Under a Department of Energy rule, BPA is allowed to meet its obligations to the Federal Government after it puts WPPSS payments at the top of the list. And at the bottom of the list is repayment of the interest and principal on the Federal investment.

Under the new proposal, the bonds would provide that BPA would be providing security for the new bonds to be issued by the new entity and they would do so by raising rates sufficiently to cover those rates, and assumedly that which is still owed. But Bonneville continues to roll over its obligations and not to meet their obligations to the Federal Government. Any debtor would like to have the arrangement that the BPA has, but only the BPA has this favored treatment. And the rest of the people in this country are, as a consequence, subsidizing the energy cost of the people in the Northwest.

Now, I do not yield to anyone in this body as far as my support for public power is concerned. But the fact is that although BPA has increased rates to their users 700 percent since 1979, the users of Bonneville Power Authority energy are still paying only 55 percent of the national average. One reason for that is that the repayment priority schedule allows BPA to meet WPPSS related obligations prior to its Federal obligations; and another reason is that irresponsible payment policy.

The proposed legislation would impose something close to an additional $1 billion in additional obligations on BPA, and that which BPA is not already paying would be added to by another billion dollars. And the American taxpayers would be the ones who are carrying the load because BPA would continue to owe the Federal Treasury the $7 billion at less than the interest rates that the Federal Treasury pays when it borrows money.

Now quite probably this new obligation of WPPSS in connection with BPA would receive a higher repayment priority than repaying the Federal investment. Otherwise, it is unlikely that the new entity that would

be created under this arrangement could possibly be put together, because they could not otherwise be able to sell the bonds.

Thus, the effect of creating son of WPPSS is to add further delay to Bonneville Power Authority's repayment of the Federal investment, a delay which has already cost taxpayers $740 million to $1.4 billion, according to FERC.

But there is more. Supporters say there is no Federal budget impact. That is only true for the immediate short term. But what happens if BPA defaults on its obligations to the new entity? We have already seen that, despite a 700-percent rate hike, the agency lacks the revenue to meet existing obligations. It is quite possible that, despite the intent of the bill to pay back new bondholders through rates, the agency will simply be unable to raise enough revenue to do so.

In that event, who is left holding the bag? Who is always left holding the bag? The American taxpayer.

Newspaper stories suggest that the most likely financing package is some sort of short-term line of credit, convertible to 5-year notes. Thus, Bonneville Power Authority would be required to pay the entire $1 billion face amount in 8 years. Knowing what we do about its current revenue picture, the prospect of a default seems entirely likely. In that scenario, the taxpayers of the United States become the obvious underwriters.

Madam President, it is interesting to find that not only are some of us here in the U.S. Senate concerned about this matter. I find that 23 State representatives and State senators from the State of Oregon have sent a telegram to the Speaker of the House, which reads as follows:

> We ask for your total opposition to the McClure amendment to the Department of Interior's appropriation bill. This plan gives a blank check to WPPSS payable by ratepayers of the Northwest. No hearings have been held and we have many unanswered questions and concerns. This new financing mechanism would permit the BPA to give bankrupt WPPSS a minimum of an additional $1 billion of ratepayers' money to pursue completion of unneeded and uneconomical nuclear plants. The magnitude of this issue demands full and open examination via the normal route of legislation through Congress. Your strongest efforts to delete the McClure amendment in conference committee would be a great service to the ratepayers of your district and of the entire Northwest.

That mailgram is signed by Grattan Kerans, speaker of the Oregon House, 17 State representatives, and six State senators.

Madam President, I ask unanimous consent that the entire Mailgram be printed in the RECORD.

There being no objection, the mailgram was ordered to be printed in the RECORD, as follows:

SPEAKER OF THE HOUSE,
STATE CAPITOL,
Salem, Oreg.

Representative JIM WEAVER,
Washington, D.C.

To: Speaker TIP O'NEILL, Representatives SYDNEY YATES, JOHN DINGELL, RICHARD OTTINGER, LES AUCOIN, RON WHITE, DENNY SMITH, BOB SMITH, DON BONKER, ROD CHANDLER, NORMAN DICKS, THOMAS FOLEY, MIKE LOWRY, JOEL PRITCHARD, SID MORRISON, AL SWIFT.

We ask for your total opposition to the McClure amendment to the Department of the Interior's appropriation bill. This plan gives a blank check to WPPSS payable by rate payers of the Northwest. No hearings have been held and we have many unanswered questions and concerns. This new financing mechanism would permit the BPA to give bankrupt WPPSS a minimum of an additional $1 billion of rate payers money to pursue completion of unneeded and uneconomical nuclear plants. The magnitude of this issue demands full and open examination via the normal route of legislation through Congress. Your strongest efforts to delete the McClure amendment in conference committee would be a great service to the rate payers of your district and of the entire Northwest.

Grattan Kerans, Speaker of the Oregon House; State Representatives: Rick Bauman, Chuck Bennett, Annette Farmer, Wayne Fawbush, Tom Hanlon, Jim Hill, Larry Hill, Carl Hosticka, Bruce Hugo, Ed Leak, Robin Lindquist, Mike McCracken, Barbara Roberts, Lonnie Roberts, Jim Scavera, Dick Springer, Tom Throop; State Senators: Bill Frye, Charles Hanlon, Margie Hendriksen, Ron Monroe, Frank Roberts, Jan Wyers.

Mr. METZENBAUM. Madam President, that is not the only group that has found fault with this method of legislating on an Interior appropriations bill—legislating, I might say, without a hearing.

The resolution of the Public Power Council which includes many of the utilities with an interest in WPPSS Unit 1-2-3, indicates the following:

> Further resolve that the Public Power Council opposes section 317 of the appropriations bill for the Department of the Interior and related agencies as a piecemeal solution. The Public Power Council opposes any congressional action until the ratepaying public has had sufficient input into the process and until the Public Power Council's Executive Committee has sufficient information to determine the legislative course of action that is in the best interest of the ratepayers of the region's consumer-owned utilities.

We find that the Grace Commission was also addressing itself to the subject of BPA's repayment practices when it stated as follows:

> High interest rate investments are repaid first and balloon payments on loan rate obligations are indicated in the final year after long periods of minimal repayment.

I might say that is right on target as far as the BPA situation is concerned.

Going on in the Grace report:

> A rolling 50-year period is assumed for repayment of outstanding obligations, always moving forward from the latest addition or replacement. On some projects this last pension technique has already increased the effective repayment period to 89 years. Interest payments by BPA are omitted if revenues for any given year fail to govern.

I might say, that is right on target with respect to this particular issue.

Going on the report states:

> These practices produce results which cannot be reconciled with traditional financial statements and which prevent any current measure of accountability. As an example, the certified public accountant statement included in the annual report of one BMA states matter of factly that it was not prepared in accord with generally accepted accounting principles.

Madam President, those are not the only groups who are opposed to this proposal. As a matter of fact, a letter sent on July 26, 1983, to every Senator, was signed by the Environmental Action Group, the Environmental Defense Fund, the Natural Resources Defense Fund, the Union of Concerned Scientists, the Friends of the Earth, the Sierra Club, the Environmental Policy Center, the Public Citizens Critical Mass Energy Project, as well as the Council for a Competitive Economy.

As if it were not enough to have all of those environmental groups involved, the National Taxpayers Union also signed the letter.

They pointed out:

> We think it is extremely important that the implications of this proposal be thoroughly examined in hearings before the proposal is brought to the floor for a vote. This is especially important because BPA's current debt obligations to the Federal Government are not being met. The potential cost to the taxpayers and the U.S. Treasury should be thoroughly understood in advance.

Madam President, when all of those environmental groups and the National Taxpayer Union get together to raise this kind of point, it certainly has merit and substance.

Now I want to address myself to one other point before I conclude. That is that there are some who would suggest that this would help WPPSS bondholders. I am frank to say that I think that is the intent, but I am not sure that it would work that way. To those who are bondholders, whose bonds are now in default or may soon go into default, this legislation may put you at even greater risk. Unit 4 and 5 bondholders would lose the right to get at unit 1-2-3 assets to get repayment. And current 1-2-3 bondholders may also be disadvantaged.

Under the circumstances, by reason of the fact that there have not been hearings, in view of the fact that this is legislation on an appropriations bill, and because I believe that there is an appropriate manner in which to proceed, and that is by a hearing on proper authorizing legislation which is to be held on Wednesday afternoon of this week, Madam President, I raise the point of order——

Mr. McCLURE. Madam President, would the Senator yield?

Mr. METZENBAUM. Of course.

Mr. McCLURE. Would the Senator withhold his point of order so that we can debate the issue before the point of order is lodged?

Mr. METZENBAUM. Certainly.

Mr. McCLURE. I thank the Senator.

Madam President, I understand how the Senator from Ohio is concerned about the Bonneville Power Administration and its financial plight. I can understand him being concerned about the impact that this or any other amendment might have upon the taxpayers of this country.

Madam President, the Senator from Ohio has that concern misplaced with respect to this amendment. The unfortunate fact is that power projects in the Northwest, which have become famous or infamous across the Nation, are in trouble for a variety of reasons. The Bonneville Power Administration many years ago entered into net billing contracts with the participants in the Washington Public Power Supply System on three of the five powerplants which WPPSS undertook to construct.

Let me sketch very briefly the historical background.

First of all, the Bonneville Power Administration owns no generating facilities. They own transmission facilities. They are obligated under precedent and current law for the repayment of the power features in Federal projects in the Columbia basin. Those projects, generally speaking, have been multipurpose projects with flood control and irrigation benefits, as well as power production.

The acts that authorized the construction of those projects included a provision for the repayment of a portion of the construction cost which was attributed to the production of power.

The Bonneville Power Administration was created as the marketing agent for the power produced from those projects, constructed by both the Corps of Engineers and the Bureau of Reclamation.

In order to market that power effectively, they were involved in the construction of transmission lines from those power projects to the points of consumption. Bonneville Power is responsible for the repayment of the cost of those construction lines.

So there is a repayment obligation by Bonneville Power to the Treasury of the United States, both for the power features in these projects and for the transmission lines.

I might add as a footnote to the argument with respect to the point of order, that the Transmission Act of 1974 provided that the Bonneville Power Administration would receive its instructions in annual appropriations acts.

As the various entities in the Northwest were created subsequent to the construction of these power facilities, they became the ultimate marketing agents for the federally generated power, or, to put it more properly, perhaps, the power generated by Federal facilities. The State of Washington enacted a statute authorizing the formation of public utility districts and they became the major but not the sole marketing mechanism to the ultimate consumers. In addition, there are municipal entities and rural electric cooperatives throughout Oregon, Washington, Idaho, and in the areas within the Columbia River basin that are in Montana which market power.

So we have a network of entities that are supplied power from the projects in the Northwest by the facilities which are under the administrative control of the Bonneville Power Administration, but the BPA does not, itself, own any generating facilities.

When it became apparent that there was not going to be sufficient power in the Northwest to meet all of the needs of these so-called preference agencies, those public bodies granted a preference to the receipt of power from Federal projects, met to determine whether the Federal Government would authorize Bonneville Power to get into the business of building, owning and operating generating facilities.

The Northwest rather uniformly decided and asked Congress not to move into that direction. But the Bonneville Power Administration and the public power entities in the Northwest came to agreement on what was known as the hydropower accord. Additional generating power would have to be thermal rather than hydro. Since the Federal system was almost totally hydro, all of the thermal features would be built by non-Federal entities to provide the power that would be required to meet the demands of all customers, both those that are preference customers and those that are not.

After that was done, the State of Washington created the Washington Public Power Supply System, WPPSS. Bonneville, looking forward to the necessity of supplying its customers with an adequate supply of power for the demands projected at the time, contracted with WPPSS that they would, in effect, cooperate with WPPSS, their member entities, and contracting entities, for the construction of three powerplants.

That arrangement is a rather unique one, because the Washington Public Power Supply System, WPPSS, contracts with individual entities to take power from WPPSS, from these plants, once they are completed. Those entities, in turn, in effect assign the power to which they are entitled to Bonneville to be distributed. Bonneville then deducts from charges otherwise applicable to these entities an amount equal to their share of construction costs under net-billing contracts. The entities then use the money credited to pay obligations on bonds which have been issued by WPPSS for construction.

WPPSS, in addition to deciding to build these plants, also contracted with 88 other entities, 88 public entities, throughout the Northwestern States for building two other plants.

I might note that on the first three, there are contracts with a number of public entities and four investor-owned utilities on plant No. 3, but investor-owned utilities are involved only in plant No. 3.

At plants 4 and 5, there are 88 entities throughout the Northwestern United States that contracted with WPPSS to build 4 and 5. But Bonneville is not involved with 4 and 5, because they entered into contracts with WPPSS only with respect to the output on 1, 2, and 3.

WPPSS became overextended for a variety of reasons. First, the power projections were more optimistic than consumption actually proved to be. The delays that were occasioned by Government regulation and, frankly, some very poor construction management have caused the cost of those plants to increase enormously from the estimates made when all of this was undertaken. There is now no need for the power in a reasonable timeframe with respect to the fourth and fifth plants. WPPSS was unable, because of that, to go to the market to raise the money that was necessary to finance them through to completion. Just in the very recent past, WPPSS has become in default on the $2.5 billion worth of bonds that have been issued with respect to the construction of 4 and 5. That default and those bonds with respect to 4 and 5 have no direct connection to the first three plants with which Bonneville Power is involved.

Madam President, this amendment adds nothing to Bonneville's liabilities. The only way you can suggest at all that Bonneville has any liability under this amendment that they do not have without it, would be to recognize that WPPSS is unable to go to the bond market to finance anything. Therefore, plant No. 3, in addition to 4 and 5, would go down in addition to No. 1, which has been, in effect, mothballed or at least delayed indefinitely in its construction.

As a result, WPPSS would have then only one of the five plants that it started out to build still under construction. The other four would be stopped by one means or another.

This amendment seeks to give an alternative for financing WPPSS 1, 2, and 3 rather than having WPPSS go to the market, which it cannot do while it is under default on 4 and 5.

This would give Bonneville the authority to contract with a substitute entity, in effect, a different entity than WPPSS, to undertake exactly the same responsibility that they have in their relationship with WPPSS—no more and no less. So there is no additional liability under this amendment than there would be had WPPSS performed as they were supposed to perform in the construction of plants No. 2 and 3.

As I said earlier, plant No. 1 has been indefinitely delayed. Plant No. 2 is about 98 percent complete. It should go to fuel loading this fall and go into operation late next winter or early in the spring.

Plant No. 3, the one which is most in question under this amendment, is about 75 percent complete. This would allow an entity or entities other than WPPSS to go to the financial markets, either the bond markets or financial banks, to raise the $960 million that is necessary to complete plant No. 3, in addition to the modest amounts that are necessary for the completion of plant No. 2.

Plant No. 3 happens to be the one in which there are four investor-owned utilities involved, as well as the public entities. The four investor-owned utilities have a 30-percent interest and WPPSS has a 70-percent interest in plant No. 3. So it has an indirect effect upon the financial capacity of the four investor-owned utilities to finance their own ongoing construction program aside from their involvement in WPPSS No. 3. This begins to complicate the question with respect to the building of coal-fired plants in the Northwest, including in Montana, to produce power that will flow into the grid in the Northwest.

I go through this brief history as a way of illustrating, I hope, that Bonneville Power has no legal liability under this amendment that it does not have under the existing contractual arrangements with WPPSS—none.

The Senator from Ohio raises the issue of nonrepayment of obligations to the U.S. Treasury.

As I outlined a moment ago, their indebtedness, their schedule of repayments to the Federal Treasury, comes from two sources. The first was the power features of multipurpose Federal projects, both by the Corps of Engineers and Bureau of Reclamation. The second is the construction of transmission facilities to get that power to market, which was financed by direct appropriation and borrowings from the Treasury.

Bonneville does have a responsibility to pay that back out of the revenues generated from the sale of the electricity that is produced and distributed from those facilities and through that transmission network. Several years ago, about 20 years ago if my memory serves me correctly, they started the issue of rolling maturities, the practice of rolling maturities. What it amounts to is that every time they add a new dam, they refinance the entire structure and reschedule the entire debt. Whether that is good policy or bad policy is something that is entirely unrelated to this question before us today.

Mr. METZENBAUM. Will the Senator from Idaho yield for a question?

Mr. McCLURE. I shall be happy to yield for a question without losing my right to the floor.

Mr. METZENBAUM. Certainly.

Madam President, is it not a fact that when they roll over the maturities, when they roll over at the old interest rates and no payment on principal, it just adds further to the Federal responsibility? Because there is a difference between old rate and the rate the Federal Government is presently paying just means that if you do not collect anything on the principal, Federal taxpayers are picking up the difference.

Mr. McCLURE. Let me respond to the Senator this way. I have not gone back and tried to reconstruct my own memory on this. I am responding strictly from memory. What happens when they refinance the old debt is they pay the principal that is currently due at that time but they restructure over the new repayment period. That has the effect of stretching it out over a longer period; therefore, lowering the annual payments. Each portion of the debt has so extended the interest rate in effect on that portion of the indebtedness.

Mr. METZENBAUM. But is it not the bottom line that it winds up that the extension of that debt becomes subsidized since the Federal Government is paying obviously a considerably higher rate than the rate which it is paid back?

Mr. McCLURE. The Senator from Ohio and I have had this discussion a number of times in the past, and I suspect we will have it a number of times in the future. What he refers to as subsidy is a fixed rate of interest that was entered into at the time of the construction of a project, much as I am sure is done by people who build parking lots, parking garages, and others. When they start out, they know what the interest rate is and during the life of that contract it remains the same interest rate.

Mr. METZENBAUM. Not when it is extended. Not when it is extended, I say to my good friend. If you extend it, you pay at the current rate or a little bit higher rate because you are not meeting your debt.

Mr. McCLURE. That may well be. As I say, I have not gone back to look at the repayment schedule, because that really is not germane to the question that we have before us with respect to whether or not Bonneville can contract with a substitute entity instead of WPPSS so that they can complete plant No. 2 and plant No. 3.

Mr. METZENBAUM. Is it not the fact that there has been no repayment on principal or interest the last 2 years; that there has only been $43 million repaid on principal and interest in the last 10 years; that there has only been $638 million paid on a total of $7.8 billion, and that under this proposal, if it should become the law and the new entity is created, the additional obligation in connection with which BPA will be involved will come pretty close to another additional billion dollars? Is that not the fact?

Mr. McCLURE. Let me respond to the Senator in this way. Again, I have not gone back to verify the payment schedule or the amount that has been paid because in the view of the Senator from Idaho it really is not germane to this discussion today. I cannot dispute what the Senator says. He may have, indeed, checked the payment schedule. I have not.

Mr. METZENBAUM. I have.

Mr. McCLURE. I have not because this does not add 1 penny of additional liability that was not covered under the net billing contracts with WPPSS in the first instance.

Now, the Senator is correct that it will take almost $1 billion to complete plant Nos. 2 and 3, but that was an obligation that Bonneville Power had with WPPSS under the net billing contracts that were entered into slightly more than 10 or 11 years ago. So it does not change that. It substitutes an entity that has the capacity to borrow that money to complete the plants for one that has lost the capacity to borrow the money to complete the plants.

Mr. METZENBAUM. In order that we may zero in on the question, I will ask my friend another question. I know he is a man of integrity and I know he understands the law. Does he not recognize that this is a legislative proposal on an appropriations bill?

Mr. McCLURE. We will get to the issue of the point of order in a moment—maybe a few minutes rather than a moment—but as I indicated earlier, the Transmission Act provided the approval of Bonneville's operations, and the instructions to them on their operations was to come in appropriation language.

That is provided for in the law under which they operate and under which they have operated for many years. There has been one exception to that that I am aware of. When the Northwest Power Act was passed, we legislated instructions in addition to those instructions that have been given to Bonneville in Appropriations Acts over the last dozen or more years.

But the question the Senator raises primarily with respect to Bonneville's

repayment schedule and Bonneville's ability to repay is, it seems to me, extraneous to the question of whether or not we are going to force a further collapse in the Northwest power system. We already have seen the impact upon the bond markets and upon thousands of people across this country as WPPSS has defaulted on the bonds that were issued on Nos. 4 and 5. A lot of people that were depending upon WPPSS to continue their construction program are now looking at a total loss of $2½ billion worth of bonds. What we seek to do in an atmosphere of emergency is to give them the structure under which it is possible for them to complete the two plants that show promise of being able to be completed, one to go on line in 1984 and another one in 1985 or 1986, so that they have some power to sell to help generate revenue to repay the investors who have bought those bonds.

If we make that impossible, then we have not only the potential for a collapse on their repayment capacity with respect to the bonds on 4 and 5, as bad as that has been, but you face the possibility of a collapse on the construction of unit 3 at least, and you begin to cloud No. 2. Therefore, there is an emergency to which we are trying to respond.

Mr. JOHNSTON. Will the Senator yield?

Mr. McCLURE. I think there is adequate precedent for what we are trying to do and more than enough reason to attempt to do it this way. I would be happy to yield to the Senator from Louisiana.

Mr. JOHNSTON. Madam President, as the Senator from Idaho knows, I am most anxious to help him complete units 2 and 3 in as expeditious a manner as possible, and it was in that spirit that we approved this legislation in the committee and in the subcommittee.

I say to the Senator, Madam President, that the idea at the time we approved the legislation was that it would be, first of all, consensus legislation which would involve the Senators from the States involved all supporting it, and, second, legislation that would be legally impregnable because if you have the legislation subject to legal doubt you may not help or expedite the completion of units 2 and 3——

Mr. McCLURE. Will the Senator yield on those points?

Mr. JOHNSTON. Yes; if I may just complete the sentence—but, rather, might simply subject the whole system to further litigation. Now, if I may just say one more thing.

As I understand it, hearings are set for Wednesday at 2 p.m. on the matter, and I ask the distinguished Senator from Idaho, would it not be better, recognizing the emergency nature of this matter, which I fully support and fully want to help in the matter in whatever manner we can, to not put this matter on this bill but, rather, delay it until after the hearings, particularly considering the fact that Chemical Bank, which has underwritten these bonds, would not comment on the legislation?

Mr. McCLURE. Will the Senator yield on those two points?

Mr. JOHNSTON. Yes.

Mr. McCLURE. First of all, with respect to consensus, as the Senator knows, the distinguished senior Senator from Oregon is the chairman of the Appropriations Committee and obviously this had his support when we marked up the bill or it would not be here. The junior Senator from Oregon also supported the inclusion of this language as did both the Senators from Washington, Senator JACKSON and Senator GORTON. Senator BAUCUS of Montana as well as Senator SYMMS from Idaho have joined in supporting this language because of the necessity of finding some way of dealing with the problem.

Mr. JOHNSTON. How many coauthors of the legislation do we have?

Mr. McCLURE. When I originally offered this provision on this appropriation bill, seven of the eight Senators from the Columbia Basin States supported it. With respect to the separate legislation I have offered and which has been placed in the RECORD, and upon which we are going to have the hearings, five of the eight Senators have supported it.

In response to the other question of the Senator from Louisiana, I do not believe that it is desirable or wise for us to delay this until we have had an opportunity to run it through the authorizing process. There is no legal impairment. There is no legal question to doing it this way, if Congress will do it. But there is question concerning the ability of Congress to act expeditiously in order to be able to alleviate this problem that haunts not just the Northwest now but the entire country as well.

Mr. JOHNSTON. I have one question with regard to the legality.

As I understand it, this would authorize State law to set up a separate entity which could then issue new bonds to complete 2 and 3. My question is this: Would the ability of this new entity to receive revenues be senior to the demands of the bondholders on WPPSS 2 and 3?

Mr. McCLURE. The demands of the bondholders?

Mr. JOHNSTON. In other words, as it now stands, you have some bondholders who have the ability to receive revenues from WPPSS on units 2 and 3. Does this allow the new entity to be senior to that claim of revenue?

Mr. McCLURE. I do not really believe that it is a question of seniority with respect to the obligations that a new entity might issue, whether it would be by bonds or by other financial arrangements, because under the net billing agreement that Bonneville has already signed, Bonneville is responsible for repayment of those debts.

Mr. JOHNSTON. Which debts—the existing debts?

Mr. McCLURE. The existing debts on 1, 2, and 3. They would be equally responsible for paying the debts on the new entity that provided the additional money to complete 2 and 3.

Mr. JOHNSTON. But the reason you create the new entity is that WPPSS has no capacity to borrow money. Their credit is no good.

Mr. McCLURE. That is not because of 1, 2, and 3. That is because of the collapse on 4 and 5.

Mr. JOHNSTON. I understand. But they cannot borrow that money.

Mr. McCLURE. That is correct.

Mr. JOHNSTON. So you create a new entity, and the only reason they would be able to borrow money is that they would be senior to these other claims.

Mr. McCLURE. No; that is not correct. The reason they would be able to borrow money is that there is a cloud over the WPPSS operations on 1, 2, and 3, because of the default of 4 and 5. The new entity would not have any responsibilities with respect to Nos. 4 and 5.

Mr. JOHNSTON. But what would they be able to pledge to the bondholders or to the——

Mr. McCLURE. The net billing contracts, which have been in effect for 12 years between Bonneville and the participants in WPPSS 1, 2, and 3 and the contract with the entity on 2 and 3.

Mr. JOHNSTON. The net billing contract is already pledged, is it not?

Mr. McCLURE. Yes.

Mr. JOHNSTON. Would you put that net billing contract junior to the new billing contract?

Mr. McCLURE. It does not make any difference, because Bonneville has the responsibility to repay all the obligations with respect to 1, 2, and 3, whether it be the old entity or the new, through rates that are charged to the consumers in the Northwest.

The Federal Treasury is not at risk; the bondholders are not at risk. As a matter of fact, the bondholders are better off, because there is more revenue coming in to help Bonneville repay.

Mr. JOHNSTON. I say to my distinguished colleague that I do not purport to be an expert on this matter. I support the ends he espouses. But as I understand it, there are serious questions, very serious legal questions, involving this whole matter. Indeed, there are some bond counsel who have a lot of egg on their faces, who have already put their reputation and their

firm name on the line, in saying that the existing obligations were OK.

Mr. McCLURE. The real question comes with respect to those who have claims against WPPSS because of the obligations on 4 and 5, whether or not bonds were issued. Therefore, the only security is a Bonneville powerplant. The problem, thus, is whether the people who have claims against WPPSS because of the 4 and 5 bonds have a right to look at the assets in 1, 2, and 3. That is a legal question for the courts. This amendment does not involve that.

Mr. GORTON. Mr. President, will the Senator from Idaho yield?

Mr. JOHNSTON. If I may make one comment: The Senator from Idaho may be entirely correct, but a matter of this kind, by necessity, must be passed pretty well by consensus—in other words, the legal experts on both sides of the aisle and the bond experts. This kind of matter, which you are going to pass without hearing and without deep consideration, has to be passed, it seems to me, by consensus.

I say to my distinguished colleagues that at this point there seems to be no consensus, and it is not that there is opposition. There certainly is not opposition from me. There may be opposition from the distinguished Senator from Ohio.

I wonder, in order to get that consensus, if we might temporarily excise this amendment from this particular bill, recognizing that we are going to have hearings on Wednesday, and seek thereafter the soonest vehicle we can to pass the legislation.

Mr. McCLURE. This is the most timely vehicle.

As a matter of fact, I would be less than completely candid if I did not confess that the real difficulty does not lie in this body. The real difficulty lies in the other body.

This is not just a vehicle. It is in fact an appropriate place for us to direct what Bonneville Power should do as provided in the Transmission statute.

The reason I introduced the legislation is that some of my friends were distressed about offering legislation on an appropriation bill. I believe we can give them the opportunity for hearings with respect to the merits, and not with respect to the procedure, by introducing separate legislation.

I say to my friend that while some slowdown in the construction of No. 3 is not very damaging if the slowdown is a planned one, if everybody knows what it is, and if there is certainty about the process at the end.

We expect to recess at the end of this week for 1 month or 5 weeks. We will be back in mid-September. We will have no other opportunity to legislate on this subject until then. If we wait, there will be great uncertainty about No. 3 and its construction schedule and its viability, and this will begin to affect not just Bonneville or WPPSS but also those investor-owned utilities that are coventurers in No. 3.

There is some urgency to try to give some certainty to this situation by positive legislative expression in the Congress of the United States at the earliest possible time. This is the earliest possible time, in my judgment, and I therefore hope we can leave this in the current bill and pass it as is.

Mr. JOHNSTON. I yield to the distinguished Senator from Washington.

Mr. GORTON. I thank my friend from Louisiana.

I should like to add to and reinforce the statements of the Senator from Idaho.

I point out the urgency of this proposal not only to my friend from Louisiana, whom I know greatly sympathizes with what we are attempting to accomplish here, but to my friend from Ohio as well. A delay in this process, even if it turns out his proposal is passed in the form of authorizing legislation 6 weeks or 10 weeks, or 6 months from now, will be extremely costly to the people of the region represented both by myself and by the distinguished Senator from Idaho. We have an emergency. We have a problem facing us which seems to be without parallel in our fiscal and construction history in this country.

A construction program which was far too ambitious and a construction program which was badly mismanaged over a period of years, so badly that two nuclear power sites were simply abandoned, now threatens to include at least one additional site, the so-called WPPSS 3. This plant is clearly needed by the Pacific Northwest as indicated by its inclusion in our regional power plan. WPPSS 3 has been constructed during the course of the last 2 or 3 years in a manner which makes it a model of construction efficiency in the nuclear power field.

In fact, until 2 or 3 months ago, the progress on WPPSS 3 was not only ahead of schedule but was under budget.

If it is abandoned at this point, if it is mothballed without any indication as to the date of its completion, it is inevitable that the almost $1 billion completion figure to which the Senator from Ohio referred earlier will, in just a few months, be a much larger figure than that, perhaps another quarter of a billion dollars. This is an additional investment which will get us no additional power, which will provide for no additional efficiency and which simply will be the cost of delay, the cost of our being bothered by procedural irregularities or by the fact that this is a rather ambitious project.

The Senator from Ohio began his set of objections to this proposal on the basis of the slowness with which the debts to the Federal Government of the Bonneville Power Administration are being paid off. This proposal has nothing to do with that subject. The rejection of this amendment by the Senator from Idaho is not going to increase the speed with which BPA pays its obligations to the United States. As a matter of fact, to the extent that it hurts and debilitates the economy of the Northwest, it will, if anything, slow down that process rather than to speed it up.

The sole question before us is how much the people of the Northwest are going to have to pay in addition to the grave losses which they and bondholders all across the country will have suffered, as a result of the insolvency of the four and five projects.

I am informed that the cost of a 1-year delay in this proposal will be $195 million, $195 million which will gain us nothing. It assumes that after that 1-year delay we will be able to go back on board with the proposal which is very much like this and in all probability is identical to this.

We would not be here debating this amendment today were WPPSS able to sell bonds in the marketplace at the present time. WPPSS has full legal authority to complete this project. It lacks the financial ability to complete the project because, for totally understandable reasons, no one will lend it any more money because of its insolvency with respect to WPPSS 4 and WPPSS 5.

So the consequences are increased costs and a threat to the solvency of investor-owned utilities which own 30 percent of the output of WPPSS 3. This is all over a concern which, at least at this point, is stated largely on a procedural basis, legislating on an appropriations bill, something which the Senate does all the time.

The Senator from Ohio raised the question that this might be intended as a bailout for bondholders but that it would not work as such. The Senator from Louisiana, paradoxically, raises the question as to whether or not this threatens bondholders in connection with WPPSS 3 by becoming a prior obligation to that which is owed to them.

I submit that neither of those is the case. At this point, the present bondholders on WPPSS 5 are not threatened. They are being paid the obligations which are owed them at the present time out of charges which the Bonneville Power Administration makes under the net billing agreements against those who purchase their power through Bonneville. That will continue if this amendment passes and if the project is a success.

What will be the difference? The specific project or the specific methodology which is now proposed does not involve the issuance of future bonds. It involves loans in the terms of 8 to 10 percent which are financially feasi-

ble. We would not be here if that had not already been determined to be a method by which the money for the completion of this project can be made.

When WPPSS 3 is completed it will, of course, produce power which will, in turn, produce income and will, therefore, increase rather than decrease the security of the bondholders in WPPSS 3.

This is not a proposed bailout for the bondholders in WPPSS 4 and 5. That is not only not the intention of the Senator from Idaho, it is not the proposal of anyone else who is involved in this matter. It is the fact that the bonds for WPPSS 4 and 5 have been repudiated. That means that we need this legislation in order to complete 3.

The Senator from Ohio has also raised the question of opposition, or at least questions, by certain public utility districts and other public power advocates in the Pacific Northwest about the nature of this proposal.

Reading one point which spoke of it as a "piecemeal solution," I think it only fair to say to the Senator from Ohio as well as to the Senator from Louisiana that much of that comes from the fact that at least certain representatives of those PUD's want legislation to include a bailout by Congress of the bondholders in projects 4 and 5, something which I know the Senator from Ohio would oppose from beginning to end and something which is not being proposed here by the Senators from the Pacific Northwest.

We are not asking for a bailout of those bondholders. We do not intend to do so. Some people in our region who now are unwilling to support this proposal do want Congress to do exactly that. They do not oppose the completion of the construction of powerplant No. 3, but they want a Federal solution to the disaster which has overtaken 4 and 5 at the present time.

We have a situation here which is a true emergency. We sincerely request not only the Senator from Louisiana but the Senator from Ohio as well not to block this, but to help us see to it that by far the best solution for our people, for our constituents, a solution which is not going to cost the taxpayers and the rest of this Nation 1 cent, is in fact implemented.

It is very important that this be implemented and, moreover, even these conditional objections can be met. The Senator from Idaho, as much as I, recognizes the fact that we cannot pass this bill and get the President's signature on it between now and the time which we leave. This bill is not going to go through the House of Representatives in the course of the next 2 or 3 days. The questions raised by all of those who question this proposal, whether they have to do with the bonds or the borrowing, whether they have to do with congressional procedure, whether they have to do with opinions of the GAO, whether they have to do with the responsibility of certain utilities in Oregon and rural electric cooperatives, are almost certain to be solved during the course of the month of August and early September.

A hearing is set in this body for Wednesday on an identical piece of legislation. A hearing is set in the House of Representatives for mid-September. It is far better that we pass this amendment at the present time, recognizing that it will not become law unless all of those questions are answered, and allowing it to become law if the House of Representatives and if the members of the conference committee in this Senate find they are solved, than to allow this vehicle to go by, to wait for something which, for all practical purposes, cannot pass in the course of the next 4 or 5 months.

That, I say to the Senator from Louisiana, is the real question. This is the important trend. It is not going to pass a conference committee, it is not going to pass the House of Representatives, unless these questions are answered. But we are not going to get the opportunity to answer those questions on time unless we include this provision in this bill at this time. On behalf of our constituents, I ask that the Senate facilitate help to our people rather than putting them in jeopardy.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. GORTON. I yield

Mr. McCLURE. I think it is obvious we will not be able to complete action on this amendment this evening. I think the majority leader is about to ask us to temporarily set it aside. Before doing that, however, I want to put the Senate on notice of two things: One is that I will propose an amendment to the amendment at the appropriate time which states as follows: On page 81, line 14, before the period insert the following:

: Provided, That all of the restrictions and limitations set forth in 16 U.S.C. 839d(j)(1) shall apply to any contracts or obligations entered into by the administrator pursuant to this provision

That language will be added because the Treasury Department wants to make certain what I believe is certain under the existing statute, that the full faith and credit of the United States is in no way pledged to the repayment here, and that it is the intent of the legislation to make the ratepayers bear all costs associated with the project. As I mentioned I believe this is the current law and the effect of this amendment.

Also, Mr. President, I ask unanimous consent that a letter addressed to me dated August 1, 1983, from the Deputy Secretary of the Treasury, Mr. R. T. McNamar, in support of this amendment be printed in the RECORD.

The PRESIDING OFFICER (Mr. WILSON). Is there objection?

Mr. METZENBAUM. Mr. President, reserving the right to object, I do want to say to my friend from Idaho that I indicated I was prepared to raise a point of order in order that he might be heard, and I did not yield to him with the thought in mind that he was going to propose an amendment to the amendment. I think under the circumstances that is somewhat irregular.

Mr. McCLURE. Mr. President, will the Senator yield further? Let me say that I seek no advantage in doing this. I just want people to understand what this language says, and the purpose of the amendment is simply to make abundantly clear what I think is a redundant explanation of what the law is already. I do not think it adds to or subtracts from either the Senator's position or mine.

Mr. METZENBAUM. We can discuss it further tomorrow. I think the majority leader is seeking recognition.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE DEPUTY SECRETARY
OF THE TREASURY,
Washington, D.C., August 1, 1983.

Hon. JAMES A. McCLURE,
Chairman, Senate Subcommittee on Interior and Related Agencies, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The situation at Washington Public Power Supply System is complicated and its resolution is important to the long-term power needs of the Pacific Northwest. Treasury is anxious to work with the Congress to provide clarifying legislation to facilitate the completion of WPPSS Units 2 and 3. We share your sense of urgency in developing a solution that meets the needs of all parties, avoids a bailout of the creditors and equity holders, and minimizes Federal Government outlays.

Treasury has reviewed Section 317 of H.R. 3363 as reported by the Senate and S. 1701, which contemplates that ratepayers in the region that receive the power generated by WPPSS Units 2 and 3, and not the federal government, would be responsible for paying all costs associated with these two plants. This legislation would permit the Bonneville Power Administration ("BPA") to contract with a newly created entity to pay the principal and interest due on securities issued in the public credit markets by that new entity. This new authority would be used to enable completion of the two nuclear power plants (WPPSS Units 2 and 3). Treasury believes that it is important to assure investors and all those concerned with this matter that the intent of the legislation is not to extend federal involvement. Clarity here will help to avoid creating confusion about the intent of this provision. In our view, this purpose can best be secured if the modifications recommended below are adopted. Subject to these modifications, Treasury does not object to the proposed legislation.

First, since Treasury understands that the intent of the legislation is to make the ratepayers bear all costs associated with this project. Treasury believes an amendment

that clarifies that intent is highly desirable. Such a clarifying amendment is enclosed herewith. The intent of this additional language, and of the legislative history language described below, is to ensure that no federal funds, in the form either of borrowings from Treasury or of appropriations, be used to complete the two nuclear power plants.

Second, to clarify this position, the following language should be added either in the Conference Report discussing this provision or in clarifying statements during consideration of this legislation:

The Congress specifically intends that all of BPA's costs associated with the new financing for WPPSS No. 2 and No. 3 be recovered in BPA's rates by both BPA and FERC. Thus all funds needed to pay all costs associated with completion of these plants will be borne solely by the ratepayers, and the Administrator may not use funds from appropriations or from the issuance of securities to the Secretary of the Treasury pursuant to 16 U.S.C. 838k(a) to pay for any of the costs associated with completing WPPSS No. 2 and No. 3. Further, by incorporating by reference the limitations and restrictions set forth in 16 U.S.C. 839d(j)(1), Congress intends that any contract entered into by BPA shall be secured solely by revenues received by the Administrator from the sale of electric power and other services and that any such contracts or obligations are not, and shall not be construed to be, secured by the full faith and credit of the United States.

If these two conditions are met, the Office of Management and Budget has advised that there is no objection to Section 317 of H.R. 3363 as reported by the Senate and S. 1701 from the standpoint of the Administration's program.

Sincerely,

R. T. McNAMAR,
Deputy Secretary.

Mr. McCLURE. The Senator from Texas had an amendment which he wished to offer. We could temporarily set this amendment aside and adopt this amendment by voice vote without any time at all, if it is all right.

Mr. METZENBAUM. I am prepared, if the majority leader wishes to put us in recess, but other than that I think we ought to stay on this issue.

Mr. BAKER. Mr. President, I gather from the visual colloquy and the eloquent gestures I saw made by both participants that it may be in order for the distinguished Senator from Texas to ask unanimous consent to temporarily lay aside the pending committee amendment so that he may offer an amendment; is that correct?

The PRESIDING OFFICER. The Senator from Texas is recognized for that purpose.

Mr. McCLURE. Mr. President, reserving the right to object—and I shall not—under this parliamentary procedure the pending amendment would be the pending business on resumption of consideration of this bill?

Mr. BAKER. Yes, Mr. President, it would be.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Amendment No. 2108

(Purpose: To change the name of the Institute for Museum Services to the Endowment for Museums)

Mr. TOWER. Mr. President, I send to the desk an amendment and ask the clerk to report.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Texas (Mr. TOWER) proposes an amendment numbered 2108.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 82, after line 15, add the following:

SEC. . Any reference in any law, order, or regulation, including this Act, to the—

(1) Institute of Museum Services shall be deemed to refer to the National Endowment for Museums;

(2) the National Museum Services Board or the Museum Services Board shall be deemed to refer to the National Endowment for Museums Board; and

(3) the Director of the Institute when such references refers to the Director of the Institute of Museum Services shall be deemed to refer to the Director of the National Endowment for Museums.

Mr. TOWER. Mr. President, the simple purpose of this amendment is to change the name of the Institute of Museum Services to the National Endowment for Museums.

The Institute for Museum Services was at one time a part of the Department of Education. It has now been separated by congressional action from the Department of Education and made a companion agency of the Endowment for the Arts and Endowment for the Humanities.

It is appropriate, therefore, that the name be changed. The amendment I would propose would only change the name. It would not change the funding profiles, it would not change anything except the name, and it has no budgetary impact.

I have discussed it with the distinguished Senator from Idaho (Mr. McCLURE), the Senator from Louisiana (Mr. JOHNSTON), I have discussed it with Senator PELL, and I think he would deliver himself of his own sentiments on the issue.

May I say that the matter will be in conference, and if there is any problem with that amendment, obviously the conferees can act appropriately when they reach the conference.

It seems to me that since the Institute for Museum Services does perform services for both the arts and the humanities, it is an appropriate name change which has been requested by the board of directors of the Institute and by the outgoing director of the Institute who, very coincidentally, happens to be my wife.

May I yield to the Senator from Rhode Island?

Mr. PELL. Mr. President, I appreciate the words of the Senator from Texas very much indeed and also the thought here of elevating the Institute for Museum Services.

However, while the board of the institute supports this concept, there is some doubt, I believe, in the museum community as to the effect of this amendment because it might well dry up support for museums from the Endowment of the Arts and the Endowment of the Humanities, and for that reason, having been the author of the original bill, I have some reservations about this amendment.

However, out of respect and friendship for my colleague from Texas and for his wife, who has been the director of the institute, I will not object at this time, but I would hope that before it is decided upon in conference ample time is allowed so that the museum community itself can make their views known as well.

Mr. TOWER. May I say I agree with the Senator from Rhode Island that if any serious objections are raised from the museum community itself—and I do not think it will be, and if it did I would not offer this—but if it is I think, of course, the conferees will take that into consideration before it is disposed of.

Mr. JOHNSTON. Mr. President given the sentiments of my distinguished friend for Rhode Island as well as my colleague from Texas, we have no objection.

Mr. McCLURE. Mr. President, I have no objection, subject to the limitations which have been expressed. I am ready to accept the amendment.

The PRESIDING OFFICER (Mr. MURKOWSKI). The question is on agreeing to the amendment of the Senator from Texas.

The amendment (No. 2108) was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF PERIOD FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, with my usual lack of success in estimating time, I estimated that we would be out by 6 p.m.

Mr. President, I ask unanimous consent that there now be one more period for the transaction of routine morning business to go not beyond the hour of 6:30 with Senators permitted to speak therein.

THE TEXTILE AGREEMENT WITH RED CHINA—ANOTHER EXERCISE OF FOLLY?

Mr. HELMS. Mr. President, this past weekend officials of the United States and the so-called People's Republic of China reached agreement on a new bilateral treaty setting limits on Red Chinese textile and apparel imports into the United States. This new agreement is crucial to the economy of North Carolina, where roughly 300,000 workers earn their livelihoods from textiles and apparel.

Mr. President, I have not seen all the details of the agreement. But based on what I have been able to find out since it was initialed in Peking Saturday night, I have reservations about it.

I was disappointed, for example, that the agreement was reached in the absence of U.S. industry advisers to the talks, who walked out to demonstrate their concern that the U.S. Government position should have been tougher.

Mr. President, these are critical times for the U.S. textile and apparel industries. Their very survival—and the economic future of the countless American workers they employ—could well depend on what happens in the next few months.

It is imperative, then, the every act of this administration with regard to textile and apparel imports be consistent with President Reagan's commitment to seek to limit the growth of textile imports to the growth of the domestic market. I cannot say whether or not this agreement will provide a framework for meeting this commitment. I do not know enough about it yet.

The question right now is whether U.S. officials charged with the duty of implementing our textile agreements will seek to carry out the President's commitment within the framework of this agreement. Every one of them should be aware of this commitment. They should also be aware that they are under close scrutiny to see that their actions are consistent with it. What is at stake, Mr. President, are thousands of jobs all over America. We have already exported too many U.S. textile and apparel jobs to the Far East. This trend must be reversed.

In the event this agreement is not tough enough, I will call upon the administration to renegotiate it. Whether it is deemed tough enough will depend in large measure on how it is enforced. If enforcement is adequate, maybe the textile industry will be able to live with it.

I have seen reports that the new agreement would allow imports of Communist Chinese textiles and apparel in 35 of 106 specific categories to grow at a rate of from 2 to 4 percent each year. What this will mean in practice remains to be seen. Unfortunately, under our previous bilateral agreement with Red China—which purported to limit textile and apparel growth to 4 percent a year—the volume of imports from Red China surged 40 percent in 1980, 73 percent in 1981, and 25 percent in 1982. This year to date imports from Red China are up 16 percent despite unilateral quotas. These figures indicate how important enforcement is.

The Communist Chinese need hard currency, and one of the few ways they have to get it is by exporting textiles and apparel for sale in our markets. Naturally, the more textiles and apparel they can sell us, the more hard currency they will have. In 1982, Red China shipped 800 million dollars' worth of textiles and apparel to the United States—11 percent of all U.S. imports. You can bet the Red Chinese will aggressively seek to increase their exports to the United States, and to acquire an even greater share of our market.

I have never been an advocate of trade with Communist China, Mr. President. My position on that is well-known, as is my record. I vigorously fought President Carter's proposal to extend most-favored-nation trading status to Communist China. I was apprehensive when our wheat farmers sought new markets in Red China following President Carter's grain embargo with the Soviet Union. And I will continue to caution against trying to build our economic stability on trade with Communist nations.

I will continue to monitor carefully developments in textile and apparel trade. And I also intend to promote vigorously the interests of American textile and apparel workers and manufacturers with this administration.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed in the end of the Senate proceedings.)

PRESIDENTIAL APPROVAL

A message from the President of the United States announced that on August 1, 1983, he had approved and signed the following enrolled bill:

S. 459. An act to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purpose of relocating a portion of the city of American Falls out of the area flooded by the American Falls Reservoir.

MESSAGE FROM THE HOUSE RECEIVED DURING THE ADJOURNMENT

ENROLLED BILL SIGNED

On July 29, 1983, during the adjournment of the Senate the Secretary of the Senate received a message from the House of Representatives announcing that the Speaker pro tempore had signed the following enrolled bill:

H.R. 3069. An act making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes.

Under the authority of the order of July 29, 1983, the enrolled bill was signed by the majority leader (Mr. BAKER).

MESSAGES FROM THE HOUSE

At 12:16 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House insists upon its amendment to the bill (S. 675) to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, "to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes," and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. PRICE, Mr. BENNETT, Mr. STRATTON, Mr. NICHOLS, Mr. DANIEL, Mr. MONTGOMERY, Mr. ASPIN, Mr. DELLUMS, Mr. DICKINSON, Mr. WHITEHURST, Mr. SPENCE, Mrs. HOLT, Mr. HILLIS, and Mr. BADHAM; from the Permanent Select Committee on Intelligence, only when differences regarding intelligence-related activities are under consideration: Mr. BOLAND, Mr. MINETA, Mr. MCCURDY, Mr. ROBINSON, and Mr. STUMP; as additional conferees for consideration of section 1030C and 1030D of the Senate bill, and modifications thereof committed to conference: Mr. PERKINS, Mr. HAWKINS, Mr. FORD of Michigan, Mr. BIAGGI, Mr. ERLENBORN, and Mr. GOODLING, be the managers of the conference on the part of the House.

At 1:25 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 622. An act to amend title 5 of the United States Code to provide health benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes; and

H.R. 2760. An act to amend the Intelligence Authorization Act for fiscal year 1983 to prohibit U.S. support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups organizations, or movements seeking to overthrow governments of countries in Central America.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 321. Joint resolution to proclaim a day of national celebration of the 200th anniversary of the signing of the Treaty of Paris.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

At 5:25 p.m. a message from the House of Representatives, delivered by Mr. Berry, one of its clerks, announced that the House had passed the following bills, without amendment:

S. 727. An act to authorize the Secretary of the Interior to set aside certain judgment funds of the Three Affiliated Tribes of Fort Berthold Reservation in North Dakota, and for other purposes.

S. 930. An act to authorize the Smithsonian Institution to purchase land in Santa Cruz County, Ariz.

The message further announced that the House had agreed to the following concurrent resolutions, without amendment:

S. Con. Res. 7. A concurrent resolution to authorize and provide for a bust of Carl Hayden to be placed in the Capitol.

S. Con. Res. 58. A concurrent resolution correcting the enrollment of S. 272.

The message further announced that the House has passed the following bills each with an amendment in which it requests the concurrence of the Senate.

S. 46. An act to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping'."

S. 1098. An act to consolidate and authorize certain ocean and coastal programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce.

The message further announced that the House agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (S. 272) to improve small business access to Federal procurement information.

The message also announced that the House has passed the following bills and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 1256. An act to amend title 14, United States Code, to provide for selective preappointment travel to the Coast Guard Academy for cadet applicants, and for other purposes;

H.R. 1372. An act to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska;

H.R. 2590. An act to amend the Agricultural Adjustment Act to authorize marketing research and promotion projects, including paid advertising for filberts and to amend the Potato Research and Promotion Act;

H.R. 2727. An act to codify without substantive change recent laws relating to money and finance and transportation and to improve the United States Code;

H.R. 3232. An act to amend title 28 of the United States Code to authorize payment of travel and transportation expenses of newly appointed special agents of the Department of Justice;

H.R. 3677. An act to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program;

H.J. Res. 297. Joint resolution providing for appointment of Jeannine Smith Clark as a citizen regent of the Board of Regents of the Smithsonian Institution; and

H.J. Res. 338. Joint resolution to correct Public Law 98-63 due to an error in the enrollment of H.R. 3069.

HOUSE MEASURES REFERRED

The following bills and joint resolution were read the first and second times by unanimous consent, and referred as indicated:

H.R. 622. An act to amend title 5 of the United States Code to provide death benefits to survivors of Federal law enforcement officers and firefighters, and for other purposes; to the Committee on Labor and Human Resources.

H.R. 1256. An act to amend title 14, United States Code, to provide for selective preappointment travel to the Coast Guard Academy for cadet applicants, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 1372. An act to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska; to the Committee on Commerce, Science, and Transportation.

H.R. 2590. An act to amend the Agricultural Adjustment Act to authorize marketing research and promotion projects, including paid advertising for filberts and to amend the Potato Research and Promotion Act; to the Committee on Agriculture, Nutrition, and Forestry.

H.R. 2727. An act to codify without substantive change recent laws related to money and finance and transportation and to improve the United States Code; to the Committee on the Judiciary.

HOUSE MEASURE READ THE FIRST TIME

The following bill was read the first time:

H.R. 2760. An act to amend the Intelligence Authorization Act for fiscal year 1983 to prohibit U.S. support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America.

MEASURE PLACED ON THE CALENDAR

The following joint resolution was read twice and placed on the calendar:

H.J. Res. 297. A joint resolution providing for appointment of Jeannine Smith Clark as a citizen regent of the board of Regents of the Smithsonian Institution.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary reported that on today, August 1, 1983, he had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 67. Joint resolution to designate the week of September 25, 1983 through October 1, 1983, as "National Respiratory Therapy Week."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1536. A communication from the Commissioner of the Bureau of Reclamation, Department of the Interior, transmitting, pursuant to law, a report on modifications to Island Park Dam, Minidoka project, Idaho-Wyo.; to the Committee on Energy and Natural Resources.

EC-1537. A communication from the Federal Inspector, Alaska Natural Gas Transportation System, transmitting, pursuant to law, a report on the status of the Alaska Natural Gas Transportation System for April through June 1983; to the Committee on Energy and Natural Resources.

EC-1538. A communication from the president of the American Trucking Associations, Inc. and the executive director of the Regular Common Carrier Conference, transmitting, for the information of the Senate, a report on highway damage by causes other than large trucks; to the Committe on Finance.

EC-1539. A communication from the Chairman of the Board of Trustees of the Public Defender Service of the District of Columbia, transmitting, pursuant to law, the annual report of the Service for fiscal year 1980; to the Committee on Governmental Affairs.

EC-1540. A communication from the Chief of the Army and Air Force Exchange Service, transmitting, pursuant to law, the annual report on the financial condition of the pension plan of the Service for calendar year 1982; to the Committee on Governmental Affairs.

EC-1541. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a list of the

reports issued by the General Accounting Office for the month of June 1983; to the Committee on Governmental Affairs.

EC-1542. A communication from the Deputy Chief of Staff for Installations and Logistics, Department of the Navy, transmitting, pursuant to law, the annual report of the retirement plan for civilian employees of the U.S. Marine Corps exchanges, recreation funds, clubs, messes, and the Marine Corps Exchange Service for calendar year 1982; to the Committee on Governmental Affairs.

EC-1543. A communication from the Deputy Assistant Secretary of the Air Force (Logistics and Communications), transmitting, pursuant to law, a report on the conversion of the mess attendant function at Loring Air Force Base to performance by contractor; to the Committee on Armed Services.

EC-1544. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the food services function at the Naval Regional Medical Center, Charleston, S.C., to performance by contractor; to the Committee on Armed Services.

EC-1545. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, a report entitled "Current Cost-Sharing and Financing Policies for Federal and State Water Resources Development"; to the Committee on Environment and Public Works.

EC-1546. A communication from the Secretary of Education, transmitting, pursuant to law, final regulations for the Indian fellowship program; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. COHEN, from the Committee on Governmental Affairs, without amendment:

S. Res. 192. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1001. Referred to the Committee on the Budget.

By Mr. COHEN, from the Committee on Governmental Affairs, with an amendment in the nature of a substitute and an amendment to the title:

S. 1001. A bill to authorize appropriations for the Office of Federal Procurement Policy for an additional 5 fiscal years.

COMMITTEE DISCHARGED

The Committee on Energy and Natural Resources discharged the following bill, which was placed on the calendar:

S. 724. A bill to authorize the U.S. Army Corps of Engineers to undertake activities to provide new public works investment, grants to the several States to encourage and foster the construction of necessary public capital investment projects, to assist in creating new and productive jobs, and for other purposes.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ROTH, from the Committee on Governmental Affairs:

Judith W. Rogers, of the District of Columbia, to be an associate judge of the District of Columbia Court of Appeals for the term of 15 years;

A. Franklin Burgess, of the District of Columbia, to be associate judge of the Superior Court of the District of Columbia for the term of 15 years.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GRASSLEY (for himself, Mr. JEPSEN, Mr. GORTON, and Mr. COCHRAN):

S. 1716. A bill to clarify the personal injury and death provisions of section 844 of title 18, United States Code, relating to arson; to the Committee on the Judiciary.

By Mr. SPECTER (for himself, Mr. DIXON and Mr. SASSER):

S. 1717. A bill to amend the Railroad Unemployment Insurance Act to extend the supplemental benefits provision for 1 year; to the Committee on Labor and Human Resources.

By Mr. DANFORTH (by request):

S. 1718. A bill to amend the Trade Act of 1974 to renew the authority for the operation of the Generalized System of Preferences, and for other purposes; to the Committee on Finance.

By Mr. METZENBAUM:

S. 1719. A bill to amend the Internal Revenue Code of 1954 to eliminate capital gain treatment of timber income; to the Committee on Finance.

By Mr. PELL:

S. 1720. A bill to amend the Federal Reserve Act to provide for increased representation of small business interests on the Board of Governors of the Federal Reserve; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. BINGAMAN:

S.J. Res. 141. A joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "Carrier Alert Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. LEAHY (for himself, Mr. LAUTENBERG and Mr. SASSER):

S. Res. 191. A resolution relating to justice in the case of the slain American churchwomen in El Salvador; to the Committee on Foreign Relations.

By Mr. COHEN:

S. Res. 192. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1001; from the Committee on Governmental Affairs; to the Committee on the Budget.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GRASSLEY (for himself, Mr. JEPSEN, Mr. GORTON, and Mr. COCHRAN):

S. 1716. A bill to clarify the personal injury and death provisions of section 844 of title 18, United States Code, relating to arson; to the Committee on the Judicary.

PUBLIC SAFETY OFFICERS PROTECTION ACT

● Mr. GRASSLEY. Mr. President, I rise today to introduce legislation that would clarify the enhanced penalty provisions of Federal laws relating to the use of explosive materials in arson fires.

These enhanced penalty provisions were made part of the law in recognition that a person who intentionally sets a fire to a building or other structure, sets in motion a destructive force that may take the life of others. It was a recognition that arson is a crime of violence, not merely a crime against property.

It was a recognition that a natural and foreseeable consequence of an arsonist's acts are that firefighters may be injured, or even die, fighting the fire. It was a recognition on the part of Congress, that the arsonists must be held accountable for this highest of crimes, the taking of human life.

Because of the ambiguity in the law that this legislation addresses, at least one Federal court has held that the enhanced penalty provisions do not apply to injuries to firefighters. This, in fact, happened recently in Sioux City, Iowa.

There, two firefighters, Mr. Michael L. Johnson and Mr. Kirk M. Wicker died fighting a fire set by an arsonist because his business was failing. Six other firefighters were injured.

As tragic as that was, insult was added to injury when a Federal court ruled, in the criminal prosecution of the arsonists, that the enhanced penalty provisions of 18 U.S.C. 844 did not apply to the death and injury of firefighters. Instead, the arsonists were treated as though all they had done was set fire to a building. They were not punished for the murder of the firemen.

Now imagine if you will, Mr. President and my colleagues. Imagine that you are the close relative or friend of a person that has chosen to risk his life and safety, protecting the lives and property of your community. And then some night, or in the early morning hours as happened in Sioux City, your friend or loved one loses his life while fighting a fire set by an arsonist.

Imagine that just as you are coming to grips with that tragedy, consoling yourself with the knowledge that public service was what your loved one wanted to do, something that they felt was important. And then some Federal court rules that this courageous person who has given his life is not included in the protection of the statute. And then the arsonist is sentenced by the court as though no one had been hurt. As though no one had died. As

though only a building had been destroyed.

The Public Safety Officers Protection Act would clearly express the intent of Congress that injuries, or deaths, of public safety officers performing their duties fighting an arson fire are covered by the enhanced penalty statute. The law currently provides that the maximum penalty for an arson fire resulting in injury is doubled, and if death results, any penalty, including the death penalty, may be imposed.

Now I want to make clear for the benefit of some of my colleagues that this legislation would not create a death penalty provision nor impose a more severe penalty than Congress has already authorized. Nor would it, in my view, bring under the protection of the statute any person that is not already, intended to be, under its protection. Rather, it would make crystal clear that public safety officers, including police and firemen, are under its protection.

Mr. President, and my colleagues, between 1978 and 1982, 67 firefighters in the United States lost their lives fighting fires set by arsonists. Many times that number were injured, some permanently disabled.

It is common knowledge that many such arson fires are set by people acting for monetary gain. I believe that if a man whose business is failing is considering having a fire set to his business to collect the insurance, the knowledge that he may spend 20 years in prison if a firefighter is injured, and may receive the death penalty if one is killed, may just prevent that crime from taking place.

Mr. President, I ask unanimous consent that the text of this bill be printed following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1716

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Public Safety Officers Protection Act".

SEC. 2. (a) Subsection (d) of section 844 of title 18, United States Code, is amended by—

(1) striking out "personal injury results" and inserting in lieu thereof "personal injury results to any person, including any public safety officer performing duties as a direct or proximate result of conduct prohibited by this subsection,"; and

(2) striking out "deaths results," and inserting in lieu thereof "death results to any person, including any public safety officer performing duties as a direct or proximate result of conduct prohibited by this subsection,".

(b) Subsection (f) of section 844 of such title is amended by—

(1) striking out "personal injury results" and inserting in lieu thereof "personal injury results to any person, including any public safety officer performing duties as a direct or proximate result of conduct prohibited by this subsection,"; and

(2) striking out "deaths results" and inserting in lieu thereof "death results to any person, including any public safety officer performing duties as a direct or proximate result of conduct prohibited by this subsection,".

(c) Subsection (i) of section 844 of such title is amended by—

(1) striking out "personal injury results" and inserting in lieu thereof "personal injury results to any person, including any public safety officer performing duties as a direct or proximate result of conduct prohibited by this subsection"; and

(2) striking out "deaths results" and inserting in lieu thereof "death results to any person, including any public safety officer performing duties as a direct or proximate result of conduct prohibited by this subsection,".●

By Mr. SPECTER (for himself, Mr. DIXON, and Mr. SASSER):

S. 1717. A bill to amend the Railroad Retirement Unemployment Insurance Act to extend the supplemental benefits provison for 1 year; to the Committee on Labor and Human Resources.

UNEMPLOYED RAILROAD WORKERS SUPPLEMENTAL BENEFITS EXTENSION ACT OF 1983

Mr. SPECTER. Mr. President, today I am introducing, along with Senators DIXON and SASSER, legislation that will reinstate the program of supplemental unemployment benefits for railroad workers that was authorized in the emergency jobs bill and expired on June 30, 1983.

In the jobs bill we appropriated $125 million to finance an additional 10 weeks of unemployment compensation for those railroad workers who had exhausted the 26 weeks to which they were entitled. Congress inadvertently eliminated the original extended benefits program with enactment of the Omnibus Budget Reconciliation Act of 1981.

Fortunately, this program has cost much less than expected. As of July 21, 1983, the Railroad Retirement Board had only paid out $41 million.

When the supplemental benefits program expired, many railroaders had not exhausted their supplemental benefits. And despite our seeming recovery, many workers continue to be laid off or will remain jobless for many weeks. It is imperative that we commit the unused resources included in the jobs bill to give needed relief to unemployed railroad workers and their families.

The seasonally adjusted unemployment rate in the railroad industry during May 1983 was a staggering 16.9 percent. Prior to reconciliation of 1981, a rate of approximately 8 percent would trigger additional weeks of benefits. Originally, extended benefits would also be awarded if the insured unemployment rate reached 4.5 percent. The Congressional Budget Office, for the purposes of fiscal year 1984 budget, has until now contended that the IUR would remain above this level for at least the first three quarters of the next fiscal year.

Mr. President, the Congress has acted responsibly in providing as many as 63 weeks of unemployment benefits to workers in the general economy who have involuntarily lost their jobs and have exhausted their basic benefits component. Railroad workers and their families should be treated with no lesser standard of compassion. They, too, know the hardships of long-term unemployment; they are the individuals who bore the brunt of our prolonged economic slump. It is our duty to act without delay to provide a modicum of support until they return to the comfort and security they once knew well.

In May, the number of railroad workers collecting unemployment checks hit a high of 30,000, and has since decreased steadily. In mid-July, only 8,500 workers filed for benefits, reflecting both increased employment in the railroad industry and the end of the supplemental benefits program. In any case, sufficient funds remain to finance a supplemental program during the 1983-84 benefit year, which began July 1.

The bill I place before the Senate today, the Unemployed Railroad Workers Supplemental Benefits Extension Act, will afford those railroaders with less than 10 years of service who have already received their initial 26 weeks of benefits an additional 10 weeks of support.

Furthermore, those unemployed who had not received the full 10 weeks of supplemental compensation as of June 30 when the program ended will not receive their remaining benefits.

My State of Pennsylvania counts among its residents more unemployed railroad workers than any other State. They, and the more than 70,000 railroad workers who have been laid off since the recession began look to us now for guidance and support. I urge my colleagues to join me in pursuing rapid enactment of this important legislation.

● Mr. SASSER. Mr. President, I rise today to join my distinguished friend and colleague from Pennsylvania, Mr. SPECTER, in offering legislation which is aimed at lessening the dreaded consequences of unemployment for thousands of railroad workers in this country.

The economic recession we have experienced over the past 2½ years has exacted a heavy burden on millions of working Americans. Unemployment has climbed to levels not seen since the Great Depression. And although there are encouraging economic signs on the horizon, the latest statistics provided by the Bureau of Labor Statistics indicate that civilian unemployment stands at 10 percent. In other

words, there are still over 11 million Americans who cannot find work.

In the recently passed budget resolution, it was assumed that unemployment for the next fiscal year would continue to remain above 9 percent and would be 8.5 percent for fiscal year 1985, despite significant fiscal restraints and an improving economy. The administration, in its mid-session review of the fiscal year 1984 budget released last week, concedes 8.9 percent unemployment for the coming fiscal year. Thus, it is painfully obvious that even so much as a glimmer of economic prosperity will elude a significant portion of the population.

The railroad industry has been particularly hard hit by the recession. In May, unemployment in the rail industry stood at 16.9 percent. Since 1981, rail employment has dropped from 503,000 to 380,000 in March of this year. Although unemployment has steadily declined since March, today there are nearly 100,000 more unemployed railroad workers than 2 years ago.

The purpose of this legislation is to provide relief in the form of supplemental unemployment benefits to those rail workers with less than 10 years of service. Earlier this year, Congress passed legislation similiar to this as part of the emergency jobs bill. Unfortunately, payment of these benefits expired on June 30. For many thousands of rail workers, the 10 week extension enacted in the jobs bill was little more than a cruel aberration. What we are attempting to do is merely live up to the spirit of the legislation that passed Congress a few short months ago. Our bill would allow those workers afflicted with unemployment to take full advantage of the 10 week extension of supplemental benefits. The Railroad Retirement Board estimates that anywhere from 30,000 to 50,000 workers would benefit from this legislation.

There is absolutely no reason why railroaders should be treated differently than other workers. In the general economy, it is possible for workers to receive as much as 63 weeks of unemployment benefits. Yet, to these rail workers with less than 10 years service, there is the reality of only receiving in some instances no more than 26 weeks. The despair, frustration, and need for hope is every bit as real to these individuals as it is to all others.

Furthermore, it is estimated that the cost of this legislation will be negligible. In the jobs bill, we appropriated $125 million for this program. To date, only $41 million has been spent. It is estimated that the program called for in this bill will cost approximately $40 to $50 million. Thus, it is possible to pay for these benefits from moneys already appropriated and still realize savings.

Mr. President, I urge my colleagues to give this matter their full attention, and sincerely hope that they will join us in attempting to remedy this serious problem.●

By Mr. DANFORTH (by request):

S. 1718. A bill to amend the Trade Act of 1974 to renew the authority for the operation of the Generalized System of Preferences, and for other purposes; to the Committee on Finance.

GENERALIZED SYSTEM OF PREFERENCES RENEWAL ACT OF 1983

● Mr. DANFORTH. Mr. President, today I am introducing legislation on behalf of the administration to reauthorize the Generalized System of Preferences (GSP) which is to expire January 3, 1985. When the GSP was first implemented in 1976, its purpose was to help developing countries diversify their economies. By encouraging development through trade, the GSP program was designed to lessen a developing country's need for external assistance and make that country a participant in the international trading system.

All developed countries that participate in the General Agreement on Tariffs and Trade (GATT) now have GSP schemes. The U.S. GSP program was authorized by Congress in title V of the 1974 Trade Act. Under the program, the President designates both countries and products eligible for duty-free treatment. Articles are first designated based on their import-sensitivity. Certain products are statutorily exempt, such as textiles, footwear, and steel. Articles entitled to import relief for safeguards or national security reasons cannot benefit for the period that relief is afforded. A 35 percent direct cost, value-added rule of origin protects against passthrough operations.

Approximately 3,000 products from 100 lesser developed countries (LDC's) now receive duty-free treatment. The total value of 1982 GSP imports was $8.4 billion, or about 8 percent of total U.S. imports, and was predominantly in nonagricultural products. Of the total GSP imports, 64 percent came from 5 countries, and 88 percent from 15 countries. The United States enjoys a merchandise trade surplus with most of the GSP beneficiaries.

Prior to the Tokyo round multilateral trade negotiations tariff concessions, the weighted average tariff level waived under GSP was 9 percent. By 1987, after the multilateral trade negotiations tariffs are phased in, the level will be 4.5 percent. Although this level would not appear to be of significant competitive value, the lesser developed countries regard the GSP program as retaining great symbolic value.

A report on the growth of GSP imports and their import penetration in the U.S. market was published in May by the U.S. International Trade Commission. The principal findings of the study included:

First, GSP imports, rising from $5.2 billion to $8.4 billion over the 1978–81 period, accounted for only 4.1 percent of total imports in 1978 and rose modestly to 4.9 percent in 1981.

Second, GSP imports have not resulted in significant increases in the overall import share of the total U.S. market or of the markets of any of the seven major industrial sectors examined. GSP imports averaged 0.5 percent or less of total U.S. consumption over the entire period.

Third, in only 12 of the roughly 650 smaller commodity/industry groups examined in the study have GSP imports resulted in significant increases in import penetration.

Fourth, a variety of factors were found to limit the degree of market penetration by GSP imports including the various statutory checks built into the program, the limited product coverage of the program, the modest rates of duty on GSP eligible items, and the manufacturing limitations in many of the beneficiary countries.

From this study, it would appear that benefits from the GSP program have accrued to developing nations, but not in such a magnitude as to damage American industry and employment.

U.S. TRADE WITH DEVELOPING NATIONS

The GSP program has contributed to the emerging role of the Third World as an important factor in U.S. trade. This growing partnership fosters economic prosperity both in the United States and the Third World. As Secretary of State George Shultz has indicated, "There will be no enduring economic prosperity for our country without economic growth in the Third World." The economic well-being of citizens in the United States is in fact directly related to the well-being of citizens in the Third World. Moreover, in the absence of economic stability in most developing nations, prospects for enduring political stability are remote.

World trade has become an integral part of the economy of the United States. Every $1 billion in increased exports results in an additional 25,000 jobs. Every $1 billion in decreased exports may result in a decrease of 60,000 to 70,000 U.S. jobs, after multiplier effects are taken into account. Between 1977 and 1980, four out of five all new manufacturing jobs created in the United States were related to exports. One out of six U.S. jobs are dependent upon exports. As regards U.S. trade with the Third World, approximately 1 out of every 20 workers in our manufacturing plants and one our of every 5 acres of our farmland produce for Third World markets.

This trade with developing nations has increased at a remarkable rate since the inception of the GSP program in 1976. In the late seventies and early eighties, U.S. exports to Third World countries increased at more than 30 percent per year before the current recession took its toll. The developing countries have been the fastest growing market for U.S. exports. In the first 3 months of 1983, the developing countries bought 36 percent of all our exports. This means that developing countries purchased more U.S. exports than Western Europe, Eastern Europe, the Soviet Union, and China combined.

Trade with the Third World, while providing jobs to U.S. workers, yields two additional benefits. First, the Third World countries provide many strategic minerals to the United States that are vital to our strategic industrial base.

Second, healthy trading relations may prove to be the most effective way of providing financial assistance to the Third World. In 1980, the developing countries export earnings of $580 billion amounted to 17 times what they received in foreign aid. Putting an emphasis on trade rather than aid is in the best interest of both the United States and the Third World countries.

In this regard, the United States at the recent Williamsburg summit pledged, along with our allies, to stimulate the economies of the developing countries through increased international trade. Granting reasonable duty-free import privileges to developing countries is an effective way to strengthen the economies of the Third World. By strengthening these economies, we are in turn strengthening the export markets of the United States. Creating a strong market for U.S. exports is essential to enduring economic prosperity and employment for our country.

GSP RENEWAL

Mr. President, the administration's legislation would extend the GSP program for a period of 10 years. It goes beyond a simple extension of current law, however, in a number of significant ways, as described in the following letter of transmittal from U.S. Trade Representative William Brock.

It is my intention to hold the initial hearing on this legislation in the Subcommittee on International Trade on August 4.

Mr. President, I ask unanimous consent that Ambassador Brock's letter be printed in the RECORD, along with the "Generalized System of Preferences Renewal Act." And an analysis of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1718

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; STATEMENT OF PURPOSES.

(a) SHORT TITLE.—This Act may be cited as the "Generalized System of Preferences Renewal Act of 1983".

(b) PURPOSES.—The purposes of this Act are to—

(1) promote the development of developing countries, which often need temporary preferential advantages to compete effectively with industrialized countries;

(2) promote the notion that trade, rather than aid, is a more effective and cost-efficient way of promoting broad-based sustained economic development;

(3) take advantage of the fact that developing countries provide the fastest growing markets for United States exports and that foreign exchange earnings from trade with such countries through the Generalized System of Preferences can further stimulate United States exports;

(4) allow for the consideration of the fact that there are significant differences among developing countries with respect to their general development and international competitiveness;

(5) encourage the providing of increased trade liberalization measures, thereby setting an example to be emulated by other industrialized countries;

(6) recognize that a large number of developing countries must generate sufficient foreign exchange earnings to meet international debt obligations;

(7) promote the creation of additional opportunities for trade among the developing countries;

(8) integrate developing countries into the international trading system with its attendant responsibilities in a manner commensurate with their development;

(9) encourage developing countries to eliminate or reduce significant barriers to trade in goods and services and to investment, and

(10) address the concerns listed in the preceding paragraphs in a manner that—

(A) does not adversely affect United States producers and works, and

(B) conforms to our international obligations under the General Agreement on Tariffs and Trade.

SEC. 2. 10-YEAR EXTENSION OF THE GENERALIZED SYSTEM OF PREFERENCES.

Section 505 of the Trade Act of 1974 (19 U.S.C. 2465) is amended by striking out all after the heading and inserting in lieu thereof the following:

"No duty-free treatment under this title shall remain in effect after January 3, 1995.".

SEC. 3. CONSIDERATION OF A BENEFICIARY DEVELOPING COUNTRY'S COMPETITIVENESS IN EXTENDING PREFERENCES.

Section 501 of the Trade Act of 1974 (19 U.S.C. 2461) is amended—

(1) by striking out "and" at the end of paragraph (2),

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and", and

(3) by adding at the end thereof the following new paragraph:

"(4) the extent of the beneficiary developing country's competitiveness with respect to eligible articles.".

SEC. 4. AMENDMENTS RELATING TO THE COMPETITIVE NEED LIMIT.

Subsections (c) and (d) of section 504 of the Trade Act of 1974 (19 U.S.C 2464 (c) and (d)) are amended to read as follows:

"(c)(1) Whenever the President determines that any country—

"(A) has exported (directly or indirectly) to the United States during a calendar year a quantity of an eligible article having an appraised value in excess of an amount which bears the same ratio to $25,000,000 as the gross national product of the United States for the preceding calendar year, as determined by the Department of Commerce, bears to the gross national product of the United States for calendar year 1974, or

"(B) except as provided in subsection (d)(2), has exported (either directly or indirectly) to the United States a quantity of any eligible article equal to or exceeding 50 percent of the appraised value of the total imports of such article into the United States during any calendar year.

then, not later than 90 days after the close of such calendar year, such country shall not be treated as a beneficiary developing country with respect to such article.

"(2)(A) Not later than 2 years after the date of the enactment of the Generalized System of Preferences Renewal Act of 1983, and periodically therafter, the President shall conduct a general review of eligible articles based on a consideration of the factors set forth in sections 501 and 502(c).

"(B) If, after any review under subparagraph (A), the President determines that this subparagraph should apply because a beneficiary developing country has demonstrated a sufficient degree of competitiveness (relative to other beneficiary developing countries) with respect to any eligible article, then paragraph (1) shall be applied to such country with respect to such article by substituting—

"(i) '1983' for '1974' in subparagraph (A), and

"(ii) '25 percent' for '50 percent' in subparagraph (B).

"(3)(A) Not earlier than 2 years after the date of the enactment of the Generalized System of Preferences Renewal Act of 1983, the President may waive the application of this subsection with respect to any eligible article of any beneficiary developing country if, before the 90th day after the close of the calendar year for which a determination was made, the President—

"(i) determines, based on the factors set forth in sections 501 and 502(c), that such waiver is in the national economic interest of the United States, and

"(ii) publishes such determination in the Federal Register.

"(B) In making any determination under subparagraph (A), the President shall give great weight to the extent to which the beneficiary developing country has assured the United States that such country will provide equitable and reasonable access to its markets.

"(C) Any waiver granted pursuant to this paragraph shall remain in effect until the President determines that such waiver is no longer warranted due to changed circumstances.

"(4) Except in any case to which paragraph (2) applies, the President may waive the application of this subsection if, before the 90th day after the close of the calendar year for which a determination was made, the President determines and publishes in

the Federal Register that, with respect to such country—

"(A) There has been a historical preferential trade relationship between the United States and such country,

"(B) There is a treaty or treaty or trade agreement in force covering economic relations between such country and the United States, and

"(C) such country does not discriminate against, or impose unjustifiable or nureasonable barriers to, United States commerce.

"(5) A country which is no longer treated as a beneficiary developing country with respect to an eligible article by reason of this subsection may be redesignated, subject to the provisions of sections 501 and 502, a beneficiary developing country with respect to such article if imports of such article from such country did not exceed the limitations in paragraph (1) (after application of paragraph (2)) during the preceding calendar year.

"(d)(1)(A) Subsection (c) shall not apply to any beneficiary developing country which the President determines, based on the factors set forth in sections 501 and 502(c), to be a least developed beneficiary developing country.

"(B) The President shall—

"(i) make such determination with respect to each beneficary developing country within 6 months after the date of the enactment of the Generalized System of Preferences Renewal Act of 1983, and periodically thereafter, and

"(ii) notify the Congress at least 60 days before any such determination becomes final.

"(2) (c)(1)(B) (after application of subsection (c)(2)) shall not apply with respect to any eligible article if a like or directly competitive article was not produced in the United States on the earlier of—

"(A) January 3, 1985, or

"(B) January 1 of the calendar year for which the determination is being made under subsection (c)(1)(B).".

U.S. TRADE REPRESENTATIVE,
Washington, July 22, 1983.

Hon. JOHN C. DANFORTH,
U.S. Senate,
Washington, D.C.

DEAR JACK: As promised in my correspondence to Chairman Robert Dole of July 12, 1983, I am pleased to transmit to you for introduction in the Senate the Administration's legislative proposal for the renewal of the Generalized System of Preferences (GSP) program.

As you are aware, this Administration is firmly committed to the renewal of Congressional authority for the GSP program, which is due to expire on January 3, 1985.

For the past year, the Office of the United States Trade Representative has reviewed the operation of the GSP program. All of our private sector advisory committees and subcommittees discussed the issue of renewal and many recommendations for change were suggested. Further, USTR sponsored three public hearings over a period of eight days in New York, San Francisco, and Washington, D.C. More than eighty witnesses presented testimony concerning the extension of GSP and over one hundred other interested parties supplied written comments. In sum, my Office, in conjunction with the staff of your Trade Subcommittee, solicited and compiled the views of all interested U.S. producers, workers, importers and exporters, and foreign governments.

The proposal for GSP renewal which I submit to you today for consideration was drafted after taking into account these many recommendations and views, and in particular, it incorporates specific suggestions made by your subcommittee staff. This compilation of information represents the most comprehensive evaluation of the GSP program undertaken since the program's inception. I invite your subcommittee to review this material, together with the Five Year Report of GSP and the recently completed International Trade Commission (ITC) report entitled "An Evaluation of U.S. Imports Under the GSP".

The Administration's proposal for renewal accomplishes four critical objectives: (1) limiting GSP treatment for highly competitive products; (2) creating the possibility for the least developed countries to expand their trade with the U.S.; (3) providing leverage to further liberalize barriers to U.S. exports; and (4) adding a new dimension of predictability, protection and tangible benefits to U.S. interests.

Under this renewed GSP plan, the United States will have greater ability to seek expanded market access for U.S. goods and services in beneficiary countries. We will take a long, hard look at the potentially trade-distorting practices of these GSP countries before we continue to provide preferential treatment on a product-by-product basis. In short, the Administration's renewal proposal will allow us to use our GSP program and the benefits it bestows to create opportunities for our importing and exporting community here at home, while at the same time providing a chance for the developing world to make responsible decisions about their own economic growth.

The importance of the GSP program to the economic well-being of both the United States and developing countries has grown considerably over the past decade. For developing countries, GSP encouraged trade provides an essential stimulus to efficient production and rapid economic growth. This in turn results in greater markets for U.S. exports and more jobs for Americans. Currently, developing countries purchase nearly 40 percent of all U.S. exports, which is considerably greater than U.S. exports to the EC and Japan combined, and exports to the developing countries are growing considerably faster than exports to these traditional developed country markets.

I thank you for your consideration and introduction of this vitally important piece of legislation.

Very truly yours,

WILLIAM E. BROCK.

Enclosures.

ADMINISTRATION PROPOSAL TO RENEW THE GENERALIZED SYSTEM OF PREFERENCES

Statutory authority for the U.S. Generalized System of Preferences (GSP) will expire on January 3, 1985. Now in its eighth year of operation, the GSP has become an integral part of U.S. trade and foreign policy. It has made a contribution to the long-term economic development of many developing countries and has stimulated two-way trade between the United States and these countries. The GSP has become a significant component of U.S. bilateral relations with many beneficiary countries. It is in the interest of the United States to extend the GSP program beyond 1985 in such a way as to strengthen these developments further.

The GSP is a program of tariff preferences granted by the United States to developing countries to assist their economic development by encouraging greater diversification and expansion of their production and exports. At present, the GSP grants duty-free treatment to approximately 3,000 products imported from 140 developing countries and territories. The value of U.S. imports receiving GSP duty-free treatment grew from $3.0 billion in 1976, the program's first year of operation, to $8.4 billion in 1982. GSP imports represent only 3 percent of total U.S. imports.

IMPORTANCE OF THE GSP TO U.S. TRADE

The importance of trade to the economic well-being of both the United States and developing countries has grown considerably over the past decade. Currently, developing countries purchase nearly 40 percent of U.S. exports, which is considerably greater than U.S. exports to the EC and Japan combined, and exports to the developing countries are growing considerably faster than exports to these traditional developed country markets.

For developing countries, trade provides an essential stimulus to efficient production and rapid economic growth. Exporting to world markets enables developing countries to achieve scales of production that could not be reached on the basis of their domestic demand alone. This permits developing countries to employ their human, natural and capital resources in their most productive uses, thereby maximizing output and income from the available resources. Exports also generate the foreign exchange necessary to pay for fuel, intermediate inputs and capital goods imports that are required for their development efforts.

Export growth is essential for developing countries to meet their debt services requirements. The durability of financial support programs for high-debt developing countries arranged by the International Monetary Fund, central banks in developed countries, and commercial banks depends upon these countries' export expansion. A strong export performance also helps to attract additional foreign private investment, which increases a developing country's ability to expand its production capacity as well as its social and physical infrastructure.

On the other hand, competition from imports heightens the incentives for local producers in developing countries to improve their productivity and encourages them to adopt product and production innovations that raise the country's overall level of technology. All of these benefits from trade increase a developing country's ability to employ its people and to provide a higher standard of living for them.

It is in our mutual interest to increase further the bilateral trade flows between the United States and developing countries. The Administration believes the GSP has made an important contribution in this regard since 1976. The GSP has become an integral part of our overall effort to encourage economic development through trade, not aid. The GSP beneficiary countries, many of which have longstanding and close ties to the United States, look on the program as an important indication of the seriousness with which the United States views its stated policy of encouraging self-sufficient economic development. They attach great importance to this concrete incentive the United States provides for increased domestic production and export of their manufactured, semi-manufactured, and agricultural products. The increased export earnings generated by the GSP program permit ben-

eficiary countries to pay for priority imports supporting further economic development. They also help create conditions for the beneficiary countries to expand their purchases of American capital goods and agricultural products.

The 19 other OECD developed donor countries are committed to a balanced continuation of the GSP. Most have already extended their GSP programs for a second decade. The Administration believes a renewal of the GSP based on the considerations outlined above will reinforce the development goals of the GSP and further support the economic and foreign policy interests of the United States.

DESCRIPTION OF ADMINISTRATION PROPOSAL

In addressing the importance of continuing the U.S. GSP program beyond its scheduled expiration in January 1985, several considerations must be kept in mind:

The recognition that developing countries provide the fastest growing markets for U.S. exports and that foreign exchange earned by these countries through the GSP can further stimulate U.S. exports.

The desire to provide further opportunities for increased trade liberalization, thereby setting an example for other industrialized countries to follow.

The recognition that many developing countries maintain significant barriers to trade in goods and services and to investment which, if liberalized, would spur the U.S. exports.

The desire to integrate developing countries into the international trading system with its attendant responsibilities in a manner commensurate with their development.

The recognition that there are significant differences among developing countries with respect to their general development and international competitiveness.

The desire to create additional opportunities for trade among the developing countries.

The recognition that trade, rather than aid, is a more effective and cost-effective way of promoting broadbased sustained economic development.

The recognition that a large number of developing countries must generate sufficient foreign exchange earnings to meet international debt obligations.

The desire to promote the development of Third World countries, which often need temporary preferential advantages to compete effectively with industrialized countries;

The desire to address these concerns in a manner that does not adversely affect U.S. producers and workers.

Taking into account these considerations and taking note of the recent actions by other industrialized countries to extend their GSP programs, the Administration proposes a ten-year extension of the U.S. GSP. The Administration further proposes that the program be modified so as to better serve the interests outlined above.

The renewed GSP program would be structured so as to further the goals of: (1) limiting GSP treatment for highly competitive products; (2) assuring U.S. exports greater market access in beneficiary countries; (3) reallocating benefits to the less developed beneficiary countries to the degree possible; and (4) conforming to U.S. international obligations under the GATT and related agreements.

Under the renewed program, the President should continue to be guided in his GSP eligibility decisions by the following factors set forth under the existing statute and administrative procedures:

(1) the development level of individual beneficiaries;

(2) the beneficiary country's competitiveness in a particular product;

(3) the overall interests of the United States;

(4) the effect such action will have on furthering the economic development of developing countries;

(5) whether or not the other major developed countries are extending generalized preferential tariff treatment to such product or products;

(6) the anticipated impact of such action on United States producers of like or competitive products; and

(7) the extent to which the beneficiary country has assured the United States it will provide equitable and reasonable access to the markets and basic commodity resources of such country.

However, the Administration intends to depart from current practice by giving increased weight to two of these factors: the level of economic development of a beneficiary and whether that country provides adequate market access to U.S. exports. In its market access considerations, the Administration will examine not only beneficiary country tariff and non-tariff barriers to trade in goods and services, but also other trade-distorting practices such as performance requirements and inadequate protection of intellectual property rights.

The considerations noted above would be employed with respect to the limitation of GSP treatment for highly competitive products from the more advanced beneficiaries and with respect to the liberalization of GSP treatment as a means to induce beneficiary countries to provide significant market access. Given the authority to liberalize GSP treatment beyond present statutory restraints, the Administration would also attempt to ensure that the least developed beneficiary countries receive the greatest amount of benefits possible under the system.●

By MR. METZENBAUM:

S. 1719. A bill to amend the Internal Revenue Code of 1954 to eliminate capital gain treatment of timber income; to the Committee on Finance.

ELIMINATION OF CAPITAL GAIN TREATMENT ON TIMBER INCOME

Mr. METZENBAUM. Mr. President, in 1943, the timber interests of this country came to Washington and left with a special tax provision that treats the sale of timber as a capital gain. This means that instead of paying a tax rate as high as 46 percent, they need only pay 28 percent.

The farmers of my State of Ohio, when they make a profit growing corn, wheat, or soybeans, pay their taxes at ordinary tax rates. But those who cut timber, which is planted in the same manner as other crops, are allowed to treat their profits as a capital gain.

Today I am introducing legislation to repeal the special capital gains treatment accorded timber income.

Mr. President, the timber industry is one of the lowest taxed sectors of our economy. According to a recent study of corporate tax rates, the paper, fiber, and wood industry paid a 4 percent effective tax rate on U.S. income in 1981. A similar study conducted by the Joint Tax committee reported that the paper industry paid a negative 14.2-percent rate. The industry, in other words, received so many tax writeoffs that companies either received a refund on prior taxes paid or a credit to reduce future tax bills.

I am not alone in my belief that the timber industry is not paying its fair share.

In testimony before the Senate Finance Committee, Assistant Secretary of the Treasury John Chapoton characterized timber as "one of the most tax favored of domestic industries." He pointed to the capital gains treatment of timber, observing that profits received by manufacturers and producers of every other product are taxed at ordinary rates. And he pointed out that the timber industry receives a 10-percent tax credit and rapid depreciation for reforestation expenses.

Who can qualify for the preferential capital gains treatment?

Prior to 1944, only timber that was not used for a business purpose, which was sold on an occasional basis, and in which the seller retained no economic benefit qualified for capital gains treatment. These requirements excluded timber cut on public-or industry-owned acreage from capital gains treatment. In effect, only farmers and nontimber industry owners of timber could benefit.

But in 1943, the timber industry pushed through the Congress an amendment that expanded the capital gains treatment. And since 1944, the timber industry has not only been allowed to pay capital gains rates on timber it cuts from its own lands, but from private lands and even timber cut on public lands. In 1954, the law was expanded to include Christmas trees.

Today, we have a tax law that bestows capital gains treatment to taxpayers who hold timber for 1 year. The taxpayer need not have planted or nurtured the trees.

And, the land itself does not have to be subject to taxation—it can be Federal land.

And, what if, by chance, the timber company owns the land upon which the timber is cut?

In that case, the timber qualifies not only for capital gains treatment on the profits earned on the timber; the company also gets special tax breaks for reforestation expenses.

Since 1980, timber companies have been eligible to take a 10-percent investment tax credit and to write off their reforestation expenses over a 7-year period for reforestation expenses up to $10,000 per year.

No other taxpayer can take an investment tax credit for improvements

to property, nor can any other taxpayer, except for oil companies which can immediately write off intangible drilling costs, write off improvements to land in so rapid a fashion. Other taxpayers must write off improvements to real property over the same period that the property itself is written off.

There are no standards to qualify for this preferential treatment. A site does not have to be economically feasible. There are no requirements that the planting be done properly. There is no requirement that the landowner tend the plants at all. The tax benefits exist even if the planting fails.

Reforestation is a laudable goal, but we have Federal programs now in place to directly accomplish it.

Landowners can receive free or subsidized seedlings, and technical assistance; and, they can receive subsidies for reforestation, fire prevention, and insect, and disease control. In fact these direct subsidies cost the Federal Government some $100 million per year.

Mr. President, my bill would eliminate only the special capital gains treatment accorded timber. It would not disturb the subsidies provided through direct programs and the special tax credit and depreciation provisions. It would have no effect whatever on reforestation.

But this bill would raise some $3.1 billion through fiscal year 1988.

I believe that the capital gains treatment accorded timber income should be eliminated as part of the effort to raise $73 billion mandated under the budget resolution.

Mr. President, let me add just one more word.

I cannot think of any more timely period when Congress should be indicating its attitude with respect to timber in this country.

Just last week, the White House had the audacity—and I say it was audacious—to make it possible for contracts that timber companies have entered into with the U.S. Government to be extended for a period of 5 years, without any interest whatsoever. I submit to the Members of Congress that I doubt very much that that action on the part of the White House was legal; but whether it was legal or illegal, it was highly inappropriate. It was wrong. It was the giving away of something approaching $500 million a year by the White House.

This administration, which has talked so much about balancing the budget, has flaunted in the face of the American people this giveaway of hundreds of millions of dollars to the timber industry.

I believe that this bill would move in the right direction. But I believe that the White House should be called to account for their action, which I consider to be highly illegal. When the appropriate time comes, I will offer an amendment to see whether or not we can take action to reverse the action of the White House in giving away hundreds of millions of dollars to the timber industry.

Mr. HATFIELD. Mr. President, I should like to take this occasion to invite the Senator from Ohio to make a visit to Oregon—I really mean this; I think it would be very enlightening—to have an opportunity to visit the greatest timber production State in the Union.

I think that when the Senator from Ohio has had an opportunity to see timber growing, he might wish to revise his remarks when he compares growing corn with growing trees, as he has just done on the floor of the Senate. I believe it would be helpful and enlightening for all of us to able to delineate between growing corn in Ohio and growing trees in Oregon.

Mr. METZENBAUM. Mr. President, I will not take issue with the Senator from Oregon that there is a difference between growing corn and growing trees, but I will take issue with the Senator from Oregon when he says in his press release that the partial victory for the timber contractors' relief bill, which was the White House action—and I have great respect for the Senator from Oregon—but that does not justify whether corn is similar to timber or whether timber is similar to soybeans. It does not justify giving away hundreds of millions of dollars to the timber industry.

As the Senator from Oregon knows, I had indicated to him publicly as well as privately last year, and again this year, that I was prepared to join him in providing relief for those portions of the timber industry that needed relief and otherwise might be forced into bankruptcy, but that I did not believe we should provide relief as was provided by the White House when they saw they could not get the legislation through Congress. I did not think it was all right to give that kind of relief to some of the largest corporations in America who certainly do not need the relief, but that I was willing, in the instance of those companies that might otherwise go bankrupt, whether small or large, to write into the legislation an appropriate means of providing them with relief from those contracts.

I think the action of the White House was so egregiously wrong that it should embarrass all of us in Congress that we did nothing to keep them from taking this action. I consider the action to be totally illegal.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1719

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ELIMINATE THE CAPITAL GAIN TREATMENT OF TIMBER HELD FOR INVESTMENT

(a) IN GENERAL.—Section 631 of the Internal Revenue Code of 1954 (relating to gain or loss in the case of timber, coal, or domestic iron ore) is amended to read as follows:

"SEC. 631. GAIN OR LOSS IN THE CASE OF COAL OR DOMESTIC IRON ORE.

"In the case of the disposal of coal (including lignite), or iron ore mined in the United States, held for more than 1 year before such disposal, by the owner thereof under any form of contract by virtue of which such owner retains an economic interest in such coal or iron ore, the difference between the amount realized from the disposal of such coal or iron ore and the adjusted depletion basis thereof plus the deductions disallowed for the taxable year under section 272 shall be considered as though it were a gain or loss, as the case may be, on the sale of such coal or iron ore. Such owner shall not be entitled to the allowance for percentage depletion provided in section 613 with respect to such coal or iron ore. This subsection shall not apply to income realized by any owner as a co-adventurer, partner, or principal in the mining of such coal or iron ore, and the word "owner" means any person who owns an economic interest in coal or iron ore in place, including a sublessor. The date of disposal of such coal or iron ore shall be deemed to be the date such coal or iron ore is mined. In determining the gross income, the adjusted gross income, or the taxable income of the lessee, the deductions allowable with respect to rents and royalties shall be determined without regard to the provisions of this subsection. This subsection shall have no application, for purposes of applying subchapter G, relating to corporations used to avoid income tax on shareholders (including the determinations of the amount of the deductions under section 535 (b)(6) or section 545(b)(5)). This subsection shall not apply to any disposal of iron ore—

"(1) to a person whose relationship to the person disposing of such iron ore would result in the disallowance of losses under section 267 or 707(b), or

"(2) to a person owned or controlled directly or indirectly by the same interests which own or control the person disposing of such iron ore.".

(b) CONFORMING AMENDMENTS.—

(1) Subsection (e) of section 57 of such Code (defining timber preference income) is amended by striking out paragraph (1) and redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(2) Paragraph (5) of section 512(b) of such Code (relating to unrelated business taxable income) is amended by striking out the last sentence.

(3) Paragraph (3) of section 617(f) of such Code (relating to deduction and recapture of certain mining exploration expenditures) is amended by striking out "section 631 (c)" each place it appears and inserting in lieu thereof "section 631".

"(4) Section 871(a)(1)(B), 871(d)(1)(A), 881(a)(2), and 882(d)(1)(A) of such Code are amended by striking out "section 631(b) or (c)" each place it appears and inserting in lieu thereof "section 631".

(5) Paragraph (2) of section 1231(b) of such Code (defining property used in the

trade or business) is amended to read as follows:

"(2) COAL OR DOMESTIC IRON ORE.—Such term includes coal and iron ore with respect to which section 631 applies.".

(6) Subparagraph (B) of section 1402(a)(3) of such Code (defining net earnings from self-employment) is amended to read as follows:

"(B) from the disposal of coal or iron ore, if section 631 applies to such gain or loss, or".

(7) Subsections (b) and (c)(5) of section 1441 of such Code (relating to withholding of tax on nonresident aliens) are amended by striking out "631 (b) or (c)" and inserting in lieu thereof "631".

SEC. 2. EFFECTIVE DATE.

The amendments made by this section shall apply to taxable years beginning after December 31, 1983.

By Mr. PELL:

S. 1720. A bill to amend the Federal Reserve Act to provide for increased representation of small business interests on the Board of Governors of the Federal Reserve System; to the Committee on Banking, Housing, and Urban Affairs.

FEDERAL RESERVE BOARD OF GOVERNORS

Mr. PELL. Mr. President, I introduce for appropriate reference a bill to permanently reserve one of the seven seats on the Board of Governors of the Federal Reserve System for a representative of small business.

I would like to note especially that my bill is very similar to one introduced in the last Congress by the distinguised minority leader. He is the one who has pioneered in this area and I am very proud to follow in his steps.

My bill permanently reserves one seat on the seven-person Board of Governors as the small business seat, and directs the President to make his next appointment to that seat.

With the return of 14-percent mortgages and the recent escalation of interest rates for the acknowledged purpose of cooling down a recovery, the Nation has once again been reminded that monetary policy of far-reaching consequence is the product of many pressures and interests which come to bear on the few people who serve on the Federal Reserve's Board of Governors and on its Open Market Committee.

The background and perspective of the people who establish monetary policy thus can be of considerable significance to the various elements of the economy that are especially sensitive to credit availablity. It was for this reason that Congress mandated, in establishing the Federal Reserve Board, that its membership should reflect the principal sectors of the economy and different geographic regions of the country. The statute specifies that:

In selecting the members of the Board, not more than one of whom shall be selected from any one Federal Reserve District, the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country.

Over the years, the original congressional mandate for pluralism in the membership of the Board seems to have been honored more in the breach than in practice. The Board in recent years has tended to be populated by bankers and former civil servants who are specialists in monetary regulation. Their view tends to be macroeconomic in scope and to the extent that they represent interests or viewpoints, I believe they naturally tend to reflect the viewpoint of large corporate interests.

This, I believe, is a significant departure from the intent of the original congressional mandate. For in the matter of credit availability, quantitative size has a lot to do with qualitative results. Small ventures simply do not enjoy the same easy access to capital as do big established concerns. Small businesses and especially new ventures simply may not have the necessary collateral or be able to promise an early return on their capital. Thus credit restraints that may appear to make sense for large components of the economy my be disastrously restrictive to new ventures and small concerns that do not have the resources to weather the storm.

And the smaller components of our economy do need to be heard. Small businesses account for nearly 50 percent of the entire U.S. work force and small businesses contributed 60 percent of the increase in total employment during 1979–81. Despite our much publicized trend to corporate bigness through merger and conglomeration, we still are very much a nation of shopkeepers, family businesses and family farms. Especially in the current era of new high technology ventures, we continue to be a nation of opportunity for individual entrepreneurs with credit worthy ideas.

Yet our monetary policy is set by a small group whose principal focus often seems to be on the interests of big business and on the threshold of endurance of the strongest and most established elements of the economy. It may be for this reason that a record 25,000 small businesses failed last year.

The legislation I am introducing today seeks to remedy the situation by requiring that at least one of the seven members of the Federal Reserve Board of Governors be charged by law with representing the special interests of small business. Hopefully, such an appointee will effectively argue for the special needs of this vulnerable, credit-sensitive sector of the economy. Hopefully such an appointee would be especially cognizant of the credit thresholds above which small businesses may be adversely effected more swiftly than large corporate entities. And hopefully such an appointee may cause his or her colleagues on the Board to moderate their policies to reflect a broader sensitivity to the Nation's monetary requirements.

Mr. President, this issue is not a new one to the Senate and I might note that the Senate is already on record as supporting the basic objectives of my bill, although only in a permissive sense. On December 8, 1981, the Senate approved by a vote of 87 to 3 an amendment by the distinguished majority leader to the Small Business Innovation Research Act of 1981 expressing the sense of the Senate that the next occurring vacancy on the Federal Reserve Board be filled by an individual with substantial small business experience.

It should be clearly noted, however, that the measure which was approved on that occasion was a substitute for an amendment offered by the distinguished minority leader which would have directed and required the President to nominate such an individual.

In other words, the Senate approved a permissive, nonbinding request for a small business presence on the Board, in lieu of the mandatory requirement envisioned by the minority leader. The nonbinding resolution being an expression of the sense of the Senate, was deleted in conference and disappeared from the context of the Small Business Innovation Research Act, which became law in July 1932 without reference to the composition of the Board.

An interesting postscript to the Senate action occurred in January 1982 when the President nominated a new member of the Board who did appear to fulfill the Senate prescription. The nominee was Preston Martin who now sits on the Federal Reserve Board of Governors as its vice chairman. Mr. Martin has been involved in a number of small business ventures in the 1950's and 1960's, particularly in the housing and mortgage finance field, and he served as the chairman of the Federal Home Loan Bank Board from 1969 to 1972. His nomination to the Federal Reserve Board was endorsed by the president of the National Small Business Association who stated that "he fits the requirements of the resolution passed by the Senate."

There is another side to Mr. Martin's story, however, which suggests the insufficiency of the Senate resolution, and that is simply that Mr. Martin's days as a small business entrepreneur are far behind him. Since then he has enjoyed the kind of success which every small businessman dreams of but few are fortunate enough to attain.

One of Mr. Martin's small firms, PMI Mortgage Insurance Co., grew into three large companies with na-

tionwide business. They were acquired by Sears, Roebuck, and Mr. Martin became a director of Sears and of seven of its subsidiaries, one of which he served as chief executive officer. When he left Sears last November he received severance pay of $446,438. Hardly the usual lot of the average small businessman.

Mr. Martin does have many superior qualifications to serve on the Federal Reserve Board of Governors and I wish him well. However, he can hardly be considered representative of small business interests and it hardly seems fair to expect that he could accept as his first priority the advocacy of the small business viewpoint. Yet that viewpoint needs to be asserted.

My bill would assure that it would be by mandating not only the appointment of a person of appropriate background but by requiring that person specifically to represent small business interests. Identical legislation has been introduced in the House by Congressman MAVROULES. I urge its favorable consideration by both bodies.

By Mr. BINGAMAN:

S.J. Res. 141. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "Carrier Alert Week"; to the Committee on the Judiciary.

CARRIER ALERT PROGRAM

● Mr. BINGAMAN. Mr. President, I am introducing a joint resolution to declare September 25 as "Carrier Alert Week." The carrier alert program was established by joint agreement between the U.S. Postal Service and the National Association of Letter Carriers (NALC). The carrier alert program is designed to provide public assistance to the elderly, handicapped, and homebound postal customers.

Under carrier alert, a local sponsoring social service agency notifies the post office of customers who wish to participate in the program. It envisions that a letter carrier performing his or her daily rounds will be alert to an accumulation of mail which might signify a sudden illness or accident. Through locally developed procedures, the accumulation of mail is reported to the local social service agency which assumes administrative functions, arranges for emergency attention if necessary and notifies relatives of the customer's condition. This service is by no means new. I am certain we all have heard stories of letter carriers risking their lives to save the lives of others—to save a child in a blazing building, to rescue a drowning swimmer, to provide first aid to a victim of an automobile accident. Over the years thousands of letter carriers have performed such tasks. This program will be a joint effort of management and labor of the U.S. Postal Service to maximize the positive effects of such Good Samaritan acts.

The positive results of this voluntary program have been tremendous. Hundreds of cities throughout the country have started or are developing carrier alert programs. I am pleased to report that Albuquerque, Farmington, and Roswell, N. Mex., are included in the list of cities with a carrier alert program.

Carrier alert activities also could not take place without the sponsorship at the local level of social service organizations like the Administration on Aging, the American Red Cross, and the United Way of America.

Due to the success of the program, recent talks to extend the voluntary carrier alert program have been held among the U.S. Postal Service, the National Association of Letter Carriers, and the participating social service organizations.

The objectives of the meeting were to discuss ways to inform elderly and invalids not yet participating in established carrier alert programs how they can register and to encourage establishment of carrier alert programs in communities that do not yet have the program.

To further these two objectives, the United Way, in cooperation with the NALC, has produced a public service television announcement about carrier alert and the reassurance it can give to elderly or disabled postal customers. These television spots are being distributed to 210 major television markets across the country; some will appear in communities where carrier alert has not yet been established. The announcements advise viewers to call their local post office for information on carrier alert program.

Mr. President, I am very proud of carrier alert as a national program supported by both postal labor and management. The participation of letter carriers in community service activities has a long and proud history which certainly predates the development of this program. I believe it is important at this time to give recognition to this unique public assistance program and to letter carriers for their contribution in making it work. I offer this joint resolution in recognition of these efforts.●

ADDITIONAL COSPONSORS

S. 337

At the request of Mr. PACKWOOD, the name of the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 337, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by nonitemizers.

S. 422

At the request of Mr. JEPSEN, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 422, a bill to amend title 18 of the United States Code to provide a criminal penalty for robbery of a controlled substance.

S. 618

At the request of Mr. PERCY, the names of the Senator from New York (Mr. D'AMATO), the Senator from Hawaii (Mr. INOUYE), the Senator from Florida (Mrs. HAWKINS), the Senator from Michigan (Mr. LEVIN), and the Senator from Ohio (Mr. GLENN) were added as cosponsors of S. 618, a bill to revise certain Federal training and economic development programs to create jobs and develop skills in renewable energy and energy conservation industries, and for other purposes.

S. 719

At the request of Mr. THURMOND, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 719, a bill to amend subchapter II of chapter 73 of title 10, United States Code, to eliminate the social security offset against annuities provided for under such subchapter to the extent that the social security benefits of the annuitant are based on the annuitant's own employment.

S. 752

At the request of Mr. ARMSTRONG, the name of the Senator from Iowa (Mr. JEPSEN) was added as a cosponsor of S. 752, a bill to authorize certain additional measures to assure accomplishment of the objectives of title II of the Colorado River Basin Salinity Control Act, and for other purposes.

S. 865

At the request of Mr. HATFIELD, the name of the Senator from Wyoming (Mr. SIMPSON) was added as a cosponsor of S. 865, a bill to establish a nationally uniform deep-draft vessel tax for the purpose of financing operations and maintenance of deep-draft commercial channels and harbors; to fund a percentage of new channel improvements; and to provide an expedited procedure for the authorization and permitting of navigation improvement projects and related landside facilities in deep-draft ports, and for other purposes.

S. 1006

At the request of Mr. SPECTER, the names of the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of S. 1006, a bill to amend the Internal Revenue Code of 1954 to repeal the 15-percent reduction in percentage depletion for iron ore and coal.

S. 1195

At the request of Mr. BENTSEN, the name of the Senator from Georgia (Mr. MATTINGLY) was added as a cosponsor of S. 1195, a bill to amend the Internal Revenue Code of 1954 to promote the contribution of scientific equipment to elementary and secondary schools and universities and to

foster university research and scientific training.

S. 1388

At the request of Mr. SIMPSON, the names of the Senator from Alabama (Mr. DENTON), the Senator from California (Mr. CRANSTON), the Senator from Alaska (Mr. MURKOWSKI), the Senator from South Carolina (Mr. THURMOND), the Senator from Vermont (Mr. STAFFORD), the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from Maine (Mr. MITCHELL) were added as cosponsors of S. 1388, a bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans and to increase the rates of dependency and indemnity compensation for surviving spouses and children of veterans.

S. 1511

At the request of Mr. JEPSEN, the names of the Senator from Wisconsin (Mr. KASTEN), the Senator from Iowa (Mr. GRASSLEY), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 1511, a bill to amend title XVIII of the Social Security Act to provide that certain hospice programs may provide nursing care through arrangements with certified medicare providers.

S. 1592

At the request of Mr. DOLE, the name of the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 1592, a bill to amend title XVIII of the Social Security Act to correct provisions relating to the cap for hospice care.

S. 1613

At the request of Mr. TRIBLE, the name of the Senator from Nevada (Mr. HECHT) was added as a cosponsor of S. 1613, a bill to amend title 10, United States Code, with respect to the provision of medical benefits and post and base exchange and commissary store privileges to certain former spouses of certain members or former members of the Armed Forces.

S. 1687

At the request of Mr. JEPSEN, the name of the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 1687, a bill to amend the Agricultural Act of 1949 to require the Secretary of Agriculture to make an earlier announcement than is required under current law of any acreage limitation or set-aside program established for the 1984 or 1985 crop of feed grains or the 1985 crop of wheat.

S. 1699

At the request of Mr. DOLE, the name of the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of S. 1699, a bill to amend title XVIII of the Social Security Act to provide medicare coverage of hepatitis B vaccine for vaccine for end-stage renal disease patients.

SENATE JOINT RESOLUTION 54

At the request of Mr. NICKLES, the name of the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of Senate Joint Resolution 54, a joint resolution to authorize and request the President to designate the month of January 1984 as "National Eye Health Care Month."

SENATE JOINT RESOLUTION 93

At the request of Mr. EAST, the name of the Senator from Tennessee (Mr. SASSER), and the Senator from Arizona (Mr. GOLDWATER) were added as cosponsors of Senate Joint Resolution 93, a joint resolution to designate the month of September each year as "National Sewing Month."

SENATE JOINT RESOLUTION 128

At the request of Mr. MOYNIHAN, the names of the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Oregon (Mr. HATFIELD), the Senator from Indiana (Mr. LUGAR), the Senator from Georgia (Mr. NUNN), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of Senate Joint Resolution 128, a joint resolution to designate the day of October 22, 1983, as "Metropolitan Opera Day."

SENATE JOINT RESOLUTIOIN 131

At the request of Mr. DOLE, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of Senate Joint Resolution 131, a joint resolution designating "National Cystic Fibrosis Week."

SENATE RESOLUTION 182

At the request of Mr. DOLE, the names of the Senator from Arkansas (Mr. BUMPERS), the Senator from Utah (Mr. GARN), the Senator from Colorado (Mr. HART), and the Senator from Texas (Mr. TOWER) were added as cosponsors of Senate Resolution 182, a resolution expressing the sense of the Senate with respect to travel by Members of the Senate to the Soviet Union.

SENATE RESOLUTION 191—RELATING TO JUSTICE REGARDING THE SLAIN AMERICAN CHURCHWOMEN IN EL SALVADOR

Mr. LEAHY (for himself, Mr. LAUTENBERG, and Mr. SASSER) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 191

Whereas on December 2, 1980, four United States citizen churchwomen were murdered in El Salvador;

Whereas the certification law (public law 97-113) requires that the Government of El Salvador make "good faith efforts both to investigate the murders . . . and to bring to justice those responsible for those murders" before aid to El Salvador can continue;

Whereas the Administration's current certification report admits to "disappointing progress" in the case and concedes a "virtual breakdown in criminal justice" in El Salvador;

Whereas the prosecution of those accused of the murders of the four American churchwomen has been plagued by consistent neglect, professional incompetence, and a steadfast unwillingness to enforce Salvador law; and

Whereas, the vigorous prosecution and effective trial of those accused of murdering the four churchwomen will promote criminal justice throughout El Salvador and encourage similar efforts to pursue the murderers of other American citizens, Salvadoran Archbishop Oscar Romero, and tens of thousands of Salvadoran civilians: Now therefore, be it

Resolved, That it is the sense of the Senate that the United States Government shall call upon the Government of El Salvador,

(1) To appoint a special prosecuting attorney to oversee the comprehensive investigation of those responsible for murdering the four American churchwomen and to prepare a thorough and effective prosecution against them, and

(2) To assure the United States Government that those accused will be brought before a jury trial by December 2, 1983.

SPECIAL PROSECUTOR FOR MURDER CASE OF FOUR AMERICAN CHURCHWOMEN

Mr. LEAHY. Mr. President, a most unfortunate set of circumstances compels me to rise today to introduce this resolution calling on the Government of El Salvador to appoint a special prosecutor to thoroughly and vigorously prepare and actively pursue the case against those responsible for the murders of the four American churchwomen who were killed in El Salvador on December 2, 1980.

Almost 3 years ago, four U.S. citizens, three Catholic nuns, and one Catholic layworker, were brutally murdered and their bodies hastily buried in shallow graves near a road in El Salvador. In the time since their deaths, the investigation and prosecution of those responsible for their murders has been plagued by consistent neglect, professional incompetence, and a steadfast unwillingness to enforce El Salvador's own laws.

Critical evidence presented by the FBI to the Salvadoran prosecutors almost 2 years ago has never been introduced into the official court record. Important leads have never been pursued and key witnesses never questioned by Salvadoran authorities. Other evidence has been lost or destroyed due to the incompetence or indifference of the prosecutors.

Mr. President, I know the case that the FBI and the American authorities helped put together on this matter. I speak as one who has spent nearly a third of his adult life as a prosecutor. Any prosecutor in the country can handle that case standing on his head and get a conviction. Yet the case goes on and on like Tennyson's brook and never seems to stop.

Perhaps the most recent development is also the most disturbing. On a

recent trip of El Salvador, the lawyers representing the families of the slain churchwomen were informed that the person named coordinator of the prosecution in the case has been removed from a previous position for accepting a bribe from an opposing counsel in a criminal case. When the lawyers inquired why the man had not been disbarred for his behavior, they were told that such a punishment was impossible since he had not yet passed the bar.

These delays and incompetence on the part of the Salvadoran prosecutors occur against a backdrop of reassuring and optimistic pronouncements by both the Government of El Salvador and our own State Department.

Each few months, we certify that there are improvements in human rights in El Salvador.

We have been told that the nuns' trial will take place "shortly." We were told that in my Subcommittee on Appropriations 6 months ago, 6 months before that, and 6 months before that. It is important that these words of reassurance be followed by positive steps to bring those responsible to justice.

This resolution would be one such step. The appointment of a special prosecutor by the Government of El Salvador would demonstrate its dedication and commitment to a system of impartial justice. It would tell us that they are taking this case seriously. Such a special prosecutor would be a respected Salvadoran lawyer with the experience and standing to handle the case. This special prosecutor would have the support and protection of the Government of El Salvador.

In calling for a special prosecutor in this case, I also hope to focus attention on the tens of thousands of civilian deaths, including that of Archbishop Romero, that have also not received justice. This is an effort to focus attention on the sad state of law and order in El Salvador. Any attempt to achieve a diplomatic settlement, to work toward political development in El Salvador, must take into account the problems facing the judicial system.

There must be a system of law and respect for the law. There must be an independent judiciary. In this particular case, it might be useful for the Government of El Salvador, in addition to naming a special prosecutor, to establish some guarantee of independence for the prosecutor.

Although we do not presume to interfere in the internal mechanisms of Salvadoran political life, we do feel the need to see justice done. Working for improvements in this case is a good starting point.

As the administration becomes increasingly enmeshed in talk of "regional stability" and "military shields," it must not quietly tolerate what has become, in the most bitter sense of the phrase, a travesty of justice. This administration must not forget that it has to protect people as much as it has to protect policies. To look at one without the other does little to enhance our prestige as a nation and can, in fact, render us guilty by our continued association with such injustice.

I think, quite frankly, that the administration itself should embrace the resolution I have calling for a special prosecutor in El Salvador. I do not think there is anybody in the Government or out of the Government who would condone such a brutal murder of innocent civilians. I think the Reagan administration ought to embrace this resolution. I think it ought to pass unanimously by the U.S. Senate, that we ought to have it as the statement of this country.

Mr. SASSER. Mr. President, a legal justice system in El Salvador is practically nonexistent. In the last 4 years there have been as many as 40,000 civilian deaths, yet only a few hundred cases have resulted in defendants being brought to trial. Last March a report by the New York Bar Association stated that the Salvadorans judicial system is marked by "corruption, intimidation, and inadequate training."

The Government of El Salvador, in the past few months, has established a program aimed at judicial system reform. But it will take a long time to reverse decades of judicial neglect and abuse and the process will be substantially more difficult in an environment of civil war.

On July 20, 1983, the administration submitted the fourth certification required by Public Law 97-113. That report discusses a number of areas identified by the Congress for certification that the Government of El Salvador is acting in good faith to achieve specific progress in human rights activities.

Earlier this month, the Congress approved an amendment to the certification process which requires that the Salvadoran Government has made good-faith efforts both to investigate the murders of U.S. citizens in El Salvador and to bring to justice all those responsible for those murders. Today, I want to discuss one of those cases—the murders of the four U.S. churchwomen 2½ years ago.

As my colleagues will recall, on the evening of December 2, 1980, three American nuns, Ita Ford, Maura Clark, and Dorothy Kazel and one lay worker, Jean Donovan, were forced from their car on a highway a few miles from the capital, San Salvador. The next morning these four U.S. churchwomen were found raped and murdered.

Following the murders, President Carter suspended military and economic assistance to El Salvador and sent a special team to San Salvador to investigate. The U.S. investigators revealed at that time that Salvadoran security forces attempted to cover up the murders once the bodies were found.

In the last 31 months the Government of El Salvador has failed to complete prosecution of this case despite the fact that substantial evidence has been made available and suspects identified and detained.

When the bodies were found the Government of El Salvador initially attempted to place the blame for the murders on right-wing death-squad activity. But 3 months later Salvadoran investigators located the murder site and found fingerprints of 20 National Guardsmen and treasury policemen.

On April 29, 1981, six members of the National Guard were arrested for the murders. Ten months later the defendants were finally arraigned. Once the suspects were brought before the court for arraignment, then Salvadoran President Jose Napoleon Duarte told a national television audience that the evidence indicated that the National Guardsmen arrested were "the only and the true guilty ones."

Last November 15, the case was ordered to trial and defense counsel for the five National Guardsmen who were finally charged was appointed. On January 11 of this year the investigating judge elevated the case to the final stage of trial, but in March defense attorneys appealed and succeeded in delaying the case on technical grounds. The case was then returned to lower court, according to Secretary of State George Shultz, "for investigation and clarification of evidence."

Last month, Salvadoran President Alvaro Magana stated that the trial would reopen in July. But 10 days ago, the trial judge again delayed this case stating that new evidence would prevent a trial for at least 6 more months.

Mr. President, I wanted to bring these aspects of the history of the case to the attention of the Senate. Investigation and prosecution has been impeded for 31 months. The question must be asked: Why has this case not been brought to trial in face of a substantial body of evidence against the defendants?

Our own Federal Bureau of Investigation has developed what is reported to be irrefutable evidence against the National Guardsmen. I have not reviewed that evidence, but those who have confirm that this is an open-and-shut case. But in 31 months this case has not been tried and is still delayed.

Mr. President, I am pleased to cosponsor this resolution with Senator LEAHY calling on the Government of El Salvador to appoint a special prosecutor in this case and to set a date certain for the trial before December 2

of this year—3 years after the murders.

Further delays must not be permitted. This case must be brought to trial. The violence and corruption associated with these murders must be exposed in open court. Justice is being denied by the duplicity of the Government of El Salvador in allowing these unreasonable and inexcusable delays.

Mr. President, the civilian violence in El Salvador is epidemic. The number of reported deaths by the right wing death squads and the government security forces did decline last year but according to the U.S. Embassy in San Salvador and other observers, civilian deaths have increased at least 12 percent in the first 6 months of 1983 compared to the last 6 months of 1982.

By offering this resolution, we hope not only to encourage that justice be done in the case involving the U.S. churchwomen but it is also our hope that bringing the churchwomen's murderers to trial will stimulate the active prosecution of the tens of thousands of other murders which remain unsolved in El Salvador.

Mr. LAUTENBERG. Mr. President, I join with Senator LEAHY today in introducing Senate Resolution 191, a resolution relating to justice in the case of four American churchwomen murdered in El Salvador on December 2, 1980. This resolution expresses the sense of the Senate that the U.S. Government call upon the Salvadoran Government to appoint a special prosecutor in this case and commence the trial of those being held in custody by December 2, 1983.

December 2, 1983, will be 3 years since the murders of Maryknoll Sisters Ita Ford and Maura Clark, Ursuline Sister Dorothy Kazel, and lay volunteer Jean Donovan. By any stretch of the imagination, this is a long enough period of time for the Salvadoran Government to have completed its investigation of the crime and have begun the final stages of its prosecution of those who have already been held for 2 years for the killings. Yet, as the world knows, neither the investigation nor the prosecution has been completed.

The appointment of a special prosecutor by the Salvadoran Government is not without precedent. Most recently a special prosecutor has been named to handle the cases of certain government soliders charged with the massacre of 18 peasant farmers at the Las Hojas farm cooperative in El Salvador. This is a necessary step to cut through what the Department of State calls a justice system in the state of virtual collapse due to intimidation and corruption.

I join my colleagues in introducing this resolution because the broader questions of peace and war in Central America can distract our attention from cases such as this one. It is imperative that the full influence of the U.S. Government be used to demand justice in this case, in which four American citizens, devout Christians, were murdered by the troops of a government we are supporting with hundreds of millions of dollars in aid.

This is all the more important, Mr. President, because the congressional requirement for certifications by the administration on human rights progress in El Salvador may no longer be imposed. Since these certification requirements are complete with the submission of the administration's July 20, 1983, report, the Senate must insure that it receives complete and timely reports on future developments in this case.

Mr. President, I know that dozens of my colleagues have expressed their concern about the murders of these Americans by Salvadoran troops in the 2½ years since this tragedy. My own sense of dismay has grown steadily since I came to represent the State of New Jersey here. Earlier this year, the body of journalist John J. Sullivan was returned to Bergen, N.J., from El Salvador. Sullivan, too, was murdered in El Salvador in December 1980 and no progress has been made in determining or prosecuting those responsible.

In March I first met with Bill Ford, the brother of one of the four churchwomen, Ita Ford, to discuss in detail the legal delays and distractions that had kept the Salvadoran Government from completing its investigation and prosecuting vigorously five national guardsmen already in custody for the crimes. Bill Ford is from Upper Montclair, N.J. As a lawyer he brings considerable expertise to the case along with the anguish of a family member.

I was immediately troubled to hear Bill Ford document his conclusions that the Salvadoran Government was purposely delaying the investigation and trial, was holding back on evidence that pointed to a wider conspiracy, and was not able to contribute to justice being done. And I was disturbed by his charge that our own State Department had been less than fully responsive to the families of the churchwomen. Despite numerous meetings in Washington and in El Salvador, the families and their legal representatives felt compelled to file suit in Federal court to obtain relevant information about the case.

After studying testimony given on these points by Secretary of State George Shultz and others to the Senate Appropriations Foreign Operations Subcommittee, I felt compelled to write Secretary Shultz on April 20. I questioned whether the unresponsiveness of the Salvadoran and American Governments was not indicative of a policy that needed change. Though responding with terms such as "reprehensible crime, concern, and forthcoming," Assistant Secretary Powell Moore gave no new information or encouragement that a policy change would allow new or renewed pressure for justice.

Mr. President, I ask that my letter to the Secretary of State and the reply of the Assistant Secretary of State appear at the end of my statement.

While I awaited the State Department reply, the Lawyers Committee for International Human Rights, headquartered in New York City and involved heavily in the case of the churchwomen, sent a detailed 18-page memorandum to the Department with specific suggestions and recommendations for full investigation in El Salvador. The Lawyers Committee noted the severe shortcomings of the Salvadoran effort to develop evidence and a motive for the crimes. The committee noted the failure of the Salvadoran Government to explore all the questions of a possible coverup and of the involvement of higher level officers in the crime.

The Lawyers Committee's detailed effort and further conversations with Bill Ford prompted me to join other Senators in pressing Salvadoran President Alvaro Magana on June 17 for specific information about the Salvadoran commitment to progress in this case. On the one hand, President Magana predicted the setting of a trial date within 4 to 6 weeks. On the other hand, he noted his own lack of influence with what he termed "the independent judiciary."

When President Reagan announced his intention to nominate a new Assistant Secretary for Inter-American Affairs and a new ambassador to El Salvador, the Senate gained another opportunity to impress upon the administration its concern for conclusive action. I urged the Foreign Relations Committee chairman and ranking minority member to press nominees Langhorne Motley and Thomas Pickering to place justice in this case, and satisfaction for the families of the victims, high on their list of priorities.

In part I wrote the chairman on June 23:

> There are many other serious questions associated with American involvement in El Salvador and Central America, to be sure. But progress toward democracy and development is measured precisely in steps taken in cases such as this. Can we reasonably expect our purposes in Central America to be served in the longer term if we cannot see them served here?

I also submitted questions for Ambassador Motley for the hearing record. But the new Assistant Secretary responded, again, that cooperation with the families was good and that the evidence did not suggest the involvement of others in the crime.

Mr. President, I ask that the text of my letter to the chairman of the For-

eign Relations Committee and the questions to and responses of Ambassador Motley appear at the end of my statement.

I believe the question we face today is still the same. Can we reasonably expect our purposes in Central America to be served in the longer term if we cannot see them served here?

Mr. President, since December 1980 there have been 2½ years of dodge and delay by the Government of El Salvador in seeing justice done in this case. These 2½ years coincide almost exactly with the Reagan administration's policy of hundreds of millions of dollars of U.S. military and economic aid to that same Salvadoran Government.

The responsibilities for investigation and prosecution are clear to both the United States and Salvadoran Governments. The concern of the Congress has been clearly and consistently stated. There is enduring support among the American people for justice and respect for human rights in our foreign policy, particularly where American citizens are murdered by foreign soldiers.

Yet, Mr. President, the investigation has never been completed. The prosecution has never gone to trial. The questions raised by Bill Ford and the Lawyers Committee have never been answered. And the administration has never laid it on the line and used the dollars that Bill Ford pays in taxes, that the Clarks, the Kazels, the Donovans, and the Sullivans pay in taxes, as a lever to get justice done.

President Magana promised Senators a trial date 6 weeks ago, but that deadline has passed and the only announcement we have had in the interim is that the trial must be postponed for another 6 months. Assistant Secretary Powell Moore and Assistant Secretary Motley have written that evidence in the case does not suggest the involvement of others in the murders. But Presiding Judge Bernardo Rauda suddenly announced last week that new evidence involving six new suspects now must be investigated.

The Department of State certified July 20, 1983, that the prosecution of the five National Guardsmen accused of murdering the four American churchwomen is continuing. But the Lawyers Committee, after another visit to El Salvador a month ago, concluded the opposite in a letter to Assistant Secretary Motley on July 14, 1983. The committee wrote:

On the basis of our visit, we continue to be deeply concerned that no one will ever be successfully prosecuted for these crimes. More than 2½ years after the murders, the Salvadoran prosecutors still have not completed a number of basic investigative steps that are critical to a successful prosecution in this case. Moreover, in the 6 months since we last visited El Salvador, the prosecutors have done almost nothing to advance the case properly to trial. It is now unlikely that a trial will occur before 1984.

Mr. President, the Lawyers Committee laid out for Assistant Secretary Motley 6 pages of specific steps still needed in this case. I ask that their letter and recommendations appear at the end of my statement.

We cannot allow this case to drag on forever, Mr. President. We cannot continue to pursue a policy that ignores the pain suffered by the families of these churchwomen, the expressed will of the Congress and the American people, and the larger place that justice and human rights should have in our foreign policy.

The resolution Senator LEAHY, myself, and others are introducing today recommends the appointment of a special prosecutor to carry this case vigorously forward. It recommends the convening of a trial for those already accused in the case before the end of 1983. El Salvador's response to these recommendations will be an important sign as to whether the goal of justice and rule of law in El Salvador is taken seriously.

Mr. President, I ask that the complete text of Senate Resolution 191 be printed at the end of this statement and that a letter to Secretary of State George Shultz, a letter from Assistant Secretary Powell Moore, a letter to the chairman of the Foreign Relations Committee, questions submitted to Ambassador Langhorne Motley by Senators PELL and DODD at my request, and a letter from the Lawyers Committee to Ambassador Motley be printed in the RECORD in that order immediately following the text of the resolution.

The resolution and letters follow:

S. RES. 191

Whereas, on December 2, 1980, four United States citizen churchwomen were murdered in El Salvador;

Whereas, the certification law (Public Law 97-113) requires that the Government of El Salvador make "good faith efforts both to investigate the murders . . . and to bring to justice those responsible for those murders" before aid to El Salvador can continue;

Whereas, the Administration's current certification report admits to "disappointing progress" in the case and concedes a "virtual breakdown in criminal justice" in El Salvador;

Whereas, the prosecution of those accused of the murders of the four American churchwomen has been plagued by consistent neglect, professional incompetence, and a steadfast unwillingness to enforce Salvador law; and

Whereas, the vigorous prosecution and effective trial of those accused of murdering the four churchwomen will promote criminal justice throughout El Salvador and encourage similar efforts to pursue the murderers of other American citizens, Salvadoran Archbishop Oscar Romero, and tens of thousands of Salvadoran civilians; Now therefore, be it

Resolved, That it is the sense of the Senate that the United States Government shall call upon the Government of El Salvador,

(1) To appoint a special prosecuting attorney to oversee the comprehensive investigation of those responsible for murdering the four American churchwomen and to prepare a thorough and effective prosecution against them, and

(2) To assure the United States Government that those accused will be brought before a jury trial by December 2, 1983.

U.S. SENATE,
Washington, D.C., April 20, 1983.

Hon. GEORGE P. SHULTZ,
Secretary of State, Department of State, Washington, D.C.

DEAR MR. SECRETARY: I am deeply concerned about the failure of the government of El Salvador to conduct a proper and complete investigation of the murders of four American churchwomen in December 1980 and to prosecute vigorously the five ex-national guardsmen arrested for these murders two years ago.

I have noted with interest your statements on this case, particularly your assessment given the Senate Subcommittee on Foreign Operations on March 22. You stated then that the Salvadoran criminal justice system is ineffective and that the United States wants to be of assistance in making it more effective. But I am troubled that this message is not getting through to either the Salvadorans or to other Administration officials.

In an UPI dispatch that appeared in the Washington Post on March 23, Salvadoran President Alvaro Magana is quoted as saying, "In all these cases, as in any other, it is of special interest that justice be handed down without taking into consideration interests or pressure." I would welcome any explanation you might be able to provide as to the prospects for bringing more graphically to President Magana's attention the expressly stated concern of the Congress.

Also disappointing to me, Mr. Secretary, is the low priority the Justice Department appears to accord to this case as well as to other murders of American citizens in El Salvador. As quoted in the Post of April 17, Attorney General William French Smith could only say, after meetings in El Salvador, that he "hoped" the Salvadorans were pursuing the case of the churchwomen, but that, "it's a little hard for me to say, because I was not there for the purpose of investigating or following specific cases."

These statements by the Attorney General certainly clash with Administration attempts to reassure the Congress over the last two years that progress is being made and that American pressure will continue until justice is done.

I am disturbed, too, Mr. Secretary, by the claims of some family members of the four churchwomen that the Department of State, the U.S. Embassy in San Salvador and the FBI have not been forthcoming in providing information relevant to the investigation and prosecution of those responsible for the murders of their relatives. Any information that bears materially on the larger human rights questions involved in the murders, such as unjustifiable or intentional delay of the investigation and prosecution, or questions about involvement of high ranking Salvadoran government officials in these murders, should be a matter to be addressed independently.

I would call upon you, Mr. Secretary, to press for the most complete disclosure of information to the families of the four churchwomen and to agree to an independent assessment of the evidence and investi-

gation done by the Department of State and other U.S. agencies, including the FBI. Indeed, if the cases have been properly pursued by the Salvadoran government, it would be most serious and deleterious to current U.S. policy. But a cover-up of relevant facts would be infinitely worse in compromising our own standards of justice and our responsibility to be forthright with our own citizens.

I regret, Mr. Secretary, that I am close to concluding that despite your certifications of progress in El Salvador, we are rapidly approaching the point where further military assistance cannot be justified. The lack of progress in the cases involving the murders of American citizens is but one example of how human rights are suffering in that country.

Our responsibility under the Foreign Assistance Act are clear, "to promote and encourage increased respect for fundamental human rights and freedoms." More to the point, Section 301 of the Arms Export Control Act of 1976 prohibits security assistance to any country "engaged in consistent patterns of gross violations of internationally recognized human rights."

I know you have spoken of the military shield our assistance provides for the growth of democracy, reform and justice in El Salvador. A better shield in El Salvador may be a negotiated end to the fighting that will guarantee all groups an equal and secure opportunity to participate again in the political process. Vigorous efforts by the United States in this direction would directly contribute to the end of the fighting in El Salvador and improve the climate in which human rights and justice can thrive.

Thank you for your prompt consideration of these requests I anticipate your earliest possible reply.

Sincerely,

FRANK R. LAUTENBERG.

U.S. DEPARTMENT OF STATE,
Washington, D.C., May 17, 1983.

Hon. FRANK R. LAUTENBERG,
U.S. Senate.

DEAR SENATOR LAUTENBERG: Thank you for your letter of April 20 concerning the murder of four American churchwomen in El Salvador.

The Department of State shares your regret and concern about these tragic deaths. We remain committed to a full investigation into the murders and to seeing that those responsible are brought to justice. To this end, the Department of State, the U.S. Embassy, and the FBI, have spent countless hours working on this case. As requested by the families, we have specifically pursued their concerns that persons other than the accused might have been involved in the crime. The weight of the evidence does not suggest higher-level involvement in the murders. You may be assured that we will continue to pursue any leads, no matter where they may take us, and to press for a fair and thorough administration of justice.

With regard to President Magana's statement, President Magana was referring to the importance of a fair and complete administration of justice in the further improvement in the human rights situation in El Salvador. The breakdown of the criminal justice system in El Salvador is partially the result of attorneys, juries and judges who have been subject to bribery, corruption, and intimidation. It is not in the interest of justice in this case, or in the many others, that these reprehensible practices continue. The U.S. Government and the Government of El Salvador want to see a fair and thorough administration of justice in this case, and the reestablishment of the criminal justice system necessary to the furthering of democracy in El Salvador. President Magana is well aware of the Congress and the Administration's concerns regarding the murders of U.S. citizens. President Reagan has personally relayed this concern for a fair and thorough investigation and prosecution to President Magana. In addition, Ambassador Hinton, Attorney General Smith, and members of Congress have expressed this same concern to President Magana and other members of the government. I believe that all these individuals would agree that an impartial and honest judicial system should be created in El Salvador. We have offered the Government of El Salvador any assistance it may deem useful in this effort. A U.S. team of legal experts has provided Salvadoran President Magana with a lengthy analysis and recommendations to improve the judicial system. We are hopeful that the effect will bear fruit.

With regard to Attorney General Smith's statements, it is true that he was not in El Salvador to investigate specific cases of murdered Americans. The Attorney General's visit to El Salvador was an expression of the Administration's commitment to see justice done in these cases, and to offer assistance in revitalizing the judicial system. It is not the FBI's mandate to investigate crimes committed abroad. Rather, the FBI assisted in the investigation of the murdered U.S. citizens at the request of the Salvadoran Government.

The Department of State and the U.S. Embassy have been forthcoming in providing information relevant to the investigation and prosecution of those responsible for the murders. The Department of State has provided the families and their legal representatives with several hundred documents relating to the case. We have met with the families and their legal representatives several times, both in Washington and El Salvador. The Government of El Salvador has provided the legal representatives with a copy of the entire court record, and it has authorized the FBI to release results of certain evidence it took. In addition, the Secretary of State has ordered an independent and high level review of all the evidence available to our government pertaining to this case. We will provide the Salvadoran judiciary with any evidence we may find that could be of use to them in prosecuting this case and report to the Congress when this review is complete.

Again, thank you very much for your concern. You may be assured that the Department shares your commitment to assist the families in any way possible and for ensuring that those responsible for this reprehensible crime are brought to justice. We hope that by pursuing a fair and thorough administration of justice in this particular case that a precedent will be started for the revitalization of the judicial system in other cases. We believe that ultimately a viable judicial system is essential if further improvements in human rights and democracy in El Salvador are to come about.

Sincerely,

POWELL A. MOORE,
Assistant Secretary
for Congressional Relations.

U.S. SENATE
Washington, D.C., June 23, 1983.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am deeply concerned about the failure of the Government of El Salvador to investigate fully and prosecute effectively those responsible for the murders of four American churchwomen in December 1980. One of these women, Ita Ford, was a resident of New Jersey.

Since her brutal and untimely death, the family of Ita Ford has actively sought justice in El Salvador and full disclosure from our own government of the circumstances surrounding the murders. I have contacted the Department of State on behalf of the family, but without satisfaction. The freedom of information suit filed on behalf of the families now pending in New York is clear evidence that cooperation in this regard has been less than satisfactory.

Seeing justice done in El Salvador in this case is of deep and personal concern to me. That you and other members of the Committee share these concerns is reflected in past recommendations of the Committee. Therefore I know we all welcomed the comments of President Magana when he met with Senators on July 17 that in four to six weeks a definite date would be set for the trial of those already charged in the case. While timetables in the past have slipped regularly, it is my hope that El Salvador is now impressed with our concern and appreciative of the relationship between progress in this case and continued U.S. military assistance.

The nominations of Ambassador Langhorne A. Motley to be Assistant Secretary of State for Inter-American Affairs and Ambassador Thomas R. Pickering to the Ambassador to El Salvador soon will be before your Committee. At these hearings I hope you will be able to place the strongest possible emphasis on the need for greater U.S. and Salvadoran efforts to see justice done. I would urge you to encourage both Ambassador Motley and Ambassador Pickering to take stronger action toward meeting the concerns of the families of the churchwomen in their effort to learn the truth and see justice done.

There are many other serious questions associated with American involvement in El Salvador and Central America, to be sure. But progress toward democracy and development is measured precisely in steps taken in cases such as this. Can we reasonably expect our purposes in Central America to be served in the longer term if we cannot see them served here? Continuing to press forward with military assistance without a strong committment to justice and human rights will surely undermine efforts to assist the people of Central America.

I appreciate your consideration of my views and suggestions. Should I be in a position to be of service to you in the future, please do not hesitate to call on me.

Sincerely,

FRANK R. LAUTENBERG.

THE LAWYERS COMMITTEE
FOR INTERNATIONAL HUMAN RIGHTS,
New York, N.Y., July 14, 1983.

Hon. LANGHORNE MOTLEY,
Assistant Secretary of State, Department of State, Washington, D.C.

DEAR AMBASSADOR MOTLEY: As counsel for the families of the four American churchwomen who were assaulted and murdered in El Salvador on December 2, 1980, we write

to express our present concerns about the status of the investigation of the murders. During the week of July 4, we visited El Salvador, as we have on two previous occasions since August 1982, to inquire into steps being taken by Salvadoran authorities to investigate this crime and prosecute those who are responsible for it. As you know, five former National Guard enlisted men were arrested in May of 1981, but have yet to be tried.

During our latest visit, we met and discussed developments in the case with the Fiscal General, Dr. Mario Adalberto Rivera, and members of his staff; with the presiding judge, Dr. Bernardo Rauda Murcia; with Kenneth Blakely and James Mack at the U.S. Embassy in San Salvador; with private Salvadoran lawyers; and with others knowledgeable about the case.

On the basis of our visit, we continue to be deeply concerned that no one will ever be successfully prosecuted for these crimes. More than two and one-half years after the murders, the Salvadoran prosecutors still have not completed a number of basic investigative steps that are critical to a successful prosecution in this case. Moreover, in the six months since we last visited El Salvador, the prosecutors have done almost nothing to advance the case properly to trial. It is now unlikely that a trial will occur before 1984.

While in El Salvador we suggested, as we have in the past, that appropriate steps be taken to gather the following essential evidence:

(i) *The statement of Dagoberto Martinez Martinez.* Martinez was the superior officer of Subsergeant Colindres Aleman, the reputed ringleader of the guardsmen who have been accused of carrying out the crime. According to a sworn statement by Martinez, given to the F.B.I. in Los Angeles, California on February 9, 1982, Colindres Aleman confessed to him in December, 1980, shortly following the crime. We have been informed by the Fiscal General and other Salvadoran lawyers that the testimony of Martinez will not be admissible as evidence in the trial unless he is examined in El Salvador before the presiding judge. The importance of this confession as evidence is underscored by the fact that the case against Colindres Aleman is at this time only circumstantial. The judicial record contains no admissible evidence directly linking Colindres Aleman to the murders of the four women. We understand that Martinez' whereabouts in California are currently known to the F.B.I., and that he has applied for political asylum in the United States. We believe that the United States government is in a position to arrange for his examination in El Salvador by Salvadoran authorities and that this is essential to a successful prosecution. Despite this, when we met with him, the Fiscal General of El Salvador displayed no interest in obtaining this key evidence.

(ii) *Colindres' thumbprint on the burned-out van.* A second piece of evidence that would directly link Colindres to the murders is his thumbprint, which was located by the F.B.I. on the burned-out van in which the four women were riding. According to the Fiscal General, this and other technical evidence developed by the F.B.I. cannot be admitted as evidence in the Salvadoran proceedings unless the tests are successfully duplicated by Salvadoran authorities. The Fiscal General told us that the van has been exposed to the wind and weather since the crime, and that the thumbprint is presumed to have been washed off and lost. Immediate steps should be taken to inspect the van to determine whether in fact the thumbprint has been lost. If this is the case, the Fiscal General should make a further effort to persuade the court to admit the F.B.I. fingerprint test as evidence against Colindres. In our meeting with him, the Fiscal General declined our requests to take either of these steps.

(iii) *The testimony of Guardsman Cesar Valle Espinoza and others concerning the existence of higher orders.* Valle Espinoza has testified that on the evening of December 2, 1980, Colindres Aleman stated to him that he was acting under "superior orders" to apprehend the four women. Valle's testimony names two other Guardsmen who were with him and should have heard Colindres' statement. Virtually every Salvadoran lawyer with whom we have spoken has told us that the most likely defense of the five accused would be that they were acting under the higher orders of others who have not been charged. It thus becomes essential to fully investigate this issue, in order to refute the defense or, if it is established that others were involved, to bring appropriate charges. To date, the Fiscal General has refused to investigate this issue or make any effort to prepare for this likely defense. As we have suggested to him repeatedly, he could begin by examining the two guardsmen who were with Valle and should have heard the statement by Colindres, and by re-examining Valle concerning the details of what he heard.

(iv) *Testimony of Guardsman Perez Nieto.* The prosecutors should also re-examine Margarito Perez Nieto, a member of the Salvadoran National Guard who was also stationed at the airport on December 2, 1980. In his testimony last year, Perez Nieto stated that he had seen two suspicious-looking women at the airport on the afternoon of December 2. (The two women were apparently Jean Donovan and Dorothy Kazel.) He says that he reported this observation to Subsergeant Colindres Aleman. Perez Nieto was never fully questioned as to why the women seemed suspicious to him, what resulted from his conversation with Colindres Aleman, or who else he spoke with about these suspicious-looking foreigners. Nevertheless, the Fiscal General told us he has no intention of re-examining Perez Nieto.

(v) *Written death threats and related evidence in the hands of the F.B.I.* While in El Salvador, we learned for the first time that the F.B.I. has in its possession a written death threat that was delivered to the church in Chalatenango, where Ita Ford and Maura Clarke were working. We also learned that the F.B.I. found eight distinct sets of fingerprints on this threat, which have never been given either to the judge or to the prosecutors.

When we spoke to the Fiscal General and his staff during our recent visit they told us that they had no knowledge of the letter. One of the prosecutors told us, "If we had known about this evidence earlier, this could be a very different case." The prosecutors should be given access to this evidence at once.

This evidence may shed light on the unresolved issue of higher orders; there are reports that members of the church in Chalatenango were threatened and severely criticized during the fall of 1980 by the commander of the army in that area, Ricardo Pena Arbaiza.

The death threat may yield important evidentiary leads pertaining to Col. Pena Arbaiza's potential involvement in the killing, an issue that should be fully investigated. When we asked the Fiscal General about evidence suggesting higher orders, he told us that the has done nothing to pursue this aspect of the case and has no intention of doing so.

(vi) *Inquiry into the origins and authenticity of the confidential document given to the Salvadoran prosecutors.* At our meeting with the Fiscal General and his staff, we furnished him a copy of a document that may be pertinent to this case which was recently sent to the Maryknoll Order in New York by an anonymous source. A copy of the document has also been given to the U.S. Embassy.

Because of the nature of this document, and questions we have about its authenticity, we believe that its contents should remain confidential at this time. However, we feel that the document—whether or not it is authentic—could have a profound impact on the outcome of this trial, and that its authenticity and origins should be investigated immediately on a priority basis. Although the Fiscal General shared our view of the importance of this document, his office has so far failed to take any action.

We feel very strongly that each of the foregoing steps is essential to a successful prosecution, and that each should be completed before the sumario, or investigative stage, of the judicial proceedings is completed. Once this case is elevated from the sumario to the plenario, or trial stage, of the proceedings, it will be, for all practical purposes, impossible to introduce into the trial record new evidence that may be produced.

Considering the serious problem still facing us, we are encouraged by and welcome the appointment of former Federal Judge Harold Tyler to review the case. As we understand it, Judge Tyler's mission is to examine all evidence and information in the possession of the U.S. government and to identify any evidence or evidentiary leads that should be shared with the Salvadoran prosecutors. We believe his efforts could lead to the discovery of important evidence and substantially improve the prospects of successfully prosecuting what is at present a circumstantial case.

Yet despite Judge Tyler's involvement, we continue to be disturbed by the apparent unwillingness and inability of those in the Salvadoran Fiscal General's office to successfully prosecute all those responsible for the murders. Virtually all those working on the case are law students. Indeed, we have been reliably informed that one of these law students, Bachiller Leonel Romero Cordero, has been named the coordinator of the case despite the fact that he was once removed from office for taking a bribe from a defense lawyer in a robbery trial in Zacatecoluca. In our view, the appropriateness of this individual's involvement in the case should be re-examined immediately.

In view of these continuing problems, we believe it is essential that the U.S. government take all appropriate steps to ensure that evidence critical to a successful prosecution is developed and presented in an admissible form.

We remain anxious to cooperate with and assist the Department of State in seeing that all those who are responsible for the murders of the four churchwomen are finally brought to justice.

Sincerely, yours,

R. SCOTT GREATHEAD.
MICHAEL H. POSNER.

QUESTIONS SUBMITTED BY SENATORS PELL AND DODD AT THE REQUEST OF SENATOR LAUTENBERG

EL SALVADOR: MURDER OF THE CHURCHWOMEN

Q. What is being done to investigate and follow up on allegations that higher ranking military and government officials may have been involved in the murders? What would Ambassador Motley do to press for more conclusive findings?

A. During the investigation done by the Salvadoran Investigative Working Group before the case went to court, the Working Group pursued the possibility of higher level involvement. Every such lead was pursued. To the extent they could be checked out, none proved to be of any substance. As in the past, should a lead develop, we are prepared to insist that the Government of El Salvador pursue it. At present the weight of the evidence does not suggest the involvement of others besides that of five ex-National Guardsmen.

EL SALVADOR: TRIAL DATE OF MURDERERS

Q. What is Ambassador Motley's interpretation of President Magana's pledge to Senators on June 17 that a new trial date would be set in four to six weeks? Is this a firm date based on new developments or just the latest in a series of sliding timetables?

A. President Magana was referring to the judicial investigation now being carried out by Judge Bernardo Rauda. When the Court of Appeals returned the case to him March 11 for further investigation, it asked him to clear up several questions. Judge Rauda has now completed all these additional investigations. Ballistics tests on the weapons used to murder the churchwomen have been performed by the National Police and are about ready for presentation to the Judge. (The tests previously conducted by the FBI were not admissible because they were not conducted in El Salvador. The FBI has now provided additional technical assistance to the National Police to permit them to conduct the tests.) Once Judge Rauda has these tests formally in the judicial investigation record, he intends to elevate the case once more to "plenary," or for jury trial. It was President Magana's judgement that this elevation should take place within the next few weeks.

EL SALVADOR: SUIT IN U.S. COURTS

Q. Why has it been necessary for families of the murder victims to file suit in U.S. District Court in New York against the Department of State seeking information about the murders and the investigation and trial? What would Ambassador Motley be prepared to do to allow full disclosure of information to the families of the murder victims?

A. It has been and will continue to be the intention and desire of the Department of State to ensure maximum disclosure possible of information to the families of the murder victims. The Department of State has been in continuing contact with the families of the murder victims and has provided them with information, both in written and oral form. In addition to this informal channel, the Department processed a Freedom of Information Act (FOIA) request, dated June 29, 1981, concerning the murders, in which the Department retrieved a total of 236 responsive documents. Of this total, 125 documents were released in full and 60 were released in part, 30 were withheld in their entirety, and 21 documents which had originated in other agencies were referred to those agencies for their review and direct response to the requester. Although the major part, by far, of the information was therefore released, some information had to be withheld because it fell within categories of information exempted from disclosure under the following FOIA exemptions: (1) it was currently and properly classified, in that it consists of foreign government information, information which concerns foreign relations or foreign activities of the United States, or information which would disclose the identity of a confidential source, the disclosure of which reasonably could be expected to cause damage to the national security (exemption (b)(1), 69 documents or portions thereof); (2) it consisted of pre-decisional, deliberative information (exemption (b)(5), 8 documents, or portions thereof); (3) it constituted a clearly unwarranted invasion of personal privacy (exemption (b)(6), 2 documents, or portions thereof); (4) it is contained in investigatory records compiled for law enforcement purposes (exemption (b)(7), 64 documents, or portions thereof). The requesters filed suit in U.S. District Court to contest the withholding of this information.

The Department is currently processing another request from the families to update their previous request. As soon as the documents responsive to this request have been reviewed, all of the information will be released, unless it is subject to a Freedom of Information Act exemption. As the Department has explained in great detail in affidavits filed in the New York case, it remains necessary for the Department to protect classified information, pre-decisional deliberative material, privacy information (about persons other than the slain churchwomen) and investigatory records. The Department is particularly concerned that the premature public release of investigatory material might impede the trial of the alleged perpetrators. It has to be kept in mind, also, that any information, including classified information, which is released to the families would have to be released to any other FOIA requester. Meanwhile, the Department will stay in contact with legal representatives of the families in order to ensure that they are fully apprised of the legal proceedings in El Salvador concerning these heinous murders.

EL SALVADOR: PROSECUTION OF MURDERERS

Q. Can the United States reasonably expect any progress in development and democracy in Central America in the longer term if we cannot see justice done in this case.

A. The prosecution of the five ex-National Guardsmen for the murder of the American Churchwomen by the Government of El Salvador is a landmark case in that country. Previously, "everybody" knew that members of the Armed Forces were not prosecuted for their acts, regardless of the crime. Therefore, this case does represent an important change in Salvadoran judicial practise. Unless all members of a society are responsible before the law, the rule of law is impossible. Without the government's commitment to establish the rule of law, democracy cannot begin, much less flourish. On the other hand the five ex-National Guardsmen are entitled to a defense. Judge Rauda has appointed defense lawyers for them. These attorneys are acting in good faith in the defense of their clients. While we cannot predict the outcome of the jury trial, we would agree that the cause of democracy would suffer a great reverse in El Salvador were the jury trial to result in a travesty of justice.

SENATE RESOLUTION 192—BUDGET RESOLUTION RELATING TO CONSIDERATION OF S. 1001

Mr. COHEN, from the Committee on Governmental Affairs, reported the following original resolution; which was referred to the Committee on the Budget.

S. RES. 192

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1001. Such waiver is necessary because S. 1001 authorizes the enactment of new budget authority which would first become available in fiscal year 1984, and such bill was not reported on or before the appropriate date required under section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The waiver of section 402(a) is necessary to permit congressional consideration of statutory authority for the Office of Federal Procurement Policy.

S. 1001 provides an authorization for fiscal year 1984 of $5,000,000.

AMENDMENTS SUBMITTED

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

TOWER AMENDMENT NO. 2108

Mr. TOWER proposed an amendment to the bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes, as follows:

On page 82, after line 15, add the following:

SEC. . Any reference in any law, order, or regulation, including this Act, to the—

(1) Institute of Museum Services shall be deemed to refer to the National Endowment for Museums;

(2) the National Museum Services Board or the Museum Services Board shall be deemed to refer to the National Endowment for Museums Board; and

(3) the Director of the Institute when such references refers to the Director of the Institute of Museum Services shall be deemed to refer to the Director of the National Endowment for Museums.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, August 3, to hold a hearing on S. 1701, a bill to impose specific directives on the Bonneville Power Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, August 2, at 9:30 a.m., to hold a closed hearing to receive testimony on the U.S. military action in Central America.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on foreign Relations be authorized to meet during the session of the Senate on Tuesday, August 2, to consider the following nominations:

Millicent Fenwick for the rank of Ambassador during the tour of her service as U.S. Representative to the Food and Agriculture Organization in Rome;

Thomas Enders to be Ambassador to Spain;

Patsy Blackshear, Chester A. Crocker, William F. Pickard, Francis S. Ruddy, and Charles G. Wells to be Members of the African Development Foundation;

Clair W. Burgener, Malcolm Forbes, Jr., Joseph Lane Kirkland, Arch L. Madsen, Jane L. Michener, and Michael Novak for Membership in the Board for International Broadcasting;

Peter Jon de Vos to be Ambassador to the People's Republic of Mozambique; and

Foreign Service List dated July 25, 1983.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, August 2, to mark up the budget reconciliation package.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, August 2, 1983, in order to consider and act on pending nominations, commemorative resolutions, and the following legislation:

TITLE XIII OF S. 829—FEDERAL TORT CLAIMS ACT AMENDMENTS

S. 645—Court Improvements Act of 1983.

S. 381—Federal Courts Study Act.

S. 384—State Justice Institute Act of 1983.

S. 385—A bill to provide greater discretion to the Supreme Court in selection of the cases it will review.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

COCAINE—ITS IMPACT ON HEALTH

● Mrs. HAWKINS. Mr. President, there is widespread misinformation about the physiological and psychological problems associated with cocaine use.

Coca leaf-chewing was, and remains, a widespread practice among the Andean Indians who must work in a 2-mile high atmosphere without proper nourishment. A cud of leaves is chewed along with some alkali, and this gives relief from fatigue, hunger, and the low oxygen content of the air. Chewing coca leaves is not a very efficient way to extract the cocaine, and the Andean workers do not report a "high"—but they are capable of working more effectively for an hour or two after chewing the leaves.

The extraction and purification of cocaine more than a century ago changed the story completely. It was put into patent medicines, prescribed for all sorts of physical and mental ailments, and appeared to be a "miracle drug" because, at first, it made people feel better. Cocaine was recommended for nervous exhaustion, depression, alcoholism, morphine addiction, and many other conditions.

Unfortunately, as time went on, people became seriously dependent on the drug, cases of overdoses and psychoses appeared, and enthusiasm gave way to bitter disappointment. Sigmund Freud, the founder of psychoanalysis, wrote glowing articles about the safety and effectiveness of cocaine, but later had to retract them, admitting the shortcomings and dangers of the drug.

We are now in a period when people have forgotten the dismal 19th-century experience with cocaine, and claims of its harmlessness and exhilarating effects are again being heard. Cocaine's present popularity proves the adage that "those who forget history are condemned to repeat it."

Pupillary dilation, increased heart rate, elevated blood pressure, loss of appetite with substantial weight loss, and sleeplessness commonly occur with cocaine use. The intravenous route may be accompanied by hepatitis or bloodstream infections. Freebasing has been reported to interfere with the exchange of lung gases.

Deaths due to cocaine toxicity are increasing. The mechanism involved may be a heart rhythm disruption, failure of the respiratory center, or repeated convulsions. A few people are hypersensitive even to low doses of cocaine, possibly because of a deficiency of enzyme.

Because many people are now using enormous quantities of cocaine—stopping only when the user or the cocaine supply is exhausted—we know that tolerance and a withdrawal syndrome can develop. Eventually, more and more cocaine produces less and less euphoria. A variety of aches and pains, physical depletion, and profound psychological depression are some of the withdrawal symptoms.

The psychological complications of cocaine dependence are the primary cause for concern. A paranoid mode of thinking can result in violence to the user or those around him. Psychotic episodes have been seen in persistent cocaine users. Hallucinations are classically described—but auditory, visual, or gustatory misperceptions also occur.

With access to large amounts of cocaine, the user, especially the mainliner and freebaser, can arrive at a point where cocaine use becomes a career. For such individuals, nothing else is of any significance—nothing provides any pleasure except cocaine.

There are several reasons why some drug abusers return incessantly to cocaine. First, the memory of a high is exceedingly attractive; second, the discomfort after stopping is cured by taking more cocaine; and, third, the depression following a cocaine run is temporarily relieved by cocaine. Finally, the ordinary pleasures of living are no longer pleasurable, because the abuser's reward centers have been overstimulated.

The cocaine career—which began as a search for a high—ends in a dismal effort by the abuser to extricate himself from unhappiness, depression, and the inability to enjoy the many facets of life.

I ask that an April 11, 1983, Time magazine cover story "Fighting Cocaine's Grip—At First I Was Scared" by Kurt Anderson be printed in the RECORD.

The article follows:

AT FIRST I WAS SCARED

Caroline Coleman grew up in the privileged world of trust funds, Virginia boarding schools and Swiss finishing schools. It is a world, she claims, where using drugs is as common as clipping coupons. "Most of the people I knew snorted coke and took pills. You just couldn't make a move without ammunition." Coleman, now 28, says she began sampling marijuana, hash, amphetamines and barbiturates when she was a freshman at an exclusive girls' school in Virginia horse country. The status drug among the teen-age girls, however, was clearly cocaine. "If you had a little thing of coke you felt cool," Coleman recalls. She snorted coke occasionally but preferred the more mellow high of heroin, which a classmate gave her during her senior year. Soon she was hooked.

After two years of college in New York and two more years abroad, Coleman settled in Manhattan. She tried to kick her heroin habit, enrolling in a methadone program. But soon she discovered an irresistible thrill: speedballs, injections of coke and heroin mixed together. She thus acquired a craving for the drug she had once dismissed. "The intense flash from the cocaine was so wonderful that if I only had $20 I'd buy coke." She initially bought her drugs from friends, but as her speedballing grew to a $300-a-day-habit, she had to buy on the street. "At first I was scared," she says. "But then it became a part of it that I really liked, going into a really bad neighborhood."

Although her income from a trust fund supported her comfortably, Coleman kept busy with odd jobs as a substitute teacher or an extra on a TV soap opera. But her interest waned as she became more obsessed with coke. "There was no room to think about anything else. When I was working, I'd be thinking, 'I'll cop [buy] in four hours,' 'I'll cop in three hours.' Sometimes I'd just leave early and go cop." Before long, the interest she received in her trust fund was not enough to pay her drug bills. "The coke made me absolutely insane. I'd steal silver and gold jewelry from my family and friends. That would be my motivation for going to people's houses." She also began to dip into her capital. Bank officials, alarmed at her shrinking account, contacted her parents in Greenwich, Conn. Her mother hired a detective to follow Caroline. The detective tapped her phone and secretly photographed her buying drugs. When he presented the evidence to her parents, they persuaded her to go to Phoenix House, a drug rehabilitation center in New York. Coleman finally stopped taking drugs. Now a counselor at Phoenix House working with teen-agers, she considers cocaine far more addictive than heroin. She sums up: "I was like a vampire needing blood."●

BIGBEE RANCH CELEBRATES DIAMOND JUBILEE

● Mr. DOMENICI. Mr. President, we in the Southwest take great pride in the beauty of our land and the way in which so many use it, work on it, and make their livelihood from it. I rise today to recognize a family who know better than most how rich those rewards are and just how hard one must work to attain them.

In 1908, when the State of New Mexico was still a territory, David Bigbee and his son, Dade came from Missouri to stake their claim on the acres entitled all Americans under the Homestead Act. The family settled there and began work on what would become the family business for the following generations. David's sons, Frank and Dade, became the two principal managers of the property, ever expanding and improving the initial claim their father had acquired.

On August 20, the Bigbee family ranch will celebrate its diamond jubilee. Run today by Frank Bigbee's son John, a former State representative, and his wife Povy, the ranch now consists of 150 sections in New Mexico, and a separate enterprise in Colorado. The work and dedication which allowed the ranch to thrive and prosper as it has would make David Bigbee very proud of his family—as we all are. For while he took the initial risk, his children and grandchildren built on that faith and today 75 years later have preserved the idea of the ranch as a family enterprise. John's father Frank is, at 92, president of the company, and Mrs. Dade Bigbee, who will be celebrating her 96th birthday during the week of the jubilee, is chairman of the board. Clearly, without this unity and multigenerational commitment, the ranch would not have prospered as it has. But as the Bigbees well-know, succeeding in the ranching business takes much more than commitment and dedications—it takes long, hard days, and lots of work under conditions that are often less than optimum. And I think it is in this knowledge that they derive the great sense of pride and accomplishment that I know will characterize the festivities surrounding the ranch's diamond jubilee.●

EIGHT YEARS: FROM HELSINKI TO MADRID

● Mr. DOLE. Mr. President, today marks the eighth anniversary of the signing of the Helsinki Final Act. On August 1, 1975, the heads of state of 33 European nations, the United States, and Canada, committed their governments to improved relations, through a series of provisions designed to enhance European security and cooperation. One of these recognized human rights as an essential factor in insuring the development of friendly relations and cooperation.

After almost 3 years of tough negotiations at the Madrid meeting to review implementation of the Final Act, 34 signatories have reached provisional agreement on a concluding document. Malta is the only country which has withheld consensus in an effort to force the other 34 to agree to a conference on Mediterranean security.

Assuming that the Malta problem will be resolved, the concluding document will make significant additions to the CSCE process. The document has provisions which deal with the rights of workers to organize, religious rights, human contacts and family reunification, access to diplomatic and consular missions, free flow of information, rights of journalists, and measures against terrorism. Significantly, the Madrid meeting also has provided a forum for the vigorous review of compliance by all signatories with the provisions of the Helsinki Final Act. This thorough and continuing review highlighted the failure of the Soviet Union and other East European states to adhere to many of their Helsinki commitments. The United States and other delegations were forthright in calling attention to and condemning flagrant Soviet and Eastern violations of the Final Act. There is hope that eventually this will have a beneficial effect.

Mr. President, the goals of the Helsinki Final Act, cannot be totally realized as long as Soviet troops occupy Afghanistan; as long as members of the Moscow, Ukrainian, Lithuanian, Georgian, and Armenian Helsinki monitoring groups languish in prisons, labor camps, and psychiatric hospitals; as long as the workers of Poland are denied the right to form free trade unions; and as long as so many in the East are denied the right to reunite with their families in the West. Nevertheless, it is vitally important for us to keep the Helsinki process alive—to continue to set standards for international behavior and to communicate to the Soviet Union our deep concerns on issues of implementation. Indeed, the Madrid agreement provides for additional forums to further these ends, including experts meeting on human rights, human contacts and on the peaceful settlement of disputes, as well as a cultural forum, and the next followup meeting in Vienna in 1986.

Mr. President, the Senator from Kansas would like to conclude by inserting into the RECORD a valuable appreciation of the basic CSCE policy concerns which my fellow commissioner, Senator ORRIN HATCH, has written. Although the CSCE impasse has now—with the exception of the Malta filibuster—been resolved, many of Senator HATCH's underlying concerns remain as valid today as when they were written a few months ago. In particular, the experts meeting on ways to facilitate human contacts and family reunification, and the Conference in Disarmament in Europe (CDE), are provided for in the Madrid documents, largely as Senator HATCH foresaw. Like him, the Senator from Kansas would prefer that the larger freedoms that he enumerates could also become reality.

As cochairman of the Helsinki Commission, I remain deeply disturbed about the continuing violations of the Helsinki accords and I regret that we have not yet witnessed any significant manifestations of the Soviet Government's intent to live up to its human rights commitments. Nevertheless, I remain committed to the noble ideals found in the final act and in the Madrid concluding document, and fervently hope that the Soviet Government will begin to show that it intends to treat these ideals with respect. Only in the full implementation by all signatories of the Helsinki Final Act can the goal of true security and cooperation in Europe be realized.

The material follows:

THE CSCE IMPASSE

(By Senator Orrin G. Hatch)

The Conference on Security and Cooperation in Europe has been meeting in Madrid for three years, but is still dead-locked over signing a final document. The impasse centers on the key issue of human rights. While the Madrid meeting has been in session, the Soviets and their Warsaw Pact allies have continued to violate the human rights provisions of the 1975 Helsinki Final Act, thereby jeopardizing the credibility of the entire Helsinki process.

Our ambassador to the CSCE, Max Kampelman, has done a superb job convincing our allies that we must see some "performance" from the Soviets before we sign a concluding document—some indication that they intend to take their Madrid commitment seriously. Our allies support us on

this; in turn, they want our support for convening a Conference on Disarmament in Europe (CDE) with the Soviets to reduce the risk of military confrontation in Europe. When I visited Madrid a few months ago as a CSCE commissioner, I decided that a CDE in 1983 would be useful, provided the Soviets agree to our four conditions for confidence-building measures (CBMs): that they be militarily significant, politically binding, verifiable, and cover the entire continent of Europe.

When I met with Chancellor Helmut Kohl of West Germany this past April prior to his meeting with President Reagan, I encouraged him to raise the issue of a CDE with the President, since he and I agree on the importance of a CDE in 1983. According to *The New York Times*, Mr. Kohl told President Reagan that he wants to go ahead and convene a CDE while at the same time continuing to encourage the Soviets to make progress in the area of human rights. However, President Reagan believes the Soviets and their Warsaw Pact allies need to demonstrate progress in human rights *before* we can sign a Madrid document which contains provisions for a CDE.

The President is 100 percent correct in holding to this position. In addition to "linking' Soviet performance with signing a final document, our allies need to understand that, if they want a CDE, they must continue to stand firm and wait for a significant gesture from the Soviets and their Warsaw Pact allies.

Of course, we need to be flexible in defining "performance." Some possibilities are: Soviet workers should be allowed to form independent labor unions; emigration restrictions should be eased; individuals should be allowed to practice their religion without fear of persecution; imprisoned human rights activists Anatoly Shcharansky and Andrei Sakharov should be released.

Other examples of "performance" would be the withdrawal of some Soviet troops from Afghanistan or improvements in Poland. Last September the Senate Steering Committee, of which I am vice-chairman for foreign policy, sent a letter to President Reagan supporting his policy of insisting on real progress in Poland before reaching any new agreements.

It is absolutely essential that the West continue to remain united in its priorities. The NATO alliance is demonstrating its cohesiveness by seeking important changes in the draft language put forth by the neutral and nonaligned nations. One very important addition we are seeking is a provision for a meeting of experts to explore ways to facilitate human contacts and family reunification.

This one issue demonstrates the importance of the CSCE. It was not meant to be a battleground where one side tries to overpower the other. Rather, the purpose of the CSCE is to improve East-West relations. As my colleague, Senator Bob Dole, stated before the CSCE last November, "East-West harmony is a fundamental objective of American foreign policy. The oportunities to achieve that harmony can be enlarged by what we do here in Madrid, within the framework of the CSCE. Yet, how can we make progress without abiding by the Final Act's provisions?"●

EIGHT YEARS OF HELSINKI IN THE U.S.S.R.

● Mr. D'AMATO. Mr. President, amid the hoopla over the seeming end of the Madrid Conference, we must ask ourselves what has happened to the people whom the Helsinki Final Act was supposed to benefit: the citizens of the U.S.S.R. and Eastern Europe. As a member of the Commission on Security and Cooperation in Europe, I am dismayed over the lack of improvement of human rights within the Communist regimes of the East bloc. During the past year, we have seen the flickering flame of Polish freedom extinguished by the repressive military leadership of that nation. Eight years after the signing of the Helsinki Final Act, we continue to witness the blatant suppression of even the most basic of human rights. Of particular note, is the attempt by the atheistic governments of Eastern Europe to eliminate every last vestige of religion.

Thus, on this occasion, the eighth anniversary of the signing of the Helsinki Final Act, I wish to draw the attention of my colleagues to the situation of religious communities in the Soviet Union. While we all rejoice in the recent happy resolution of the 23-year emigration struggle of two Pentecostal families, the Vashchenkos and Chymkhalovs, there are at least 30,000 other Soviet Evangelical Protestants who want to emigrate as the only way to escape generations of religious persecution in the U.S.S.R. There are also about 300,000 Soviet Jews who want to escape anti-Semitism. So, for those of us who are committed to bettering the situation of religious believers—Jews, Christians, Moslems—in the U.S.S.R., there is a lot of work left to be done.

What is the status of religious groups in the Soviet Union? Despite official Soviet assurances, religious life in the U.S.S.R. is actually under rigid Government control. In fact, Soviet laws on religion attempt to regulate every aspect of organized religion: No one under the age of 18 is supposed to attend church; church sermons and literature are censored by the Government; and entry to seminaries is subject to state control. This list of restrictions could be extended many times. If groups of Soviet believers feel that it is against the dictates of their consciences to abide by these official restrictions, the community is forced into an illegal status and participants are liable for criminal prosecution.

Probably half of the Prisoners of Conscience in the Soviet Union today are religious believers: Hundreds of Baptists, Adventists, and Pentecostals, including dozens of pastors, have been imprisoned in the past few years. For the first time since 1972, two Lithuanian Catholic priests, Father Sigitas Tamkevicius and Alfonsas Svarinskas, are imprisoned; Russian Orthodox priest, Father Gleb Yakunin, has been put in solitary confinement for daring to ask for a Bible in camp; Georgian Orthodox activist, Valentina Pailodze, was recently given an 11-year term of imprisonment; and numerous Muslims have been imprisoned for seeking religious and cultural rights. This tragic list of victims of Soviet repression of religion could also be extended hundreds of times.

In closing, I would like to draw my colleagues' attention to the particular plight of several other religious groups in the U.S.S.R. Not only does the Soviet state arrogate to itself the right to decide what types of religious activities are permissible, but it also has the supreme arrogance of outlawing entire creeds, including the Eastern or Greek Rite Catholic Church of Ukraine, one Uniate activist, Josif Terelya, has spent most of his adult life in camps and psychiatric hospitals; Jehovah's Witnesses, who are considered members of an international conspiracy emanating from Brooklyn, N.Y.; and the True Orthodox, there is a group of True Orthodox women which has spent 25 years in the camps. In violation of its Helsinki pledges, the Soviet state continues to practice discrimination and repression against religious believers in the U.S.S.R.

In light of the continued repression in the Soviet Union, the results of the long diplomatic deliberations at Madrid may seem meager. But we must persevere in our painstaking efforts to insure that the Soviet Union will eventually live up to its solemn international commitments. To do otherwise would forsake our solemn commitment or preserve, foster, and support religious freedom throughout the world.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. STEVENS. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The select committee has received a request for a determination under rule 35 which would permit Mr. Robert H. Dockery of the staff of Senator CHRISTOPHER J. DODD, to participate in a program sponsored by the Konrad Adenauer Stiftung, in the Federal Republic of Germany, from October 8-15, 1983.

The committee has determined that participation by Mr. Dockery in the program in the Federal Republic of Germany, at the expense of the Konrad Adenauer Stiftung, to discuss United States-German relations, is in

the interest of the Senate and the United States.●

FINANCIAL AID TO POLAND

● Mr. MOYNIHAN. Mr. President, martial law having nominally been ended by the Soviet Union's proconsul in Warsaw, General Jaruzelski, Western creditor governments have in recent days moved quickly to formally reschedule Poland's unpaid debts to Western banks. Simultaneously, the world learned last Thursday that negotiations for a long-term grain sale agreement between the United States and the Soviet Union, suspended 2 years ago by the United States in protest of the Soviet-sponsored repression of the free trade union, Solidarity, have quickly yielded a new agreement.

Before Solidarity is forgotten to history altogether, I urge my colleagues to take note of two statements regarding status of civil liberties and human rights in Poland.

One is the expression of Lech Walensa, who said, on the day following the transformation of the military regime in Poland to a civilian one:

If I were to choose between the new (civilian) and martial law, I would choose martial law.

This from a man who spent more than 1 year as a prisoner of the state for holding views at odds with those of the state. He knows about civil liberties what we, in the West, can only imagine. Clearly, the end of martial law has not meant the restoration of human rights in Poland.

The second statement I commend to Members of the Senate, and to the many readers of the CONGRESSIONAL RECORD, comes from our distinguished colleague, the junior Senator from Wisconsin, Mr. KASTEN, who has summarized his view of this situation in a studied and persuasive essay in the Wall Street Journal of July 28, 1983.

I ask that the complete text of Senator KASTEN's article be printed at this point in the RECORD.

The article follows:

[From the Wall Street Journal, July 28, 1983]

HOLD OFF RESCHEDULING THE POLISH LOANS

(By Robert W. Kasten Jr.)

What do the latest actions by the Polish government really mean for the people of Poland, and how should the U.S. react? We have conditioned normal relations with Poland upon the lifting of martial law, release of political prisoners and discussions with independent labor unions. Are conditions in Poland sufficiently changed for us to normalize relations?

In many cases the new "civil" laws are harsher than the martial laws they replace. For instance, it now will be impossible to strike legally, independent unions will be banned completely, press censorship and restrictions on movement will be tightened severely, and the regime will be able to declare an emergency whenever it decides there is a threat from "internal factors." As Gen. Jaruzelski told the Polish Parliament a week ago: "Any attempt at anti-state activity will be curbed no less unswervingly than during martial law." No wonder that Lech Walesa declared: "If I were to choose between the new (laws) and martial law, I would choose martial law." In addition, it seems that the "release of political prisoners" by Polish authorities may not include any real political prisoners.

ARGUMENTS OF THE MODERATES

Thus, despite the apparent changes, there hasn't been any change in substance. Yet the banking community has begun to clamor for a return to the state of affairs before martial law. Poland has requested that its foreign debt be rescheduled drastically, including an incredible eight-year moratorium on interest payments and a demand for $3 billion more in export credits. American and European leaders seem ready to discuss this. Clearly, the West has yet to learn anything about economic relations between communist and capitalist nations.

Those who advocate a rescheduling make the same arguments as the "moderates" who opposed a declaration of Polish default one year ago. Then, despite the fact that Poland had stopped making payments on its debts, they argued against facing the financial realities and declaring default.

The "moderates" asserted that if we refrained from declaring default, the West would gain in two ways: There would be an incentive for the Polish authorities to "liberalize" more quickly, to lift martial law and to treat the Polish people less harshly. And Poland would speed up its repayment of loans to the West.

But what actually happened? It has taken 1½ years to "lift" martial law, and this action itself is meaningless. The evidence doesn't support the claim that Western restraint leads to improved behavior on the part of communist governments. History indicates that in dealing with such regimes the welfare of the people depends far more on the dynamics of internal politics than on Western actions.

What about the financial situation? During hearings before my Foreign Operations Subcommittee last year representatives of the administration claimed that if we didn't declare default, things would be better for Western creditors. Robert Hormats, former assistant secretary of state, in testimony on Feb. 9, 1982, opposed declaring Poland in default and asserted that "the best chance of putting maximum pressure to obtain a reflow of currency from Poland to the East is by continuing to press them to pay their debts. Now they don't pay as we would like, clearly, but there is a net outflow. There is a net outflow, and it is a high cost for an economy as weak as the Polish economy."

But the past year hasn't fulfilled the predictions of those who confidently assured us that the Polish government would make every effort to repay its debt. True, Poland paid half of the interest due in 1982, but only on the condition that the other half be "recycled" back to Poland by banks as short-term credits. The net effect was to increase the debt's magnitude by one half the interest due to Western creditors. These short-term credits enabled Poland to "purchase" Western goods, leading to a further transfer to resources from West to East. And now comes the latest outrageous request from the Polish debtors. The "outflow" described by Mr. Hormats continues to be in the opposite direction.

This is perhaps the most important point to be made, for the Polish debt is but a small part of the greater issue of financing and extending credit to the Soviet Union and its satellites. Trade with the Soviet Union once was seen as an aspect of "detente." By trading with and lending to the communists, it was argued, we would bridge the gap between East and West, bringing prosperity and hope to oppressed people. And by making tyrannical states more dependent on Western goods and technology, we would convert them into more moderate and freer nations, eventually eliminating the danger of war. Western trade would "liberalize" the communist countries.

But things didn't work out that way. The oppressed people remain oppressed, the communist nations are no less tyrannical, and the danger of war hasn't been reduced. Why hasn't the theory of "liberalization by trade" worked, as we once believed it would?

Part of the answer lies in the underlying philosophy of the Soviet bloc countries themselves.

According to Lenin's theory of imperialism, the capitalist West is driven by historical necessity to export its surplus first to the underdeveloped world, and then to communist countries. In other words, when capitalists extend credit to communist nations, they are behaving as Marxist-Leninist theory predicts they will. As Lenin wrote:

". . . the capitalists of the world and their governments, in their rush to conquer the Soviet market, will close their eyes [to various Soviet diplomatic subterfuges] and will thereby be turned into blind deaf mutes. They will furnish credits which will serve us for the support of the Communist Party in their countries and, by supplying us material and technical equipment which we lack, will restore our military industry necessary for our future attacks against our suppliers. To put it in other words, they will work on the preparation of their own suicide."

The implication is that the accumulation of debt has been a conscious act of policy by the communist states and that they have no intention of paying it back. It is likely that communist borrowing is part of "the economic strategy of an empire." In a brilliant essay by this title in Grand Strategy: Countercurrents, Larry Arnn observed that:

". . . until the Poles actually repay the loans, the food they have consumed and the capital they have imported is not expensive to them at all. It is incredibly cheap. The spanking new Polish steel mill may not be an efficient and wise investment by our standards, but it is a large and modern steel mill, and so far someone else has paid for it."

The problem's magnitude becomes apparent when we consider that Poland's government is $25 billion richer and the West is $25 billion poorer, and that even though Poland has paid only a minute part of what it owes, its line of credit is far from exhausted. Furthermore, as Mr. Arnn noted, the logic that has allowed Poland to "borrow" $25 billion will enable the Soviet Union and the rest of its satellites to "borrow" billions and billions more, unless we recognize this policy for what it is: the economic exploitation of the West by the East, which can occur only because of the shortsightedness of capitalist nations.

SHOULD DELAY ARRANGEMENT

We must recognize these things and be guided in our relations with communist countries by reason and prudence—not by our hopes alone. These hopes have been

dashed too many times. I believe we have reached a point where we must draw the line. A year ago I called for the U.S. to declare Poland in default. Now I believe that the U.S. should delay any agreements on rescheduling Poland's debt until such time as that country meets objective standards of human freedom. In addition, if by the end of the year Poland hasn't made substantive changes in its policy toward its people, we should state unequivocally that we will declare Poland in default of the $1.7 billion it owes to the Commodity Credit Corporation. The U.S. thereby would accomplish three important goals. First, we would make clear to our allies and to Western business interests that trade between West and East is a risky undertaking that we will no longer subsidize. Second, we would begin to undermine the economic strategy of the Soviet empire. And finally, we would make it clear that our commitment to liberty and human rights is more than just words.●

HUMAN RIGHTS AND SECURITY: 8 YEARS OF THE HELSINKI PROCESS

● Mr. HATCH. Mr. President, 8 years ago on August 1, 1975, the heads of state from 33 European nations, the United States and Canada, signed the Helsinki Final Act, initiating a diplomatic phenomenon known as the Helsinki process. This process, unique in international relations, covers a wide range of East-West activity with special focus on human rights and security issues. Essential to the Helsinki process are the periodic review conferences held to consider member state's records in implementing the Final Act and to encourage improved compliance with its provisions. The most recent conference of this kind, the Madrid meeting, has nearly completed its work, with only a few details relating to Maltese demands in the Mediterranean security area still to be resolved.

The Madrid meeting, which began in September 1980, has been the scene of sharp East-West clashes over such issues as the continuing Soviet occupation of Afghanistan, the imposition of martial law in Poland and human rights violations in the Warsaw Pact countries. Several months ago, I visited Madrid as a CSCE commissioner and became convinced that convening a Conference on Disarmament in Europe, CDE with the Soviets in 1983 would be useful, provided the Soviets show their intent to view their Helsinki human rights obligations seriously and agree to our four conditions for confidence-building measures, CBM's: that they be militarily significant, politically binding, verifiable, and cover the entire continent of Europe.

When I met with West German Chancellor Helmut Kohl last April, prior to his visit with President Reagan, I encouraged him to raise the issue of the CDE with the President. According to the New York Times account of their meeting, Mr. Kohl did tell President Reagan that he wanted to convene a CDE while continuing to encourage Soviet progress in the area of human rights. President Reagan reportedly responded that the Warsaw Pact needed to demonstrate progress in human rights before we signed a Madrid document containing provisions for a CDE.

President Reagan was right, and has shown that Madrid has been more than just the setting for bloc-to-bloc acrimony. Several agreements have been forged during the deliberations which mark a significant advance over the original final act in both the military security and human rights areas.

Of particular importance is the agreement to hold a conference on confidence and security building measures and disarmament in Europe, beginning in January 1984, in Stockholm, Sweden. This will be a large-scale forum devoted to improving military confidence-building measures, or CBM's, already in the final act and extending their scope of applicability to include military activities in the entire European part of Soviet territory. These CMB's are early warning provisions such as the advance notification of military maneuvers and movements, designed to reduce the threat of surprise attack. The extension of the area of applicability of these CMB's to all of the Soviet Union west of the Ural Mountains is a significant new step which could provide a valuable precedent for the West in future arms control and disarmament discussions with the Soviets. The Stockholm meeting will take its place alongside the two sets of talks going on in Geneva and Vienna involving nuclear weapons and the MBFR sessions in Vienna, as a major arms control forum. A distinguishing feature of the Stockholm talks will be the participation of a much wider spectrum of states, including all 35 nations in the Helsinki process. If this first stage of the Stockholm meeting is successful, a second stage on disarmament questions may be held sometime after 1986.

Progress on military security issues at Madrid has been balanced by the adoption of important new measures in human rights, including two experts-level meetings, one devoted to human rights and the other to human contacts and family reunification problems. Unfortunately, the progress made at Madrid in negotiating new provisions concerning human rights has not yet encouraged the Soviet Union to improve its performance in this vital field.

Even before Solidarity sprang to life in Poland in August 1980, a small group of Soviet citizens banded together to form fledgling independent labor unions in the U.S.S.R. The first such effort in late 1977 was crushed and its leader, Ukrainian coal miner Vladimir Klebanov, today languishes in a psychiatric hospital. The second effort, which began in 1978, is an organization called The Free Interprofessional Association of Workers, SMOT, which has been the object of a particularly brutal campaign of repression: 14 members of SMOT are now in prison, 3 of whom—Vladimir Gershuni, Aleksandr Skovov, and Mikhail Zotov—are in psychiatric hospitals. Other SMOT activists, such as Vladimir Skvirsky and Lev Volokhonsky, have been subjected to repeated terms of imprisonment for their labor union activism.

This suppression of free trade unionism violates the Soviet's international obligations arising from their ratification of conventions of the International Labor Organization, ILO, and also violates the spirit of the Helsinki Final Act of 1975. In a major advance of the Helsinki process, the Madrid final document requires member states to "insure the right of workers freely to establish and join trade unions, the right of trade unions freely to exercise activities and their rights as laid down in relative international instruments," a clear reference to ILO conventions. As chairman of the Senate Committee on Labor and Human Resources as well as a CSCE Commissioner, I will follow reports of Soviet compliance to these provisions with intense interest.

In another area, emigration, the Soviet record has been abysmal. Only members of three ethnic minorities—Jews, Germans, and Armenians—have been permitted to leave the Soviet Union. During the past year, the emigration of these three groups has been reduced to a trickle. In 1982, only 2,688 Soviet Jews were allowed to emigrate as opposed to 51,320 in 1979. Even more ominous for the prospects of Soviet Jewry is the recent formation of an official anti-Zionist committee which announced in June of this year that the process of family reunification for Soviet Jews was "essentially completed." Yet, Western organizations claim that at least 300,000 Jews would still like to leave the U.S.S.R.

At the time when the Soviet Union and the United States are engaged in negotiations in several important arms control areas, Soviet failure to fulfill its human rights commitments under the Helsinki Accords is a nagging reminder of the limitations of agreements whose provisions are unenforceable. The Soviets must be shown that good intentions and pious pronouncements must be reinforced by deeds and actions, if mutual agreements are to have any meaning and substance.●

HELSINKI HUMAN RIGHTS DAY

● Mr. DECONCINI. Mr. President, since the time that the pilgrims first landed on Plymouth Rock, the people of this land have been concerned about human rights and the basic freedoms to which every human being

is entitled. The structure of our Government embodies the pilgrims' ideals of freedom of religion, thought, and expression. Throughout our history, Americans have given their lives to insure that basic human rights would prevail in this all too small world.

With the sacrifices of these people in mind and with this country's commitment to the basic rights of humanity in my heart, I would like to express my pride in our Government's recognition of this day, August 1, 1983, as Helsinki Human Rights Day.

It was on this day 8 years ago that 35 nations, including the United States and the Soviet Union, vowed to take at least a step toward improving human rights the world over. Our Nation's record in this area, though not perfect, is of considerably higher caliber than that of the Soviet Union's. It is for this reason, that although I take pride in the actions of our country, I am still dismayed by the fact that far too many people in this world are subject to great amounts of suffering because their human rights are being denied.

In the Soviet Union, on this day there are people of all nationalities, races, and creeds who are imprisoned for attempting to express their beliefs, celebrate their national heritage, or practice their religion. I am reminded of a story of one of my constituents, a woman who had immigrated to this country, who felt compelled to smuggle religious articles into the Soviet Union so that her sister and her sister's family could secretly practice their religion. This woman sewed a prayer book and a prayer shawl into the lining of her handbag so that her sister who had been denied exit from the Soviet Union could enjoy some of the religious practices she had come to freely experience in the United States.

This story represents just a portion of the oppression to which the Government of the Union of Soviet Socialists Republics and its satellites have subjected their people.

In recognizing this day as Helsinki Human Rights Day, we also recognize the unfulfilled commitment of the Soviet Union to the doctrine of the Helsinki accords. The Soviet Union has failed to recognize its peoples rights to religion, freedom of thought, and emigration. In fact, the Soviet Government has actually regressed in its policy of enabling families to reunite. For instance, in 1979, 51,320 Jews were allowed to emigrate from the Soviet Union, while in 1982, only 2,688 Jews were allowed to join their families outside of Soviet controlled territory. This denial of the basic right to freedom of movement represents a harmful blow to the ideals embodied in the Helsinki accords. As a further example of this contempt for basic human concerns, the Soviet Union has arrested, held in confinement, and repeatedly refused an exit visa to Andrei Sakharov, a man of great esteem and honor, for daring to condemn his Government for its actions in Afghanistan.

The institutionalized totalitarianism of the Soviet Union is a dangerous impediment to establishing the foundation of a peaceful and stable international system of human rights. Hopefully, by recognizing this day with such occasion, we can demonstrate to the Soviet Government our solidarity in the fight for basic human freedom the world over. I believe that every person here knows the paramount importance of such basic freedoms as free speech, religion, and unimpeded movement. It was the denial of these freedoms which drove the pilgrims to this land, and it is the inspiration of these freedoms which has allowed this Nation to endure its hardships. It will be the recognition of these freedoms that will finally liberate the people of the world.

Mr. President, I am grateful to my colleagues in Congress and to the President of the United States for their overwhelming support of my resolution which proclaims this day as Helsinki Human Rights Day.●

SUPPLEMENTAL APPROPRIATIONS—CONFERENCE REPORT

● Mr. LEVIN. Mr. President, last Friday night I voted to support the conference report on the fiscal year 1983 supplemental appropriation bill, not because passing it was good, but because not to pass it would have been a tragedy.

It was clear that if this legislation had not passed, then the food stamp program would have been almost $2 billion short for the remainder of fiscal year 1983. That would have necessitated drastically cutting benefits for August and eliminating them for September. Clearly, we could not allow this to happen.

But to do what was humane and necessary, the Senate was asked to swallow a lot of bad with the good. The conference report deleted funds that had been proposed by both the House and Senate for the strategic petroleum reserve, and deleted the Senate's disapproval of the administration's proposal to defer spending $800 million for the purchase of oil for the reserve. As Senator BRADLEY so eloquently said on Friday night, it makes no sense to send troops to Central America on grounds that we have to safeguard our commerce by protecting the sealanes there, and at the same time not do what is necessary to safeguard our commerce by making sure we have an adequate supply of oil in the event of a foreign cutoff.

Furthermore, the supplemental appropriations bill, while properly capping the amount of money which Senators can earn for making speeches, also increased the salaries of the Members of the Senate. During the debate on the supplemental appropriation bill when it was before the Senate originally, I voted time and time again against a salary increase. Unfortunately, other views prevailed. It can do nothing good for the image of the Senate to have it hide its salary increase behind the poor and dispossessed recipients of food stamps.●

DAIRY ADJUSTMENT AND STABILIZATION ACT OF 1983

● Mr. MOYNIHAN. Mr. President, last Friday, I introduced S. 1712, a bill to authorize the Secretary of Agriculture to lower the dairy price support level from $13.10 per hundredweight to $11.60 per hundredweight, and to repeal the Secretary's authority to collect two 50-cent assessments from the proceeds of the sale of every hundredweight of milk marketed commercially. I ask for the full text of my bill to be printed in the RECORD.

The bill follows:

S. 1712

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Dairy Adjustment and Stabilization Act of 1983".

SEC. 2. Effective on the sixtieth day following the date of the enactment of this Act, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446), as amended by the Omnibus Budget Reconciliation Act of 1982 and the Dairy Production Stabilization Act of 1983, is amended—

(1) by striking cut subsection (d);

(2) by striking out subsection (c) and inserting in lieu thereof the following:

"(c) The price of milk shall be supported, through purchases of milk and the products of milk, at such level, not less than $11.60 per hundredweight for milk containing 3.67 per centum milkfat, as the Secretary determines necessary in order to assure an adequate supply of milk to meet current needs, taking into consideration the net price-support purchases of milk or the products of milk by the Commodity Credit Corporation during the preceeding fiscal year. Such level shall be established by the Secretary at the beginning of each fiscal year.".

SEC. 3. (a) Within ninety days after the date of the enactment of this Act, the Secretary of Agriculture shall conduct a referendum of dairy producers who, during a representative period (as determined by the Secretary), have been engaged in the production of milk for commercial use in order to determine whether such producers favor the implementation of a nationwide dairy promotion program.

(b) If at least 50 per centum of the producers eligible to vote in the referendum vote in such referendum and two-thirds or more of the producers voting in such referendum vote in favor of the implementation of a nationwide dairy promotion program as proposed in the referendum, the Secretary shall implement such dairy promotion program. If less than 50 per centum of the producers eligible to vote fail to vote in the referendum or less than two-thirds of the producers voting in such refendum do not favor the implementation of a nationwide dairy

promotion program as proposed in the referendum, then the Secretary may not implement such a program.

(c)(1) If the Secretary implements a nationwide dairy promotion program under this Act, he shall periodically review the program and conduct referenda to determine whether producers favor continuation of the program. Such referenda shall be conducted not less often than once every five years or at any time upon petition made to the Secretary by 10 per centum or more of the producers participating in the program.

(2) The Secretary shall terminate a dairy promotion program implemented under this Act if in a referenum conducted under paragraph (1), in which at least 50 per centum of the producers participating in such program vote, two-thirds or more of the producers voting in the referendum vote to terminate the program.

(d)(1) The rate of assessment under any nationwide dairy promotion program implemented under this Act shall be 15 cents per hundredweight of milk for commercial use or equivalent thereof.

(2) Assessments may be used only for dairy promotion, research, and market development as directed by dairy producers.

(3) In any area in which a dairy promotion program is in effect (other than one implemented under this Act) producrs shall be credited for contributions made to such program, as provided in regulations issued by the Secretary, but not in excess of 15 cents per hundredweight.

(e) Only individuals who participate in a dairy promotion program implemented under this Act shall be eligible to serve on the body responsible for administering the program.

(f) The Secretary shall take such action as may be necessary to ensure that all producers eligible to vote in referenda conducted under this Act are permitted to do so.●

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. BAKER. Mr. President, first let me say that I have a request for six special orders in the morning. This is our last week in session before tne August recess and there is a great deal to be done.

Therefore, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONVENING AT 9:30 A.M., WEDNESDAY THROUGH FRIDAY

Mr. BAKER. Mr. President, I ask unanimous consent that on Tuesday, Wednesday, and Thursday, the Senate, after it completes its business, stand in recess until the hour of 9:30 a.m. on the next day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, my friend from Washington has pointed out that I made another in my growing list of inconsistent statements when I said every day this week we would come in at 9:30, including Tuesday, Wednesday, Thursday, and Friday—with the exception of tomorrow, when we will come in at 9 a.m.

I thank the Senator for correcting me.

ORDER FOR RECOGNITION OF CERTAIN SENATORS ON TOMORROW

Mr. BAKER. Mr. President, on tomorrow, after the recognition of the two leaders under the standing order, I ask unanimous consent that six Senators be recognized on special orders of not to exceed 15 minutes each as follows and in this order: Senators GOLDWATER, MATTINGLY, SYMMS, BAKER, STEVENS, and TOWER.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I ask unanimous consent, Mr. President, that the time allocated to the last four Senators—that is to say, Senators SYMMS, BAKER, STEVENS, and TOWER—be assigned to the control of the distinguished Senator from Idaho (Mr. SYMMS).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, with respect to House Joint Resolution 338, there is apparently an enrollment error. If the minority leader is agreeable, I will make a unanimous-consent request at this time to correct that.

Mr. BYRD. Mr. President, that action is cleared on this side.

Mr. BAKER. I thank the minority leader.

CORRECTING PUBLIC LAW 98-63 DUE TO AN ERROR IN THE ENROLLMENT OF H.R. 3069

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Joint Resolution 338, to correct Public Law 98-63 due to an error in the enrollment of H.R. 3069.

The PRESIDING OFFICER. The joint resolution will be stated by titles.

The assistant legislative clerk read as follows:

H.J. Res. 338, to correct Public Law 98-63 due to an error in the enrollment of H.R. 3069.

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time by title.

Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution (H.J. Res. 338) was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, there is one nomination on today's Executive Calendar that I would propose to take up this evening, if the minority leader will agree. That is the last item, Calendar No. 249, under the Department of Commerce, the nomination of David John Markey, of the District of Columbia, to be Assistant Secretary of Commerce for Communications and Information.

Mr. BYRD. Mr. President, if the distinguished majority leader will yield, there is no objection on this side.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nomination of David John Markey, of the District of Columbia, to be Assistant Secretary of Commerce for Communications and Information.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF COMMERCE

The PRESIDING OFFICER. The nomination will be stated.

The assistant legislative clerk read the nomination of David John Markey, of the District of Columbia, to be Assistant Secretary of Commerce for Communications and Information.

Mr. STEVENS. Mr. President, today the Senate will consider the nomination of David John Markey to be Assistant Secretary of Commerce for Communications and Information. I urge the Senate to swiftly confirm him for this position.

Mr. Markey will be an asset to the Department of Commerce. I know him personally from this experience as chief of staff to my friend and colleague from Alaska, Senator MURKOWSKI. During his tenure on Capitol Hill, he demonstrated a clear understanding of the legislative process. I believe that tool will serve him well in his new capacity at the Department of Commerce.

Prior to joining Senator MURKOWSKI, Mr. Markey was with the National Association of Broadcasters. There he developed a respected reputation for his knowledge in the field of communications issues. After serving with Senator MURKOWSKI, Mr. Markey worked at the Federal Communications Commission on a host of communications issues.

We are fortunate to have a person of Mr. Markey's ability in this important position. I urge the Senate to approve his nomination.

Mr. BAKER. Mr. President, on behalf of the distinguished occupant

of the chair, the distinguished junior Senator from Alaska, I send to the desk a statement in respect to this nomination and ask that it appear in the RECORD as if read.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I rise in support of the confirmation of David Markey to be Assistant Secretary of Commerce for Communications and Information and the Administrator of the National Telecommunications and Information Administration.

Mr. Markey served as my chief of staff from January 1981 to January 1983, when President Reagan nominated him for the position for which we are considering him today.

Dave was an exceptional administrator and ran my office with intelligence and integrity. He is highly qualified to be Assistant Administrator of Commerce not only by virtue of these qualities, but also by experience. As vice president for congressional relations for the National Association of Broadcasters for 7 years, he acquired a special knowledge of the world of telecommunications.

I urge my colleagues to support his confirmation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominee was confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT—S. 410

Mr. BYRD. Mr. President, on behalf of the Senator from Hawaii (Mr. INOUYE), I ask that a star print of S. 410 be printed. I send a corrected copy and an explanation of the changes to the desk. I ask unanimous consent that they be included in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. INOUYE. Mr. President. I request that a star print to S. 410 be printed.

Last February, Senator PACKWOOD and I introduced S. 410, a bill to authorize establishment of Community Nursing Centers.

This bill, drafted with the extensive advice and assistance of the American Nurses' Association, is designed to utilize the skills and scope of professional nurses in moderating and reducing the soaring costs of health care—particularly in medicare and medicaid.

Community Nursing Centers would be established primarily through building upon the existing Visiting Nurses' Associations and local nursing component of public health departments. A prime focus and effort of the CNC's would be to keep people, who would otherwise be institutionalized, out of hospitals and nursing homes by means of professional nursing and related services provided through an independent ambulatory setting.

A detailed description of the CNC proposal and its workings may be found in my introductory statement of February 3.

My purpose today is to make a few important modifications to the CNC bill on behalf of Senator PACKWOOD and myself. This is being done for two reasons: first, to incorporate a technical omission in S. 410; namely, a "lock-in" provision to avoid duplication of payment; second, and most important, to make basic changes in eligibility for CNC long-term care in order to deal with a nightmarish catch-22 scenario that plagues all who try to develop reasonable alternatives to keeping people in hospitals and nursing homes.

The problem involves the assumption by the cost estimators of increased utilization of services by people eligible for institutional care but who are not actually in institutions.

Without, as yet, having seen a CBO estimate as to the costs of S. 410—the CNC proposal—we can anticipate an inflated figure because of what they will term "induced costs."

Induced costs are the result of increased utilization attributable to the existence and availability of the benefit and without regard to the fact that no new eligibility is established in terms of individuals. All eligibles must have diagnoses of a type and severity ordinarily requiring institutionalization. Notwithstanding that fact, the increased utilization is believed to occur on the assumption that many of those who would be eligible for institutional care are not in fact in institutions—that they are otherwise cared for by family, friends, other providers, or even go without any support or care. Thus, minimal costs are presently incurred for these "eligible but not using" people. The argument is then made that the existence of the CNC's and its function of providing care to those who are otherwise institutionalized would result in the present "eligible but not utilizing population" taking advantage of CNC services with resultant increased costs.

This is the catch-22 of any effort to develop or offer bonafide ambulatory care alternatives to institutionalization; namely, that it will be additive and not substitutive.

It seems to me that this view paralyzes legitimate efforts and perpetuates the status quo of handwringing and lamentation concerning the need to keep people out of institutions. I do not want to see those who would legitimately benefit from CNC's victimized by the induced costs logic. What is needed is a reasonable opportunity for America's nurses to demonstrate their capacity to solve an enormous and growing problem at significantly lower cost.

Therefore, recognizing the impossibility of overcoming the induced costs argument absent actual experience, we have developed a "stepback" position in the interest of getting CNC's going and doing. It is a position which should negate any arguments or estimates associated with induced costs.

Those changes are as follows:

During the first 3 years of the program, CNC services, under the section authorizing care to "those who would otherwise be institutionalized," that care would be limited to:

First, those otherwise eligible persons—including requirements as to diagnoses and severity—who are, in fact, in institutions as of the effective date of the legislation; or

Second, those otherwise eligible persons who had been institutionalized for at least 30 days during the 2-year period prior to the effective date and who are determined to currently meet the requirements as to types and severity of condition; or

Third, those otherwise eligible individuals meeting all applicable health status requirements who do not meet the chronological tests under one and two above but are determined, in accordance with criteria established by the Secretary, to have no reasonable and feasible alternatives to institutionalization absent the care and service of a CNC.

Mr. President, I now submit these important revisions to S. 410 on behalf of Senator PACKWOOD and myself, and ask that it be reprinted as a star print.

I also ask that a copy of a memorandum describing the cost-containing features of the CNC legislation appear at the conclusion of my remarks. The memorandum was prepared, at the request of my office, by Ms. Patricia Jones, R.N., director of the Washington office of the American Nurses' Association.

The memorandum follows:

AMERICAN NURSES' ASSOCIATION,
Washington Office, July 20, 1983.

To: Pat DeLeon, Office of Senator Inouye; Peg Walker, Office of Senator Packwood.

From: Patricia Jones, Director, Washington Office.
Re: Costs Moderating Provisions of S. 410 (CNC bill).

It might be helpful to understanding and discussion of costs comparisons and costs estimating to describe some of the built-in costs moderating elements of the Community Nursing Centers (CNC) proposal:

1. The bill would not generate development of a whole new group of providers. It essentially builds upon the existing VNA's and public health nursing departments virtually all of whom are now Medicare providers.

2. Each CNC would have a defined service area. Thus, you would not have a multiplicity of new providers (a la hospices) competing for patients within the same service area.

3. The VNA's and the public health nursing departments have a proven track record under Medicare, as low-cost providers on any index used—whether per visit or per case. That is borne out by the attached HCFA data comparing types of Medicare home health providers and their relative unit and per case costs. The data makes it quite apparent that the agencies which would predominate as CNCs are not disposed to load up on costs or to stimulate unnecessary or avoidable utilization. They have, over the years, demonstrated service as responsible low-cost providers of care.

4. There is also a more subtle but nonetheless significant costs moderating factor in the CNC approach. Unquestionably, there will be a substitution of lower cost nursing and related service for more costly medical care. That is, the enrollment of a patient in a CNC—with the availability of nursing service and counseling—should result in avoidance of those many marginal visits to physicians and outpatient departments which occur because the patient has not alternative health care resource—such as a CNC—where they can consult on their problems.

5. An independent review group is required to evaluate and approve each proposed patient plan-of-care and to re-review at appropriate periodic intervals. This avoids giving CNCs a "blank check" in terms of determining the need for and duration of care and service. Parenthetically, the costs of review would be minimal on a per patient basis because the coverage would be available only to those otherwise eligible people who needed care for three-months or longer. Thus, the costs of a patient's review would be spread out over an extended period of months.

6. Another costs moderating effect of the CNC effort should result from a decrease in the frequency of acute episodes requiring hospitalization as well as a reduction in the lengths-of-stay for unavoidable hospital admissions. The continuum of patient care and observation provided by a CNC would result, in many cases, in early detection of changes in a patient's condition affording an opportunity for timely intervention and/or referral short of what ordinarily ultimately result in admission to a hospital. In the case of those patients whose admissions were unavoidable, the fact that they were coming out of a known CNC regimen of care and service would facilitate a willingness, understanding, and capacity to leave the hospital following a shorter stay than the norm precisely because of the availability of that known quantity—the CNC.

7. In order to qualify as a CNC, the agency must provide its services at "substantially lower costs" than other Medicare providers in the same area who offer the same type of service(s). In fact, because most of the VNA's and public health agencies are presently Medicare providers, this means they must come in at costs lower than the amounts at which Medicare was currently recognizing and reimbursing them! They can do so because of: (1) capitation as opposed to the present costly itemized billing; (2) monthly capitation in advance enhances cash flow, thereby minimizing costly borrowing; (3) serving a defined area and population permits more effective and economic staffing and budgeting; and, (4) the range of populations and needs which a CNC is required or authorized to serve permit greater spreading and sharing of overhead expenses rather than disproportionate allocation to a single program.

8. The bill requires the Comptroller-General to monitor the operations of the CNCs to assure that: services are provided in proper fashion to eligible individuals only; to assure the validity of the capitation payments in terms of amounts; and to assure that any proportion of the capitation payments retained by CNCs as incentive payments are reasonably related to efficiency and productivity in the provision of care and service and not the result of "windfall" or failure to provide necessary care.

9. As to the illogical argument that getting people out of long-term care beds (through usage of effective ambulatory care alternatives) would simply result in those beds being filled with patients awaiting placement:

(a) Many of those awaiting SNF or ICF placement in hospitals and elsewhere may, because of CNC availability as an alternative, avoid admission. In the case of Medicare reimbursement to a CNC eligibility does not include institutionalization in an ICF. This has the effect of significantly reducing the pool of patients awaiting placement in long-term care beds—at least in terms of any Medicare impact. Insofar as Medicaid is concerned, the question of CNC as an alternative to ICF care is one which each state determines voluntarily. Obviously, states would not utilize CNCs where they were not a significant cost-saving alternative to institutionalization.

(b) Many of those people in (a) above are now receiving reimbursable care and thereby incurring program cost. While Medicare may often limit payment to hospitals for bed patients awaiting transfer to long-term facilities to the Statewide average nursing home rate, this, by itself, does not take into account the additional Medicare costs which are often incurred. Among these are the physician visit costs stimulated by the ease of access to patients in hospitals.

10. Finally, as to the point that eligible individuals not presently utilizing services would be encouraged to do so because of CNC availability, one response is that if CNCs average 20% below current cost levels for servicing of eligible patients, then an increase of 20% in utilization by qualified individuals no presently in (but eligible for) institutional care could be accommodated with no increase in current aggregate costs!

TABLE 6.—NUMBER OF PERSONS SERVED, NUMBER OF VISITS, AND AMOUNT OF CHARGES, BY TYPE OF VISIT AND TYPE OF AGENCY, 1979

[1] Includes rehabilitation and skilled nursing facility-based agencies.
[2] Detail does not add to total since persons may receive more than 1 type of service.
[3] Includes speech or occupational therapy, medical social services and other health disciplines.

TABLE 1.—TOTAL MEDICARE REIMBURSEMENT, REIMBURSEMENTS FOR HOME HEALTH SERVICES, AND NUMBER OF HOME HEALTH VISITS UNDER MEDICARE, CALENDAR YEARS 1969–79

[Numbers and amounts in millions]

Year	Total medicare reimbursement [1]		Home health agency reimbursement [1]			Home health visits	
	Amount	Percent change	Amount	Percent change	As percent of total medicare reimbursement	Number	Percent change
1969 [2]	6,284.0		80.0		1.24	8.5	
1970	6,772.4	7.8	62.7	−21.6	.91	6.0	−29.9
1971	7,486.9	10.6	57.2	8.8	.76	4.8	−20.5
1972	8,216.5	9.7	66.2	15.7	.80	5.2	9.2
1973	9,639.2	17.3	93.3	40.9	.96	6.4	22.4
1974	11,920.1	23.7	144.6	55.0	1.21	8.2	29.3
1975	14,749.3	23.7	217.8	50.6	1.47	10.8	32.3
1976	17,938.7	21.6	297.0	36.4	1.65	13.6	25.9
1977	21,081.5	17.5	369.3	24.3	1.75	15.7	15.4
1978	24,359.1	15.5	440.4	19.3	1.81	17.5	11.5
1979	28,090.1	15.3	518.3	17.7	1.85	19.2	9.7

[1] The amounts reimbursed are based on interim rates which are adjusted after the end of each provider's accounting year on the basis of reasonable costs of operations. Retroactive reimbursements are excluded from the data in these tables.
[2] Comparative data for years prior to 1969 are not available.

Source: Health Care Financing Administration, unpublished utilization statistics. Amounts are for year in which expenses were incurred, based on bills processed through December 1980. Thus, data for most recent years are less complete than data for earlier years. Division of Information Analysis/OSDM/ORDS/HCFA.●

PROGRAM

Mr. BAKER. Mr. President, on tomorrow the Senate will convene at 9 a.m. pursuant to the motion to recess, which will be made shortly, in accordance with the order previously entered.

After the recognition of the two leaders under the standing order, six Senators will be recognized on special orders of not to exceed 15 minutes each. It is anticipated that after the execution of the special orders, the time for the transaction of routine morning business will be provided for.

ORDER FOR RECESS FROM 12 NOON UNTIL 2 P.M. ON TOMORROW

Mr. President, I ask unanimous consent that on Tuesday, tomorrow, as is usually our case because of caucuses by Senators from both parties which occur off the floor of the Senate, that between the hours of 12 noon and 2 p.m. the Senate stand in recess.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF H.R. 3363 ON TOMORROW

Mr. BAKER. Mr. President, after the execution of the special orders and after the expiration of the time for the transaction of routine morning business, if so provided, the Senate will resume consideration of the Interior Department appropriations bill, at which time the committee amendment dealing with the Bonneville Power Administration will be the pending question. It is anticipated that votes will occur during the course of the day tomorrow. It is hoped we can finish the Interior appropriations bill tomorrow.

Mr. President, other matters will reach the Senate in due course from the House of Representatives which will be dealt with as and when they are available and it is appropriate to do so.

On Wednesday, Mr. President, at 2 p.m., after a quorum is first established under the rule, a cloture vote will occur on the motion to proceed to the consideration of Radio Marti.

The schedule for the remainder of the week will be announced as it becomes clearer. It is the intention of the leadership to finish this week on Friday, Mr. President. It is hoped that we can dispose of all of the matters that need to be done before the recess commences.

RECESS UNTIL TOMORROW AT 9 A.M.

Mr. BAKER. Mr. President, I see no other Senator seeking recognition. I move, in accordance with the order previously entered, that the Senate now stand in recess until the hour of 9 a.m. tomorrow.

The motion was agreed to and, at 6:29 p.m., the Senate recessed until tomorrow, Tuesday, August 2, 1983, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate August 1, 1983:

DEPARTMENT OF STATE

Charles Franklin Dunbar, of Maine, a career member of the Senior Foreign Service, Class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the State of Qatar.

DEPARTMENT OF ENERGY

Danny J. Boggs, of Virginia, to be Deputy Secretary of Energy, vice W. Kenneth Davis, resigned.

DEPARTMENT OF THE TREASURY

Thomas J. Healey, of New Jersey, to be an Assistant Secretary of the Treasury, vice Roger William Mehle, Jr., resigned.

DEPARTMENT OF COMMERCE

Richard L. McElheny, of Arizona, to be an Assistant Secretary of Commerce, vice William H. Morris, Jr., resigned.

NATIONAL INSTITUTE OF BUILDING SCIENCES

MacDonald G. Becket, of California, to be a member of the Board of Directors of the National Institute of Building Sciences for a term expiring September 7, 1984, vice Warner Howe, term expired.

Kyle Clayton Boone, of North Carolina, to be a member of the Board of Directors of the National Institute of Building Sciences for a term expiring September 7, 1984, vice Blanca G. Cedeño, term expired.

IN THE COAST GUARD

The following regular officers of the U.S. Coast Guard for promotion to the grade of lieutenant (junior grade):

Mark A. Johnson	James N. Blythe
Richard A. Currier	Joseph J. Livecchi
Michael R. Murray	Bradley A. Shefka

John R. Ochs
Timothy J. Dellot
Charles E. Booth
Ronald K. Sample
John E. Hautala
Kenneth D. Forslund
Thomas D. Zapata
Dennis M. Sens
Robert O. MacMillan
Stephen G. Kinner, Jr.

CONFIRMATION

Executive nomination confirmed by the Senate August 1, 1983:

DEPARTMENT OF COMMERCE

David John Markey, of the District of Columbia, to be Assistant Secretary of Commerce for Communications and Information.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Monday, August 1, 1983*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

At the start of this new week we pray for renewal of our spirits and enthusiasm in our tasks. Grant that we will see in what we do opportunities for speaking the truth and acting with courage. Help us to undergird our efforts with the knowledge that You are always with us, correcting us when we miss the mark, and giving Your blessing to that which is noble and righteous. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution and concurrent resolution of the House of the following titles:

H.J. Res. 321. Joint resolution to proclaim a day of national celebration of the two hundredth anniversary of the signing of the Treaty of Paris;

H. Con. Res. 126. Concurrent resolution providing for the commemoration of the one hundredth anniversary of the birth of Harry S. Truman; and

H. Con. Res. 153. Concurrent resolution providing for a conditional adjournment of the House from August 4 or 5 until September 12, 1983, and a conditional adjournment of the Senate from August 3, 4, or 5 until September 12, 1983.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

AUTHORIZING SECRETARY OF INTERIOR TO CONVEY CERTAIN LANDS IN LANE COUNTY, OREG.

The Clerk called the bill (H.R. 1062) to authorize the Secretary of the Interior to convey, without consideration, cetain lands in Lane County, Oreg.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LUNGREN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING SECRETARY OF INTERIOR TO SET ASIDE CERTAIN JUDGMENT FUNDS OF THE THREE AFFILIATED TRIBES OF FORT BERTHOLD RESERVATION IN NORTH DAKOTA

The Clerk called the Senate bill (S. 727) to authorize the Secretary of the Interior to set aside certain judgment funds of the Three Affiliated Tribes of Fort Berthold Reservation in North Dakota, and for other purposes.

There being no objection, the Clerk read the Senate bill, as follows:

S. 727

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the provisions of this Act shall apply notwithstanding any provision of the Act of October 19, 1973 (87 Stat. 466; 25 U.S.C. 1401 et seq.), or any other law, regulation, or plan promulgated pursuant thereto.

SEC. 2. (a) Contingent upon availability of funds, the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") shall deposit into a separate account—

(1) $113,777.10 of the funds appropriated in satisfaction of the judgments awarded the Three Affiliated Tribes of Fort Berthold Reservation in dockets numbered 350-G and 54-81 L of the United States Court of Claims, plus

(2) all interest and investment income accrued on the funds described in clause (1) from the date on which the transcript of such judgment was filed with the Comptroller General of the United States to the date of deposit described in clause (1).

The initial payment of $113,777.10 shall be deposited when funds equal to this amount are released from the new member per capita escrow account. Thereafter, as any new membership application is denied, the funds thereby released shall be deposited in the account until such time as the sum described in clause (2) is fully satisified or there are no further membership applications to be processed. Any funds so deposited shall be distributed and used only as provided in this Act.

(b) Any funds deposited by the Secretary in a separate account under subsection (a) shall be held and invested by the Secretary in accordance with the first section of the Act of June 24, 1938 (52 Stat. 1037).

(c) Any funds deposited by the Secretary in a separate account under subsection (a), including any interest or investment income accrued thereon, may be distributed, with the approval of the Secretary, to the governing body of the Three Affiliated Tribes of Fort Berthold Reservation for use in the planning and development of a hospital or a health care facility to serve the needs of such tribes.

(d) Any funds deposited by the Secretary in a separate account under subsection (a), including any interest or investment income accrued thereon, which have not been distributed by the Secretary under subsection (c) prior to the date which is five years after the date of enactment of this Act may be distributed to the governing body of the Three Affiliated Tribes of Fort Berthold Reservation for use in any tribal program which is authorized by such governing body and approved by the Secretary.

SEC. 3. (a) The Secretary shall distribute to each eligible individual out of funds appropriated in satisfaction of the judgments awarded the Three Affiliated Tribes of Fort Berthold Reservation in dockets numbered 350-G and 54-81 L of the United States Court of Claims the sum of—

(1) $4,000, and all interest and investment income accrued thereon since August 5, 1982, plus

(2) $45.16, and all interest and investment income accrued thereon since December 13, 1982.

(b) For purposes of this section, the term "eligible individual" means any individual—

(1) who filed an application for membership with the Three Affiliated Tribes of Fort Berthold Reservation before July 10, 1982,

(2) whom the Secretary determines to be eligible to share in such judgment awards, and

(3) who has not received any distribution from the Secretary with respect to such judgment awards at any time prior to the date of enactment of this Act.

SEC. 4. Any funds appropriated in satisfaction of the judgments described in sections 3(a) which remain uncommitted after the deposit described in section 2 and the distribution described in section 3 are made by the Secretary shall be distributed and used in accordance with the programing aspect of the plan for the use and distribution of the funds appropriated in satisfaction of such judgments which became effective on May 26, 1982, pursuant to section 5 of the Act of October 19, 1973 (87 Stat. 468; 25 U.S.C. 1405).

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Consent Calendar.

DISAPPROVING THE PRESIDENT'S RECOMMENDATION TO EXTEND CERTAIN WAIVER AUTHORITY WITH RESPECT TO ROMANIA

Mr. GIBBONS. Mr. Speaker, pursuant to section 152(d)(1) of the Trade Act of 1974, I move that the House re-

solve itself into the Committee of the Whole House on the State of the Union for the immediate consideration of the resolution (H. Res. 256) disapproving the President's recommendation to extend certain waiver authority under the Trade Act of 1974 with respect to Romania.

The Clerk read the title of the resolution.

The SPEAKER. The Chair recognizes the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I ask unanimous consent that the motion I am about to make to defer indefinitely consideration of House Resolution 256 be debatable for 30 minutes, with the time to be equally divided and controlled by the gentleman from Florida (Mr. GIBBONS) and myself.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

Mr. STRATTON. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. STRATTON. Mr. Speaker, I withdraw my objection.

The SPEAKER. The gentleman from New York (Mr. STRATTON) withdraws his objection.

The Chair recognizes the gentleman from Minnesota (Mr. FRENZEL).

PREFERENTIAL MOTION OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Speaker, pursuant to section 152(d)(3) of the Trade Act of 1974, I move that consideration of the motion that the House resolve itself into the Committee of the Whole House on the State of the Union for immediate consideration of House Resolution 256 be postponed indefinitely.

The SPEAKER. The gentleman from Minnesota (Mr. FRENZEL) will be recognized for 15 minutes, and the gentleman from Florida (Mr. GIBBONS) will be recognized for 15 minutes.

The Chair recognizes the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I yield my 15 minutes to the distinguished gentleman from Pennsylvania (Mr. SCHULZE).

Mr. SCHULZE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, every year about this time, the Congress has the opportunity to consider disapproval of "most favored nation" status for Romania and other Communist countries.

Shortly, the House will have before it a motion to defer indefinitely, consideration of a resolution of disapproval of the Presidential waiver with respect to "MFN" for Romania. I strongly urge all of my colleagues to reject this motion.

"Most favored nation" status is the highest level of economic participation our Government can grant to a trading partner. We give this privilege only to our closest friends and allies as a valuable trading tool to assist them in marketing their products in the American marketplace. Communist countries are subject to the higher "column two" tariff rates. To do otherwise with the Communist nations of the world is to cheapen the meaning of friend and ally and bring both free and oppressed nations up to the same level.

Section 402 of the Trade Act of 1974, the Jackson-Vanik amendment, prohibits the guaranteeing of "MFN" treatment, Government or investment guarantees, or the negotiation of a commercial agreement with any Communist country that does not allow its citizens the freedom to emigrate. This section also permits the President to waive this prohibition, for a period of 1 year, if he determines that doing so will further promote the freedom of emigration.

When "MFN" status was first granted to Romania, it was perceived to be a reward for a marginal improvement in its emigration policies toward Jews and other minorities. Each year the executive branch has elected to waive the requirements of section 402, generally with only limited review of Romanian human rights policies.

However, the current administration put Romania on notice in 1982 that continued "MFN" status was very much in doubt. Earlier this year, the White House announced that it would not waive section 402 in response to an educational payment decree instituted by the Romanian Government. This law is a selectively applied education tax which extorted money from Romanians who had applied for exit visas.

To underscore the importance which Communist nations place on having "MFN" status with the United States, the Romanian President, Nicolai Ceausescu, upon learning of the potential cancellation of this status by President Reagan, immediately gave assurances to the White House that Romania would not require reimbursement to the state of education costs as a precondition to emigration. He also assured us that Romania would not create economic or procedural barriers to emigration. Unfortunately, the White House has relented and agreed to waive section 402 restrictions again this year.

I am appalled that we are so gullible as to believe that this government in Romania will keep its promises when in the past they have responded with only short-term improvements in their policies on emigration. This history of our relations with this nation are rife with examples of the perfidy and insincerity on the issue of human rights. Just a quick glance at their record should more than convince us to reconsider extending this trading privilege.

Several years ago, in response to increased applications to emigrate, the Romanian Government instituted a preclearance procedure which meant that potential emigrants had to have local police clearance before they could even apply for a formal application from the central government. Needless to say, this complicated the process to the degree that emigration was slowed to a trickle. However, as soon as pressure was applied from the Congress and the White House the preclearance procedure was dropped for fear of jeopardizing their "MFN" status with the United States. We relented and granted "MFN" to them and they responded in good faith with the previously mentioned education tax. When are we ever going to learn that they will do whatever is convenient for them to get what they want. When are we going to realize that we carry the most potent weapon in our arsenal, favored trade status, and we are afraid to use it to help the oppressed peoples behind the Iron and Bamboo Curtains. If we grant them what they want again this year I wonder what new impediment they will institute next year.

How can we think of granting a government such as this the same preferred status as our most trusted allies when for example, in 1983, they issued a decree prohibiting the possession or use of typewriters or duplication machines by Romanians who pose a "danger to public order or security." Private citizens are now required to register all typewriters with the police and also provide samples of the typeface for police files. Is this nation deserving of equal status with, say, Great Britain, West Germany, France? I think not.

Are we seriously going to grant "MFN" status to a country which monitors all international telephone calls of its citizens, and confiscates, reads, and sometimes destroys mail leaving Romania for Western European and other free nations. I hope not.

What I suggest today, is that this House should not be a party to the continued injustice visited upon the Romanian people by its government. We should not grant favorable trade status to a government which punishes a worker in a weapons factory with 15 years in prison for writing on a factory wall, "We want bread! We want milk." Or a government that sentences a Greek Orthodox priest and professor, Father Georghe Calciu, to 10 years in prison for "Fascist activities." Father Calciu's only crime was that he was popular with the orthodox young people and helped draft the original document of the "Free Trade Union of Romanian Workers."

Certainly such punishment for a crime denominated as "Fascist activities" should offend any civilized

person concerned with due process. Father Calciu has never admitted guilt, and has chosen to remain in prison rather than confess to crimes he did not commit. Despite repeated efforts to gain his freedom by myself and others, Father Calciu remains in prison and I fear he will soon succumb to illness and never see the light of freedom. Are we going to be a part of the crime that continues to reward a government that practices such injustices? I pray not.

If the humanitarian issues are not enough to convince you that we should deny "MFN" status to Romania, then let us look for a moment at the economic realities. We are still suffering from high unemployment in many of our major industries. Romania exports steel, footwear, textiles, furniture, tractors, railway cars, and foodstuffs to this country. Can you face the unemployed in these areas and tell them why you support a government such as Romania at the expense of their jobs? Can you look at the workers in the idle plants which formerly made these products and give them a logical reason why we should reward this nation with "MFN" status. I fear not.

The record of the Romanian Government is clear for everyone to see and I ask my colleagues to send a message to the Communist regime in Bucharest that their system is wrong. Let us tell them that the American people see it as evil and we will grant no economic favors.

I urge all my colleagues to vote "no" on the motion to defer consideration indefinitely of Congressman CRANE's resolution.

Mr. ROTH. Mr. Speaker, will the gentleman yield?

Mr. SCHULZE. I yield to the gentleman from Wisconsin.

Mr. ROTH. I thank the gentleman for yielding, and I want to compliment him on his very good statement.

Mr. Speaker, in my opinion the gentleman is correct. We have a trade deficit this year of between $65 billion and $70 billion. Why import more from an Eastern bloc country that has not been especially friendly to us? The KGB and the Eastern bloc have been stealing Western technology as reported by the New York Times today. There are billions and billions of dollars' worth of technical know-how being stolen from this country and sent to the Eastern bloc. I think that we have to send a message that, yes, we are interested in trade, that we realize that 11 percent of our gross national product depends on trade, that we want to trade whenever and wherever possible but we will not stand idly by as the KGB lifts technology from the West. We have to have a proper perspective. Research and development on high technology costs us billion of dollars, and we have to protect this investment.

□ 1215

Mr. SCHULZE. The gentleman is exactly right. In fact, last year one of my constitutents was offered illicit trade with Romania if he would work to pressure me to back off the pressure to get Father Calciu out of jail, and some of the other things that we have been trying to do. They will stop at nothing.

Mr. Speaker, I reserve the balance of my time.

May I inquire of the Chair how much time I have remaining?

The SPEAKER pro tempore (Mr. REID). The gentleman has 4 minutes remaining.

Mr. GIBBONS. Mr. Speaker, I do not plan to use any time, but if I do, it will be right at the end.

Mr. SCHULZE. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. PHILIP M. CRANE).

The SPEAKER pro tempore. Without objection, the gentleman from Illinois (Mr. PHILIP M. CRANE) is recognized for 2 minutes.

There was no objection.

Mr. PHILIP M. CRANE. I thank my distinguished colleague for yielding this time to me.

Mr. Speaker, I want to thank the gentleman for being in the vanguard of this battle to cut off most-favored-nation status for Communist countries. I think the country in question on this resolution, Romania, may in some respects, have a marginally better track record as far as observance of human rights, then many other Communist nations. And that is one of the arguments that is perennially used in favor of MFN—that somehow we are leveraging these countries to act more civilized and more humane.

For that reason supporters of MFN justify the use of U.S. taxpayer money to subsidize indirectly and directly their economic development, especially their exports This, in turn, gives them a competitive advantage over free-market countries. I think this is an outrage. One of the most outrageous things that every one of us experiences on the eve of these debates, is to be lobbied in our own offices by representatives of Communist bloc countries. We are lobbied, but who are the people who are lobbying in the offices in Bucharest or in Budapest, or Peking? Who are the lobbyists fighting in behalf of those people who are still suffering from the oppression of the totalitarian regimes among the Communist bloc countries?

If my colleagues want a breakdown to see what it is costing us with regard to Romania, their exports in millions to the United States, for example, in 1979, were $329.6 million. They granted 1,552 visas that year. That worked out to a ransom per person of $212,371. In 1981, they granted 2,352 visas, exports to the United States were $560.1 million, and the cost in ransom per person through the extension of these kinds of credit was $238,095 per person.

The fact is, we are dealing with totalitarian countries that in no way observe the normal rules of civilized nations.

I urge my colleagues to support this resolution that would terminate this extension of U.S. credits and subsidies to totalitarian regimes by voting down the motion to table.

The SPEAKER pro tempore. There is no time remaining.

PARLIAMENTARY INQUIRY

Mr. SCHULZE. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. SCHULZE. Mr. Speaker, I yielded 2 minutes to the gentleman from Illinois.

The SPEAKER pro tempore. That time has expired.

Mr. SCHULZE. We had 4 minutes, Mr. Speaker.

The SPEAKER pro tempore. The gentleman has 2 minutes remaining.

Mr. SCHULZE. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. SOLOMON).

The SPEAKER pro tempore. Without objection, the gentleman from New York (Mr. SOLOMON) is recognized for 1 minute.

There was no objection.

Mr. SOLOMON. That is all I need, and I thank the gentleman from Pennsylvania for yielding.

Mr. Speaker, the gentleman from Illinois (Mr. CRANE) said that people on this floor were being lobbied by the Romanian Government. Let me tell the gentleman, that is bad enough, but when you are also lobbied by your own State Department, I think that is outrageous.

As a matter of fact, I think that we ought to support the resolution of the gentleman from Illinois, and I think that under no circumstances should we defer action on this resolution.

I have here a list of human rights violations by the Government of Romania which includes arbitrary arrest, arbitrary imprisonment on fake charges, confiscation of ration cards, confiscation of ID cards, without which purchases cannot be made, harassment of family members, harassment on the job, loss of jobs, forced relocation to other countries. Let me tell Members, if that is not grounds to pass this resolution, I do not know what is, and I would certainly urge immediate passage of the resolution. I am going to demand a vote on it.

Mr. SCHULZE. Mr. Speaker, I reserve the balance of my time.

Mr. GIBBONS. Mr. Speaker, I yield myself such time as I may consume.

I had not planned to take any time. I think all of my colleagues know that since 1974 we have faced this problem of the Jackson-Vanik amendment. It is a difficult problem that we have to face.

Mr. Speaker, I see the gentleman from Georgia here. I will yield 4 minutes to the gentleman from Georgia (Mr. McDONALD) before I claim the balance of my time.

Mr. McDONALD. I thank the chairman of the subcommittee, the gentleman from Florida, for yielding this time to me.

Mr. Speaker, I rise in support of House Resolution 256, which would disapprove the President's recommendation to extend certain waiver authority under the Trade Act of 1974 with respect to Romania. My testimony has been consistently against granting a waiver to Romania since coming to the Congress.

The waiver is supposed to be granted after the President has received assurances that the emigration practices of the country involved will lead substantially to the achievement of the objectives of section 402(c) of the act previously cited. The objective is free emigration. Does anyone know of a Communist country that has free emigration? I do not know of one. Yet year after year, since coming to the Congress, I have been witness to this charade as Romania twiddles with its emigration pipeline to learn how many people it has to let loose in order to gain another extension of its most-favored-nation status.

Any scholar in the field of Communist affairs will tell you that the internal affairs of Romania are stricter and meaner than most any Communist nation in the world. Where else is there a law to register typewriters, together with a sample of its type? What other nation in the world would attempt to enforce a law that required you to pay back the entire cost of your education in convertible currency prior to emigrating? And remember that it is against the law to have any convertible currency in your possession in Romania.

Romania is no slouch either when it comes to repression of religion. While waiting to testify on this subject before the Trade Subcommittee of the House Ways and Means Subcommittee, I heard a Kentucky legislator testify that he visited Romania recently. He was shown a church that was bulldozed down by the authorities in order to try and stop services there. These persecuted Christians are holding services in what is left of the basement there. We know from people with contacts among the Romanians that many people are in prison simply because they are Christians. Many priests have undergone torture and died for Christ in Romania's prisons. Catholics and Protestants have no publishing houses in Romania. Teaching in, or participating in, a Sunday school is not permitted in Romania.

Let us therefore, realize what it is we are discussing. Passage of House Resolution 256 might give the United States some real leverage to use to set some people free. Continued looking the other way on Romania is tacit approval of that government and I do not like what I see.

Mr. GIBBONS. Mr. Speaker, I want to answer some of the reckless charges that have been made here today. As far as the number of people in Romania who are eligible to emigrate to the United States, they have a backlog of 1,500 who are sitting in Romania waiting to come to the United States. That is the truth of the matter. They are not holding people over there. They are turning them loose. They are turning them loose faster than we will accept them or absorb them. That is the problem we have today.

We are not dealing with an easy problem. I have listened to the complaints about Romania for a long time, and for a long time I must say I took them extremely seriously, and I still do take them extremely seriously, but there are charges and counter-charges on every side. Some people will tell you there is as much freedom of religion in Romania as there is in the United States. I do not believe that, but there is freedom of religion in Romania for some people, if they have a state-approved religion. If you do not, you do not get freedom of religion.

This is not the United States. They do not have the first amendment to their constitution.

Mr. McDONALD. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. No, you have had your time, and you have made your statement before my committee. Taking up the time of the House on this matter, let me get the facts laid out here.

We are dealing with countries that have had 2,000 years of tyrannical history behind them. They have been run and overrun. They graduated from tribes to nation states and back down to tribes again, and it is a tough, rough world over there. But 200 million people live there, and over the 40 years since World War II, we have closely investigated this problem. We have looked at it for 9 years here in the House of Representatives. We need to get this problem behind us. Fortunately, the Supreme Court decision the other day gets this problem behind us. This is probably the last Jackson-Vanik act we will have to put on up here.

It has not done any good in the countries where it has been applied. Poland does not get MFN, Russia does not get MFN, Albania does not get MFN, and they do not have any emigration quotas pending right now. Romania has an education tax, but like every law that is made in Romania, it is made by declaration, President Ceausescu undeclared the tax. The 1,500 people who are waiting there in Romania for emigration to the United States are not paying any education tax, and our Government has the word of that Government that there will not be an education tax levied upon our emigrants or anybody else's emigrants.

So we are getting these problems behind us. We have got to settle these things, though, and get them behind us. Any Member of Congress is free to travel to Romania any time he wants to. He can get a visa from our State Department and go there and see for himself. Many Americans do go there, religious leaders, business leaders, and they come back with varying reports.

Based upon all these reports, the President decided that nondiscriminatory tariff treatment should be extended for 1 more year to Romania. Based upon all of the evidence that we took in our committee hearings, we decided again that nondiscriminatory tariff treatment should be extended to Romania for 1 year.

Now, before I yield back all the balance of my time, Mr. Speaker, I want to explain the two other resolutions. One deals with Hungary. I understand there is no contest at all over Hungary. One deals with the People's Republic of China, of Communist China, as it will be called. I understand there is no problem over Communist China.

I was with Mr. VANIK when we talked with Deng Xiaoping, and I think all Members ought to know what Mr. Deng Xiaoping said to Mr. VANIK about the Jackson-Vanik amendment. He shook hands with Mr. VANIK cordially. He said, "Mr.Vanik, I know about your amendment. I am in full agreement with you on it. How many Chinese will you take?"

□ 1230

Mr. McDONALD. Mr. Speaker, will the gentleman yield on that point?

Mr. GIBBONS. He has got a billion of them he will turn loose if we will take them, but we are not going to take them. That is what this is all about.

Mr. McDONALD. Mr. Speaker, will the gentleman yield on that point?

Mr. GIBBONS. But the cold war still goes on in some minds and some places, but we have got to make progress and we have got to make progress in humane ways.

If the amendment of the gentleman from Illinois, (Mr. PHILIP M. CRANE) is adopted, we know what will happen to the visas of those 1,500 poor Romanians who want to emigrate to the United States which have been cleared

by the Romanian Government. Those visas will go right through the window, they will be no good. There will be nobody emigrating from Romania; there will be nobody emigrating from any of those countries.

Mr. Speaker, we have got to pass these resolutions for humanity's sake.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, the gentleman from Florida (Mr. GIBBONS) is absolutely correct. The President and this administration sent these resolutions to us because they believed it was in the best interests of the United States and in the interests of the people of Romania who wish to emigrate that we continue our MFN agreement with Romania for 1 more year. The people who watch that most likely in the United States, the B'nai B'rith representing the Council on Jewish Organizations, have also determined that it is in the best interests of those who wish to emigrate and in the best interests of those who are striving for full human rights in Romania that we do extend MFN for another year. As far as I know, the Chinese and Hungarian resolutions are less controversial. All three of these resolutions should be laid on the table.

Mr. Speaker, I thank the gentleman for yielding.

Mr. GIBBONS. Mr. Speaker, before I yield back the balance of my time, I want to announce that I am attempting to cooperate with the gentleman from Illinois (Mr. PHILIP M. CRANE). He is going to seek a vote on this resolution, and since the Speaker has announced that all votes today would be postponed until the end of the day, in order not to embarrass or hurt any of our colleagues who relied upon the Speaker's announcement, when the appropriate time arrives, Mr. Speaker, I am going to ask unanimous consent that this vote be postponed until after the vote on H.R. 1646 later on today. I do that as a matter of trying to cooperate with the Members who want a record vote on this.

Mr. PORTER. Mr. Speaker, last summer, we reauthorized most-favored nation status for Romania. We did so only after receiving assurance by the Romanian Government that they would permit free emigration and that harassment of religious and ethnic minorities would cease.

Immediately prior to our consideration of Romania's trade status, the situation appeared to improve. And, disappointingly, during the months immediately after the reauthorization, the situation grew alarmingly worse.

For example, look at the "education tax" the Romanian Government implemented 3 months after our reauthorizing MFN for their country. The tax made emigration practically impossible by requiring that anyone desiring to emigrate repay the government for all secondary and postsecondary education received. This tax has to be paid in Western currency. Yet no Romanian is permitted to possess such currency. This obviously was not a legitimate attempt by the government to win just compensation for education costs, since Romanians are already taxed once to cover education costs. This tax was a means of harassment, pure and simple.

Although this tax has now been removed, further restrictions continue. The government recently imposed a ban on all typewriters, a vital tool from human rights and religious activities since handwritten documents can be easily traced.

I wonder if the Romanian Government truly believes that we will ignore these restrictive actions. Let me assure them we will not.

One of the reasons for the formation of the Congressional Human Rights Caucus earlier this year was to investigate instances of human rights violations and recommend appropriate action by the Congress.

While I believe that, with the demise of the "education tax," we should reauthorize MFN status for Romania for the next year, let me assure my colleages that the Congressional Human Rights Caucus will carefully monitor human rights in Romania during this period and prior to the next vote on this matter, will recommend to the Congress appropriate action on future MFN status.

Mr. GIBBONS. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

Mr. McDONALD. Mr. Speaker, will the gentleman yield for a question?

Mr. GIBBONS. No, sir.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Minnesota (Mr. FRENZEL) to postpone indefinitely.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. PHILIP M. CRANE. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Without objection, further proceedings on this motion to postpone indefinitely will be postponed until the end of legislative business today.

There was no objection.

DISAPPROVING THE PRESIDENT'S RECOMMENDATION TO EXTEND CERTAIN WAIVER AUTHORITY WITH RESPECT TO HUNGARY

Mr. GIBBONS. Mr. Speaker, pursuant to section 152(d)(1) of the Trade Act of 1974, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the immediate consideration of the resolution (H. Res. 257)disapproving the President's recommendation to extend certain waiver authority under the Trade Act of 1974 with respect to Hungary.

The Clerk read the title of the resolution.

PREFERENTIAL MOTION OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Speaker, pursuant to section 152(d)(3) of the Trade Act of 1974, I move that consideration of the motion that the House resolve itself into the Committee of the Whole House on the State of the Union for immediate consideration of House Resolution 257 be postponed indefinitely.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Minnesota (Mr. FRENZEL) to postpone indefinitely.

The preferential motion was agreed to.

DISAPPROVING THE PRESIDENT'S RECOMMENDATION TO EXTEND CERTAIN WAIVER AUTHORITY WITH RESPECT TO THE PEOPLE'S REPUBLIC OF CHINA

Mr. GIBBONS. Mr. Speaker, pursuant to section 152(d)(1) of the Trade Act of 1974, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the immediate consideration of the resolution (H. Res. 258) disapproving the President's recommendation to extend certain waiver authority under the Trade Act of 1974 with respect to the People's Republic of China.

The Clerk read the title of the resolution.

PREFERENTIAL MOTION OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Speaker, pursuant to section 152(d)(3) of the Trade Act of 1974, I move that consideration of the motion that the House resolve itself into the Committee of the Whole House on the State of the Union for immediate consideration of House Resolution 258 be postponed indefinitely.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Minnesota (Mr. FRENZEL) to postpone indefinitely.

The preferential motion was agreed to.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following com-

munication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
August 1, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5, Rule III of the Rules of the U.S. House of Representatives, the Clerk received at 8:22 p.m. on Friday, July 29, 1983, the following message from the Secretary of the Senate: That the Senate agree to the Conference Report to H.R. 3069.

With kind regards, I am,
Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker pro tempore signed the following enrolled bill on Friday, July 29, 1983:

H.R. 3069. An act making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes.

"AGENDA FOR OPPORTUNITY"—A RHETORICAL COVERUP

(Mr. GRAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRAY. Mr. Speaker the President spoke today in an attempt to try and close the gender gap and the minority gulf with his call for an "agenda for opportunity."

But in actuality, what Mr. Reagan calls an agenda for opportunity is a rhetorical coverup of a nearly 3-year-old record of injustice and insensitivity to the needs of women and minorities.

The President today assured us that much is being done to insure that every American has an equal opportunity to achieve the American dream.

Well, Mr. President, I want to thank you for your outstanding record on behalf of minorities.

We want to thank you for your economic recovery program under which black adult unemployment has risen from 13 to 21 percent and where black teenage unemployment has risen from 37 percent to 51 percent.

We want to thank you for being the first President to fire sitting members of the U.S. Civil Rights Commission who had the courage to disagree with your record of injustice.

We want to thank you for having your lawyers argue on behalf of providing tax-exempt status to private schools that discriminate on the basis of race.

We want to thank you for the 60-percent drop on minority appointments by your administration to policy-making positions and the nearly 80-percent drop in black judicial appointments compared to the past administration.

Finally, we want to thank you for the 50-percent cut in black ambassadors since the last administration.

Mr. President, the rhetoric of a legal and moral commitment must be supported by concrete action.

Until you provide some real action, black America can have only one response to your agenda, and please forgive me, but that response is as you said today, "hogwash."

CONGRESSMAN STRATTON PRAISES NAVY SECRETARY JOHN LEHMAN FOR HIS DECISION TO HOMEPORT THE NAVY'S NEW NORTH ATLANTIC SURFACE ACTION GROUP IN NEW YORK

(Mr. STRATTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRATTON. Mr. Speaker, I want to join in expressing the warm appreciation of the New York State congressional delegation to the Secretary of the Navy, John Lehman, for his decision to award homeporting of the Navy's newest Atlantic Surface Action Group to the city of New York.

The decision was a wise one, to renew the close ties that New York City has long had with the U.S. Navy, interrupted only by Defense Secretary McNamara in 1963 when he shut down the historic Brooklyn Navy Yard.

The homeporting of this seven-warship group, comprising the battleship *Iowa*, now being refurbished in Pascagoula, Miss., one cruiser, three destroyers, and two Naval Reserve frigates, was the result of a combined effort by the entire bipartisan delegation of New York and New Jersey, the New York metropolitan business and political community and the tri-State New York Port Authority.

The actual homeporting is scheduled to become operational in 1985, and the local leaders have estimated it will bring 9,000 new jobs to the Nation's greatest city, hard hit today by unemployment.

Let me point out to my colleagues from New York, however, as we express our exultation over this victory, that we are still not entirely home free. The Chief of Naval Operations has indicated that the Navy's selection of New York—officially dubbed as their "preferred selection"—must first undergo an elaborate environmental impact statement, which is expected to take a whole year. Let me also remind my New York colleagues that, in the light of the experience at Three Mile Island, environmental impact statements now go beyond just an assessment of the State and the local water, air, and fauna. They also can explore psychological states, and the matter of community acceptance.

Morever, it appears that our nearest rival for this great honor, the State of Massachusetts, has not yet issued its concession statement. So we can anticipate a busy year ahead to nail down our certificate of title with the Navy and with the Department of Defense.

Let me make one friendly suggestion to my colleagues from New York, some of whom may not be quite as enthusiastic supporters of our armed services as this Member is, that it might be helpful in the months ahead that we go out of our way, when the roll is called in this Chamber, to lean just a little bit more toward the Navy and the Department of Defense, while these bureaucratic procedures are being carried through. After all, there is no better way of expressing our appreciation to Secretary Lehman.

As the Romans used to say: Verbum sat sapientia, a word to the wise is sufficient.

NASA GOES SILVER

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, on October 11, 1983, the National Aeronautics and Space Administration will celebrate its silver anniversary—25 years of remarkable accomplishments. You might remember—

October 11, 1958, NASA launched into Earth orbit its first automated satellite, *Pioneer 1.*

On February 20, 1962, the first U.S. citizen was launched into Earth orbit aboard the *Friendship 7* Mercury capsule.

On July 20, 1969, the Apollo 11 lunar module, *Eagle,* carried the first manned expedition to the surface of the Moon.

On April 12, 1981, the world's first reusable space shuttle, the *Columbia,* was launched, giving birth to the first reusable space transportation system.

Hundreds of unmanned satellites have carried out the scientific exploration of near-Earth space, mapped our planet's resources, charted its weather, and provided a technical base from which commercial exploitation of space has become a reality. Dozens of astronauts have been launched into Earth's orbit to perform useful research.

Mr. Speaker, NASA's 25th anniversary provides all of us with an opportunity to recognize its enormous achievements in aeronautics and space research and development, and in related fields of science and technology.

I ask that the Members of the House join me in consponsoring the resolution introduced by Mr. FUQUA, House

Joint Resolution 284, which designates October 1, 1983, as the "25th anniversary of the National Aeronautics and Space Administration."

HIGHER STANDARD OF ACCOUNTABILITY FOR SAUDI ARABIA NEEDED

(Mr. LEVINE of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVINE of California. Mr. Speaker, yesterday's Washington Post reported that—

> Saudi Arabia * * * is now expressing its "worry" that Lebanon has gone too far toward normalizing relations with Israel.

It is time for this Congress to look more closely at Saudi Arabia's repeated rejection of American policy in the Middle East and its apparent determination never to allow Israel to be accepted into the family of nations.

When Saudi Arabia wanted to purchase F-15's in the Carter administration and AWACS in the Reagan administration, the Congress received assurances that Saudi Arabia would work for peace in the region. Instead, Saudi Arabia repeatedly refuses to do so.

Saudi agents work in this country to undermine support for Israel and the Saudi Government works in the Middle East to undermine American sponsored peace initiatives.

It is time for us to pay more attention to what the Saudis do and hold them to a higher standard of accountability than we have in the past.

BUDGET DISCIPLINE AN ONGOING TASK FOR THE HOUSE

(Mr. JONES of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Oklahoma. Mr. Speaker, so far the House has supported our efforts to enforce budget discipline. Last week the supplemental appropriations exceeded the budget ceilings, but we amended it to conform. The week before, an amendment to eliminate the savings on Federal pension programs was soundly defeated.

Mr. Speaker, tomorrow the House takes up the general revenue sharing bill, and it will be another test of our resolve to enforce budget discipline. This legislation is nearly $300 million over the budget resolution limits. I will offer an amendment to cut off that amount so that it conforms to the budget.

Budget discipline is an ongoing task. To succeed, Members must do in Washington what they say back home. Tomorrow we will have another chance to prove our commitment to fiscal discipline by voting for my amendment to bring general revenue sharing under the budget ceilings.

THE PRESIDENT'S ACTIONS ON CIVIL RIGHTS

(Mr. MITCHELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL. Mr. Speaker, it is a sad day when a President of the United States must go before the Bar Association to say that he is supportive of minorities and women. We have not had that situation for years in this country.

Something is terribly wrong when the President has to go before the Bar Association to defend his so-called record on civil rights. I think one of the problems is that he is—by the way, I have never seen such animosity in my community directed toward any one President as toward this one. My community did not have that animus toward Nixon or Ford, and it is sad. I think a part of the problem is the perception of this administration, and that perception must be placed against a backdrop in which the slowdown of blacks moving into middle class has occurred under this administration.

We have a 20-percent black unemployment rate, and 3 to 5 percent of blacks have gone back into poverty since this administration took over. Above and beyond that, is it a matter of the President really not knowing what is going on with reference to minorities in this country? In December he made a speech saying that he was setting forth goals for minority businesses.

Last month he had signed an Executive order saying, "Here are the goals." He did not have to do that. There is a law on the books. Public Law 95-507. All he has got to do is to get his agencies in compliance with the law.

Mr. Speaker, I hope this can be straightened out. I do not want the President to be thought of as a racist.

□ 1245

NO TRUTH TO RUMOR THAT BILBO EASTLAND AWARD FOR CIVIL RIGHTS ACCOMPLISHMENTS TO BE ISSUED TODAY

(Mr. JACOBS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JACOBS. Mr. Speaker, I have investigated and determined that there is no truth to the rumor that the Bilbo Eastland Award for Civil Rights Accomplishments will be issued today by the American Bar Association.

COLORADO RIVER

(Mr. REID asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REID. Mr. Speaker, it is difficult talk to capsulize in just 1 minute, the influence of the Colorado River on the development of the great Southwest.

The 1,140-mile winding path of the river touches the territory of seven States and two countries. No other river has cut such a remarkable number of very deep trenches—the most spectacular being the Grand Canyon.

The river drains the largest, most arid sector of North America, which earns it the name, the "Lifeline of the Southwest."

The Colorado River system has been involved in many geological firsts. It was the first drainage basin to develop multiple uses of water: Power development, irrigation, recreation, flood control, and navigation.

The first major development toward this multiuse was the Boulder Canyon project in 1928, creating Boulder, now Hoover Dam. This was a significant engineering feat of its times and now functions as a substantial multipurpose water-storage project as well as a major tourist attraction.

Other water projects have written their own history. Parker Dam, for example, takes 1 billion gallons of water, daily—250 miles across California to supply Los Angeles and San Diego.

In another project, water has been diverted, by tunnel, beneath the Continental Divide to irrigate 700,000 acres of Colorado cropland.

Still another tributary provides water to more than 1 million people in the Denver Basin.

The tasks of the river are endless, the impact is immeasurable. It is for these reasons that the Oversight and Investigations Subcommittee of the Committee on Science and Technology will be investigating ways to work with the river in the future.

THE END TO BIPARTISANISM

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I am sorry to have to stand here this morning and say that foreign policy bipartisanism is under serious attack from the majority.

Chairman BOLAND of the Intelligence Committee has written a letter to Chairman PEPPER of the Rules Committee asking for a rule for the immediate consideration of H.R. 2968, the Intelligence Authorization Act.

I do not have time to go into the details of that requested rule. But I can tell you that it is an obvious attempt

to deny the American public any chance of reaching some middle ground with respect to Central American policy.

Chairman BOLAND states:

The leadership has indicated that the bill will be considered as soon as possible.

If that is what the Democratic leadership has indicated, then it seems there ought to at least be some consultation with the minority.

The little understood complexities of Central America need time and study by all of us. If the Democratic leadership persists in this effort H.R. 2760—just passed last week—will be presented to us once again for ratification with no real chance to amend or seek some middle ground.

This is a disgraceful and unacceptable abuse of power and we on our side have to fight it in the name of fair play and true bipartisanship.

THE INAPPROPRIATENESS OF PUBLIC DEBATE ON COVERT AID

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, last week's debate on covert aid was a case of the inmates taking over the insane asylum. It might be appropriate for the House to discuss whether or not we should engage in covert activity in general. But it is crazy for us to publicly debate funding for specific covert activities now in progress.

Covert is supposed to be covert.

We need new procedures, and new ways of deciding sensitive issues through a truly bipartisan and restructured Intelligence Committee.

When the dust stirred up by this most unfortunate episode has settled, I ask the leaders of both parties in both Houses to recommend a reorganization of the way we oversee intelligence activities to insure that last week's very sorry spectacle does not recur.

TELEPHONE RATE INCREASES EXPECTED BEGINNING JANUARY 1, 1984; AND HOUSE CONCURRENT RESOLUTION 150

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr. Speaker, I have with me today several copies of House Concurrent Resolution 150, offering Members an opportunity to express themselves about the growing confusion surrounding the telephone rate situation.

All of us concerned about people with fixed-incomes and with low incomes are worrying about the impact of the court-ordered divestiture of the American Telephone & Telegraph Co. and a potentially destructive ruling by the Federal Communications Commission reallocation telephone costs—both scheduled to go into effect on January 1, 1984.

My resolution expresses the sense of Congress that the Commission's ruling should not go into effect on that date but instead be deferred for at least 1 year until Congress has time to sort this out.

The truth is that not even the most knowledgeable experts agree about the results of these two important governmental actions—except to conclude that local telephone bills are going to rise significantly, perhaps eventually as much as double or triple present bills.

The trouble is, nobody is sure about the consequences of divestiture or about the premature Commission ruling. Legislative days remaining before the deadline may be as few as 14 if, as rumor has it, Congress may adjourn on October 1.

Comprehensive, extremely complex legislation is now before the Congress. But new proposals are being introduced daily. Conflicting testimony is filling up our hearing records. Local telephone companies are madly rushing preparations to adjust to the impending changes.

Congress cannot legislate wisely in such an atmosphere. We need more time to assess the divestiture before accepting a Commission ruling with such far-reaching consequences.

Please join me in demonstrating your concern by signing on House Concurrent Resolution 150. I will be happy to provide you with a copy and will try to answer your questions. Please get in touch with me personally or my staff assistant, Terri Carver, at 5-6435.

BALANCING THE ECONOMIC ARGUMENT AGAINST THE PRESIDENT

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, it is only fair that when this podium in the well is taken for the purpose of criticizing the President for alleged economic ills, that equal time should be granted for noting some of the gains that have been made in what we all seek, economic recovery.

Inflation at this very moment as we speak today is at the lowest level it has been in 15 years. That is good news for the American public. It should be stated loudly and boldly.

The gross national product is up significantly, which means a reduction in deficits and a good sign for all the American public who seek economic recovery.

Just as unemployment, although very high, is showing signs of steady reduction and employment is getting better every day, it is good for us to balance the record from this podium when attacks are made on the President's program for economic recovery.

APPOINTMENT AS MEMBER OF HOUSE COMMISSION ON CONGRESSIONAL MAILING STANDARDS

The SPEAKER. Pursuant to section 5(b) of Public Law 93-191, the Chair appoints the gentleman from Minnesota (Mr. FRENZEL) as a member of the House Commission on Congressional Mailing Standards to fill the existing vacancy thereon.

RESIGNATION AS MEMBER OF BOARD OF CONGRESSIONAL AWARDS

The SPEAKER laid before the House the following resignation as a member of the Board of the Congressional Awards:

DECEMBER 7, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, Capitol Building, Washington, D.C.

DEAR MR. SPEAKER: It is with sincere regret that I must resign from the Board of the Congressional Awards as I find my many commitments, both professional and on a volunteer basis, preclude my devoting enough time and effort to the wonderful goals toward which this organization strives. I cannot, in all good conscience, serve on the Board without being a working and contributing member.

I am proud to have been a part of the launching of this idealistic organization and to have helped get it off the ground because I know the first few years are the most difficult and important. I am certain with this fine beginning the Board will continue to make it thrive and grow. I will always be a part of the Congressional Awards in spirit.

With sincere regret and warmest affection.

Always,

DINAH SHORE.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

APPOINTMENT AS ADDITIONAL MEMBERS OF CONGRESSIONAL AWARD BOARD

The SPEAKER. Pursuant to section 4(a) of Public Law 96-114, as amended by Public Law 98-33, the Chair appoints as additional members of the Congressional Award Board Mr. A. J. F. O'Reilly of Pittsburgh, Pa.; Dr. Juanita Kreps of Durham, N.C.; Mr. Christopher F. Edley of New York, N.Y.; and Dr. Henry Viscardi, Jr., of Albertson, N.Y.; and Mr. Douglas A. Fraser of Northville, Mich., for the remainder of the term of Ms. Dinah Shore.

Mr. MICHEL. Mr. Speaker, pursuant to section 4(a) of Public Law 96-114, as amended by Public Law 98-33, I have today appointed as additional members of the Congressional Award Board the Honorable Gerald R. Ford of Rancho Mirage, Calif.; Mr. Curtis L. Carlson of Minneapolis, Minn.; Mr. Allen H. Neuharth of Rochester, N.Y.; and Mr. C. William Verity, Jr., of Middletown, Ohio.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Tuesday, August 2, 1983.

FEDERAL SUPPLEMENTAL COMPENSATION ACT AMENDMENTS

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3409) to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State, as amended.

The Clerk read as follows:

H.R. 3409

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subparagraph (B) of section 602(e)(2) of the Federal Supplemental Compensation Act of 1982 is amended to read as follows:

"(B) The applicable limit for any State determined under clause (ii) of subparagraph (A) shall in no event be less than the number of weeks applicable to such State for the week beginning March 27, 1983, under this paragraph (as in effect for such week) reduced by 4.".

(b) The amendment made by subsection (a) shall apply to weeks beginning after March 31, 1983.

(c) In the case of any eligible individual who (without regard to the amendment made by subsection (a)) exhausted his rights to Federal supplemental compensation (by reason of the payment of all of the amount in his Federal supplemental compensation account) before the first week beginning after the date of the enactment of this Act, such individual's eligibility for additional compensation by reason of the amendment made by subsection (a) for any week of unemployment shall not be limited or terminated by reason of any event, or failure to meet any requirement of law relating to eligibility for unemployment compensation, occurring after the date of such exhaustion of rights and before the beginning of the first week beginning after the date of the enactment of this Act.

The SPEAKER. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3409, presently under consideration.

The SPEAKER pro tempore (Mr. KILDEE). Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this legislation would amend the Federal Supplemental Compensation Act of 1982. This program provides additional weeks of unemployment compensation to individuals who have exhausted their regular State benefits and any extended benefits to which they were entitled. The program was originally due to expire on March 31, 1983. As part of that extension the program was amended, and as a result, in many States the maximum number of weeks of benefits payable has dropped substantially.

H.R. 3409 would limit the loss of FSC benefits to no more than 4 weeks, when comparing the number of weeks payable for the last week of the original program.

At this time, Mr. Speaker, I will yield to the gentleman from Tennessee, chairman of the Subcommittee on Public Assistance and Unemployment Compensation, Mr. FORD, for a more detailed explanation of the bill.

Mr. FORD of Tennessee. Mr. Speaker, I thank my distinguished chairman for yielding.

Mr. Speaker, I would like to outline for the Members those provisions of the bill effecting the railroad unemployment insurance system. Initially, I would like to remind Members that the primary concern of both committees was to avoid an automatic decrease in rail pensions, and to assure the long-range solvency of the rail pension system.

Rail workers are covered by the Railroad Unemployment Insurance Act, they are not covered by regular State unemployment insurance laws. Under this act, whenever the rail UI program has insufficient funds to pay unemployment benefits, it can borrow from the rail pension fund. Because of a rapid drop in rail employment over the last 2 years, this borrowing has increased dramatically. By October 1, 1983, the rail UI program will owe the rail pension fund $650 million. Without any changes in the rail UI program, it would have to borrow an additional $1.2 billion over the next 5 years. Therefore, within the context of assuring a sound pension fund, something had to be done to reduce this drain on the pension fund.

The bill as reported by the Committee on Energy and commerce would have transferred this borrowing authority to the Federal Unemployment Account. This is the account from which States borrow when they have insufficient funds to pay benefits. There were no provisions in the bill, however, for a specific repayment procedure for such loans to the rail UI fund. In addition, we were concerned that by simply transferring the borrowing authority to the Federal Unemployment Account we would be giving up any chance of substantive changes being made in the rail UI program that would reduce and ulitmately eliminate its borrowing needs.

The committee struck the provisions of the bill that would have allowed borrowing from the Federal Unemployment Account. Rather than allow such borrowing, we adopted a number of provisions designed to improve the solvency of the railroad unemployment insurance program. these provisions will reduce the drain on the pension fund and begin the repayment of outstanding loans to the pension fund.

Specifically, the unemployment provisions would—

First, increase employer-paid unemployment taxes by 50 percent, effective January 1, 1984.

Second, increase the amount of wages a rail employee must earn in order to qualify for unemployment benefits from $1,000 to $1,500, effective Jaunary 1, 1984.

Third, increase the waiting period for unemployment benefits in the case of a strike from 7 to 14 days.

Fourth, make sick pay benefits, which are paid out of the railroad unemployment insurance fund, subject to Federal income tax.

Fifth, establish, effective July 1, 1986 to September 30, 1990, a railroad unemployment repayment tax which will be used solely to repay outstanding loans from the unemployment insurance program to the pension fund.

Sixth, repeal, effective September 30, 1985, the authority for the railroad unemployment system to borrow from rail pension funds.

Seventh, establish a Railroad Unemployment Compensation Committee, to be comprised of two labor representatives, two management representatives, and one public member. The committee will report to the Congress, no later than April 1, 1984, recommendations addressing all aspects of the railroad unemployment insurance system, including the possibility of covering rail workers under the Federal-State unemployment system. In ad-

dition, the committee is specifically mandated to recommend adjustments in employer contributions to the system and benefit reductions which will enable the rail unemployment system to repay all loans from pension fund by the year 2000.

I know that some Members wanted us to go further in the rail UI area, particularly by extending the repayment tax beyond 1990. I want to point out, however, that the Railroad Unemployment Committee must report to the Congress no later than April 1, 1984, a specific plan for the repayment of all loans by the year 2000. We have started the repayment tax. If we had made it permanent or extended it much beyond 1990, the committee we have established would simply have no incentive to examine all aspects of the rail UI system, including tax increases, benefit reductions, and the possibility of covering rail workers under the regular State programs.

We have cut off the borrowing authority from the pension fund after September 30, 1985. This will provide another incentive for rail management and labor to bargain seriously and in good faith about the future of the rail UI system.

As I indicated at the outset, our concern is the long range solvency of the pension fund. Frankly, the industry, management, and labor alike, did not focus on the UI program when this legislation was first being considered. They were bargaining over pension changes. We have taken substantial steps in improving the solvency of the UI program, but we have also allowed the industry a framework for addressing the remaining problems.

I believe that these provisions are fiscally responsible; by assuring that the Federal Government does not pay what the industry should be paying. And they are fair, by allowing the industry time to consider further changes in the rail UI system and making recommendations to the Congress by a date certain. I urge my colleagues to approve the legislation.

□ 1300

Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. SHANNON), one of the sponsors and authors of the bill.

Mr. SHANNON. Mr. Speaker, I rise in support of H.R. 3409.

This legislation is urgently needed to restore Federal supplemental compensation (FSC) benefits to thousands of long-term unemployed workers who have lost benefits weeks earlier than originally promised—many without any notice.

FOUR STATES WERE IMMEDIATELY HIT

On June 19, 5,000 long-term unemployed workers in Massachusetts, and thousands more in Arizona, Kansas, and North Carolina, were surprised and dismayed to learn that instead of being entitled to 10 weeks of FSC benefits—as promised by the Department of Labor—the law had been reinterpreted so that they would only be paid 8 weeks of benefits. Those who had already received 8 weeks lost benefits immediately.

DOL HAD MISREAD THE LAW

These unexpected cutoffs occurred because the Department of Labor originally misinterpretated a provision in the bill extending the FSC program. The legislation approved by Congress said that no State under the new FSC program could receive more than 4 weeks less than it was entitled to in the last week of the old program. However, this 4-week floor only covered States in the first week of the new program.

The Department of Labor applied the 4-week floor to all States throughout the life of the current FSC program. For nearly 2½ months, the States were told that they could not drop more than 4 weeks compared to the number of weeks they were entitled to in the last week of the old program.

Benefits were paid out under this policy. And an expectation was created on the part of FSC claimants that they were eligible for a certain number of weeks of benefits.

DOL REINTERPRETS THE LAW

On June 10, the DOL announced that it had reinterpreted the law and that the 4-week floor only applied in the first week of the new program—and that all States except one (Delaware) could experience a loss of more than 4 weeks compared to the old program, if the insured unemployment rate dropped.

Arizona, Kansas, Massachusetts, and North Carolina were immediately hit. Thousands of workers were suddenly cut off the rolls 2 weeks earlier than expected.

Since June 10, the insured unemployment rate has dropped in another 21 States resulting in a loss of 2 weeks of benefits in each of these States, a loss that was unanticipated prior to June 10.

HURTS THE LONG-TERM UNEMPLOYED

The people we are talking about here are the long-term unemployed who have exhausted their regular State benefits and any extended benefits they were entitled to.

While there has been some reduction in the total unemployment rate, the job prospects for this group continue to look bleak. Even if the economy recovers, they will be the last to be rehired.

In light of the continuing hardships faced by this group, it is imprudent and harsh not to continue the original DOL interpretation. These people were brought onto the rolls under a certain interpretation of the law. It is unfair to kick them off the rolls weeks earlier than expected just because the Department of Labor discovered 2½ months after the fact that they had misread the law.

EXTENDED BENEFITS HAVE EXPIRED IN MANY STATES

In addition, 14 of the States which have lost benefits under the new Department of Labor interpretation have also gone off the extended benefits program since April 1983.

The combination of the loss of extended benefits and the loss of more than 4 weeks of FSC has had a particularly harsh impact on unemployed workers in these States.

H.R. 3409

This bill would simply require the DOL to run the program as it was originally interpreted—providing that no State could receive more than 4 weeks less than it was entitled to in the last week of the old program.

Adoption of this bill is simply a matter of equity.

By approving this bill, the Congress will be saying that the Federal Government will not promise the most vulnerable of our citizens one thing, and then do another.

Mr. GRADISON. Mr. Speaker, will the gentleman yield?

Mr. SHANNON. I am happy to yield to the gentleman from Ohio.

Mr. GRADISON. Mr. Speaker, Ohio is one of the States affected by this legislation which would assure that benefits will be paid as the Department of Labor said they were going to be paid. This is the very least we can do to assure fair treatment of the unemployed. I congratulate the gentleman from Massachusetts (Mr. SHANNON) for his leadership on this issue and urge my colleagues to support H.R. 3409.

Mr. SHANNON. I want to thank the gentleman from Ohio.

Mr. Speaker, I yield back the balance of my time.

Mr. FORD of Tennessee. Mr. Speaker, we reserve the balance of our time.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this measure would cost about $200 million. To enact it would be to follow, I think, a most unfortunate path. I therefore oppose the suspension of the rules to pass H.R. 3409 containing amendments to the Federal Supplemental Compensation Act of 1982.

H.R. 3409 can be traced to the action taken earlier this year when we extended the FSC, or the Federal supplemental compensation program, which had been scheduled to end on March 30.

The schedule of benefits was cut back slightly in an extended program. The purpose behind the cutback was to provide the budgetary leeway necessary to provide additional FSC benefits to persons who had exhausted

their benefits under the regular FSC program.

The transitional rule implementing the scaled-back FSC program was designed to insure that no State would experience an immediate drop of more than 4 benefit weeks from its benefit level in late March. This feature applied only to an immediate drop in benefits. It did not protect the State from losing more than 4 benefit weeks if its dropoff occurred after the first week of the extended FSC program.

The Department of Labor initially misinterpreted the language in the transitional rule and instructed the States that in no case could a State drop more than 4 benefit weeks from its level in late March. The Department corrected its instructions in early June but in the meantime four States had made erroneous payments based on the Department's erroneous instructions.

Why the Department interpreted this incorrectly is beyond me, Mr. Speaker. But now to feel that we must change the law because of this error is also very strange.

In fact, if the principle were estoppel, a long-standing legal principle, it would have to be based on the assumption that people relied on the error made by the Government to their detriment.

In fact, what we did was we created a windfall for some people who were not entitled under the clear instructions of the law as passed by this body and now we are saying we must make it up to them and to all of the others who might have relied on this if the Department of Labor had been correct.

H.R. 3409 would extend those original FSC transition rules to protect all States from dropping more than 4 benefit weeks from their levels in late March.

Proponents argue that the need for this cushion is reinforced by our rebounding economy and falling unemployment rate.

The compensation of the scaled back FSC benefit schedule and falling unemployment rates means about 25 States have dropped more than 4 benefit weeks. H.R. 3409 would limit the drop to 4 weeks.

Lost in all of this verbiage is a central fact that the Congress devised an extension of FSC benefits in March, and the Labor Department mistakenly broadened congressional action when it implemented the new law.

The aim of H.R. 3409 is to codify the departmental mistake and legalize the additional weeks of benefits which would go to affected States as a result of the mistake.

This is a terrible procedure, Mr. Speaker, If we were to codify executive branch mistakes routinely we would find ourselves in impossible situations, politically and economically as well as legally.

Passing this bill would set a bad precedent. It would help some States financially but it would represent an unwise legislative move and one which I would hope my colleagues in this body would reject.

Certainly it is not the kind of precedent we would want to extend.

Mr. Speaker, I now yield such time as he may consume to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I rise in opposition to H.R. 3409, a bill which would sanction officially a bureaucratic mixup by the Department of Labor and will have the result of increasing spending for the Federal supplemental unemployment compensation program by a quarter of a billion dollar above the amount agreed to by Congress earlier this year.

As described by the gentleman from Tennessee, the subcommittee chairman, and the distinguished gentleman from New York who has just spoken, that FSC extension bill was passed in March. It was designed to provide additional federally funded unemployment compensation benefits to long-term unemployed individuals.

□ 1315

The benefits provided under the renewed FSC program were structured so that those individual in the highest unemployment States where it is theoretically much harder to find work would receive benefits for a longer time.

Since the amounts of weeks an individual would be eligible for could rapidly drop if unemployment started declining, which it did, a provision was added in the bill which limited the immediate drop in weeks to no more than 4 weeks below the level a State was receiving the last week in March. But this provision was carefully designed within the conference committee to affect only one State, Delaware; and it was well understood at the time.

Unfortunately the Department of Labor misinterpreted the statutory language of the bill. It instructed the States that in no case should a State drop more than 4 weeks below the level it was receiving during the last week in March. By the time DOL discovered its own mistake and notified the States of how they really should act, four States had begun to make payments based on those erroneous instructions. Those four States paid out about $2.5 million. The Department of Labor has indicated that it will pay the bill for the $25 million and will make no charge for them.

Mr. Speaker, it may be par for the course for the Department of Labor to make mistakes. It ought not to be the House's responsibility to affirm the mistakes that the Department of Labor makes by changing the law, especially when it costs the taxpayers one-quarter of a billion dollars.

All the States now know what the correct provision is. They have been paying out the benefits accordingly.

In my judgment, the damage has been done, the situation has been done, the situation has been corrected by the Department of Labor, and there is absolutely no reason for Congress to legitimatize a bureaucratic error and spend a couple of hundred million dollars providing these extra benefits to which no one is entitled under the law.

What we have here is legislation by aspiration or by anticipation. The sponsors and proponents of this bill tell us, "Well, somebody expected to get more and therefore Congress must legislate to give more."

Unemployment compensation, Mr. Speaker, is designed to provide the current necessities of life to unemployed individuals. Yet under this bill unemployment compensation benefits would be provided retroactively to individuals who were never entitled to them.

In addition, under H.R. 3409, an individual could currently be working, have not fulfilled the work-search requirements that are the basic requirement of receiving unemployment compensation and still be entitled to a windfall benefit of 2 weeks of additional unemployment compensation.

I think it is important to note that the worksearch requirement which has followed each one of our unemployment compensation laws has been omitted from this bill and so there is no requirement that a recipient under this bill of the extra weeks be searching for work at all.

Now, I am not opposed to the general FSC program. I fact it was my amendment in the Committee on Ways and Means which provided the basic structure of the benefits under the program. I do not feel we can afford to spend the additional money beyond that agreed by Congress simply because some bureaucrat at DOL cannot read legislative language. It has already been noted that 25 States will be able to give more unemployment compensation to States. It should also be noted that taxpayers in all 50 States will have to pay for these benefits. It should be noted further and more emphatically that the taxpayers in 25 States will pay for benefits that will never come to their States.

A mistake was made, the mistake has been corrected. No one who has received erroneous payments will be required to pay them back. The program is not working the way Congress intended, the way the law states, and we should not change the rules now retroactively to provide windfall benefits that were never intended.

I think, Mr. Speaker, we can anticipate that Members from those 25 States who believe their areas will be benefited will support this legislation by anticipation.

It is my fervent hope that those whose only anticipation is to pay the bill, that is those who represent the other 25 States, will oppose this bill and we will defeat it under suspension.

Ms. SNOWE. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield such time as she may consume to the gentlewoman from Maine (Ms. SNOWE).

Ms. SNOWE. Mr. Speaker, I rise in support of H.R. 3409, the Federal supplemental compensation amendments, legislation which clarifies the intent of Congress regarding the current extension of long-term unemployment benefits.

I firmly believe that the Federal supplemental compensation program must be extended in order to assist those long-term unemployed workers eliminated from the rolls weeks earlier than expected and, in most cases, with little or no warning. For example, in my home State of Maine, unemployed workers have had 13 weeks lopped off their potential eligibility for unemployment insurance benefits. In accordance with the ruling made by the U.S. Department of Labor, the extended benefits program that began March 27 with 50-percent Federal funding, was abruptly shut off at the beginning of July. When asked to explain its actions, the Department simply stated that Maine's program was cut because the average statewide unemployment rate for a 13-week period ending June 4, was less than 20 percent, higher than the average during the corresponding period in the preceding 2 years. In other words, the program was terminated because the unemployment rate did not increase enough from previous levels—although the unemployment picture in Maine has not improved.

The loss of benefits has created disruption and hardship for thousands of unemployed workers. I strongly believe that now is not the time to interrupt these benefits. Therefore, I urge my colleagues to support this legislation which requires the Federal Government to provide the maximum number of weeks of FSC benefits. This small change will greatly benefit the millions of jobless individuals across the Nation.

Mr. FRENZEL. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. WILLIAMS).

Mr. WILLIAMS of Ohio. Mr. Speaker, some 91,000 Ohioans exhausted all of their unemployment benefits during June alone. In Mahoning and Trumbull Counties, which I represent, more than 2,800 persons lost their benefits. The unemployment rate in those two counties still hovers around 17 percent.

The bill now before the House will help thousands of Ohioans who are without work and without other forms of income. If we can afford to spend even one dime on foreign aid and other programs designed to help persons overseas, we cannot afford to forsake our fellow countrymen.

H.R. 3409 will provide a little help to Americans in need, help, not in accumulating wealth, but in just keeping the wolf away from the door. Those of this body who are prone to accuse others of a lack of compassion or a lack of concern for those in need now have a chance to show them they do not share those shortcomings. H.R. 3409 will give assistance to thousands of Ohioans and to many, many more persons across America. It will also show them that we, in Washington, are aware of their predicament and are trying to do something to help them.

I urge all of my colleagues to support this very worthwhile bill and I commend the gentleman from Massachusetts for offering it.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the gentleman from North Carolina (Mr. MARTIN).

Mr. MARTIN of North Carolina. I thank the gentleman.

Mr. Speaker, I rise in support of H.R. 3409, legislation to preserve the level of unemployment benefits for this fiscal year at the level that the States and the people and we, their Representatives, were led to believe last March would be the level of benefits.

The Department of Labor has now admitted to us that it was in error in misinterpreting the provisions of that law which was enacted earlier.

They have admitted their error. The Congress may now decide whether to repair that error or whether simply to acknowledge it and pass by on the other side.

The issue is not whether the Congress is going to rescue the Department of Labor which has made the error in the first place; the issue is whether we are going to decide now to treat the people of these affected States as they were told they would be treated in March.

North Carolina is one of those States. While we, in North Carolina, are delighted at the strengthening economic recovery and the pickup in the rate of progress toward a stronger economy with lower and lower unemployment, we look forward to the date when extended supplemental benefits are no longer going to be needed.

Yet we share with other States the view that our people who are still unemployed should be treated just as was promised to them and to their State when we passed the bill to phase out the supplemental benefits. That was sound legislation in March. We have no quarrel with the legislation to phase out those benefits in anticipation of quickening recovery.

Yet, it is not just a question of what was intended, as the gentleman from Minnesota has pointed out; but it is also a question of what people were told was intended at the time that the legislation was passed.

The misinterpretation by the Department of Labor led the States and the people to believe that the bill would be less severe than it is in fact. Had they been told the truth originally, there might be some question as to whether there would have been the full measure of support which passed the legislation at that time.

There is one other comment that I would leave with you, and that is, there will be many who will point out that this legislation is supported, after all, by those whose States are affected. Anyone in this House of Representatives, anyone who has followed the history of legislative issues in this Congress, will note that it is not at all unusual for Representatives of affected States to raise the issues by which their States are affected.

It would be my hope that that would not be necessary if Representatives from all other States would recognize that not only was there an error in interpretation but there is a genuine need to treat people as they were told at that time and then it would not be necessary for those of us just from the affected States to take to the battlements.

I thank the gentleman for yielding the time and I thank the Chair.

Mr. FRENZEL. Mr. Speaker, I yield 2 minutes to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Speaker, I rise in support of H.R. 3409, legislation which will restore Federal supplemental compensation benefits to long-term unemployed workers who are being denied benefits due to a reinterpretation of law by the Department of Labor. These workers are being cut off, in many cases with little or no warning. In the State of Vermont, workers have already lost 2 weeks of benefits and soon may lose 2 more.

I think it is important to point out that as to the people that are affected generally in this bill, it is no different whether you are living in Vermont or Michigan or some other State with high unemployment. If the individual lives in an area of high unemployment, the plight is the same.

In my State, for instance, we have a serious recession in the machine tool industry with unemployment in those communities in excess of 12 percent. Individuals in these areas are the ones that will primarily receive these additional benefits. There are other areas with chronic high unemployment such

as the northeastern section of my State. Those individuals are just as seriously affected and just as seriously unemployed as those in areas where the general State unemployment rate is high.

The administration made a promise to these workers this spring. It is one I think we should keep.

I urge my colleagues to give their full support for this legislation and applaud my Massachusetts colleagues for bringing it before us today.

Mr. FRENZEL. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, we are being asked to ratify a bureaucratic mistake by law.

We have made no promises. The law that we passed did not convey the promise that is to be realized in this particular bill.

It is not my business to predict what happens to a bill after it leaves this particular House.

I do think it is fair to state that the administration strongly opposes this bill and it may be passing to an uncertain future when it leaves this House, if indeed it does.

I suggest that the Members vote against it and give it a certain future immediately.

I reserve the balance of my time.

Mr. FORD of Tennessee. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Speaker, I urge my colleagues to support H.R. 3409, the Federal Supplemental Compensation Act amendment. The bill corrects a major inequity that arose from extension of the FSC program that expired March 30.

In an effort to limit the shock of States losing important FSC benefits weeks, the Social Security Amendments Act provided that no State could immediately lose more than 4 weeks of FSC as of enactment of the bill. Unemployment has since declined, allowing more States less benefit-weeks for unemployed workers. While lower unemployment would seem to indicate an improved labor situation, declining unemployment rates are largely due to the method they are computed, not additional workers.

Unemployment, as computed for the insured unemployment rate (IUR) figure used to determinine benefit eligibility, includes only those workers receiving regular State benefits—the first 26 weeks. Any unemployed worker receiving either State EB—extended benefits—or FSC has effectively been counted as an employed person since changes in the Reagan Reconciliation Act of 1981. States with basic industries such as automobile manufacturing and steel have obviously suffered from long-term unemployment—with frequent examples of workers who have not had employment for 8 or 10 or 12 months or more. Not including these men and women in unemployment statistics that determine benefits is terribly unfair, to say the least.

Mr. Speaker, I urge my colleagues to support this bill as one step in putting equity and fairness into unemployment compensation. It is not a cure-all. Unemployment benefits are not what people in our districts want—they want jobs, but it will help long-term unemployed workers that were arbitrarily cut off FSC in the March extention. I urge Members from all States to support this legislation.

Mr. Speaker, I would like to point out in closing that while the economic recovery is moving along and we all ought to be grateful for that, some States, especially in the industrial Northeast and Midwest, are still suffering a great deal. In my home county, unemployment rates last month came down, all the way down to 16 percent.

In the county adjacent to mine, unemployment rates also came down last month—all the way down to 18.5 percent. So, while the economy is improving, there are still people in our Nation, in many, many States who are hurting badly and who very badly need the extra 2 weeks of compensation benefits which this bill would provide. This bill to some people may be a budget figure; to the people of the 13th District of Ohio and the many other areas in similar circumstances, this bill means food on the table, it means utility bills paid, and it means rent paid for at least another 2 weeks.

And I think we owe that to the 10 or 11 million people in this country who are still unemployed, despite our recovery.

Mr. LEVIN of Michigan. Mr. Speaker, I rise today in support of H.R. 3409, the Federal Supplemental Compensation Act amendment. This bill will take an important first step in correcting a general inequity in the way Federal unemployment compensation programs operate.

Since we last addressed the FSC program last March, the national unemployment rate has shown only marginal improvement; 21 States have now lost more than 4 weeks of FSC benefits and would benefit under this legislation. In State after State, it has become increasingly clear that the IUR triggers, which determine the number of benefit weeks in a particular State, do not reflect the serious unemployment conditions which exist across this land. The Department of Labor may have erred technically when it determined that no State could lose more than 4 weeks of benefits under earlier legislation, but in doing so it recognized an important reality. High unemployment is still with us no matter what the IUR numbers may tell us.

While I strongly support this legislation, I believe the problem addressed by this bill is only one aspect of a larger problem. The falling IUR's have caused many States to lose FSC weeks, but the 13-week extended benefit program has simply vanished. The problem is the same. The IUR is not a good measure of the labor market conditions in a particular State. Until we address this fundamental problem, we will have to continue to patch up existing laws with arbitrary caps. I call on my colleagues to take a hard look at the way the Federal unemployment compensation benefits are determined. I think they will agree with me that something must be quickly done to correct the current situation which cuts off benefits in some of the economically hardest hit areas in the country for tens and tens of thousands who are unemployed through no fault of their own.

● Mr. BOUCHER. Mr. Speaker, I rise in support of H.R. 3409, a bill to extend the Federal supplemental compensation (FSC) program which provides additional benefits to jobless individuals who have exhausted their basic unemployment compensation benefits.

In my congressional district in southwest Virginia, the unemployment rate averages 13 percent. In the coal-producing counties of my district, the average unemployment rate is 18.8 percent. In one county, the jobless rate is 27.2 percent. The recession remains very real for the 19,000 residents of Virginia's Ninth Congressional District who are out of work, and the passage of H.R. 3409 is essential to these individuals who are most in need.

In States such as Virginia where the long-term unemployed are ineligible for benefits under the extended benefit (EB) program, extension of the FSC program is vital to people seeking to provide for their families, to make medical payments and to pay the rent or the mortgage. The additional weeks of benefits provided by H.R. 3409 are essential to the maintenance of a basic standard of living for the long-term unemployed and their families.

Between February and May of this year, 5,019 individuals in my congressional district exhausted their basic unemployment compensation benefits and, due to the unavailability of extended benefits in Virginia, were forced directly into the FSC program. During the same February to May period, 5,202 individuals in my congressional district exhausted their additional weeks of FSC benefits and were still out of work. The fact that more individuals exhausted FSC benefits than exhausted basic benefits indicates the severity of unemployment in my district and dramatizes that the long-term unemployed need additional assistance.

I have introduced legislation which is now pending before the Ways and Means Committee to amend the extended benefit program to provide up to 13 weeks in extended benefits on a substate basis. This legislation would relieve the serious inequity which arises through the use of statewide unemployment levels to trigger the payment of extended benefits.

Pending reform of the extended benefit program, the long-term unemployed in my State and in the 44 other States that do not now qualify for extended benefits depend on the FSC program for additional benefits after basic benefits have been exhausted. I commend Chairman ROSTENKOWSKI of the Ways and Means Committee for moving promptly with this vital legislation, and I urge my colleagues to support H.R. 3409.●

● Mr. WILLIAMS of Montana. Mr. Speaker, I rise in support of H.R. 3409. This legislation is urgently needed to restore Federal supplemental compensation (FSC) benefit payments of long-term unemployed workers were cut off the rolls weeks earlier than expected and in many cases with little or no warning—and to prevent additional cutoffs from occurring earlier than promised in the future.

The DOL, in implementing the new FSC program, misinterpreted the law in my judgment and found that the 4-week floor applied to all States throughout the life of the program—through September 1983. Those States which had already dropped 4 weeks compared to what they were entitled to in the last week of the old program were told that they would experience no further reduction in benefits, even if their insured unemployed rate (IUR) dropped.

On June 10, the DOL reinterpreted the law to say that the 4-week floor only protected States which would have otherwise experienced a drop of more than 4 weeks during the first week of the new program. All other States were informed during the first week of the new program. All other States were informed that, beginning June 19, they were not covered by the 4-week floor—if their IUR dropped, they would lose additional weeks of benefits.

Since June 10, the IUR has dropped in 25 States resulting in a loss of 2 weeks of benefits in each of the States—a loss of benefits that was unanticipated prior to June 10. Other States could be affected, depending on whether the IUR drops.

States which have already lost 2 weeks of FSC benefits under the new Department of Labor interpretation: Alabama, Arizona, Arkansas, Idaho, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nevada, New Jersey, North Carolina, Ohio, Rhode Island, South Carolina, Tennessee, Utah, Vermont, and Wisconsin.

This legislation would simply require DOL to run the current FSC program as it was originally interpreted guaranteeing that no State would receive more than 4 weeks less than it was intitled to in the last week of the old program. Benefits would be paid as DOL said they were going to be paid until the new interpretation was announced on June 10.

In addition, I would like to alert my colleagues in the House of Representatives regarding another problem with the FSC program identified in the letter below from Mr. Harold V. Kansier, administrator, State of Montana Unemployment Insurance Division:

STATE OF MONTANA DEPARTMENT OF LABOR AND INDUSTRY, EMPLOYMENT SECURITY DIVISION,
Helena, Mont., June 24, 1983.

Re Federal supplemental compensation.

Representative PAT WILLIAMS,
Longworth House Office Building,
Washington, D.C.

DEAR PAT: Last week when we discussed the procedures used in Federal Supplemental Compensation you indicated that you might be interested in important changes for this legislation which would be beneficial to the states administration of the program and to the claimants.

At the present time we must change the claimant's duration every time the insured unemployment rate triggers a change in duration. We have also had to change the length of entitlement because of recent legislative amendments. I do not have an argument with the need for changing the entitlement when the unemployment insurance rate changes in the state, but I feel the change should apply to new applicants only and once an individual has established a duration, the duration should remain until exhausted.

This is the first program I can recall which required change in entitlement once it has been established. Making these changes which have to be made in a very short time frame results in administrative nightmare and considerable anguish and disappointment on the part of the claimant who is depending upon unemployment benefits for a specific time of which he has already been notified.

These changes require considerable computer programming overtime for such purposes and cost of computer services. The last change amounted to $1,500 for this purpose only. This may seem a small amount, but then of course Montana has a small population. It must be a tremendous cost in some of the larger states.

This actually is a small cost compared with the staff time we must divert from other important programs in order to make the adjustment. It is estimated it takes at least five minutes on each claimant to make the redetermination. This does not include the additional time needed and cost to notify the claimant of his change in duration or notification that he has exhausted his claim. Actually, the cost becomes even greater when you consider that overpayments of benefits have to occur when you are involved in frequent changes as described above.

I would hope that you would be able to do something about this program making it more manageable and equitable to the claimant.

Sincerely,

HAROLD V. KANSIER,
Administrator, Unemployment Insurance Division.●

Mr. FORD of Tennessee. Mr. Speaker, we have no further requests for time on this side.

I would just like to state prior to yielding back my time, that the Shannon bill, and I will state it once again for the record, does two things. One is that it will provide 2 additional weeks of unemployment compensation benefits for some 450,000 long-term unemployed individuals in this country.

And according to CBO, the cost for 1983 is $166 million and $14 million for fiscal 1984, and, therefore, I would urge my colleagues to vote favorably for H.R. 3409.

Mr. Speaker, I yield back the remainder of my time.

Mr. FRENZEL. Mr. Speaker, I yield back the remainder of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill H.R. 3409, as amended.

The question was taken.

Mr. FRENZEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clauses 5, rule I, the Chair's prior announcement, further proceedings on this motion will be postponed.

MEDICARE HOSPICE REIMBURSEMENT AMENDMENT

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3677) to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program.

The Clerk read as follows:

H.R. 3677

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1814(i)(2) of the Social Security Act is amended—

(1) by striking out "located in a region (as defined by the Secretary)" and "for the region" in subparagraph (A), and

(2) by amending subparagraph (B) to read as follows:

"(B) For purposes of subparagraph (A), the 'cap amount' for a year is $6,500, increased or decreased, for accounting years that end after October 1, 1984, by the same percentage as the percentage increase or decrease, respectively, in the medical care expenditure category of the Consumer Price Index for All Urban Consumers (United States city average), published by the Bureau of Labor Statistics, from March 1984 to the fifth month of the accounting year.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes and the gentleman from Ohio (Mr. GRADISON) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 3677, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3677 provides for a technical correction to the medicare hospice benefit included in the Tax Equity and Fiscal Responsibility Act of 1982.

The hospice benefit included in Public Law 98-248 provides for reimbursement of a comprehensive set of hospice benefits, in lieu of regular medicare benefits, for terminally ill medicare beneficiaries. Hospice care emphasizes pain control and the relief of stress and focuses care largely in the home setting rather than in an inpatient acute care setting.

The Department of Health and Human Services is in the process of writing regulations to implement the hospice legislation. In writing these regulations, it has been determined that there is a technical problem with the original legislation. If uncorrected, this would result in inadequate reimbursement for hospice care.

H.R. 3677 provides a technical correction to establish the hospice cap on reimbursement at $6,500, indexed by the medical care component of the Consumer Price Index. This represents an amount which should adequately compensate hospices for the provision of hospice care.

When this legislation was originally considered, there were 248 cosponsors in the House and 68 cosponsors in the Senate. I urge my colleagues to show their continued support for hospice care as a humane and cost effective alternative to traditional medical care by voting for H.R. 3677.

I now yield such time as he may consume to the gentleman from Indiana, the chairman of the Subcommittee on Health, Mr. JACOBS, for a more detailed explanation of this legislation.

Mr. JACOBS. Mr. Speaker, actually a more detailed explanation for the legislation is not really needed. it is a classic case, Mr. Speaker, of the desirability of saying something in plain English rather than by complicated formula. It has been a series of errors and readjustments of what the actual cost of effectuating this hospice program, which I think about 99 percent of the American people either favor or would favor if it were explained. It is an opportunity to save the trust fund money, both theoretically and in actual fact.

The assumption of the Congressional Budget Office is that each case would cost about $7,600. In fact, this legislation will make that limit $6,500. Not out of harshness, but out of more realistic estimates about how much the program will actually cost.

And with that, I yield 2 minutes to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Speaker, for a 2-year period of time I served as cabinet-level commissioner on aging in the State of Connecticut and during that period one of the most significant developments was the whole hospice movement.

I saw far too many cases where families saw not only an individual die without dignity, but wipe out assets that he or she had worked for for a lifetime hoping to pass them on to future generations.

The hospice movement is a move in the direction of changing all of that. It allows one death with dignity because that is the emphasis. Two, it holds the family unit together. Three, as the sponsor of the legislation indicated, it does, I think, provide a more economical setting because instead of requiring that that person live out his or her days in a hospital or nursing home, the emphasis is on care in the home.

Now the whole question for the future development of this very logical and very humane program is the question of reimbursement. In the last session, under the direction of the gentleman from California (Mr. PANETTA), and with the full cooperation and advancement of the cause by the Ways and Means Committee, a reimbursement formula was developed. That formula provided a reasonable rate of reimbursement. And then we found through administration interpretation that there was an attempt to cap this reimbursement and to come up with a rate, frankly, that simply would not do it.

The net effect, I think, would be to thwart the hospice movement. First, it would stop many facilities from taking in this type of patient. Second, in my judgment, it would force that patient back into the hospital unnecessarily, break up the family unit, cause that family to incur excessive expense and I think create a situation that both lacked dignity and contributed cost to the taxpayer.

This legislation today is designed to correct that inequity. I think it is a step in the right direction both for dignity and for a cost-efficent approach to the taxpayer. We ought to approve this legislation and approve it now.

Mr. JACOBS. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. PANETTA), one of the two principal architects, the other being the gentleman from Ohio (Mr. GRADISON).

Mr. PANETTA. Mr. Speaker, I rise in strong support of H.R. 3677. It was introduced by myself and my colleague from Ohio (Mr. GRADISON) to try to establish a reasonable cap for the hospice care reimbursement program. And more importantly, to try to deal with a technical problem that arose in the development of the regulations implementing this legislation.

This legislation is in truth a technical correction and has no budgetary impact. That fact is substantiated by the Congressional Budget Office.

As many know, and as has been stated here, the Department of Health and Human Services is in the process of developing regulations now to implement medicare hospice benefits, which were included in the Tax Equity and Fiscal Responsibility Act of 1982.

At that time, the legislation was overwhelmingly supported on both the House side and the Senate side. There were something like 242 cosponsors of that legislation in the House and 68 cosponsors in the Senate. It was broadly supported.

The purpose of that care is to provide a humanitarian and compassionate form of care to be made available to terminally ill patients and their family members.

With the election of hospice care, coverage is provided for the patient for home care, for counseling, for pain relieving drugs, for medical supplies.

□ 1340

It is an alternate form of care that many people have chosen over the last few years. Respite care is made available under this program to reduce the stress imposed on family members during this period of ordeal. Moreover, the substitution of hospice care in lieu of acute care treatment can provide measureable cost savings to the medicare program. This kind of program makes a great deal of sense from the health point of view, from the humanitarian point of view and from a cost point of view.

In the hospice legislation as introduced, a formula was developed at that time to provide for a set amount that would be distributed based on a per capita medicare cost for the last 6 months of life for cancer patients. Relying on data from the Congressional Budget Office, it was projected that this cost would be near $19,000 and, therefore, the formula in the original legislation provided for 75 percent of that per capita cost which would have

provided about $14,600 in 1983. Additional information at the time showed that the per patient cost for hospice care was somewhere between $6,000 and $7,000. Therefore, in lieu of that, changes were made to provide a cap figure that would be more in keeping with the actual costs, and so the formula was developed on the basis of 40 percent of the base amount, leaving a reimbursement amount of $7,600.

Unfortunately, since the passage of TEFRA last year, it was recognized that errors were made in the calculations by CBO. The primary error was the fact that the per capita cost was not $19,000. The result was that using the formula in the bill, the reimbursement would have been $4,200 instead of $7,600, which would have made the program almost inaccessible for those that sought coverage by medicare.

This legislation, then, today is based on the most recent information we have relating to per patient costs. It establishes a cap of $6,500 and uses, as I said, the most current data we have in establishing that fixed amount.

The hospice program, if these regulations are published, is due to begin operating on November 1 of this year. Unfortunately, regulations have yet to be published by HHS. By resolving this cap issue, there is really no reason why the regulations should not come forward very soon. There are other concerns involving the proposed regulations. It is important for participants to have a reasonable opportunity to review these regulations and to comment on them so that the program can go into effect by November 1. This legislation is an important step in that direction.

Mr. Speaker, I want to express my thanks to my colleague, the gentleman from Ohio (Mr. GRADISON) for his help in this legislation and the chairman of the committee and the members of the full Ways and Means Committee for their help in expediting this legislation to the floor. I urge Members to support it.

Mr. JACOBS. Mr. Speaker, I yield such time as he may consume to the astonishingly and superlatively intelligent gentleman from California (Mr. MATSUI).

Mr. MATSUI. I thank the gentleman from Indiana for yielding me this time.

Mr. Speaker, I rise in support of H.R. 3677. Without the timely enactment of legislation, the national hospice program in general, and the Sacramento hospice community specifically, will be unable to render care to this country's terminally ill medicare patients. The Congress must move expeditiously to cure a technical problem which may deny the provision of humane and cost-effective hospice services to such patients commencing November 1, 1983.

When the Ways and Means Committee approved legislation last year authorizing medicare reimbursement for hospice services, it intended the cap on reimbursement to equal approximately $7,600. The Congressional Budget Office, in an unfortunate miscalculation, supplied the committee with erroneous figures which resulted in a statutory formula that produced a reimbursement limit of $4,322. I fear that this lower rate will discourage medicare patients from choosing to participate in a hospice program and cause them to elect more traditional types of treatment.

With respect to the hospice community in Sacramento, I believe that without a revision of the present cap on hospice reimbursement, the Sutter Hospitals' model homemaker assistance program's participation in medicare may well be jeopardized. This innovative project allows cancer patients to remain in their homes, as homemakers perform vital personal care, meal preparation, light housework, shopping, child care, and companionship tasks. Without the availability of these services, many cancer patients are forced to seek costly inpatient hospital care.

To demonstrate the cost savings of hospice treatment as opposed to inpatient hospital care, I would like to share some estimates prepared by Sacramento's Sutter Hospitals. Hospice services for a 7-day period, including homemaker services, cost about $600 a week. A comparable stay in a hospital would cost nearly $1,600, and that figure does not include costs for acute treatment. Given that a terminally ill patient receives hospice treatment from between 55 and 75 days, a $6,500 cap would cover adequately the majority of expenses a patient would incur. H.R. 3677 specifies such a cap.

In conclusion, I urge my colleagues to address this problem as expeditiously as possible by passing today H.R. 3677. This curative legislation will raise the present reimbursement level to the $6,500 level. It is proper that we do such.

Mr. Speaker, I would also like to commend both the gentleman from California (Mr. PANETTA) and the gentleman from Ohio (Mr. GRADISON) for their fine work in originating this legislation and also in moving expeditiously to raise the cap.

Mr. JACOBS. Mr. Speaker, this bill can be properly classified as a technical correction to legislation already overwhelmingly passed by both Houses of Congress and signed by the President.

Mr. Speaker, we have no further requests for time on this side.

Mr. GRADISON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first I want to pay tribute to the gentleman from California (Mr. PANETTA) for his leadership and his persistence on this important issue.

I would like to restate emphatically my own commitment to the timely and equitable implementation of the medicare hospice benefit enacted last year as section 122 of the Tax Equity and Fiscal Responsibility Act.

H.R. 3677, the bill now before us, would make an important technical correction in the hospice statute by establishing the cap amount allowable for reimbursement of hospices under the medicare program.

Mr. Speaker, a few weeks ago I learned that the statutory formula for calculating the cap amount for the hospice benefit would produce an unanticipated payment limit of about $4,200. This was an error made by the Congress itself and had the effect of setting a cap approximately $3,000 below the level envisioned at the time of enactment. The $4,200 cap amount is simply not adequate to provide the necessary quality of care to terminally ill medicare hospice patients.

H.R. 3677 sets the cap amount at $6,500. While this amount is somewhat below the amount originally intended, I have been advised that it is adequate to allow hospice programs to deliver the high standard of care we envisioned.

In view of the rapidly approaching date for implementation of the hospice reimbursement benefit under medicare, it is imperative that Congress expedite this necessary corrective measure. Although the statute is to be implemented on November 1, no regulations have yet been issued. Correction of the cap problem should remove the last barrier to prompt issuance of the regulations.

Terminally ill medicare patients deserve no less than to have the option of selecting this innovative, comprehensive, compassionate alternative to traditional care.

I urge my colleagues to support H.R. 3677.

Mr. Speaker, I yield such time as he may consume to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Speaker, I rise in strong support of H.R. 3677, a bill to amend the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program.

The hospice movement is a relatively new one in this country. But it has not taken long for it to demonstrate to us that it is a humane and less costly alternative to traditional care for the terminally ill.

It was with this in mind that Congress enacted within the Tax Equity and Fiscal Responsibility Act of last year a provision authorizing reimbursement for hospice care provided

to terminally ill patients covered by medicare.

As I have stated, the hospice movement is relatively young in this country. The administration correctly pointed out that we did not have a great deal of data on the subject.

Recognizing this, reimbursements for hospice care were capped at 40 percent of the average amount medicare pays in the last 6 months of life for a terminally ill cancer patient. In setting this figure, the Congress and the Ways and Means Committee relied on Congressional Budget Office estimates. These estimates resulted in a cap in excess of $7,000 per beneficiary.

The Health Care Financing Administration, in drawing up its regulations and reimbursement levels, arrived at a much lower reimbursement level, just over $4,000. Clearly, this level is inadequate to adequately reimburse hospices for their expenses and undermines congressional intent in the passage of this legislation.

The bill before us would set the reimbursement level at $6,500, indexed to the medical care component of the Consumer Price Index. This figure is far closer to the level intended than that arrived at by HCFA. As such, it will do far more to promote hospice care as an ethically and economically sound alternative.

I urge my colleagues to carry out the intent of the hospice provision of TEFRA, and to give their full support to H.R. 3677.

Mr. DAUB. Mr. Speaker, I commend the gentleman from California (Mr. PANETTA) for his leadership on the issue of hospice care. I cosponsored his legislation last year to provide coverage under the medicare program for hospice care which was included in the Tax Equity and Fiscal Responsibility Act of 1982. I rise today in support of this measure, H.R. 3677, to raise the cap on medicare reimbursement for hospice care from $4,200 to $6,500.

It was the intent of Congress upon enactment of the hospice provision to reimburse 40 percent of the estimate of current medicare costs in the last 6 months of life according to the Congressional Budget Office estimate of this cost. However, in drafting the regulations, the Department of Health and Human Services used a figure well below the figure Congress anticipated.

The purpose of hospice care is to allow the terminally ill the care needed to make their last days of life as comfortable as possible. Not only is home health care for the terminally ill less expensive than institutional care, but I believe that it is more humane. As I have stated before, health care in the home should not be seen as an alternative to nursing home or other institutional care, but rather institutional care should be seen as the last alternative to home health care.

I urge my colleagues to support H.R. 3677. We must show our support for hospice care, including this measure for adequate medicare reimbursement for this care. Without this adequate reimbursement, the future of the hospice program is in jeopardy.

● Mr. BIAGGI. Mr. Speaker, I am pleased to rise in support of H.R. 3677 legislation to reestablish the intent of Congress relative to the rate of reimbursement under medicare for hospice care services.

Last year about this time we enacted the landmark TEFRA law. Included as one of its many provisions was a first time reimbursement under medicare for services provided to the terminally ill in hospice centers. As an original member of the House Select Committee on Aging and a cosponsor of legislation to provide for such medicare coverage, I was pleased at the passage of this new law.

When Congress adopted this provision, it was determined that the reimbursement rate would be developed under a formula which would be based on the average medicare expenditures for the care of cancer patients in their last 6 months of life. It was clearly the intent of Congress that the cap on this reimbursement would be in the vicinity of $7,000.

Earlier this year, the administration during their preliminary regulatory work on the hospice provision made a determination that the reimbursement rate would be closer to $4,200. This represented a basic betrayal of the commitment of Congress to the hospice program and immediately the House Select Committee on Aging conducted a hearing in protest over this cruel and arbitrarily low level of reimbursement.

The legislation before us would specify that the cap on medicare reimbursement for hospice care be set at $6,500 per patient and indexed to rise along with the medicare care component of the consumer price index. This legislation recognizes fault both in the original intent of Congress as being too high—but also in the administrations levels which were far too low. It provides a realistic and compassionate level of reimbursement which will allow for hospice care services to continue.

As the New York State Hospice Association pointed out in a recent letter to me.

> Without adequate reimbursement one of two things will happen. Either patients will remain in the acute care system thus producing no savings for the Medicare system and continuing in appropriate care for patients—or hospices will be bankrupt.

For anyone who knows the value of hospices not only to the patient but to their families and friends the issue should be clear and the logic for support of this legislation compelling. It would allow us to act before the administration takes steps to further weaken the medicare program. The inclusion of the hospice language in TEFRA was one of Congress' most compassionate and enlightened moments. Passage of this bill is vital for us to honor or commitment to those of our fellow Americans who need and deserve hospice care.●

● Mr. ROYBAL. Mr. Speaker, I strongly support H.R. 3677, a bill introduced by my distinguished colleagues Mr. PANETTA and Mr. GRADISON to revise the cap amount on medicare reimbursement for hospice care.

Hospice care is a vital and humane service designed to ease the pain and suffering for terminally ill patients and their families. When Congress enacted legislation to allow medicare reimbursement for hospice care, however, it sought not only to provide assistance to the dying but also established reasonable limits on such reimbursements to insure that they do not jeopardize the future solvency of the medicare trust funds. Thus, a cap amount was established on the average hospice reimbursement.

Unfortunately, the data provided to Congress were faulty so that when the administration developed draft regulations to implement the new hospice provision it derived a cap amount far too low to cover the reasonable costs of hospice care. H.R. 3677 corrects that problem by establishing a cap of $6,500 to be indexed annually according to increases in the medicare expenditure category of the Consumer Price Index.

As chairman of the Select Committee on Aging, I commend Mr. PANETTA, Mr. GRADISON, and the members of the Ways and Means Committee for their prompt attention to this important subject. The medicare hospice provision is scheduled to go into effect on November 1, 1983. With this important change in the cap amount, hospices will be able to provide the high quality care intended by Congress.

Revising the cap is a necessary step, but it does not alter other proposed regulations now under consideration by HHS Secretary Heckler. Testimony presented to the Aging Committee repeatedly demonstrated that portions of these proposed regulations would seriously hinder hospice care. For example, the administration had considered a daily reimbursement rate for inpatient hospice care that was far too low. Similarly, the administration's preliminary interpretation of the 80/20 requirement established by Congress—80 percent of hospice care is expected to be in the home with no more than 20 percent inpatient care—was considered to be punitive to the point of being detrimental to well intentioned and well run hospices.

I am hopeful that these problems will be corrected before the regula-

tions are published to avoid the need for corrective legislation. In the meantime, I urge all of my colleagues in the House to vote for H.R. 3677.●

● Mr. VANDERGRIFF. Mr. Speaker, earlier this year, I was very disturbed to learn that the draft regulations by the Health Care Financing Administration set the cap on medicare reimbursement for hospice care at $4,332—almost 45 percent less than Congress had intended when it enacted TEFRA. My awareness was heightened in June when I chaired an Aging Committee field hearing in my district. I listened to individuals who have had personal experience with hospices—whose loved ones had spent their last days attended by caring professionals, and who, themselves, had been counseled and consoled after their loss. I also heard from those committed professionals; I visited one of the hospices in my district. Most importantly, I talked with hospice patients themselves and was inspired by their praise of the concept which was meaning so much to them in their days.

It was due to my steadfast commitment to the kind of quality care provided by hospices that I felt compelled to introduce legislation to raise the medicare cap, and did so on June 20. My bill and Mr. PANETTA's bill, H.R. 3677, should pass today by the House, are identifical. Mr. PANETTA's original plan was to include a provision for hospice reimbursement in another health care bill. I commend him for concluding that our thought of hospice legislation standing on its own merits was best.

I should like to reiterate that hospices are both good medicine and good economics. It is essential to the cost saving potential, however, that hospice care be regarded as a comprehensive alternative to conventional care for the terminally ill patient. This can only be accomplished if the medicare reimbursement is reasonable. I believe that a cap of $6,500 is both reasonable and absolutely necessary if we are to give medicare recipients the option of choosing hospice care.

I applaud the passage of this measure, and I salute my colleagues who saw merit in this vital proposal.●

● Mr. HOYER. Mr. Speaker, I would like to take this opportunity to support H.R. 3677, a bill which increases the amount allowable for reimbursement for hospice care under the medicare program. This bill raises the current ceiling from $4,332 to $6,500, an amount much closer to the one originally intended by the 97th Congress when it overwhelmingly approved extending medicare coverage to hospice care.

Hospice care provides an alternative to traditional care for terminally ill patients. Designed to deal with the special needs of the terminally ill and their families, hospices employ a team of professionals and nonprofessionals, volunteers and paid staff. These staff members attempt to develop a plan of care to provide for the physical, psychological, and spiritual needs of both the patient and family.

In order to ease the physical needs of the patients, for example, hospices emphasize palliative care: The hospice provides medical relief for pain, and attempts to treat the symptoms instead of trying to control the disease. Hospices also encourage the patient to receive treatment in the home, fostering patient interaction with the family, an important component of hospice care.

Last February, while attending a lecture entitled "Hospice Care: Present Challenges and Opportunities," given by Dr. Daniel C. Hadlock, medical director of Hospice, Inc., I learned of the numerous benefits for receiving treatment in a hospice, not only for the patient but for the attending personnel as well. Hospice care requires interdisciplinary teamwork from the physicians, nurses, social workers, volunteers, and clergy which, in turn, inspires an exchange of professional skills and personal ideas in order to provide the most appropriate care for the patient and the family. The extensive use of volunteers allows the hospices to provide services that would otherwise be too costly. As a result, hospices have higher staff ratios than nursing homes. All of these features of hospice care are certainly responsible for the tenfold increase in the number of hospices from 1978 to 1981.

Aside from the question of reducing health care costs, hospice care is an increasingly viable and humane alternative for the terminally ill. I believe that by raising the level of funding allowed under the medicare program, we will make this option available to more Americans. I urge my colleagues to support this bill.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 3677.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

□ 1350

GENERAL LEAVE

Mr. JACOBS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks with respect to the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

GENERAL LEAVE

Mr. FRENZEL. Mr. Speaker, I ask unanimous consent that all Members may have leave to revise and extend their remarks on House Resolutions 256, 257, and 258 which were brought up for consideration earlier today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

□ 1350

AUTHORIZING THE SMITHSONIAN INSTITUTION TO PURCHASE LAND IN SANTA CRUZ COUNTY, ARIZ.

Mr. HAWKINS. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 930) to authorize the Smithsonian Institution to purchase land in Santa Cruz County, Ariz.

The Clerk read the Senate bill, as follows:

S. 930

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Smithsonian Institution is authorized to purchase land in Santa Cruz County, Arizona, for the permanent headquarters of the Fred Lawrence Whipple Observatory.

SEC. 2. Effective October 1, 1984, there is authorized to be appropriated $150,000 to carry out the purposes of this Act.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. HAWKINS) will be recognized for 20 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. HAWKINS).

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate bill now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Senate 930 provides for the authorization of the Smithsonian Institution to purchase land in Santa Cruz County, Ariz.

Senate 930 passed the Senate on May 25, 1983, and was referred to the Committee on House Administration. In a meeting on July 26, 1983, the committee favorably reported S. 930 by unanimous voice vote. House Report 98-330 was filed to accompany the bill S. 930.

The purpose of the bill is to authorize the Smithsonian Institution to purchase 4 acres of land which it has been

leasing and using as a base camp so that permanent headquarter facilities can be constructed for the Whipple Observatory which is maintained and operated by the Smithsonian on Mount Hopkins, near Amado, Ariz., in Santa Cruz County. The bill authorizes the appropriation of $150,000 for the purchase of land.

The Whipple Observatory, an astronomy research site, occupies 4,744 acres leased from the U.S. Forest Service. For the past 13 years the Smithsonian has leased 4 acres of land at the foot of Mount Hopkins as a base camp and staging area for research activities on the mountain. On the property is a one-level school building and residence which have been converted to office use; a small, informal visitors' center; and various automotive service, repair, and storage buildings.

Increased interest and use of the Observatory has resulted in a growing demand for access to the Observatory and expanded facilities to serve the public. Current and projected needs of the Observatory necessitate a larger headquarters facility and leasehold improvement is not economical. Ownership of the land would allow for the planned and coordinated development of permanent facilities that would be cost-efficient. Acquisition of the acreage is estimated to be $150,000, which is authorized to be appropriated in S. 930. If approved, the funding for the acquisition of land will be sought in the Smithsonian's fiscal year 1985 budget request. The actual plans and construction of the permanent headquarters, estimated to cost $3 million, would be referred to the House Committee on Public Works and Transportation in fiscal year 1986.

This is a reasonable request. I urge favorable consideration of S. 930.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the subject bill is as described by the chairman. It was passed unanimously by the committee. It is favored by the administration. It is only an authorization, not an appropriation.

I urge immediate acceptance of the bill, and I yield back the balance of my time.

● Mr. BOLAND. Mr. Speaker, I support S. 930 and urge its adoption by the House.

S. 930 would authorize the Smithsonian Institution to purchase land in Arizona for the construction of a permanent headquarters for the Fred L. Whipple Observatory. The research activities of the Whipple Observatory are conducted on property leased from the U.S. Forest Service. The headquarters of the Observatory, however, is located on land which is leased from the Tubac, Ariz., school district. While the lease arrangement has been generally satisfactory, it does not provide sufficient flexibility to allow the Observatory's headquarters to expand to meet its current and projected needs. Purchase of the property by the Smithsonian will allow an orderly expansion of the headquarters facility and other improvements necessary to accommodate the demands of an increasing number of visitors.

Mr. Speaker, S. 930 is sound legislation from both a management and budgetary standpoint. It deserves the support of the House.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. HAWKINS) that the House suspend the rules and pass the Senate bill, S. 930.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the Senate bill was passed.

A motion to reconsider was laid on the table.

AUTHORIZING A BUST OF CARL HAYDEN TO BE PLACED IN THE CAPITOL

Mr. HAWKINS. Mr. Speaker, I move to suspend the rules and concur in the Senate concurrent resolution (S. Con. Res. 7) to authorize and provide for a bust of Carl Hayden to be placed in the Capitol.

The Clerk read as follows:

S. CON. RES. 7

Resolved by the Senate (the House of Representatives concurring), That in honor of Carl Hayden, who served in the United States Congress longer than any other man in history, the Joint Committee on the Library (hereinafter referred to as the "Joint Committee") is authorized and directed to provide for the design and sculpture of a bronze or marble bust of Carl Hayden. The Joint Committee is further authorized and directed to accept such bust on behalf of the Senate and to cause such bust to be placed in an appropriate location within the Senate wing of the Capitol or any of the Senate Office Buildings, or any room, space, or corridor thereof.

SEC. 2. (a) The Joint Committee is authorized to solicit and accept gifts of property, real or personal, or services to carry out the provisions of this resolution. After January 3, 1985 the Joint Committee shall not solicit or accept any such gifts, and shall expend or use all such gifts before expending any moneys provided for in subsection (b).

(b) Expenses incurred by the Joint Committee in carrying out the provisions of this resolution, which shall not exceed $10,000, shall be paid out of the contingent fund of the Senate on vouchers approved by the Chairman of the Joint Committee.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. HAWKINS) will be recognized for 20 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. HAWKINS).

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate concurrent resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Senate Concurrent Resolution 7 authorizes a bust of the late Carl Hayden to be placed in the U.S. Capitol.

Senate Concurrent Resolution 7 passed the Senate on May 25, 1983, and was referred to the Committee on House Administration. In a meeting of July 26, 1983, the committee favorably reported Senate Concurrent Resolution 7 by unanimous voice vote. House Report 98-331 has been filed to accompany Senate Concurrent Resolution 7.

The purpose of the concurrent resolution is to authorize and direct the Joint Committee on the Library to provide for a bust of Carl Hayden and to cause such bust to be placed in an appropriate location within the Senate wing of the Capitol or any of the Senate Office Buildings. The expenses incurred by the Joint Committee shall not exceed $10,000 and shall be paid out of the contingent fund of the Senate. The Joint Committee is authorized to solicit and accept gifts of property or services to carry out the provisions of the resolution, which are to be expended before expending any moneys provided for through the Senate contingent fund.

Those of us who had the opportunity to work with or observe the late Carl Hayden experienced a truly historic figure. Senator Hayden was a remarkable public servant who served the people of Arizona and the Nation for 57 consecutive years, longer than any other man in the history of the U.S. Congress. His legislative career began in 1912 when then-Representative Hayden came to Washington in the 62d Congress as the first Representative from the new State of Arizona. After serving in the House for 15 years Hayden was elected to the Senate where he served for 42 years.

Senator Hayden was a quiet, diligent, hard-working public servant who never lost touch with the common man. With the passing of Carl Hayden in January 1972 passed a chapter of our rich national history.

The Committee on House Administration concurs with our Senate colleagues that it is fitting to honor and recognize the accomplishment and contributions of this great man.

I urge passage of this concurrent resolution.

Mr. FRENZEL. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Arizona (Mr. STUMP).

Mr. STUMP. Mr. Speaker, as the prime sponsor of the House resolution to honor the late U.S. Senator Carl Hayden by authorizing the placement of his bust in the U.S. Capitol, it is my privilege to support this resolution sponsored by Senators GOLDWATER, DECONCINI, and MATHIAS.

Senator Hayden's history of service to his community, his State and our country as an elected official began in 1902 as a member of the Tempe town council, and continued without interruption until he retired from the U.S. Senate on January 3, 1969. In 1912, when Arizona became a State, Carl Hayden was elected our first Congressman, and in 1926 he was elected to the U.S. Senate. His 57 consecutive years in this Congress is a record unlikely to be challenged.

During that service, which spans the growth of our country from horse drawn wagon to man landing on the moon, his legislative accomplishments literally changed the face of this country and his native Arizona with highways, airports, reclamation projects, and parks.

Among his greatest triumphs were the central Arizona project, which will insure water for Arizona's future, the GI bill, which brought a college education and homeownership to millions of American service men and women, and the establishment of the Interstate Highway System.

Senator Hayden had an incredible capacity for hard work, most often done behind the scenes. This was much to the consternation of his political advisers, who told him that he ought to seek more publicity. His reply is a classic. He told those advisers, "There are two types of Members of Congress—show horses and work horses. I endeavor to be a work horse."

Carl Hayden's kindness and consideration are legendary. He found some good in everyone. His word was his bond. He was a man of great personal courage dedicated to the truth. These characteristics were totally employed for the people he was elected to serve.

He was fond of telling that when he was first elected to Congress he personally knew every registered voter in the State and one of his regrets at his retirement was that that was no longer possible. He treasured those contacts with his constituents.

Men like Carl Hayden, who quietly, honestly, and with strength offer service to their country and fellow man, are models for each of us and future generations to follow. It is with pride as an Arizonan and an American that I ask this Congress to honor him.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill is as described by the distinguished chairman. It was passed by the committee unanimously. It is not objected to by the administration.

Although it is a Senate resolution, Mr. Speaker, the House can take some comfort in the fact that Representative and Senator Hayden began his career in this body.

I urge the immediate passage of the resolution.

● Mr. UDALL. Mr. Chairman, I rise today to pay a brief tribute to a man who proudly and diligently served his Nation and home State of Arizona longer than any other man in our history—Senator Carl Hayden.

I am sure many of you will agree with me that his service in Congress, which spanned more than half a century, was legendary. Carl Hayden lived under 19 Presidents and was able to service under 10. I myself had the distinct pleasure of working with Mr. Hayden for 8 years. During that time, I was able to observe his keen dedication to the central Arizona water project, a task he undertook earnestly and ardently. Due in large part to his efforts, the central Arizona project is today a reality, a tribute to the man who initiated a project of great importance to Arizona's future.

This man, who in 1912 began his record term in Congress 10 years before I was born, served as a distinguished public servant. Working as a committee member, chairman, and President pro tempore, he exemplified the true Arizona spirit of pioneer dedication.

For these reasons, and many others, I find it most appropriate we authorize a marble bust sculpture of Carl Hayden to be placed in the Capitol.

This bill, will do credit to Congress and Arizona by placing a likeness of Carl Hayden in the Capitol with equally famous and prominent Americans.

Mr. Speaker, Carl Hayden in serve to remind us of virtues such as integrity and honesty. He was a modest man, not much given to making speeches or grabbing headlines. However, he remained a hard worker all his life.

On behalf of Arizona, I thank you for considering this tribute to an outstanding man—Carl Hayden. And I urge the adoption of Senate Concurrent Resolution 7.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. HAWKINS) that the House suspend the rules and concur in the Senate concurrent resolution, Senate Concurrent Resolution 7.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

APPOINTMENT OF CITIZEN REGENT OF THE SMITHSONIAN INSTITUTION

Mr. HAWKINS. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 297) providing for appointment of Jeannine Smith Clark as a citizen regent of the Board of Regents of the Smithsonian Institution.

The Clerk read as follows:

H.J. RES. 297

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress, caused by the death of Nancy Hanks of the District of Columbia on January 7, 1983, is filled by appointment of Jeannine Smith Clark of the District of Columbia for the statutory term of six years.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California, Mr. HAWKINS, will be recognized for 20 minutes, and the gentleman from Minnesota, Mr. FRENZEL, will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. HAWKINS).

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the joint resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 297 provides for the appointment of Mrs. Jeannine Smith Clark as a citizen regent of the Board of Regents of the Smithsonian Institution.

House Joint Resolution 297 was introduced on June 15, 1983, and was referred to the Committee on House Administration. In a meeting of July 26, 1983, the committee favorably reported House Joint Resolution 297 by unanimous voice vote. House Report 98-329 has been filed to accompany House Joint Resolution 297.

The purpose of the resolution is to fill the vacancy created on the Smithsonian's Board of Regents by the death of Nancy Hanks of the District of Columbia on January 7, 1983.

The Smithsonian Board of Regents is made up of 17 members, 9 of whom are so-called citizen regents. The citizen regents are noncongressional persons who have been nominated by the regents and are elected to the Board of Regents by passage of a joint resolution of Congress. Of the nine, two regents are designated to be residents of the District of Columbia. The citizen regents serve statutory 6-year

terms and their service is gratuitous except for necessary traveling and other expenses in attending meetings of the board.

The Smithsonian Board of Regents has unanimously nominated Mrs. Jeannine Smith Clark as citizen regent from the District of Columbia. Mrs. Clark, who was born and raised in the District of Columbia, is a graduate of Dunbar High School and received her undergraduate and master of arts degrees from Howard University. Mrs. Clark, the mother of three, is married to Dr. Charles H. Clark, associate professor of surgery at Howard University.

Mrs. Clark has had a rich and varied career in education and public service as a teacher, a full-time volunteer worker, a member of the D.C. Board of Elections and Ethics, and a consultant to the D.C. government and others on a variety of social and civic issues. This nomination to the Board of Regents is of particular interest because Mrs. Clark has been active at the Smithsonian for the last 15 years in a variety of volunteer roles, most notably as a docent in the Africa Hall at the Museum of Natural History, vice chairman of the Docent Advisory Council, and Chair of the Smithsonian Women's Committee.

The Smithsonian Board of Regents oversees a great national treasure whose activities reach into the life and pulse of the local community, which also happens to be the Nation's Capital. Mrs. Clark's active involvement in the community, her years of volunteer activity at the Smithsonian and elsewhere, and her background in education and civic affairs should provide an added dimension to the policy and planning arm of the Smithsonian Institution.

I urge favorable consideration of this nomination.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I agree with the description of House Joint Resolution 297 just given by the distinguished chairman of the committee.

I urge the appointment of Jeannine Smith Clark to the Smithsonian Board of Regents.

Mrs. Clark appeared before our full committee and impressed our committee. The vote was unanimous. Unfortunately, I was not able to be present, but I am told by our other committee members that she will be a splendid representative on the Board of Regents of the Smithsonian.

I urge speedy passage of this bill.

● Mr. BOLAND. Mr. Speaker, I strongly support House Joint Resolution 297 and urge my colleagues to give it their endorsement.

House Joint Resolution 297 would provide for the appointment of Jeannine Smith Clark as a citizen regent of the Smithsonian Institution. Mrs. Clark is a person of considerable accomplishment and ability. She has had a distinguished career as an educator in the District of Columbia and has been involved in a number of important civic, cultural, and charitable activities in the Washington area. Her service on the Board of the Smithsonian Institution National Associates has acquainted her with the work of the Smithsonian and has given her an opportunity to become familiar with the manner in which the Smithsonian operates.

Mr. Speaker, I am privileged to serve as one of the congressional members of the Smithsonian's Board of Regents. I believe that Mrs. Clark will be a valuable addition to the Board, and I look forward to working with her.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. HAWKINS) that the House suspend the rules and pass the joint resolution, House Joint Resolution 297.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the joint resolution was passed.

A motion to reconsider was laid on the table.

□ 1400

CODIFYING RECENT LAWS RELATED TO MONEY AND FINANCE

Mr. EDWARDS of California. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2727), to codify without substantive change recent laws related to money and finance and transportation and to improve the United States Code, as amended.

The Clerk read as follows:

H.R. 2727

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

AMENDMENTS TO TITLE 31

SECTION 1. Title 31, United States Code, is amended as follows:

(1) The first sentence of section 755 is amended to read as follows: "A final decision under section 753(a)(1)-(3), (6), or (7) of this title may be reviewed by the United States Court of Appeals for the District of Columbia Circuit or by the court of appeals of the United States for the circuit in which the petitioner resides.".

(2) Section 1535 is amended by—

(A) inserting in subsection (a)(3) "or get by contract" after "provide";

(B) inserting in subsection (a)(4) "by contract" after "provided";

(C) striking out subsection (b);

(D) redesignating subsection (c) as subsection (b); and

(E) inserting after subsection (b) (as redesignated) the following:

"(c) A condition or limitation applicable to amounts for procurement of an agency or unit placing an order or making a contract under this section applies to the placing of the order or the making of the contract.".

(3) Section 3322 is amended by—

(A) redesignating subsection (b) as subsection (c); and

(B) striking out subsection (a) and substituting the following:

"(a) The Secretary of the Treasury shall transfer public money to a disbursing official only by draft or warrant written on the Treasury. Except as provided in subsection (b) of this section, a disbursing official shall—

"(1) deposit public money as required by section 3302 of this title; and

"(2) draw public money from the Treasury or a depositary only—

"(A) as necessary to make payments; and

"(B) payable to persons to whom payment is to be made.

"(b) In a place without a depositary, the Secretary, on deciding it is essential to the public interest, may authorize specifically in writing that public money be—

"(1) deposited in any other public depositary; or

"(2) kept in another manner under regulations the Secretary decides are the safest and most effective in making a payment to a public creditor easier.".

(4) Section 3528(b) is amended by—

(A) inserting "(1)" after "(b)";

(B) striking out "(1)" before "the certification" and substituting "(A)";

(C) striking out "(2)(A)" and substituting "(B)(i)";

(D) striking out "(B)" before "no law" and substituting "(ii)";

(E) striking out "(C)" and substituting "(iii)"; and

(F) adding at the end the following:

"(2) The Comptroller General may deny relief when the Comptroller General decides the head of the agency did not carry out diligently collection action under procedures prescribed by the Comptroller General.".

(5) In section 3711(c)(2), strike out "(49 U.S.C. 26(h))" and substitute "(49 App. U.S.C. 26(h))".

(6) Section 3902(b) is amended—

(A) in clause (1), by striking out "3903(2)(A)" and substituting "3903(2)"; and

(B) in clause (2), by striking out "3903(2)(B)" and substituting "3903(3)".

(7) Section 5132(a)(1) is amended by striking out the last sentence.

(8) Section 6716(c)(1) is amended by striking out "Subsection" and substituting "Subsections".

AMENDMENTS TO TITLE 49

SEC. 2. Title 49, United States Code, is amended as follows:

(1)(A) Section 308 is amended—

(i) in the catchline, by striking out "Annual reports" and substituting "Reports";

(ii) in subsection (a), by striking out the last sentence; and

(iii) by adding at the end the following:

"(d) By the 90th day after the end of fiscal year, the Secretary shall submit to Congress a report listing the specific assistance provided by the United States Government to the railroad industry during that fiscal year. The report shall include—

"(1) the reasons for each Government loan or grant and explain the way in which the loan or grant contributed to the overall goal of providing a safe and efficient transportation system;

"(2) information on the financial condition of each railroad having a loan guaranteed under the Emergency Rail Services Act of 1970 (45 U.S.C. 661 et seq.) throughout the duration of the loan; and

"(3) information on the past and anticipated financial condition and operations during the fiscal year of the Railroad Rehabilitation and Improvement Fund established under section 502(a) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822(a)) and of the Obligation Guarantee Fund established under section 511(b) of that Act (45 U.S.C. 831(b)).

"(e)(1) The Secretary shall submit a report to Congress in January of each even-numbered year of estimates by the Secretary on the current performance and condition of public mass transportation systems with recommendations for necessary administrative or legislative changes.

"(2) In reporting to Congress under this subsection, the Secretary shall prepare a complete assessment of public transportation facilities in the United States. The Secretary also shall assess future needs for those facilities and estimate future capital requirements and operation and maintenance requirements for one-year, 5-year, and 10-year periods at specified levels of service.".

(B) Item 308 in the analysis of chapter 3 is amended to read as follows:

"308. Reports.".

(2) In sections 103(c)(1), 106 (g)(1) and (h), 302(b), 321, 329 (b)(1) and (d), 334, and 501(b)(2), strike out "49 U.S.C." wherever it appears and substitute "49 App. U.S.C.".

(3) In section 306(b), strike out "332" and "49 U.S.C." and substitute "332 or 333" and "49 App. U.S.C.", respectively.

(4) In sections 10904 (d)(2) and (e)(3) and 11344(d), strike out "section 5(a)-(d) of the Department of Transportation Act (49 U.S.C. 1654(a)-(d))" and substitute "section 333(a)-(d) of this title".

(5) In section 10362(a)(1), strike out "section 744 of title 45" and substitute "section 304 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 744)".

(6) In section 10362(b)(5)(A), strike out "section 562(a) of title 45" and substitute "section 402(a) of the Rail Passenger Service Act (45 U.S.C. 562(a))".

(7) In section 10362(b)(5)(B), strike out "section 1613 of this title" and substitute "section 17 of the Urban Mass Transportation Act of 1964 (49 App. U.S.C. 1613)".

(8) In section 10526(a)(5), strike out "section 1141j(a) of title 12" and substitute "section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a))".

(9) In section 10542(a)(2), strike out "chapter 23A of title 46" and substitute "the Intercoastal Shipping Act, 1933 (46 U.S.C. 843 et seq.)".

(10) In section 10542(c)(2), strike out "section 391a of title 46" and substitute "section 4417a of the Revised Statutes (46 U.S.C. 391a)".

(11) In sections 10544(d)(1)(B) and 10703(a)(4)(D)(ii), strike out "(46 U.S.C. 843-848)" and substitute "(46 U.S.C. 843 et seq.)".

(12) In section 10706(c), strike out "section 12 of title 15" and substitute "the first section of the Clayton Act (15 U.S.C. 12)".

(13) In section 10749(b)(2), strike out "chapter 20 of this title" and substitute "the Federal Aviation Act of 1958 (49 App. U.S.C. 1301 et seq.)".

(14) In section 10903(b)(2), strike out "section 565(b) of title 45" and substitute "section 405(b) of the Rail Passenger Service Act (45 U.S.C. 565(b))".

(15) In section 11125(b)(2)(A), strike out "section 421 of title 45" and substitute "the Federal Railroad Safety Act of 1970 (45 U.S.C. 431 et seq.)".

(16) In section 11347, strike out "section 565 of title 45" and substitute "section 405 of the Rail Passenger Service Act (45 U.S.C. 565)".

(17) Section 11361(b), is amended by striking out "subchapter IV" and substituting "subchapter IV of chapter 11".

(18) In section 11367(a), strike out "Section 78n(a) of title 15" and substitute "Section 14(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78n(a))".

(19) In section 11367(b), strike out—

(A) "section 77c(a)(6) of title 15" the first time it appears and substitute "section 3(a)(6) of the Securities Act of 1933 (15 U.S.C. 77c(a)(6))";

(B) "section 77c(a)(6) of title 15" the 2d time it appears and substitute "section 3(a)(6)";

(C) "Section 77e of that title" and substitute "Section 5 of that Act (15 U.S.C. 77e)"; and

(D) "subchapter I of chapter 2A of title 15" and substitute "that Act (15 U.S.C. 77a et seq.)".

(20) In sections 11909(b) and 11914(b), strike out "prior to enactment of the Department of Transportation Act" and substitute "before October 15, 1966".

CONFORMING AMENDMENTS TO OTHER TITLES

SEC. 3. (a) Title 5, United States Code, is amended as follows:

(1) In section 5313, strike out "Director of the Bureau of the Budget" and substitute "Director of the Office of Management and Budget".

(2) In section 5314, strike out "Deputy Director of the Bureau of the Budget" and substitute "Deputy Director of the Office of Management and Budget".

(3) In section 5315, strike out "Assistant Directors of the Bureau of the Budget (3)" and substitute "Assistant Directors of the Office of Management and Budget (3)".

(4) In section 5514(c), strike out "section 581d" and substitute "section 3530(d)".

(5) In section 8348(d), strike out "the Second Liberty Bond Act as amended," and substitute "chapter 31 of title 31".

(b) Title 18, United States Code, is amended as follows:

(1) In section 490, strike out "minor coins coined" and substitute "one-cent and 5-cent coins minted".

(2) In section 4124, strike out "Director of the Bureau of the Budget" and substitute "President".

(c) The Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) is amended as follows:

(1) In section 7448(p), strike out "Bureau of the Budget" and substitute "President".

(2) In section 7701(a)(33)(G), strike out "part I of the Interstate Commerce Act" and substitute "subchapter I of chapter 105 of title 49".

(d) Chapter 11 of title 44, United States Code, is amended as follows:

(1) Amend item 1108 in the analysis of chapter 11 to read as follows:

"1108. Presidential approval required for printing of periodicals; number printed; sale to public."

(2) In the catchline of section 1108, strike out "Bureau of Budget" and substitute "Presidential".

(3) In the text of section 1108, strike out "Director of the Bureau of the Budget" and substitute "President".

TECHNICAL PROVISIONS

SEC. 4(a)(1) Except as provided in paragraph (2) of this subsection, the amendment made by section 1(9) of the Act of January 12, 1983 (Public Law 97-452, 96 Stat. 2468), applies to an obligation issued under section 3102(a) of title 31, United States Code, after September 3, 1982.

(2) The amendment made by section 1(9) of the Act of January 12, 1983 (Public Law 97-452, 96 Stat. 2468), applies to an obligation issued after June 30, 1983, if—

(A) interest on the obligation is exempt from tax (decided without regard to the amendments made by section 310 of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248, 96 Stat. 595)) under law (without regard to the identity of the holder); and

(B) the obligation was not required to be in registered form under the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) as in effect on September 2, 1982.

(b) The amendment made by section 1(9) of the Act of January 12, 1983 (Public Law 97-452, 96 Stat. 2468), applies to an obligation issued under section 3103(a) of title 31, United States Code, after December 31, 1982.

(c) The amendments made by sections 1 (3), (4), and (7) and 3(b)(1) of this Act are effective as of September 13, 1982.

LEGISLATIVE PURPOSE AND CONSTRUCTION

SEC. 5. (a) Sections 1-4 of this Act restate, without substantive change, laws enacted before April 1, 1983, that were replaced by those sections. Sections 1-4 may not be construed as making a substantive change in the laws replaced. Laws enacted after March 31, 1983, that are inconsistent with this Act supersede this Act to the extent of the inconsistency.

(b) A reference to a law replaced by sections 1-4 of this Act, including a reference in a regulation, order, or other law, is deemed to refer to the corresponding provision enacted by this Act.

(c) An order, rule, or regulation in effect under a law replaced by sections 1-4 of this Act continues in effect under the corresponding provision enacted by this Act until repealed, amended, or superseded.

(d) An action taken or an offense committed under a law replaced by sections 1-4 of this Act is deemed to have been taken or committed under the corresponding provision enacted by this Act.

(e) An inference of a legislative construction is not to be drawn by reason of the location in the United State Code of a provision enacted by this Act or by reason of the caption or catchline of the provision.

(f) If a provision enacted by this Act is held invalid, all valid provisions that are severable from the invalid provision remain in effect. If a provision of this Act is held invalid in any of its applications, the provision remains valid for all valid applications that are severable from any of the invalid applications.

REPEALS

SEC. 6. (a) The repeal of a law enacted by this Act may not be construed as a legislative inference that the provision was or not in effect before its appeal.

(b) The laws specified in the following schedule are repealed, except for rights and duties that matured, penalties that were incurred, and proceedings that were begun before the date of enactment of this Act:

SCHEDULE OF LAWS REPEALED

Statutes at Large

Date	Chapter or Public Law	Section	Statutes at Large Volume	Page
1920				
May 21	194	7(a)	94	613

Jan. 12	97-448	306(b)(2)	96	2405

The SPEAKER pro tempore. Is a second demanded?

Mr. MOORHEAD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. EDWARDS) will be recognized for 20 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2727, as amended, amends titles 31 and 49 of the United States Code to reflect changes in those titles by laws that did not specifically amend those titles. Because titles 31 and 49 are now law—rather than merely prima facie evidence of the law—they can be changed only by direct amendment. The bill, as amended, also restates certain sections to more accurately reflect current law and makes necessary technical and conforming amendments to certain titles of the Code that have been enacted into positive law and to the Internal Revenue Code of 1954. The amendments, purely technical in nature, are offered to clarify the intent of certain provisions or to correct cross-references.

The bill was prepared for the House Judiciary Committee by the Office of the Law Revision Counsel under its authority under section 285b of title 2, United States Code, to prepare revisions in titles of the Code that have been enacted into positive law.

Mr. MOORHEAD. Mr. Speaker, I yield myself such time as I may consume. Mr. Speaker, this is genuinely noncontroversial legislation. H.R. 2727 is the product of the Office of the Law Revision Counsel. Principally, it makes clarifications, and not substantive changes, in title 31 and title 49 of the United States Code.

Last fall, Congress codified title 31 for the first time (Public Law 97-258). However, subsequent to that action, Congress passed other legislation amending title 31 that needs to be brought into conformity with that overall codification. The clarifications made by H.R. 2727 in title 31 were requested by, and are supported by, the Department of the Treasury and the General Accounting Office. The changes being made in title 49 deal with transportation reporting requirements, and I am advised that the Department of Transportation has no objection to their enactment.

On June 17, 1983, the Office of Management and Budget wrote to Judiciary Committee Chairman Peter Rodino expressing no objection to the enactment of H.R. 2727.

Again, Mr. Speaker, we have no objection on the Republican side of the aisle to the enactment of this housekeeping legislation.

Mr. EDWARDS of California. I yield myself such time as I may consume in order that I may include at this point a detailed explanation of H.R. 2727, as amended, which reads as follows:

DETAILED EXPLANATION OF H.R. 2727—REVISION OF TITLE 31, UNITED STATES CODE, "MONEY AND FINANCE," AND SECTION 308 OF TITLE 49, UNITED STATES CODE, "TRANSPORTATION"

PURPOSE OF THE AMENDED BILL

The general purpose of the bill is as stated in its title.

Specifically, the bill will amend titles 31 and 49, United States Code, which have been enacted into positive law, to reflect changes in those titles by laws that did not specificially amend those titles. Also, the bill amends section 755 of title 31 to have it conform more closely to the source provision of the section, establishes an effective date for obligations issued under section 3102(a) or 3103(a) of title 31, amends sections 10904(d)(2) and (e)(3) and 11344(d) of title 49 to amend cross-references affected by the codification of subtitle I of title 49 by the Act of January 12, 1983 (Pub. L. 97-449, 96 Stat. 2413), and makes conforming amendments to certain titles of the United States Code that have been enacted into positive law and to the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.).

The bill makes no change in the substance of existing law.

STATEMENT

As stated in the purpose of the bill, this legislation is to reflect changes in the text of titles 31 and 49 because of laws that did not specifically amend those titles. The bill also makes technical and conforming changes in title 49, other titles of the United States Code that have been enacted into positive law, and the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.). The amendments, purely technical in nature, are offered to clarify the intent of certain provisions or to correct cross-references.

The detailed section-by-section analysis explains the changes made by the bill.

AGENCY COMMENTS

In an effort to achieve the greatest degree of accuracy possible, the Committee submitted the bill to the Department of Transportation, the Department of the Treasury, the Comptroller General of the United States, and the Office of Management and Budget. The Committee received the following letters:

OFFICE OF THE SECRETARY OF THE TREASURY,
Washington, D.C.

Attn: Mr. Lawrence Monaco.

Mr. EDWARD F. WILLETT, Jr.,
Law Revision Counsel,
HOUSE OFFICE BUILDING,
Washington, D.C.

DEAR MR. WILLETT: We are in receipt of a letter dated May 5, 1983 from Chairman Rodino to Secretary Regan requesting Treasury Department comments on H.R. 2727, a bill to codify certain provisions relating to Title 31 of the United States Code. The Office of Tax Policy has reviewed section 4(a) of the bill, and we have one comment.

Section 4(a) is intended to clarify the effective date of the requirement that long term United States debt obligations be issued in registered form. Section 4(a)(1) correctly states that "bonds" issued under 31 U.S.C. § 3102(a) are to be issued in registered form after September 3, 1982. However, section 4(a) does not make clear the effective date of registration for "notes" issued under 31 U.S.C. § 3103(a). The effective date for "notes" is obligations issued after December 31, 1982. See P.L. 97-248, § 310(d)(1), 96 Stat. 599 (Tax Equity and Fiscal Responsibility Act of 1982). Accordingly, we would suggest that section 4 be amended to clarify the effective date of registration for "notes".

Please feel free to call Andrew Furer of my staff (566-2927) if you have any questions regarding this matter.

Sincerely,
ROBERT G. WOODWARD,
Acting Tax Legislative Counsel.

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, D.C., May 31, 1983.

Hon. PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary,
House of Representatives,

DEAR MR. CHAIRMAN: This is in response to your letter dated May 5, 1983, requesting our comments on H.R. 2727, 98th Congress, which would, among other things, amend title 31, United States Code to codify without substantive change recently enacted laws relating to money and finance.

The bill incorporates the substance of a number of changes we have previously informally discussed with the Office of the Law Revision Counsel (Office). Additionally, the Office has assured us that the bill would include an amendment to 31 U.S.C. § 755 which would make this section conform more closely to the language of its source provision.[1] Consequently, we fully support the enactment of H.R. 2727 into law.

Sincerely yours, ——— ———,
(for Comptroller General of the United States).

---

[1] The first sentence of 31 U.S.C. § 755 would be revised to read as follows:

"Any final decision of the Board under section 753(a)(1)-(3), (6), or (7) of this title may be appealed to the United States Court of Appeals for the circuit in which the petitioner resides or to the United States Court of Appeals for the District of Columbia Circuit."

This language is based upon section 4(1)(1) of Pub. L. No. 96-191, February 15, 1980, 94 Stat. 29.

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C.

Hon. PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your request for the views of the Office of Management and Budget on H.R. 2727, a bill "To codify without substantive change recent laws related to money and finance and transportation and to improve the United States Code."

Section 1535.

Revised section	Source (United States Code)	Source (statutes at large)
1535(a)	31 App.: 686(a) (1st sentence words before 15th comma, previso)	May 21, 1920, ch. 194, § 7(a) (1st 2c sentences) 41 Stat. 613; June 30, 1932, ch 314, § 601, 47 Stat. 417; restated July 20, 1942, ch. 507, 56 Stat. 661; Aug. 23, 1958, Pub. L. 85-726, § 1407, 72 Stat. 808; Aug. 6, 1981, Pub. L. 97-136, § 11, 95 Stat. 1707; Oct. 15, 1982, Pub. L. 97-332- § 1(1)-(3), 96 Stat. 1622.

1535(c)	31 App.: 686(a) (last sentence)	May 21, 1920, ch. 194, 41 Stat. 607, § 7(a) (last sentence; added Oct. 15, 1982, Pub. L. 97-332, § 1(4), 96 Stat. 1622.

The Office of Management and Budget has no objection to enactment of H.R. 2727.

Sincerely,

JAMES M. FREY,
Assistant Director for Legislative Reference.

SECTION-BY-SECTION SUMMARY

SECTION 1—AMENDMENTS TO TITLE 31

Section 1 of the bill amends various sections of title 31, United States Code. A revision note for each paragraph of section 1 of the bill has been prepared to explain the amendments made by that paragraph.

SECTION 1(1)

This clarifies section 755 by conforming it more closely to the language of the source provision of the section

SECTION 1(2)

This is necessary because section 3620(a)(last sentence) of the Revised Statures inadvertently was omitted from the codification of title 31 by section 1 of the Act of September 13, 1982 (Pub. L. 97-258, 96 Stat. 877).

In subsection (a), before clause (1), the words "Except as provided in subsection (b) of this section" are added because of the restatement.

In subsection (b), before clause (1), the word "however" is omitted as surplus. The words "treasurer or" are omitted as obsolete because of the 1st-4th pars. under the heading "Independent Treasury" in the Act of May 29, 1920 (ch. 214, 41 Stat. 654). In clause (2), the words "rules and" are omitted as surplus.

SECTION 1(4)

This clarifies section 3528(b) by restoring the authority of the Comptroller General to deny relief to certifying officials in the same way relief may be denied to disbursing officials.

SECTION 1(5)

This is necessary to reflect the transfer of the non-positive law provisions of title 49 to title 49 appendix.

SECTION 1(6)

This is necessary to correct cross-references in section 3902(b)

SECTION 1(7)

This is necessary because the language was restated by section 382(b)(1) of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35, 95 Stat. 432) but inadvertently codified as 31:5132(a)(1)(last sentence) by section 1 of the Act of September 13, 1982 (Pub. L. 97-258, 96 Stat. 939).

SECTION 1(8)

This is necessary to correct a mistake in section 6716(c)(1) as codified by section 1 of the Act of September 13, 1982 (Pub. L. 97-258, 96 Stat. 1025).

SECTION 3302 OF TITLE 31

Section 3618 (1st sentence related to non-military deposits) of the Revised Statutes inadvertently was omitted as a source credit for 31:3302. Table 2A of H. Rep. 97-651 (p. 298) states that the sentence was omitted as superseded by various sections of title 10. Title 10 supersedes the sentence only as it applies to military deposits. However, the language of section 3618 (1st sentence related to non-military deposits) is subsumed in the broader language of section 3617 of the Revised Statutes, the source credit for 31:3302(b). Therefore, while section 3618 (1st sentence related to non-military deposits) should be a source credit for 31:3302(b), it is not necessary that the language of the sentence be restated.

SECTION 2—AMENDMENTS TO TITLE 49

Section 2 of the bill amends title 49, United States Code. A revision note for each paragraph of section 2 of the bill has been prepared to explain the amendments made by that paragraph.

SECTION 2(1)(A)(I), (III), (B)

Revised section	Source (U.S. Code)	Source (Statutes at large)
308(d)	49 App.: 1654a	Oct. 14, 1980, Pub. L. 96-448, § 409, 94 Stat. 1948; Dec. 21, 1982, Pub. L. 97-375, § 210(a), 96 Stat. 1825.
308(e)	49 App.: 1601c	Jan. 6, 1983, Pub L. 97-424, § 310, 96 Stat. 2151.

In subsection (a)(1), the words "January of each even-numbered year" are substituted for "January of 1984 and in January of every second year thereafter" to eliminate unnecessary words.

SECTION 2(1)(a)(ii)

This is necessary because section 111(b) of the Congressional, Reports Elimination Act of 1982 (Pub. L. 97-375, 96 Stat. 1821) repealed section 602 of the Regional Rail Reorganization Act of 1973 (Pub. L. 93-236, 87 Stat. 1022), which was restated as section 308(a) (last sentence) of title 49 by section 1 of the Act of January 12, 1983 (Pub. L. 449, 96 Stat. 2413).

SECTION 2(2)

This is necessary to reflect the transfer of the non-positive law previsions of title 49 to title 49 appendix.

SECTION 2(3)

This is necessary to correct a cross-reference in section 306(b) and to reflect the transfer of the non-positive law provisions of title 49 to title 49 appendix.

SECTION 2(4)

This amends cross-references in sections 10904(d)(2) and (e)(3) and 11344(d) of title 49 affected by the codification of subtitle I of title 49 by section 1 of the Act of January 12, 1983 (Pub. L. 97-449, 96 Stat. 2413).

SECTION 2(5)-(10)

These are necessary to conform the style used for cross-references in subtitle IV of title 49 to that used in other positive law titles.

SECTION 2(11)

This is necessary to conform an amendment made by section 5(g)(2) and (5) of the Act of January 12, 1983 (Pub. L. 97-449, 96 Stat. 2443).

SECTION 2(12)-(16)

These are necessary to conform the style used for cross-references in subtitle IV of title 49 to that used in other positive law titles.

SECTION 2(17)

This is necessary to correct an amendment made by section 5(g)(9) of the Act of January 12, 1983 (Pub. L. 97-449, 96 Stat. 2443).

SECTION 2(18), (19)

These are; necessary to conform the style used for cross-references in subtitle IV of title 49 to that used in other positive law titles.

SECTION 2(20)

This is necessary for clarity.

SECTION 3—CONFORMING AMENDMENTS TO OTHER TITLES

Section 3 of the bill makes conforming amendments to certain titles of the United States Code that have been enacted into positive law and to the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.).

SECTION 3(a)(1)-(3)

These are necessary because of the redesignation of the Bureau of the Budget as the Office of Management and Budget by section 102(a) of Reorganization Plan No. 2 of 1970 (eff. July 1, 1970, 84 Stat. 2085).

SECTION 3(a)(4)

This is necessary to correct the cross-reference in 5:5514(c) to reflect the codification of former 31:581d as 31:3530(d) by section 1 of the Act of September 13, 1982 (Pub. L. 97-452, 96 Stat. 967).

SECTION 3(a)(5)

This is necessary to correct the cross-reference in 5:8348(d) to reflect the codification of the Second Liberty Bond Act as chapter 31 of title 31 by section 1 of the Act of September 13, 1982 (Pub. L. 97-452, 96 Stat. 937).

SECTION 3(b)(1)

This is necessary to clarify that the minor coins of the United States, as defined in former 31:317, as the one-cent and 5-cent coins. Section 317 was restated in section 5112 of title 31 by section 1 of the Act of September 13, 1982 (Pub. L. 97-452, 96 Stat. 981).

SECTION 3(b)(2), (c)(1), (d)

These are necessary to reflect the transfer of functions from the Bureau of the Budget and the Director of the Bureau of the Budget to the President under section 101 of Reorganization Plan No. 2 of 1970 (eff. July 1, 1970, 84 Stat. 2085).

SECTION 3(c)(2)

This is necessary to reflect the codification of the jurisdictional provisions of part I of the Interstate Commerce Act (ch. 104, 24 Stat. 370) in subchapter I of chapter 105 of title 49.

SECTION 4—TECHNICAL AMENDMENTS

Section 4 of the bill establishes effective dates for obligations issued under section 3102(a) of title 31, United States Code, and certain amendments made by this bill.

SECTION 4(a)(1)

This is necessary because of section 310(d)(2) of the Tax Equity and Fiscal Responsiblity Act of 1982 (Pub. L. 97-248, 96 Stat. 600). The words "Except as provided in paragraph (2) of this subsection" are added because of the restatement.

SECTION 4(a)(2)

This is necessary because of section 310(d)(4) of the Tax Equity and Fiscal responsiblity Act of 1982 (Pub. L. 97-248, 96 Stat. 324), as added by section 306(b)(2) of the Technical Corrections Act of 1982 (Pub. L. 97-448, 96 Stat. 2405). The words "under law" are substituted for "(A) under section 103 of the Internal Revenue Code of 1954, or (B) under any other provision of law" to eliminate unnecessary words.

SECTION 4(b)

This clarifies that the effective date of the requirement that long term United States debt obligations be issued in registered form applies to notes as well as bonds as provided by section 310(d)(1) of the Tax Equity and Fiscal Responsibilty Act of 1982 (Pub. L. 97-248, 96 Stat. 599).

SECTION 4(c)

Section 4(c) of the bill provides an effective date of September 13, 1982 (the date of enactment of the codification of title 31, United States Code), for provisions that make technical and clerical corrections to that codification and to title 18 to reflect that codification.

SECTION 5—LEGISLATIVE PURPOSE AND CONSTRUCTION

Section 5 of the bill contains a statement of the legislative effect on enacting sections 1-4, savings provisions, and provisions to assist in interpreting and applying the provisions of law enacted by the bill.

SECTION 6—REPEALS

Section 6 of the bill relates to the repeal of those statutes that are modified and reenacted by the bill.

Subsection (a) provides that a repeal of a law may not be construed as a legislative inference that the provision was or was not in effect before its repeal.

Subsection (b) contains the schedule of laws to be repealed. It also preserves rights, duties, and penalties incurred, and proceedings begun before the date of enactment of the bill.

MASTER DISPOSITION TABLE

This table shows the disposition of all laws affecting the restatement of title 31, United States Code, and section 308 of title 49, United States Code, that are repealed by this bill and reenacted as part of title 31 or section 308 of title 49. The table is in 2 parts. Table 1A shows the disposition according to United States Code citation. Table 1B shows the disposition according to Statutes at Large citation. When a law is restated in sections 1-4 of the bill, the citation to the provision of the restatement is shown. When a law listed in the table is not restated in sections 1-4, the table contains a reference to table 2. Table 2 explains the reason why the law is omitted from the restatement in sections 1-4.

TABLE 2—LAWS OMITTED AND REPEALED

This table shows the laws omitted because of the restatement of title 31, United States Code, and section 308 of title 49, United States Code, and repealed by the bill. The table is in 2 parts, with table 2A listing repealed laws according to Statutes at Large citation and table 2B listing repealed laws according to Revised Statutes citation.

TABLE 2A.—STATUTES AT LARGE

Date	Chapter or Public Law	Section	Statutes at large		Explanation
			Volume	Page	
1982					
July 12	97-214	10(b)(5)	96	176	Executed. Repealed section 40 of the Act of Aug. 10, 1956 (ch. 1041, 70A Stat. 636), that was repealed by section 5(b) of the Act of Sept. 13, 1982 (Pub. L. 97-258, 96 Stat. 1079).
Dec. 21	97-375	111(b)	96	1821	Executed. Repealed section 602 of the Regional Rail Reorganization Act of 1973 (Pub. L. 93-236, 87 Stat. 1022), that was repealed by section 7(b) of the Act of Jan. 12, 1983 (Pub. L. 97-449, 96 Stat. 2445).

TABLE 2B.—REVISED STATUTES

Revised statutes (section)	Explanation
266	Superseded. Provided that the Secretary of the Treasury publish 30 days after the end of each quarter a statement of receipts and expenditures of the quarter. Superseded by section 3513 of the revised title.
267	Superseded. Provided that the Secretary of the Treasury publish on the first day of each month the last preceding weekly statement of the Treasurer of the United States. Superseded by section 3513 of the revised title.

GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2727, the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. EDWARDS) that the House suspend the rules and pass the bill, H.R. 2727, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate disagrees to the amendment of the House to the bill (S. 675) entitled "An act to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. TOWER, Mr. THURMOND, Mr. GOLDWATER, Mr. WARNER, Mr. HUMPHREY, Mr. COHEN, Mr. JEPSEN, Mr. QUAYLE, Mr. EAST, Mr. WILSON, Mr. JACKSON, Mr. STENNIS, Mr. NUNN, Mr. HART, Mr. EXON, Mr. LEVIN, Mr. KENNEDY, Mr. BINGAMAN, and solely for the consideration of section 1030C, Mr. STAFFORD and Mr. PELL to be the conferees on the part of the Senate.

AUTHORIZING PAYMENT OF EXPENSES OF NEWLY APPOINTED SPECIAL AGENTS

Mr. EDWARDS of California. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3232), to amend title 28 of the United States Code to authorize payment of travel and transportation expenses of newly appointed special agents of the Department of Justice.

The Clerk read as follows:

H.R. 3232

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 31 of title 28 of the United States Code is amended by adding at the end the following new section:

"§ 530. Payment of travel and transportation expenses of newly appointed special agents

"The Attorney General or the Attorney General's designee is authorized to pay the travel expenses of newly appointed special agents and the transportation expenses of their families and household goods and personal effects from place of residence at time of selection to the first duty station, to the extent such payments are authorized by section 5723 of title 5 for new appointees who may receive payments under that section.".

SEC. 2. The table of sections at the beginning of chapter 31 of title 28 of the United Stated Code is amended by adding at the end thereof the following new item:

"530. Payment of travel and transportation expenses of newly appointed special agents.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. EDWARDS) will be recognized for 20 minutes, and the gentleman from Wisconsin (Mr. SENSENBRENNER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill now under consideration, H.R. 3232 is very simple and very sensible. It would authorize the Department of Justice to pay for the travel and transportation expenses incurred by newly appointed special agents of that agency to their first permanent duty station.

The general rule for Federal employees is that these expenses are not reimbursable. However, several exceptions previously have been enacted, including one for the special agents of the Fish and Wildlife Service of the Department of the Interior. Like those employees, and unlike most other Federal employees, DEA and FBI special agents are both recruited nationally and assigned nationally. For example, although a prospective special agent may submit his or her application in the San Francisco field office, headquarters will assign the agent where the need is, and usually, in an area other than the area from which he or she was recruited.

In the past, the FBI has tried to alleviate the financial burden on the new agent by assigning that employee initially to the area from which he or she was recruited, and then, 6 months later, reassigning that agent to a station where the need existed. That second move was reimbursable.

So long as the number of new agents remained relatively small, this system worked fairly well. However, the drug enforcement initiative now being pursued jointly at DEA and the FBI means that approximately 300 new agents will be hired in the next fiscal year. It no longer makes sense to assign these agents first to their home area—they must go directly to the area where they are needed. Therefore, the choice for the Department of Justice was either to continue their present practice (which will now be wasteful), burden these new agents with these expenses, or seek the authority which is contained in this bill.

The Subcommittee on Civil and Constitutional Rights, which I chair, held a hearing on this subject on June 16, 1983, and was convinced that the fair and economical thing to do was to enact this authority. Compared to the Department's present policy, this authority will permit a savings of over $459,000 per year. The subcommittee unanimously reported this bill on June 29, and we now seek your support in the House.

Mr. SENSENBRENNER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3232 allows the FBI to reimburse special agents for the transfer of their families and household goods from Quantico, Va., their training facility, to their first permanent duty station, a practice not currently allowed by the Comptroller General of the United States. The FBI currently assigns these agents to the office closest to the location of their household goods and families at the time of appointment, for a period of 6 months, in order to establish the permanent duty station status required by the Comptroller General. This 6-month assignment is made without regard to the needs of the FBI and has proven to be counterproductive to their mission. It is agreed that the change would be more cost effective than the current practice of the FBI and would streamline the process of

assigning agents to various field offices based on the needs of the FBI. In fact, had H.R. 3232 been in place in fiscal year 1982, almost one-half a million dollars would have been saved.

The FBI argues that this is a matter of critical importance in view of the staffing requirements of the drug task forces. Experienced FBI agents are being assigned to those task forces, and office requirements in other areas will be satisfied through the assignment of new agents. These assignments would be effectively postponed for 6 months, during which time they would be assigned to the office from which they were appointed.

I urge my colleagues to vote to suspend the rules and pass H.R. 3232.

Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. EDWARDS) that the House suspend the rules and pass the bill, H.R. 3232.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

PROVIDING FOR ADOPTION OF CONFERENCE REPORT ON S. 272 AND FOR ADOPTION OF SENATE CONFERENCE RESOLUTION 58

Mr. MICHELL. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 293) providing that the House shall be considered to have adopted the conference report on the bill (S. 272) to improve small business access to Federal procurement information, to have receded from its amendment to the title of said bill, and to have adopted the concurrent resolution (S. Con. Res. 58) correcting the enrollment of S. 272.

The Clerk read as follows:

H. RES. 293

Resolved, That upon the adoption of this resolution the House shall be considered to have adopted the conference report on the bill (S. 272) to improve small business access to Federal procurement information, to have receded from its amendment to the title of said bill, and to have adopted the concurrent resolution (S. Con. Res. 58) correcting the enrollment of S. 272.

The SPEAKER pro tempore. Is a second demanded?

Mr. PRITCHARD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Maryland (Mr. MITCHELL) will be recognized for 20 minutes, and the gentleman from Washington (Mr. PRITCHARD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Maryland (Mr. MITCHELL).

□ 1410

Mr. MITCHELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the resolution. Before explaining the substantive law involved, I want to clarify for the Members the procedure which is involved.

The resolution simply does three things:

First, it provides that upon its adoption, the conference report on a bill to improve small business access to Federal procurement information (S. 272) is approved.

Second, it directs the Secretary of the Senate when he enrolls this conference report to make several minor changes.

Third, it agrees to the Senate's title of the bill.

The reason that this conference report is being handled on the suspension calendar is to avoid any possible point or order for exceeding the scope of conference. The provision which is in question is the effective date of the bill. The original House bill, which subsequently became a House amendment to the Senate bill, would have been effective upon enactment. The Senate bill, S. 272, was a more extensive bill and among other things imposes restrictions upon the authority of a contracting officer to enter negotiations for a sole source contract. The Senate bill also changes some of the provisions regarding publication of notice of procurement in the Commerce Business Daily rather than simply imposing timely notice requirements. Presumably, for these reasons the Senate felt a 45-day lead time was in order. Although the House conferees agreed with many of the provisions in the Senate bill, we felt that Federal departments should receive additional time to begin their compliance. As a result, the conferees delayed the effective date of the bill beyond the date specified in the Senate bill and thus may have exceeded the scope of conference. Consideration of the conference report on the suspension calendar avoids the possible raising of this technical violation.

In addition, after the conference report had been filed and after the Senate had approved the conference report, we received a letter from the Department of Defense expressing its concern over some of the provisions of the conference report. We had earlier considered some of the concerns expressed and addressed those which we believed had merit. The new letter, however, raised concerns for the first time. Although I do not necessarily agree with the Defense Department's views or the conclusions as to the impact of the conference report, nonetheless I agreed with my ranking minority member and the principal Senate conferees that it was advisable to adopt minor changes so as to preclude the possibility of erroneous interpretations and unintended results. As my colleagues know, conference reports cannot be amended on the floor as can a bill. The procedure needed to accomplish the changes is for the House and Senate to adopt a resolution for the Secretary of the Senate to make the changes. Such a change was introduced as Senate Concurrent Resolution 58 which basically includes the following:

Reinstatement of an exemption under existing law from publication of notice of procurements from another Government department or a mandatory source of supply; establishing an exemption from such publication requirements of procurements for research resulting from unsolicited proposals if publication would disclose originality of thought; and establishment of an exemption in emergencies from the requirement that a contracting officer obtain approval from the head of the procuring activity before commencing negotiations for large sole source contracts.

The Senate agreed to this resolution last Thursday.

Thus, under the motion I have made all we are doing is agreeing to the conference report with minor changes.

The conference report, as modified by the Senate resolution, would do the following:

First, Federal departments and agencies would be required to public notice of upcoming Federal contracts of $10,000 or more in the Commerce Business Daily. They would be required to allow the lapse of at least 15 days between the publication of notice and the issuance of a contract solicitation—30 days for R&D solicitations—and then to allow at least an additional 30 days for receipt of bids or proposals. There would be exemptions for those procurements: (1) which for security reasons are of a classified nature; (2) which are for goods or services for which the Department has an unusual and compelling urgency; (3) in which a foreign government is reimbursing the United States for the cost of the procurement and only one source is available or if the terms of an international agreement or treaty authorize or require that the procurement be from specified sources; (4) which are made from another Government department or a mandatory source of supply; (5) which are for utility services if only one source is available; (6) which are made against an order placed under a requirements contract; (7) which are for research resulting from unsolicited proposals

which are unique if publication would disclose originality of thought or innovativeness; and (8) for which SBA and the Department agree that advance notice is not appropriate or reasonable.

Second, it would impose a prohibition against Federal departments commencing negotiations for a sole source contract (except under the 8(a) and Small Business Innovation Research programs and in emergency situations) above a threshold amount unless the head of the procuring activity or his deputy has approved the authority to enter into such contract and the contracting officer has considered the responses to the notice of procurement action. There would be a 3-year phase in of the dollar threshold amount of procurement contracts to which these provisions will apply: $1 million in fiscal year 1984, $500,000 in fiscal year 1985, and $300,000 in fiscal year 1986 and each year thereafter.

Third, it also would require that in all procurement actions in excess of $25,000 in which the award of subcontracts is likely, the Federal department entering the contract must submit for publication in the Commerce Business Daily a notice announcing the award of the prime contract.

Fourth and last, the provisions of the conference report would be applicable to procurement actions initiated 90 days after the date of enactment except the restriction on sole source contracts which would be effective October 1, 1983.

I believe this is an excellent bill and will assist small business in Government contracts. I also want to compliment all of the members of the committee who worked and contributed to the formation of this legislation. I particularly want to single out for congratulations Mr. ADDABBO Mr. MCDADE, my ranking minority member, and my colleague from Nebraska, Mr. DAUB.

Mr. RAY. Mr. Speaker, will the gentleman yield?

Mr. MITCHELL. Mr. Speaker, at this juncture I yield briefly to my colleague, the gentleman from Georgia.

Mr. RAY. Mr. Speaker, I rise in support of the conference report on S. 272 and urge its adoption by the House. However, I share some of the same concerns expressed by my colleague from Nebraska.

Let me commend my colleague and my chairman, Mr. MITCHELL, for pursuing legislation that will mandate a period of 15 days' notice in the Commerce Business Daily before issuance of a solicitation, and 30 days before completion will be foreclosed. I supported the House bill, H.R. 1043, because I believe that small businesses need this extended period in order to compete effectively.

However, it recently came to my attention that in conference the exemption for perishable foods, such as fresh fruit, vegetables, meat, and seafood, has been deleted. This exemption is in present law and is important to preserve the ability of the Department of Defense as well as other agencies to buy perishable food in the marketplace. It is extremely difficult to forecast the need for these types of items 45 days in advance. Crop failures are difficult to predict. The food spoils rapidly and cannot be stored. The only way to insure that the best quality produce is purchased at the best price is to buy in the marketplace from whomever is offering the most favorable quality for the price.

There has been no indication that the present method of buying perishable food has resulted in a lack of competition, or an exclusion of small businesses. In fact, 97 percent of the Department of Defense purchases of subsistence food are from small businesses.

Therefore, I hope that the Department of Defense as well as other agencies will take advantage of the provision in S. 272 to go to the SBA for an exemption when the reasonableness of current purchasing practices can be demonstrated.

Mr. Speaker, I urge that the House adopt the conference report on S. 272.

Mr. MITCHELL. Mr. Speaker, I reserve the balance of my time.

Mr. PRITCHARD. Mr. Speaker, I yield my 20 minutes to the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I am delighted on behalf of the minority on the Small Business Committee to participate in support of this resolution and of the conference report.

I believe that this bill will bring much needed changes to our procurement system.

Recent articles in newspapers throughout our Nation have illustrated what happens when there is overreliance on a single source of supply.

With this bill, we intend to help bring an end to abusive overpricing, such as $435 for a claw hammer, $436 for a sledge hammer, $437 for a 12-foot measuring tape, $110 for a 4 cent electronic part, and $44 for a 17-cent lamp. We cannot and we will not tolerate this kind of procurement abuse, even in a fiscally sound budget period; but with an almost $200 billion yearly deficit, and cutbacks in all programs to reduce Government costs, this waste of taxpayer funds is outrageous.

Competition is our aim. We want agencies to know that there are other sources for the goods and services that they need, as opposed to single source contracting. By reducing sole source contracts, by increasing notice of prime and subcontracting opportunities and by ultimately increasing competition, Federal costs will be reduced and more businesses will have the opportunity to do business with the Federal Government.

I urge a vote in favor of this conference report.

Mr. Speaker, I would like to engage the chairman of the Small Business Committee, if I might, in a colloquy.

Mr. MITCHELL. I would be delighted.

Mr. DAUB. Will the gentleman from Maryland, the distinguished chairman of the committee, respond to some questions?

Mr. MITCHELL. I would be pleased to respond to my good friend.

Mr. DAUB. Mr. Speaker, I would like to engage the distinguished chairman of this committee in a colloquy concerning perishable commodities. Am I correct in understanding that under the conference report, if a department can demonstrate the reasonableness of current purchasing practices and that advance notice is not appropriate or reasonable, it can receive an exemption from the advertisement requirements of this bill for the procurement of certain kinds of perishable commodities?

Mr. MITCHELL. Mr. Speaker, the gentleman from Nebraska is absolutely correct. The bill has been crafted to allow a nonlegislative resolution of special problems that may arise. The Administrator of the Small Business Administration and the head of the Federal Department are empowered to agree to commodity class exemptions where appropriate. Certainly, it is not the intent of this committee to cause a disruption of established procurement methods where ample competition and existing market methods combine to create an efficient procurement system that results in lower costs.

Mr. Speaker, let me add a little bit more to my colloquy. I would be most reluctant to preclude our Armed Forces from having access to those delicious Maryland crabs. That is a perishable commodity and certainly it would be cruel and almost inhuman to deny our armed services personnel access to that delectable morsel from Maryland.

Mr. DAUB. Might I say to my distinguished chairman and, indeed, good friend, that we would not want to deny the Armed Forces personnel at, for example, my Air Force base, the Strategic Air Command in Omaha, those delightful and delectable morsels, a commodity which may be deemed perishable, that comes from the Maryland shore.

I appreciate the gentleman's response very much and it is, indeed, a clear explanation. I think it serves as useful legislative intent in the record.

Mr. Speaker, let me conclude for my part, since I do not observe that any from my side wish any further part of the time granted to me, that the staff

deserves a great deal of commendation for the work that they have done; that we indeed on both sides of the aisle and the committee have cooperated with the Department of Defense in attempting to work out any problems. I think that this close cooperation is notable.

I believe that we are together on a very good piece of legislation that will, indeed, be good for the efficiency of our Government and for the opportunities of those who on the outside of our Government institutions can have some say in efficiency and economy, which ought to be the hallmark of anything we do in this Congress.

So I do again urge my colleagues to support the resolution and the conference report.

Mr. Speaker, I yield back the balance of my time.

Mr. MITCHELL. Mr. Speaker, I have no further requests for time.

I simply urge the immediate approval of the conference report. I know of no controversy surrounding this conference report.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Maryland (Mr. MITCHELL) that the House suspend the rules and agree to the resolution, House Resolution 293.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MITCHELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION OCEAN AND COASTAL PROGRAM AUTHORIZATION ACT

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 1098) to consolidate and authorize certain ocean and coastal programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce.

The Clerk read as follows:

S. 1098

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Oceanic and Atmospheric Administration Ocean and Coastal Program Authorization Act."

TITLE I—NONLIVING MARINE RESOURCES

AUTHORIZATION

SEC. 101. There are authorized to be appropriated to the Department of Commerce to enable the National Oceanic and Atmospheric Administration to carry out its nonliving marine resource duties under law, $800,000 for fiscal year 1984. Moneys appropriated pursuant to this authorization shall be used to fund those duties relating to nonliving marine resources specified by the Act entitled "An Act to define the functions and duties of the Coast and Geodetic Survey, and for other purposes", approved August 6, 1947, as amended (33 U.S.C. 883a), and any other law involving such duties. Such duties include, but are not limited to, polymetallic sulfide analyses and research.

TITLE II—NATIONAL SEA GRANT COLLEGE PROGRAM

AUTHORIZATION

SEC. 201. (a) Section 212 of the National Sea Grant Program Act (33 U.S.C. 1131) is amended by inserting immediately after paragraph (3) the following new paragraph:

"(4) Not to exceed $42,000,000 for fiscal year 1984 and not to exceed $46,000,000 for fiscal year 1985.".

(b) Section 3(c) of the Sea Grant Program Improvement Act of 1976 (33 U.S.C. 1124a(c)) is amended by inserting immediately after paragraph (3) the following new paragraph:

"(4) For fiscal years 1984 and 1985, not to exceed $1,000,000 in each fiscal year appropriated pursuant to section 212 of the National Sea Grant Program Act may be available to carry out this section.".

TITLE III—OCEAN THERMAL ENERGY CONVERSION ACT

AUTHORIZATION

SEC. 301. Section 406 of the Ocean Thermal Energy Conversion Act of 1980 (Public Law 96-320) is amended—

(1) by striking out "and"; and

(2) by striking out "1983." and inserting in lieu thereof "1983, not to exceed $620,000 for the fiscal year ending September 30, 1984, and not to exceed $800,000 for the fiscal year ending September 30, 1985.

MISCELLANEOUS

SEC. 302. (a) The Ocean Thermal Energy Conversion Act of 1980 (Public Law 96-320) is amended—

(1) in section 2(a)(1) by striking out "located in the territorial sea" and inserting in lieu thereof "located in whole or in part between the highwater mark and the seaward boundary of the territorial sea";

(2) in section 3(11) by striking out "standing or moored in or beyond the territorial sea of the United States" and inserting in lieu thereof "standing, fixed or moored in whole or in part seaward of the highwater mark";

(3) in the first sentence of section 101(a) by striking out "located in the territorial sea" and inserting in lieu thereof "located in whole or in part between the highwater mark and the seaward boundary of the territorial sea";

(4) in section 101(b)(2) by striking out "located in the territorial sea" and inserting in lieu thereof "located in whole or in part between the highwater mark and the seaward boundary of the territorial sea";

(5) in section 101(c)(7) by striking out "will not be documented under the laws of the United States;" and inserting in lieu thereof "will be documented under the laws of a foreign nation;";

(6) in section 108(e)(2)(C)(ii) by striking out "moored or standing" and inserting in lieu thereof "moored, fixed or standing";

(7) in section 108(e) by adding a new paragraph (4) to read as follows:

"(4) For the purposes of this subsection the term 'ocean thermal energy conversion facility' refers only to an ocean thermal energy conversion facility which has major components other than water intake or discharge pipes located seaward of the highwater mark.";

(8) in section 110(1) by striking out "aboard" and inserting in lieu thereof "in or aboard";

(9) in section 301 by striking out "on board" and inserting in lieu thereof "in or on board", by striking out "or other" and inserting in lieu thereof "or on board any", and by striking out in paragraph (2) thereof "to board" and inserting in lieu thereof "to enter or board";

(10) In section 303(b) by striking out "on board" and inserting in lieu thereof "in or on board", by striking out "or other" and inserting in lieu thereof "or any", and by striking out in paragraph (1) thereof "board and inspect" and inserting in lieu thereof "enter or board, and inspect, any ocean thermal energy conversion facility or plantship or";

(11) in the first sentence of section 403(a)(1) by inserting "and all of which is located seaward of the highwater mark," immediately after "licensed under this Act"; and

(12) In the first sentence of the section 403(c)(2) by inserting "documented under the laws of the United States and" immediately after "ocean thermal energy conversion facility or plantship".

(b) Such Act is further amended—

(1) in section 101(c)(1) by striking out "cannot and will not" and inserting in lieu thereof "cannot or will not";

(2) in section 101(c)(5) by striking out "has expired;" and inserting in lieu thereof "has not expired;";

(3) in section 101(c)(10) by striking out "each" and inserting in lieu thereof "any";

(4) in section 101(c)(13) by striking out "and" after the semicolon and inserting in lieu thereof "or"; and

(5) in section 101(c)(10) by striking out "(33 U.S.C. 1451 et seq.)" and inserting in lieu thereof "(16 U.S.C. 1451 et seq.)".

(c) Section 405 of such Act is amended by striking out "3" and inserting in lieu thereof "five."

(d) Such Act is further amended by adding the following new section:

"SEC. 408. Within 18 months after the date of enactment of this provision, the Administrator shall submit to the President of the Senate and the Speaker of the House of Representatives a report detailing what steps the United States Government is taking and plans to take to promote and enhance the export potential of ocean thermal energy conversion components, facilities, and plantships manufactured by United States industry. Such report shall include—

"(1) the relevant views of the National Oceanic and Atmospheric Administration, International Trade Administration, Maritime Administration, Department of Energy, Small Business Administration, United States International Development Cooperative Agency, the Office of the Special Trade Representative, and other relevant United States Government agencies;

"(2) the findings of studies conducted by the Administrator to fulfill the intent of this section;

"(3) a summary of activities, including consultations held with representatives of both the ocean thermal energy conversion and financial industries conducted by the Administrator to fulfill the intent of this section; and

"(4) such recommendations as the Administrator deems appropriate for amending the Ocean Thermal Energy Conversion Act of 1980 (Public Law 96-320) or other relevant Acts to better promote and enhance the export potential of ocean thermal energy conversion components, facilities and plantships manufactured by United States industry".

(e) Such Act is further amended—

(1) in the first sentence of section 108(d)(1) by striking out "reorganizational safety" and inserting in lieu thereof "navigational safety";

(2) in section 109(b)(2) by striking out "natural" and inserting in lieu thereof "national";

(3) in section 112(b) by striking out "confidential commercial and financial information)" and inserting in lieu thereof "commercial or financial information which is privileged or confidential)";

(4) in section 116(a) by striking out "facility or platform" and inserting in lieu thereof "facility or plantship";

(5) in section 302(b)(1) by inserting "to halt" immediately after "injunction,";

(6) in the first sentence of section 403(c)(2) by striking out "Treasury" and inserting in lieu thereof "Treasury, including the provisions of the Tariff Act of 1930, as amended (19 U.S.C. 1202), and other laws codified in title 19, United States Code,";

(7) in section 3(11) by striking out "freshwater," and inserting in lieu thereof "fresh water,";

(8) in section 101(c)(4) by striking out "enforcement" and inserting in lieu thereof "regulatory";

(9) in section 101(c)(6) by striking out "for license" and inserting in lieu thereof "for a license";

(10) in section 101(c)(14) by striking out "when" and inserting in lieu thereof "if";

(11) in section 101(d)(2) by striking out "licensee" and inserting in lieu thereof "applicant, licensee";

(12) in the first sentence of section 105(a)(2) by striking out "that (A)" and inserting in lieu thereof "(A) that";

(13) in the first sentence of section 105(b)(1) by striking out "of adjacent" and inserting in lieu thereof "of an adjacent";

(14) in the third sentence of section 105(b)(1) by striking out "is" and inserting in lieu thereof "are";

(15) by inserting the text of section 109(b)(3) as a new paragraph (3) immediately after the end of paragraph (2) of section 108(d), and by repealing section 109(b)(3);

(16) in section 109(c) by striking out "such of" and inserting in lieu thereof "of such", and by striking out "impingment" and inserting in lieu thereof "impingement";

(17) in section 111(b) by striking out "environment established by any treaty or convention," and inserting in lieu thereof "environment,"; and

(18) in section 112(b)(2)(B) by striking out "administrator" and inserting in lieu thereof "Administrator".

(f) Section 102(h) of such Act is amended to read as follows:

"(h) The Administrator shall not take final action on any application unless the applicant has paid to the Administrator a reasonable administrative fee, which shall be deposited into miscellaneous receipts of the Treasury. The amount of the fee imposed by the Administrator on any applicant shall reflect the reasonable administrative costs incurred by the National Oceanic and Atmospheric Administration in reviewing and processing the application.".

TITLE IV—NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE ACT OF 1977

AUTHORIZATION

SEC. 401. Section 8 of the National Advisory Committee on Oceans and Atmosphere Act of 1977 (33 U.S.C. 857-18) is amended—

(1) by striking out "and" immediately after "1981,"; and

(2) by striking out the period after "1982" and inserting in lieu thereof ", $630,000 for the fiscal year ending September 30, 1984, and $630,000 for the fiscal year ending September 30, 1985.".

TITLE V—PAY INCREASE AUTHORIZATION

MISCELLANEOUS

SEC. 501. There are authorized to be appropriated to the Department of Commerce, to enable the National Oceanic and Atmospheric Administration to carry out its duties indicated under this Act, such additional sums as may be necessary for increases in salary, pay, and other employee benefits authorized by law.

The SPEAKER pro tempore. Is a second demanded?

Mr. PRITCHARD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes, and the gentleman from Washington (Mr. PRITCHARD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 1098, consolidates three authorization bills unanimously reported by the Committee on Merchant Marine and Fisheries and includes another important marine program administered by the National Oceanic and Atmospheric Administration (NOAA).

First, the bill reauthorizes the National Sea Grant Program Act at $42 million for fiscal year 1984 and $46 million for fiscal year 1985. The purpose of the sea grant program is to foster research, education, and advisory services relating to the conservation, management, and use of marine resources through our Nation's colleges and universities. Currently, there are 29 sea grant colleges and universities that participate in the matching grant program. Throughout the history of the program, State and private sector matching funds have exceeded the one-third required minimum, and presently support over 40 percent of the program. The economic benefits derived from the program are significant. For example, a 1981 survey indicated that $277 million in annual gross revenues and savings to marine and coastal industries resulted from sea grant research projects. That figure nearly equals the Federal Government's total appropriations over the first 13 years of the program and is only one indication of the economic importance of the program.

Second, the bill reauthorizes the Ocean Thermal Energy Conversion Act of 1980 at $620,000 for fiscal year 1984 and $800,000 for fiscal year 1985. Under that act, NOAA is carrying out a streamlined licensing program to facilitate a commercial ocean thermal energy conversion (OTEC) industry. The increase of $150,000 for fiscal year 1984 over the administration's request would authorize continued funding for OTEC-related environmental research, particularly with respect to impacts on fisheries; and $200,000 would be provided in fiscal year 1985 for such research, in addition to $600,000 for regulatory activities. Further, the bill would require NOAA to report on efforts to promote the exporting of OTEC technology and make a number of administration-recommended changes in the OTEC Act.

Third, the bill would reauthorize the National Advisory Committee on Oceans and Atmosphere Act at $630,000 annually for fiscal years 1984 and 1985. As an advisory body to the Department of Commerce and the Congress, the National Advisory Committee on Oceans and Atmosphere (NACOA) continually reviews national ocean policy, coastal zone management, and the status of marine atmospheric science and service programs. NACOA has been at the forefront of a number of important issues, offering an independent viewpoint which is vital, given the recent budgetary constraints concerning ocean and atmospheric programs.

In addition, the bill provides $800,000 for NOAA's non-living marine resources program for fiscal year 1984. NOAA's polymetallic sulfide research, supported by redirected in-house funds prior to fiscal year 1983, is aimed at evaluating recently discovered mineral-rich deposits off the U.S. west coast. These deposits may be of significant commercial value and I believe a modest amount of Federal funding is warranted to continue this research.

The programs contained in the bill have received strong support from the Congress in the past and continue to merit our support today.

Finally, I would point out, Mr. Speaker, that our amendment contains an authorization level for fiscal year 1984 that is $500,000 under that contained in the bill from the other body. At this point in the RECORD I include the following:

SECTION-BY-SECTION EXPLANATION OF THE COMMITTEE AMENDMENT TO S. 1098

(A bill to consolidate and authorize certain ocean and coastal programs and functions of the National Oceanic and Atmospheric Administration (NOAA))

SHORT TITLE—NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION OCEAN AND COASTAL PROGRAM AUTHORIZATION ACT

Title I—Nonliving Marine Resources

Sec. 101 authorizes the appropriation of $800,000 for fiscal year 1984 for NOAA's nonliving marine resources duties, including research and other activities pertaining to polymetallic sulfides. This budget subactivity has in the past been partially carried out pursuant to standing authorization under "An Act to define the functions and duties of the Coast and Geodetic Survey, and for other purposes" (35 U.S.C. 883a). It is the intent of the Committee that funds appropriated pursuant to this authorization be used for polymetallic sulfide analyses and research; however, the provision does allow NOAA some budgetary flexibility.

Title II—National Sea Grant College Program

Sec. 201(a) amends section 212 of the National Sea Grant Program Act by authorizing the appropriation of an amount not to exceed $42,000,000 for fiscal year 1984 and $46,000,000 for fiscal year 1985.

Sec. 201(b) contains a technical amendment to correct the reference to that part of section 3 of the Sea Grant Program Improvement Act of 1976 which is to be amended, and allows up to $1 million of the authorized appropriation to be available in each of fiscal years 1984 and 1985 to carry out Sea Grant's international program.

Title III—Ocean Thermal Energy Conversion Act

Sec. 301 amends section 406 of the Ocean Thermal Energy Conversion Act of 1980 (the OTEC Act) by authorizing the appropriation of an amount not to exceed $620,000 for fiscal year 1984 and not to exceed $800,000 for fiscal year 1985. Of the above amounts, it is the intent of the Committee that $150,000 and $200,000, be authorized, respectively, for OTEC-related environmental research.

Sec. 302(a) contains a series of twelve technical amendments.

Sec. 302(b) contains a series of five technical amendments.

Sec. 302(c) extends for two years the requirement for NOAA to submit an annual report on the OTEC program.

Sec. 302(d) requires the Administrator of NOAA to report to Congress within 18 months after the enactment of this Act on what steps the U.S. Government is taking and plans to take to promote and enhance the export potential of OTEC components, facilities and plantships.

Sec. 302(e) contains a series of eighteen technical amendments.

Sec. 302(f) amends section 102(h) of the OTEC Act to allow the Secretary to charge a fee that reflects the actual expenses incurred by NOAA in reviewing and approving an application for an OTEC facility or plantship, similar to the fee mechanism now employed under the provisions of the Deep Seabed Hard Mineral Resources Act.

Title IV—National Advisory Committee on Oceans and Atmosphere Act of 1977

Sec. 401 amends Section 8 of the National Advisory Committee on Oceans and Atmosphere Act by authorizing the appropriation of an amount not to exceed $630,000 for each of the fiscal years 1984 and 1985.

Title V—Pay Increase Authorization

This section permits appropriations to accommodate legislated pay increases and other employee benefits to carry out the NOAA duties covered in this bill.

□ 1420

Mr. PRITCHARD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the committee amendment to S. 1098, which reauthorizes and brings together four important oceans programs of the National Oceanic and Atmospheric Administration (NOAA) under the Department of Commerce.

Title I of this bill reauthorizes the polymetallic sulfide research and evaluation program of NOAA. Funds authorized under this program ($800,000) will be used to evaluate the polymetallic sulfide deposits recently discovered off the coasts of Washington, Oregon, and California. Information obtained via this program will help add to the U.S. data base from which we can determine the commercial viability of these mineral deposits. The research knowledge gained from studies focused upon the ocean floor polymetallic sulfides and hydrothermal vents is also used to search for fossil ocean mineral bodies on land. Continued support of this effort will also maintain the U.S. leading role on the international front.

Title II of the bill will reauthorize the national sea grant college program at $42 million for fiscal year 1984 and $46 million for fiscal year 1985. The sea grant program has successfully carried out its role as the basic national university marine resource program. It is one of the most efficient and cost-effective programs of the Federal Government and it should be continued without fundamental change. I would like to point out that the University of Washington sea grant program has been instrumental in the birth of a new domestic industry. The sea grant program provided the impetus for technology development of high-precision acoustic instrumentation for fisheries management and research. This is just one of many contributions the national sea grant college program has made in the marine sector of our economy.

Title III of this bill reauthorizes the Ocean Thermal Energy Conversion Act (OTEC) at $620,000 for fiscal year 1984 and $800,000 for fiscal year 1985. OTEC is the process where electricity is generated by utilizing the temperature differential between warm surface water and the colder deep water. This technology has several advantages: First, it could assist the United States in its drive toward energy independence; second, it has the potential to improve our balance-of-trade payments; and third, NOAA estimates that the total export potential of OTEC technology could be greater than $170 billion in 1980 dollars.

Title IV of this bill reauthorizes the National Advisory Committee on Oceans and Atmosphere (NACOA) at $630,000 for fiscal years 1984–85. I support the reauthorization of NACOA in order to maintain its role as an independent oceans advisory committee to the President and to Congress. NACOA also provides a useful role via its published reports to the President and to Congress on current U.S. oceans and atmospheric policies and the administration of those policies.

In conclusion, the House Appropriations Committee has supported this committee's recommendations on the necessary funding levels for these vital oceans programs for fiscal year 1984. I urge my colleagues to support passage of this important legislation.

Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. FORSYTHE).

Mr. FORSYTHE. Mr. Speaker, I rise in support of the committee amendment to S. 1098, which consolidates and authorizes several important NOAA ocean and coastal programs.

S. 1098—a similar version of which was adopted by the Senate earlier this summer—incorporates the provisions of three bills reported by the Merchant Marine and Fisheries Committee earlier this year. These are: H.R. 1381, which reauthorizes the Ocean Thermal Energy Conversion Act of 1980; H.R. 1643, which reauthorizes the National Sea Grant College Program Act; and H.R. 2722, which reauthorizes the National Advisory Committee on Oceans and Atmosphere Act of 1977.

S. 1098 also sets an $800,000 authorization level in fiscal year 1984 for certain NOAA nonliving marine resource activities. It is the intent of the committee that this money be primarily applied to polymetallic sulfide analyses and research. NOAA's at-sea research capability and scientific staff have provided a major focal point for polymetallic research that the committee believes should be continued and enhanced.

NOAA's polymetallic sulfide work for 1984 will entail evaluating the deposits recently discovered off the west coast of the United States. The program is also aimed at developing a predictive capability for finding these mineral deposits in other areas of the deep seabed as well as on land. This capability will allow the United States to determine the potential for commercial development of the resource.

Finally, I want to highlight title II of S. 1098. It authorizes funds for

fiscal years 1984-85 for the national sea grant college program. The authorization levels contained in S. 1098 are identical to those passed by the Senate and are more than $20 million below those for the past 4 years. Sea grant is a merit-based, highly competitive, matching-grant program. The return on the Federal investment in sea grant to the marine industry and to the people of this Nation has been significant. In my State of New Jersey, sea grant fisheries, shore processes, and pollution projects have resulted in millions of dollars in savings to New Jersey and east coast ocean and coastal industries. Further, the value of sea grant goes beyond the local, State, and regional work. It is also a national network of people, ideas, and technology providing a critical scientific base to the Nation's marine program. The Federal role in the program insures that the benefits of the State programs are available for application nationwide.

Mr. Speaker, S. 1098 contains responsible reauthorization levels for critical NOAA oceans and coastal programs. The House Appropriations Committee has recommended fiscal year 1984 funding for all of the programs contained in S. 1098. I support S. 1098 and urge the support of my colleages.

Mr. PRITCHARD. Mr. Speaker, I have no more requests for time.

Mr. JONES of North Carolina. Mr. Speaker, I yield such time as he may consume to the gentleman from New Hampshire (Mr. D'AMOURS), chairman of the subcommittee.

Mr. D'AMOURS. Mr. Speaker, I rise in strong support of S. 1098, as amended.

This bill represents an important investment in the wise management of our marine resources. The fact that the Merchant Marine and Fisheries Committee unanimously reported out H.R. 1381, H.R. 1643 and H.R. 2722, whose provisions have all been incorporated into this bill, clearly demonstrates the bipartisan support S. 1998 enjoys. Administration efforts to cut the programs reauthorized by this bill have been pennywise and pound-foolish. That is why it is crucial for the Congress to act decisively to reauthorize.

There is hardly a more cost-effective program in Government today than the national sea grant college program. In one single year—1980—revenues and cost savings to marine industries generated by the program totaled $227 million. That was six times the amount the Federal Government appropriated to the program in that year and only slightly less than the total amount appropriated to the program over its-then-13-year history.

Such results have caused the Heritage Foundation to conclude that, "sea grant has an impressive record of success * * *. Sea grant funding should be increased by 10 percent per year in real terms for the next 5 years." Unfortunately, due to political realities, we have not been able to provide those increases. This reauthorization merely authorizes a return to the program's 1981 spending level. For the last 2 years, this program has had to operate on barebones funding levels provided in continued spending resolutions. A modest increase is provided for fiscal year 1985.

The OTEC program, which is also reauthorized in S. 1098, is another example of the importance of investing in our future. A study commissioned by the Department of Energy has determined that OTEC technology could provide a potential export market worth $200 billion to $300 billion. Yet some people tend to take a very shortsighted view about nurturing the export potential, while other industrial nations—in particular, Japan—forge ahead of us. This bill, in addition to reauthorizing the OTEC program, requires the Federal Government to report to Congress on steps it could and should be taking to eventually achieve our potential in the world market.

This bill also provides authorization for continued analysis and research of polymetallic sulfide deposits recently discovered in deep ocean vents off our Pacific coast. These discoveries may eventually become an enormous financial and strategic resource and it is important that NOAA's work be continued.

The bill provides continued support for the National Advisory Committee on Oceans and Atmosphere, a board which has played an important role in advising Congress and the President on oceans policy. If we value sound and thoughtful management of our ocean and coastal resources, this board's life should be extended.

As I said before, this bill enjoys broad, bipartisan support within the Committee on Merchant Marine and Fisheries. It is a good bill, it is an important bill, and I urge you to support it.

Mr. DYSON. Mr. Speaker, I rise today to support S. 1098, legislation which includes three bills passed unanimously by the House Merchant Marine Committee, including H.R. 1643, the authorization bill for the national sea grant program.

S. 1098 authorizes $42 million in fiscal year 1984 funds for this vital program. This program provides matching funds to colleges and universities to foster research and education on the use and conservation of marine resources.

The sea grant program is a working partnership that maintains a consistent and continuing relationship between the Federal Government, State governments, universities throughout the States, and some of the major marine industries. On the State level, it is a statewide effort, drawing not just from one university, but from all the major research institutions in the State. Each State is part of a regional network, that includes other sea grant efforts in nearby States. The goal is a coordinated effort. The sea grant program provides an opportunity for scientists and scholars to work together, to benefit from each other's work and experience, to get the job done more effectively and quickly.

The sea grant program is problem-oriented in its scope and method. Maryland is fortunate to have an exceptional sea grant program at the University of Maryland, and they bring together some of the most knowledgeable people in the State to work as advisers. The program encourages them to help define the problem issues, and focus on those where it is possible—with limited resources—to make a difference. The program is, of course, university based, recognizing that most of the best scientific talent is in our universities.

The biggest advantage to be gained from this project is the outreach knowledge which is gained from this research, knowledge that others will apply. Sea grant provides the scientific information to people who are interested in communicating its implications in the formation of sound public policy.

A good deal of the research begun in Maryland is already paying off. The University of Maryland's blue crab studies have produced a new and radically different understanding of the fluctuations in the bay's blue crab harvests. The oyster research program by the university under the sea grant program has developed a better understanding about the specific chemical attractant isolated by Maryland researchers that cues oyster larvae to settle and metamorphose into spat. Both of these examples, and there are many more, produced information which will lead to better predictions of harvests, something we know now only because of the sea grant program in Maryland.

And in the end, this increased knowledge pays for itself. According to one estimate, a portion of the program has generated more than $227 million in annual revenues by stimulating growth in fish harvesting, marine construction, seafood processing, and a number of other areas. That $227 million almost equals the Federal Government's total investment in the sea grant program between 1968 and 1981.

The Reagan administration has twice attempted to thwart funding for two important programs contained in S. 1098, the national sea grant program and the National Advisory Committee on Oceans and Atmosphere,

but each time has been unable to do so. It seems unreasonable to me to cut funding for this program which aids in obtaining and applying information on important aquatic issues at a time when its research is beginning to pay off for the Chesapeake Bay and other areas dependent on a healthy marine life.

Congress has recognized the substantial importance of these programs in the past. The Senate passed S. 1098 by voice vote on June 15. I urge my colleagues, now, to continue to support these worthwhile endeavors by passing this legislation.

● Mr. CORRADA. Mr. Speaker, I rise in support of S. 1098, the National Oceanic and Atmospheric Administration Ocean and Coastal Program Authorization Act, which would consolidate and authorize appropriations for various programs under NOAA.

I am particularly supportive of titles II and III of the bill. Title II would authorize $42 million in fiscal year 1984 and $46 million in fiscal year 1985 for the national sea grant program and title III would authorize $620,000 in fiscal year 1984 and $800,000 in fiscal year 1985 for the Ocean Thermal Energy Conversion Act, among other things.

Puerto Rico has greatly benefited from the sea grant program which started on the island in January 1977 with the granting of marine advisory services project to the Humacao University College. It has grown rapidly ever since and, in 1980, the program was granted a coherent status. This achievement ratified the importance, usefulness, and potentialities of the sea grant program to the island's community, university administrators, educators, and government agencies. This program establishes the university-agency-industry cooperation that needs to be promoted on the island and it is the first of its kind working with and for fishermen in Puerto Rico. Approximately 150,000 Puerto Ricans are benefiting from this program which also has been highly successful as well as cost-effective throughout the Nation.

In addition, I want to restate my strong support for OTEC. The reauthorization of Public Law 96-320, the Ocean Thermal Energy Act of 1980 is essential to reaffirm our commitment to the development of OTEC. The environmental studies and licensing procedures must continue to be divulged in an orderly manner to allow this technology to achieve its full potential. The export market is estimated to be between $200 to $300 billion.

Puerto Rico has been at the forefront of this technology for the past 7 years and we look forward to the day when its role in our energy picture is firmly entrenched.

I urge my colleagues to vote for the passage of this legislation which authorizes appropriations for highly important ocean and atmospheric programs.●

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the Senate bill, S. 1098, as amended.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. PRITCHARD. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were refused.

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on S. 1098, the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

ALASKAN HOVERCRAFT

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1372) to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska until November 6, 1988, as amended.

The Clerk read as follows:

H.R. 1372

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding section 27 of the Merchant Marine Act, 1920, or any other law restricting the coastwise trade to vessels of the United States, the vessels Yukon Princess I and ACT-100 may operate within the State of Alaska until November 6, 1985. The repair or reconstruction of either vessel is subject to the same requirements as a vessel qualified to engage in the coastwise trade.

SEC. 2. A vessel named in section 1 may continue to operate until November 6, 1990, if the owner of that vessel, before November 6, 1985, contracts to build or purchase a new comparable hovercraft vessel built in the United States.

The SPEAKER pro tempore. Is a second demanded?

Mr. SNYDER. Mr. Speaker, I demand a second.

The SPEAKER. pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

□ 1430

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes and the gentleman from Kentucky (Mr. SNYDER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1372, as amended, a bill granting a limited extension of a very narrow exception to the Jones Act for hovercraft operating in Alaska.

As originally introduced, the bill would have extended for 5 years the authority of a single hovercraft built overseas to operate in the otherwise restricted coastwise commerce of the United States. The restriction is in section 27 of the Merchant Marine Act of 1920, the so-called Jones Act. That law requires any vessel transporting cargo between points in the United States to be built in the United States and to be continuously owned and operated by U.S. citizens.

In 1978, a 5-year exception from the Jones Act was provided for hovercraft, still in the developmental stage, to be experimented with in and above the frozen coastline of Alaska, where the attributes of hovercraft appeared to be most useful. The experimental work is yet to be completed, and the need for a modest extension is necessary. During consideration of this measure, the committee was made aware of a similar vessel operating under a different exception to the Jones Act (the Yukon River exception). It was determined that it would be in the public interest as well as the interest of the interested parties to fold both vessels into the provisions of H.R. 1372.

At the same time, the committee reexamined the reasons for the Jones Act restructions, and determined that it would be in furtherance of that measure's original purpose if some incentive could be provided, in this bill, to encourage construction of new vessel types in U.S. shipyards. Consequently, the committee approved the subcommittee amendment to shorten the continued exception for the foreign-built hovercraft to 2 years, provided that each may continue to operate in the domestic trade for an additional 5 years if the owner contracts to build a comparable vessel in the United States prior to November 6, 1985.

Mr. Speaker, this is a well-balanced bill deserving the support of all Members. I hope you will all join me in approving H.R. 1372, as amended.

Mr. Speaker, I reserve the balance of my time.

Mr. SNYDER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today the House is considering H.R. 1372. This bill provides a Jones Act waiver that will permit two hovercraft vessels currently operating, to continue to operate, in the Alaska region. The Merchant Marine Subcommittee held a hearing on this bill on June 9 and received testimony from all interested parties. On July 29, the full committee met and reported out H.R. 1372 as ordered by the subcommittee, to extend the waiver until November 6, 1985, and to further permit the vessels to operate until November 6, 1990, if the operators contract to build or purchase a new U.S.-built hovercraft by November 6, 1985.

The Merchant Marine and Fisheries Committee has traditionally been very reluctant to act favorably on legislation to waive the requirements of the Jones Act. This reluctance is premised on the recognition that the Jones Act doctrine forms the cornerstone of our maritime policy. It serves to promote and preserve our U.S. shipbuilding and ship operating industries.

Although the Jones Act is an important maritime law, it is not sacrosanct. In those specific instances in which the committee has found a waiver to the Jones Act to be justified, the legislation has been acted upon favorably—as well it should be. It makes little sense to resist amendments to the Jones Act just for the sake of preserving a doctrine. On the other hand, the burden of proof lies with the proponents of a waiver to show that such legislation will not violate the integrity of the Jones Act.

In the instance of H.R. 1372, the proponents of the legislation did satisfy that burden of proof. These vessels are indeed unique and will serve as a means to demonstrate the usefulness of hovercraft as a form of transportation. In addition, the bill will encourage hovercraft construction in the United States.

The administration has no objection to the bill and I am not aware of any opposition to the bill on this side of the aisle.

Mr. Speaker, I yield such time as he may consume to the illustrious gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, this legislation which I introduced to allow beyond November 1983 the operation of certain hovercraft off the Alaskan coast is noncontroversial, and, thus, is being considered under a suspension of the rules. However, it is nonetheless important to the security and economic well being of our country.

Thus, I want to thank the distinguished chairman of the Merchant Marine and Fisheries Committee, Mr. JONES, for sponsoring this bill with me and for the expeditious handling of this matter by the committee.

In addition, I am deeply grateful to Mr. BIAGGI, chairman of the Merchant Marine Subcommittee, for the time and effort he has taken to develop language to refine H.R. 1372 in such a way that the purpose of the bill can be achieved without impairing the effectiveness of the Jones Act.

Enactment of this bill will enable research, development, and testing to proceed on the use of air cushion vehicles to service and resupply offshore oil rigs year round in the Arctic environment as well as to respond in the event of an emergency despite often impassable terrain.

The ACT 100, an air cushion vehicle owned by Global Marine Development, Inc., of Newport Beach, Calif., has since 1980 been used to demonstrate the ability of hovercraft to operate over water, land, ice, and tundra in all types of weather and with different types of propulsion. GMDI's work with the ACT 100 has contributed significantly to the advancement of air cushion vehicle technology and its utilization for energy exploration and recovery in the Arctic.

However, further development of hovercraft technology is necessary before it can be successfully commercialized. Given the importance of the air cushion vehicle to domestic oil production and the fact that the Global Marine Development, Inc., ACT 100 is the only craft of this type currently operating on the North Slope, it is essential that additional time be granted in which demonstration and testing of the capabilities of this vessel can be completed.

Thus, I urge my colleagues to favorably consider H.R. 1372 to extend the time for certain foreign-built hovercraft to operate in Alaska. By so doing, you will be protecting and enhancing the economy and security of our country.

Mr. SNYDER. Mr. Speaker, I yield such time as he may consume to the distinguished ranking member of the full committee (Mr. FORSYTHE).

Mr. FORSYTHE. Mr. Speaker, I rise in support of H.R. 1372, the bill that would allow the continued use of two foreign-built hovercraft in Alaska.

I think that this legislation is important and timely. The companies that are involved with this issue have been in the forefront of the research and development of hovercraft and their commercial application. It seems appropriate that we allow them to continue.

There is a genuine need for these types of craft in Alaska. They are able to operate in the fragile Arctic environment over water, ice, and land without damaging the tundra.

While I continue to support the application of our Jones Act to vessels operating in our waters, these craft are unique. They are basically designed and built as much like airplanes as they are ships. I hope that, based on the demonstrated success of these hovercraft, U.S. companies will begin building these types of craft in the United States. There certainly seems to be a demand for more hovercraft to be used in many different types of commercial enterprises.

In this regard, I am pleased with this legislation as it was reported by the Merchant Marine and Fisheries Committee. The bill will allow the two U.S. companies involved to continue to operate their foreign-built hovercraft in Alasaka for 2 more years, and, if they contract to build or buy U.S.-built hovercraft within that 2-year period, then they can continue operating the foreign craft for another 5 years.

Mr. Speaker, in our committee we looked at all sides of this issue to balance the competing interests in this situation. This bill represents a good solution. I urge my colleagues to approve this bill.

● Mr. BIAGGI. Mr. Speaker, I rise in support of H.R. 1372, legislation to permit two foreign-built vessels to operate within the waters adjacent to Alaska.

The Jones Act requires that the only U.S.-built vessels transport goods between points in the United States. The vessels within the scope of H.R. 1372 are two foreign-built hovercraft.

A hovercraft is a vessel which travels over land and water on a cushion of air—created by large fans attached to the base of the vessel. These vessels—since they do not come in contact with land—do not damage the fragile Alaskan tundra. They are thus crucial to the environmentally safe development of offshore natural resources in Alaska.

This legislation grants an exemption to the Jones Act for these two vessels for a 2-year period—which could be extended for an additional 5 years if the owner of either vessel agrees to build a comparable hovercraft in the United States.

The extension provision is aimed at generating work for our shipyards and developing a domestic hovercraft construction capacity. This legislation will contribute to the growth of a new industry where the United States could effectively compete in the world market.

I urge my colleagues to join in supporting this legislation.●

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question in on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend

the rules and pass the bill (H.R. 1372), as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended the bill, as amended, was passed.

The SPEAKER pro tempore. Without objection, the amendment to the title is agreed to.

There was no objection.

The title of the bill was amended so as to read: "A bill to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislation days in which to revise and extend their remarks on H.R. 1372, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

CONSOLIDATING AND REENACTING CERTAIN MARINE SAFETY AND SEAMAN'S WELFARE LAWS OF THE UNITED STATES

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (S. 46) to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping," as amended.

The Clerk read as follows:

S. 46

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SUBTITLE II OF TITLE 46, UNITED STATES CODE

SECTION 1. Certain general and permanent laws of the United States, related to vessels and seamen, are revised, consolidated, and enacted as title 46, United States Code, "Shipping", as follows:

TITLE 46—SHIPPING

SUBTITLE	Sec.
I. [Reserved—general]	101
II. Vessels and seamen	2101

[BALANCE OF TITLE RESERVED]

SUBTITLE II—VESSELS AND SEAMEN

PART A—GENERAL PROVISIONS

Chapter	Sec.
21. General	2101
23. Operation of vessels generally	2301

PART B—INSPECTION AND REGULATION OF VESSELS

31. General	3101
33. Inspection generally	3301
35. Carriage of passengers	3501
37. Carriage of liquid bulk dangerous cargoes	3701
39. Carriage of animals	3901
41. Uninspected vessels	4101
43. Recreational vessels	4301

[PART C—RESERVED FOR LOAD LINES OF VESSELS]

PART D—MARINE CASUALTIES

61. Reporting marine casualties	6101
63. Investigating marine casualties	6301

PART E—LICENSES, CERTIFICATES, AND MERCHANT MARINERS' DOCUMENTS

71. Licenses and certificates of registry	7101
73. Merchant mariners' documents	7301
75. General procedures for licensing, certification, and documentation	7501
77. Suspension and revocation	7701

PART F—MANNING OF VESSELS

81. General	8101
83. Masters and officers	8301
85. Pilots	8501
87. Unlicensed personnel	8701
89. Small vessel manning	8901
91. Tank vessel manning standards	9101
93. Great Lakes pilotage	9301

PART G—MERCHANT SEAMEN PROTECTION AND RELIEF

2112. Authority to change working hours.
2113. Authority to exempt certain vessels.

§ 2101. General definitions

In this subtitle—

(1) "associated equipment"—

(A) means—

(i) a system, accessory, component, or appurtenance of a recreational vessel; or

(ii) a marine safety article intended for use on board a recreational vessel; but

(B) does not include radio equipment.

(2) "barge" means a nonself-propelled vessel.

(3) "Boundary Line" means a line established under section 2(b) of the Act of February 19, 1895 (33 U.S.C. 151).

(4) "Coast Guard" means the organization established and continued under section 1 of title 14.

(5) "commercial service" includes any type of trade or business involving the transportation of goods or individuals, except service performed by a combatant vessel.

(6) "consular officer" means an officer or employee of the United States Government designated under regulations to grant visas.

(7) "crude oil" means a liquid hydrocarbon mixture occurring naturally in the earth, whether or not treated to render it suitable for transportation, and includes crude oil from which certain distillate fractions may have been removed, and crude oil to which certain distillate fractions may have been added.

(8) "crude oil tanker" means a tanker engaged in the trade of carrying crude oil.

(9) "discharge", when referring to a substance discharged from a vessel, includes spilling, leaking, pumping, pouring, emitting, emptying, or dumping, however caused.

(10) "documented vessel" means a vessel for which a certificate of documentation has been issued under chapter 121 of this title.

(11) "fisheries" includes planting, cultivating, catching, taking, or harvesting fish, shellfish, marine animals, pearls, shells, or marine vegetation at a place in the fishery conservation zone established by section 101 of the Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1811).

(12) "foreign vessel" means a vessel of foreign registry or operated under the authority of a country except the United States.

(13) "freight vessel" means a motor vessel of more than 15 gross tons that carries freight for hire, except an oceanographic research vessel or an offshore supply vessel.

(14) "hazardous material" means a liquid material or substance that is—

(A) flammable or combustible;

(B) designated a hazardous substance under section 311(b) of the Federal Water Pollution Control Act (33 U.S.C. 1321); or

(C) designated a hazardous material under section 104 of the Hazardous Material Transportation Act (49 U.S.C. 1803);

(15) "marine environment" means—

(A) the navigable waters of the United States and the land and resources in and under those waters;

(B) the waters and fishery resources of an area over which the United States asserts exclusive fishery management authority;

(C) the seabed and subsoil of the outer Continental Shelf of the United States, the resources of the Shelf, and the waters superjacent to the Shelf; and

(D) the recreational, economic, and scenic values of the waters and resources referred to in subclauses (A)-(C) of this clause.

(16) "motor vessel" means a vessel propelled by machinery other than steam.

(17) "nautical school vessel" means a vessel operated by or in connection with a nautical school.

(18) "oceanographic research vessel" means a vessel that the Secretary finds is being employed only in instruction in oceanography or limnology, or both, or only in oceanographic or limnological research, including those studies about the sea such as seismic, gravity meter, and magnetic exploration and other marine geophysical or geological surveys, atmospheric research, and biological research.

(19) "offshore supply vessel" means a motor vessel of more than 15 gross tons but less than 500 gross tons that regularly carries goods, supplies, or equipment in support of exploration, exploitation, or production of offshore mineral or energy resources and is not a small passenger vessel.

(20) "oil" includes oil of any type or in any form, including petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes except dredged spoil.

(21) "passenger"—

(A) on a passenger vessel, means an individual carried on the vessel except—

(i) the master; or

(ii) a crewmember.

(B) on a small passenger vessel, means an individual carried on the vessel except—

(i) the owner or representative of the owner;

(ii) the master or a crewmember engaged in the business of the vessel who has not contributed consideration for carriage and who is paid for services;

(iii) an employee of the owner of the vessel engaged in the business of the owner, except when the vessel is operating under a demise charter;

(iv) an employee of the demise charterer of the vessel engaged in the business of the demise charterer;

(v) a guest on board a vessel that is being operated only for pleasure, or a guest on board a sailing school vessel, who has not contributed consideration for carriage on board;

(vi) an individual on board a towing vessel of at least 50 gross tons who has not contributed consideration for carriage on board; or

(vii) a sailing school instructor or sailing school student.

(C) on an offshore supply vessel, means an individual carried on the vessel except—

(i) the owner;

(ii) a representative of the owner;

(iii) the master;

(iv) a crewmember engaged in the business of the vessel who has not contributed consideration for carriage on board and who is paid for services on board;

(v) an employee of the owner, or of a subcontractor to the owner, engaged in the business of the owner;

(vi) a charterer of the vessel;

(vii) a person with the same relationship to a charterer as a person in subclause (ii) or (v) of this subclause has to an owner;

(viii) a person employed in a phase of exploration, exploitation, or production of offshore mineral or energy resources served by the vessel; or

(ix) a guest who has not contributed consideration for carriage on board.

(D) on an uninspected passenger vessel, means an individual carried on the vessel except—

(i) the owner or representative of the owner;

(ii) the managing operator;

(iii) a crewmember engaged in the business of the vessel who has not contributed consideration for carriage on board and who is paid for services on board; or

(iv) a guest on board a vessel that is being operated only for pleasure who has not contributed consideration for carriage on board.

(22) "passenger vessel" means a vessel of at least 100 gross tons carrying at least one passenger for hire.

(23) "product carrier" means a tanker engaged in the trade of carrying oil except crude oil.

(24) "public vessel" means a vessel that—

(A) is owned, or demise chartered, and operated by the United States Government or a government of a foreign country; and

(B) is not engaged in commercial service.

(25) "recreational vessel" means a vessel—

(A) being manufactured or operated primarily for pleasure; or

(B) leased, rented, or chartered to another for the latter's pleasure.

(26) "recreational vessel manufacturer" means a person engaged in the manufacturing, construction, assembly, or importation of recreational vessels, components, or associated equipment.

(27) "sailing instruction" means teaching, research, and practical experience in operating vessels propelled primarily by sail and may include any subject related to that operation and to the sea, including seamanship, navigation, oceanography, other nautical and marine sciences, and maritime history and literature.

(28) "sailing school instructor" means an individual who is on board a sailing school vessel to provide sailing instruction, but does not include an operator or crewmember who is among those required to be on board the vessel to meet a requirement established under part F of this subtitle.

(29) "sailing school student" means an individual who is on board a sailing school vessel to receive sailing instruction.

(30) "sailing school vessel" means a vessel—

(A) that is less than 500 gross tons;

(B) carrying at least 6 individuals who are sailing school instructors or sailing school students;

(C) principally equipped for propulsion by sail, even if the vessel has an auxiliary means of propulsion; and

(D) owned or demise chartered, and operated by an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) and exempt from tax under section 501(a) of that Code, or by a State or political subdivision of a State, during times that the vessel is operated by the organization, State, or political subdivision only for sailing instruction.

(31) "scientific personnel" means individuals on board an oceanographic research vessel only to engage in scientific research, or to instruct or receive instruction in oceanography or limnology.

(32) "seagoing barge" means a non-self-propelled vessel of at least 100 gross tons making voyages beyond the Boundary Line.

(33) "seagoing motor vessel" means a motor vessel of at least 300 gross tons making voyages beyond the Boundary Line.

(34) "Secretary" means the head of the department in which the Coast Guard is operating.

(35) "small passenger vessel" means a vessel of less than 100 gross tons carrying more than 6 passengers (as defined in clause (21)(B) and (C) of this section).

(36) "State" means a State of the United States, Guam, Puerto Rico, the Virgin Islands, American Samoa, the District of Columbia, the Northern Mariana Islands, and any other territory or possession of the United States.

(37) "steam vessel" means a vessel propelled in whole or in part by steam, except a recreational vessel of not more than 40 feet in length.

(38) "tanker" means a self-propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces.

(39) "tank vessel" means a vessel that is constructed or adapted to carry, or that carries, oil or hazardous material in bulk as cargo or cargo residue, and that—

(A) is a vessel of the United States;

(B) operates on the navigable waters of the United States; or

(C) transfers oil or hazardous material in a port or place subject to the jurisdiction of the United States.

(40) "towing vessel" means a commercial vessel engaged in or intending to engage in the service of pulling, pushing, or hauling along side, or any combination of pulling, pushing, or hauling along side.

(41) "undocumented" means not having and not required to have a document issued under chapter 121 of this title.

(42) "uninspected passenger vessel" means an uninspected vessel carrying not more than 6 passengers.

(43) "uninspected vessel" means a vessel not subject to inspection under section 3301 of this title that is not a recreational vessel.

(44) "United States", when used in a geographic sense, means the States of the United States, Guam, Puerto Rico, the Virgin Islands, American Samoa, the District of Columbia, the Northern Mariana Islands, and any other territory or possession of the United States.

(45) "vessel" has the same meaning given that term in section 3 of title 1.

(46) "vessel of the United States" means a vessel documented or numbered under the laws of the United States.

§ 2102. Limited definitions

In chapters 43 and 123 of this title and part I of this subtitle—

(1) "eligible State" means a State that has a State recreational boating safety and facilities improvement program accepted by the Secretary.

(2) "State" and "United States", in addition to their meanings under section 2101 (36) and (44) of this title, include the Trust Territory of the Pacific Islands.

(3) "State recreational boating facilities improvement program"—

(A) means a program to develop or improve public facilities that establish or add to public access to the waters of the United States to improve their suitability for recreational boating, including ancillary facilities necessary to ensure the safe use of those facilities; and

(B) includes acquiring title or an interest in riparian or submerged land, and the capital improvement of riparian or submerged land, to increase public access to the waters of the United States.

(4) "State recreational boating safety and facilities improvement program" means a State recreational boating safety program, or a State recreational boating facilities improvement program, or both.

(5) "State recreational boating safety program" means education, assistance, and enforcement activities conducted for marine casualty prevention, reduction, and reporting for recreational boating.

§ 2103. Superintendence of the merchant marine

The Secretary has general superintendence over the merchant marine of the United States and of merchant marine personnel insofar as the enforcement of this subtitle is concerned and insofar as those vessels and personnel are not subject, under other law, to the supervision of another official of the United States Government. In the interests of marine safety and seamen's welfare, the Secretary shall enforce this subtitle and shall carry out correctly and uniformly administer this subtitle and regulations prescribed under this subtitle.

§ 2104. Delegation

(a) The Secretary may delegate the duties and powers conferred by this subtitle to any officer, employee, or member of the Coast Guard, and may provide for the subdelegation of those duties and powers.

(b) When this subtitle authorizes an officer or employee of the Customs Service to act in place of a Coast Guard official, the Secretary may designate that officer or employee subject to the approval of the Secretary of the Treasury.

§ 2105. Report

The Secretary shall provide for the investigation of the operation of this subtitle and of all laws related to marine safety, and shall require that a report be made to the Secretary annually about those matters that may require improvement or amendment.

§ 2106. Liability in rem

When a vessel is made liable in rem under this subtitle, the vessel may be libeled and proceeded against in a district court of the United States in which the vessel is found.

§ 2107. Civil penalty procedures

(a) After notice and an opportunity for a hearing, a person found by the Secretary to have violated this subtitle or a regulation prescribed under this subtitle for which a civil penalty is provided, is liable to the United States Government for the civil penalty provided. The amount of the civil penalty shall be assessed by the Secretary by written notice. In determining the amount of the penalty, the Secretary shall consider the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and other matters that justice requires.

(b) The Secretary may compromise, modify, or remit, with or without consideration, a civil penalty under this subtitle until the assessment is referred to the Attorney General.

(c) If a person fails to pay an assessment of a civil penalty after it has become final, the Secretary may refer the matter to the Attorney General for collection in an appropriate district court of the United States.

§ 2108. Refund of penalties

The Secretary may refund or remit a civil penalty collected under this subtitle if—

(1) application has been made for refund or remission of the penalty within one year from the date of payment; and

(2) the Secretary finds that the penalty was unlawfully, improperly, or excessively imposed.

§ 2109. Public vessels

This subtitle does not apply to a public vessel of the United States. However, this subtitle does apply to a vessel (except a Coast Guard or a Saint Lawrence Seaway Development Corporation vessel) owned or operated by the Department of Transportation or by any corporation organized or controlled by the Department.

§ 2110. Fees prohibited

Fees may not be charged or collected by the Secretary for services provided for in this subtitle related to the engagement and discharge of seamen, the inspection and examination of vessels, the licensing of masters, mates, pilots, and engineers, and the measurement or documentation of vessels, except when specifically provided for in this subtitle.

§ 2111. Pay for overtime services

(a) The Secretary may prescribe a reasonable rate of extra pay for overtime services of civilian officers and employees of the Coast Guard required to remain on duty between 5 p.m. and 8 a.m., or on Sundays or holidays, to perform services related to—

(1) the inspection of vessels or their equipment;

(2) the engagement and discharge of crews of vessels;

(3) the measurement of vessels; and

(4) the documentation of vessels.

(b) Except for Sundays and holidays, the overtime rate provided under subsection (a) of this section is one-half day's additional pay for each 2 hours of overtime (or part of 2 hours of at least one hour). The total extra pay may be not more than 2 and one-half days' pay for any one period from 5 p.m. to 8 a.m.

(c) The overtime rate provided under subsection (a) of this section for Sundays and holidays is 2 additional days' pay.

(d) The owner, charterer, managing operator, agent, master, or individual in charge of the vessel shall pay the amount of the overtime pay provided under this section to the official designated by regulation. The official shall deposit the amount paid to the Treasury as miscellaneous receipts. Payment to the officer or employee entitled to the pay shall be made from the annual appropriations for salaries and expenses of the Coast Guard.

(e) The overtime pay provided under this section shall be paid if the authorized officers and employees have been ordered to report for duty and have reported, even if services requested were not performed.

§ 2112. Authority to change working hours

In a port at which the customary working hours begin before 8 a.m. or end after 5 p.m., the Secretary may regulate the working hours of the officers and employees referred to in section 2111 of this title so that those hours conform to the prevailing working hours of the port. However—

(1) the total period for which overtime pay may be required under section 2111 of this title may not be more than 15 hours between any 2 periods of ordinary working hours on other than Sundays and holidays;

(2) the length of the working day for the officers and employees involved may not be changed; and

(3) the rate of overtime pay may not be changed.

§ 2113. Authority to exempt certain vessels

If the Secretary decides that the application of a provision of part B or F of this subtitle is not necessary in performing the mission of a vessel engaged in excursions or an oceanographic research vessel, the Secretary by regulation may—

(1) for an excursion vessel, issue a special permit specifying the conditions of operation and equipment; and

(2) exempt the oceanographic research vessel from that provision under conditions the Secretary may specify.

CHAPTER 23—OPERATION OF VESSELS GENERALLY

Sec.
2301. Application.
2302. Penalties for negligent operations.
2303. Duties related to marine casualty assistance.
2304. Duty to provide assistance at sea.
2305. Injunctions.

§ 2301. Application

This chapter applies to a vessel operated on waters subject to the jurisdiction of the United States and, for a vessel owned in the United States, on the high seas.

§ 2302. Penalties for negligent operations

(a) A person operating a vessel in a negligent manner that endangers the life, limb, or property of a person is liable to the United States Government for a civil penalty of not more than $1,000.

(b) A person operating a vessel in a grossly negligent manner that endangers the life, limb, or property of a person shall be fined not more than $5,000, imprisoned for not more than one year, or both.

(c) For a penalty imposed under this section, the vessel also is liable in rem unless the vessel is—

(1) owned by a State or a political subdivision of a State;

(2) operated principally for governmental purposes; and

(3) identified clearly as a vessel of that State or subdivision.

§ 2303. Duties related to marine casualty assistance and information

(a) The master or individual in charge of a vessel involved in a marine casualty shall—

(1) render necessary assistance to each individual affected to save that affected individual from danger caused by the marine casualty, so far as the master or individual in charge can do so without serious danger to the master's or individual's vessel or to individuals on board; and

(2) give the master's or individual's name and address and identification of the vessel to the master or individual in charge of any other vessel involved in the casualty, to any individual injured, and to the owner of any property damaged.

(b) An individual violating this section or a regulation prescribed under this section shall be fined not more than $1,000 or imprisoned for not more than 2 years. The vessel also is liable in rem to the United States Government for the fine.

(c) An individual complying with subsection (a) of this section or gratuitously and in good faith rendering assistance at the scene of a marine casualty without objection by an individual assisted, is not liable for damages as a result of rendering assistance or for an act or omission in providing or arranging salvage, towage, medical treatment, or other assistance when the individual acts as an ordinary, reasonable, and prudent individual would have acted under the circumstances.

§ 2304. Duty to provide assistance at sea

(a) A master or individual in charge of a vessel shall render assistance to any individual found at sea in danger of being lost, so far as the master or individual in charge can do so without serious danger to the master's or individual's vessel or individuals on board.

(b) A master or individual violating this section shall be fined not more than $1,000, imprisoned for not more than 2 years, or both.

§ 2305. Injunctions

(a) The district courts of the United States have jurisdiction to enjoin the negligent operation of vessels prohibited by this chapter on the petition of the Attorney General for the United States Government.

(b) When practicable, the Secretary shall—

(1) give notice to any person against whom an action for injunctive relief is considered under this section an opportunity to present that person's views; and

(2) except for a knowing and willful violation, give the person a reasonable opportunity to achieve compliance.

(c) The failure to give notice and opportunity to present views under subsection (b) of this section does not preclude the court from granting appropriate relief.

PART B—INSPECTION AND REGULATION OF VESSELS

CHAPTER 31—GENERAL

Sec.
3101. Authority to suspend inspection.

§ 3101. Authority to suspend inspection

When the President decides that the needs of foreign commerce require, the President may suspend a provision of this part for a foreign-built vessel registered as a vessel of the United States on conditions the President may specify.

CHAPTER 33—INSPECTION GENERALLY

Sec.
3301. Vessels subject to inspection.
3302. Exemptions.
3303. Reciprocity for foreign vessels.
3304. Carrying individuals in addition to crew.
3305. Scope and standards of inspection.
3306. Regulations.
3307. Frequency of inspection.
3308. Examinations.
3309. Certificate of inspection.
3310. Records of certification.
3311. Certificate of inspection required.
3312. Display of certificate of inspection.
3313. Compliance with certificate of inspection.
3314. Expiration of certificate of inspection.
3315. Disclosure of defects and protection of informants.
3316. United States classification societies.
3317. Fees.
3318. Penalties.

§ 3301. Vessels subject to inspection

The following categories of vessels are subject to inspection under this part:

(1) freight vessels.
(2) nautical school vessels.
(3) offshore supply vessels.
(4) passenger vessels.
(5) sailing school vessels.
(6) seagoing barges.
(7) seagoing motor vessels.
(8) small passenger vessels.
(9) steam vessels.
(10) tank vessels.

§ 3302. Exemptions

(a) A vessel is not excluded from one category only because the vessel is—

(1) included in another category of section 3301 of this title; or

(2) excluded by this section from another category of section 3301 of this title.

(b) A motor vessel engaged in fishing as a regular business, including oystering, clamming, crabbing, or the kelp or sponge industry, is exempt from section 3301 (1), (4), and (7) of this title.

(c)(1) Before January 1, 1988, a motor vessel is exempt from section 3301 (1), (4), and (7) of this title if the vessel is not more than 500 gross tons and—

(A) is a cannery tender or a fishing tender in the salmon or crab fisheries of Alaska, Oregon, and Washington; and

(B) only carries cargo to or from vessels in those fisheries or a facility used in processing or assembling fishery products, or transports cannery or fishing personnel to or from operating locations.

(2) Before January 1, 1988, a vessel is exempt from section 3301 (1), (4), (6), and (7) of this title if the vessel is not more than 5,000 gross tons and is used only in processing and assembling fishery products in the fisheries of Alaska, Oregon, and Washington.

(d)(1) A motor vessel of less than 150 gross tons, constructed before August 23, 1958, is not subject to inspection under section 3301(1) of this title if the vessel is owned or demise chartered to a cooperative or association that only transports cargo owned by at least one of its members on a nonprofit basis between places within the waters of—

(A) southeastern Alaska shoreward of the Boundary Line; or

(B) southeastern Alaska shoreward of the Boundary Line and—

(i) Prince Rupert, British Columbia; or

(ii) waters of Washington shoreward of the Boundary Line, via sheltered waters, as defined in article I of the treaty dated December 9, 1933, between the United States and Canada defining certain waters as sheltered waters.

(2) The transportation authorized under this subsection is limited to and from places not receiving annual weekly transportation service from any part of the United States by an established water common carrier. However, the limitation does not apply to transporting cargo of a character not accepted for transportation by that carrier.

(e) A vessel laid up, dismantled, or out of commission is exempt from inspection.

(f) Section 3301 (4) and (8) of this title does not apply to an oceanographic research vessel because it is carrying scientific personnel.

(g)(1) Except when compliance with major structural or major equipment requirements is necessary to remove an especially hazardous condition, an offshore supply vessel is not subject to regulations or standards for those requirements if the vessel—

(A) was operating as an offshore supply vessel before January 2, 1979; or

(B) was contracted for before January 2, 1979, and entered into service as an offshore supply vessel before October 6, 1980.

(2) After December 31, 1988, this subsection does not apply to an offshore supply vessel that is at least 20 years of age.

(h) An offshore supply vessel operating on January 1, 1979, under a certificate of inspection issued by the Secretary, is subject to an inspection standard or requirement only if the standard or requirement could have been prescribed for the vessel under authority existing under law on October 5, 1980.

(i)(1) The Secretary may issue a permit exempting a vessel from any part of the requirements of this part for vessels transporting cargo, including bulk fuel, from one place in Alaska to another place in Alaska only if the vessel—

(A) is not more than 300 gross tons;

(B) is in a condition that does not present an immediate threat to the safety of life or the environment; and

(C) was operating in the waters off Alaska as of June 1, 1976, or the vessel is a replacement for a vessel that was operating in the waters off Alaska as of June 1, 1976, if the vessel being replaced is no longer in service.

(2) Except in a situation declared to be an emergency by the Secretary, a vessel operating under a permit may not transport cargo to or from a place if the cargo could be transported by another commercial vessel that is reasonably available and that does not require exemptions to operate legally or if the cargo could be readily transported by overland routes.

(3) A permit may be issued for a specific voyage or for not more than one year. The permit may impose specific requirements about the amount or type of cargo to be carried, manning, the areas or specific routes over which the vessel may operate, or other similar matters. The duration of the permit and restrictions contained in the permit shall be at the sole discretion of the Secretary.

(4) A designated Coast Guard official who has reason to believe that a vessel issued a permit is in a condition or is operated in a manner that creates an immediate threat to the safety of life or the environment or is operated in a manner that is inconsistent with the terms of the permit, may direct the master or individual in charge to take immediate and reasonable steps to safeguard life and the environment, including directing the vessel to a port or other refuge.

(5) If a vessel issued a permit creates an immediate threat to the safety of life or the environment, or is operated in a manner inconsistent with the terms of the permit or the requirements of paragraph (2) of this subsection, the permit may be revoked. The owner, charter, managing operator, agent, master, or individual in charge of a vessel issued a permit, that willfully permits the vessel to be operated, or operates, the vessel in a manner inconsistent with the terms of the permit, is liable to the United States Government for a civil penalty of not more than $1,000.

(j) Notwithstanding another provision of this chapter, the Secretary is not required to inspect or prescribe regulations for a nautical school vessel of not more than 15 gross tons—

(1) when used in connection with a course of instruction dealing with any aspect of maritime education or study; and

(2) operated by—

(A) the United States Merchant Marine Academy; or

(B) a State maritime academy assisted under section 1304 of the Merchant Marine Act, 1936 (46 App. U.S.C. 1295(c)).

§ 3303. Reciprocity for foreign vessels

(a) Except as provided in chapter 37 of this title, a foreign vessel of a country having inspection laws and standards similar to those of the United States and that has an unexpired certificate of inspection issued by proper authority of its respective country, is subject only to an inspection to ensure that the condition of the vessel's propulsion equipment and lifesaving equipment are as stated in its current certificate of inspection. A foreign country is considered to have inspection laws and standards similar to those of the United States when it is a party to an International Convention for Safety of Life at Sea to which the United States Government is currently a party. A foreign certificate of inspection may be accepted as evidence of lawful inspection only when presented by a vessel of a country that has by its laws accorded to vessels of the United States visiting that country the same privileges accorded to vessels of that country visiting the United States.

(b) The Secretary shall collect and pay to the Treasury the same fees for the inspection of foreign vessels carrying passengers from the United States that a foreign country charges vessels of the United States trading to the ports of that country. The Secretary may waive at any time the collection of the fees on notice of the proper authorities of any country concerned that the collection of fees for the inspection of vessels of the United States has been discontinued.

§ 3304. Carrying individuals in addition to crew

(a) A documented vessel carrying cargo that carries not more than 12 individuals in addition to the crew on international voyages, or not more than 16 individuals in addition to the crew on other voyages, is not subject to inspection as a passenger vessel or a small passenger vessel.

(b) Before an individual in addition to the crew is carried on a vessel as permitted by this section, the owner, charterer, managing operator, agent, master, or individual in charge of the vessel first shall notify the individual of the presence on board of dangerous articles as defined by law, and of other conditions or circumstances that would constitute a risk of safety to the individual on board.

(c) The privilege authorized by this section applies to a vessel of a foreign country that affords a similar privilege to vessels of the United States in trades not restricted to vessels under its own flag.

§ 3305. Scope and standards of inspection

(a) The inspection process shall ensure that a vessel subject to inspection—

(1) is of a structure suitable for the service in which it is to be employed;

(2) is equipped with proper appliances for lifesaving, fire prevention, and firefighting;

(3) has suitable accommodations for the crew, sailing school instructors, and sailing school students, and for passengers on the vessel if authorized to carry passengers;

(4) is in a condition to be operated with safety to life and property; and

(5) complies with applicable marine safety laws and regulations.

(b) If an inspection, or examination under section 3308 of this title, reveals that a life preserver, life-saving device, or firehose is defective and incapable of being repaired, the owner or master shall destroy the life preserver or firehose in the presence of the official conducting the inspection or examination.

(c) A nautical school vessel operated by a civilian nautical school shall be inspected like a small passenger vessel or a passenger vessel, depending on its tonnage.

§ 3306. Regulations

(a) To carry out this part and to secure the safety of individuals and property on board vessels subject to inspection, the Secretary shall prescribe necessary regulations to ensure the proper execution of, and to carry out, this part in the most effective manner for—

(1) the design, construction, alteration, repair, and operation of those vessels, including superstructures, hulls, fittings, equipment, appliances, propulsion machinery, auxiliary machinery, boilers, unfired pressure vessels, piping, electric installations, and accommodations for passengers and crew, sailing school instructors, and sailing school students;

(2) lifesaving equipment and its use;

(3) firefighting equipment, its use, and precautionary measures to guard against fire;

(4) inspections and tests related to clauses (1)–(3) of this subsection; and

(5) the use of vessel stores and other supplies of a dangerous nature.

(b) Equipment subject to regulation under this section may not be used on any vessel without prior approval as prescribed by regulation.

(c) In prescribing regulations for sailing school vessels, the Secretary shall consult with representatives of the private sector having experience in the operation of vessels likely to be certificated as sailing school vessels. The regulations shall—

(1) reflect the specialized nature of sailing school vessel operations, and the character, design, and construction of vessels operating as sailing school vessels; and

(2) include requirements for notice to sailing school instructors and sailing school students about the specialized nature of sailing school vessels and applicable safety regulations.

(d) In prescribing regulations for nautical school vessels operated by the United States Merchant Marine Academy or by a State maritime academy (as defined in section 1302(3) of the Merchant Marine Act, 1936 (46 App. U.S.C. 1295a(3))), the Secretary shall consider the function, purpose, and operation of the vessels, their routes, and the number of individuals who may be carried on the vessels.

(e) When the Secretary finds it in the public interest, the Secretary may suspend or grant exemptions from the requirements of a regulation prescribed under this section related to lifesaving and firefighting equipment, muster lists, ground tackle and hawsers, and bilge systems.

(f) In prescribing regulations for offshore supply vessels, the Secretary shall consider the characteristics, methods of operation, and the nature of the service of offshore supply vessels.

§ 3307. Frequency of inspection

Each vessel subject to inspection under this part shall undergo an initial inspection for certification before being put into service. After being put into service—

(1) each passenger vessel and nautical school vessel shall be inspected at least once a year;

(2) each small passenger vessel, freight vessel or offshore supply vessel of less than 100 gross tons, and sailing school vessel shall be inspected at least once every 3 years; and

(3) any other vessel shall be inspected at least once every 2 years.

§ 3308. Examinations

In addition to inspections required by section 3307 of this title, the Secretary shall examine—

(1) each vessel subject to inspection at proper times to ensure compliance with law and regulations; and

(2) crewmember accommodations on each vessel subject to inspection at least once a month or when the vessel enters United States ports to ensure that the accommodations are—

(A) of the size required by law and regulations;

(B) properly ventilated and in a clean and sanitary condition; and

(C) equipped with proper plumbing and mechanical appliances required by law and regulations, and the appliances are in good working condition.

§ 3309. Certificate of inspection

(a) When an inspection under section 3307 of this title has been made and a vessel has been found to be in compliance with the requirements of law and regulations, a certificate of inspection, in a form prescribed by the Secretary, shall be issued to the vessel.

(b) The Secretary may issue a temporary certificate of inspection in place of a regular certificate of inspection issued under subsection (a) of this section.

§ 3310. Records of certification

The Secretary shall keep records of certificates of inspection of vessels and of all acts in the examination and inspection of vessels, whether of approval or disapproval.

§ 3311. Certificate of inspection required

A vessel subject to inspection under this part may not be operated without having on board a valid certificate of inspection issued under section 3309 of this title.

§ 3312. Display of certificate of inspection

The certificate of inspection issued to a vessel under section 3309 of this title shall be displayed, suitably framed, in a conspicuous place on the vessel. When it is not practicable to so display the certificate, it shall be carried in the manner prescribed by regulation.

§ 3313. Compliance with certificate of inspection

(a) During the term of a vessel's certificate of inspection, the vessel must be in compliance with its conditions, unless relieved by a suspension or an exemption granted under section 3306(e) of this title.

(b) When a vessel is not in compliance with its certificate or fails to meet a standard prescribed by this part or a regulation prescribed under this part—

(1) the owner, charterer, managing operator, agent, master, or individual in charge shall be ordered in writing to correct the noted deficiencies promptly;

(2) the Secretary may permit any repairs to be made at a place most convenient to the owner, charterer, or managing operator when the Secretary decides the repairs can be made with safety to those on board and the vessel;

(3) the vessel may be required to cease operating at once; and

(4) if necessary, the certificate shall be suspended or revoked.

(c) The vessel's certificate of inspection shall be revoked if a condition unsafe to life that is ordered to be corrected under this section is not corrected at once.

(d) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel whose certificate has been suspended or revoked shall be given written notice immediately of the suspension or revocation. The owner or master may appeal to the Secretary the suspension or revocation within 30 days of receiving the notice, as provided by regulations prescribed by the Secretary.

§ 3314. Expiration of certificate of inspection

(a) If the certificate of inspection of a vessel expires when the vessel is on a foreign voyage, the vessel may complete the voyage to a port of the United States within 30 days of the expiration of the certificate without incurring the penalties for operating without a certificate of inspection.

(b) If the certificate of inspection would expire within 15 days of sailing on a foreign voyage from a United States port, the vessel shall secure a new certificate of inspection before sailing, unless the voyage is scheduled to be completed prior to the expiration date of the certificate. If a voyage scheduled to be completed in that time is not so completed, the applicable penalties may be enforced unless the failure to meet the schedule was beyond the control of the owner, charterer, managing operator, agent, master, or individual in charge of the vessel.

(c) When the certificate of inspection of a foreign vessel carrying passengers, operated on a regularly established line, expires at sea after leaving the country to which it belongs or when the vessel is in the United States, the Secretary may permit the vessel to sail on its regular route without further inspection than would have been required had the certificate not expired. This permission applies only when the vessel will be regularly inspected and issued a certificate before the vessel's next return to the United States.

§ 3315. Disclosure of defects and protection of informants

(a) Each individual licensed under part E of this subtitle shall assist in the inspection or examination under this part of the vessel on which the individual is serving, and shall point out defects and imperfections known to the individual in matters subject to regulations and inspection. The individual also shall make known to officials designated to enforce this part, at the earliest opportunity, any marine casualty producing serious injury to the vessel, its equipment, or individuals on the vessel.

(b) An official may not disclose the name of an individual providing information under this section, or the source of the information, to a person except a person authorized by the Secretary. An official violating this subsection is liable to disciplinary action under applicable law.

§ 3316. United States classification societies

(a) In carrying out this part, the Secretary may rely on reports, documents, and certificates issued by the American Bureau of Shipping or a similar United States classification society, or an agent of the Bureau or society.

(b) Each department, agency, and instrumentality of the United States Government shall recognize the Bureau as its agent in classifying vessels owned by the Government and in matters related to classification, as long as the Bureau is maintained as an organization having no capital stock and paying no dividends. The Secretary and the Secretary of Transportation each shall appoint one representative (except when the Secretary is the Secretary of Transportation, in which case the Secretary shall appoint both representatives) who shall represent the Government on the executive committee of the Bureau. The Bureau shall agree that the representatives shall be accepted by it as active members of the committee. The representatives shall serve without compensation, except for necessary traveling expenses.

(c)(1) To the maximum extent practicable, the Secretary may delegate to the Bureau or a similar United States classification society, or an agent of the Bureau or society, the inspection or examination, in the United States or in a foreign country, of a vessel documented or to be documented as a vessel of the United States. The Bureau, society, or agent may issue the certificate of inspection required by this part and other certificates essential to documentation.

(2) When an inspection or examination has been delegated under this subsection, the Secretary's delegate—

(A) shall maintain in the United States complete files of all information derived from or necessarily connected with the inspection or examination for at least 2 years after the vessel ceases to be certified; and

(B) shall permit access to those files at all reasonable times to any officer, employee, or member of the Coast Guard designated—

(i) as a marine inspector and serving in a position as a marine inspector; or

(ii) in writing by the Secretary to have access to those files.

(d) The Secretary also may make an agreement with or use the Bureau or a similar United States classification society, or an agent of the Bureau or society, for reviewing and approving plans required for issuing a certificate of inspection.

§ 3317. Fees

(a) The Secretary may prescribe by regulation fees for inspecting or examining a small passenger vessel or a sailing school vessel.

(b) When an inspection or examination under this chapter of a documented vessel is conducted at a foreign port or place at the request of the owner or managing operator of the vessel, the owner or operator shall reimburse the Secretary for the travel and subsistence expenses incurred by the personnel assigned to perform the inspection or examination. Amounts received as reimbursement for these expenses shall be credited to the appropriation for operating expenses of the Coast Guard.

§ 3318. Penalties

(a) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel operated in violation of this part or a regulation prescribed under this part, and a person violating a regulation that applies to a small passenger vessel, freight vessel of less than 100 gross tons, or sailing school vessel, are liable to the United States Government for a civil penalty of $1,000, except that when the violation involves operation of a barge, the penalty is $500. The vessel also is liable in rem for the penalty.

(b) A person that knowingly manufactures, sells, offers for sale, or possesses with intent to sell, any equipment subject to this part, and the equipment is so defective as to be insufficient to accomplish the purpose for which it is intended, shall be fined not more than $10,000, imprisoned for not more than 5 years, or both.

(c) A person that employs a means or device whereby a boiler may be subjected to a pressure greater than allowed by the terms of the vessel's certificate of inspection shall be fined not more than $2,000, imprisoned for not more than 5 years, or both.

(d) A person that deranges or hinders the operation of any machinery or device employed on a vessel to denote the state of steam or water in any boiler or to give warning of approaching danger, or permits the water level of any boiler when in operation of a vessel to fall below its prescribed low-water line, shall be fined not more than $2,000, imprisoned for not more than 5 years, or both.

(e) A person that alters, defaces, obliterates, removes, or destroys any plans or specifications required by and approved under a regulation prescribed under section 3306 of this title, with intent to deceive or impede any official of the United States in carrying out that official's duties, shall be fined not more than $2,000, imprisoned for not more than 2 years, or both.

(f) A person shall be fined not less than $1,000 but not more then $5,000, and imprisoned for not less than 2 years but not more then 5 years, if the person—

(1) forges or counterfeits with intent to make it appear genuine any mark or stamp prescribed for material to be tested and approved under section 3306 of this title or a regulation prescribed under section 3306;

(2) knowingly uses, affixes, or causes to be used or affixed, any such forged or counterfeited mark or stamp to or on material of any description;

(3) with fraudulent intent, possesses any such mark, stamp, or other device knowing it to be forged or counterfeited; or

(4) with fraudulent intent, marks or causes to be marked with the trademark or name of another, material required to be tested and approved under section 3306 of this title or a regulation prescribed under section 3306.

(g) A person shall be fined not more than $10,000, imprisoned for not more than one year, or both, if the person—

(1) interferes with the inspection of a nautical school vessel;

(2) violates a regulation prescribed for a nautical school vessel;

(3) is an owner of a nautical school vessel operated in violation of this part; or

(4) is an officer or member of the board of directors of a school, organization, association, partnership, or corporation owning a nautical school vessel operated in violation of a regulation prescribed for a nautical school vessel.

(h) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel that fails to give the notice required by section 3304(b) of this title is liable to the United States Government for a civil penalty of not more than $500. The vessel also is liable in rem for the penalty.

CHAPTER 35—CARRIAGE OF PASSENGERS

Sec.
3501. Number of passengers.
3502. List or count of passengers.
3503. Fire-retardant materials.
3504. Notification to passengers.
3505. Prevention of departure.
3506. Copies of laws.

§ 3501. Number of passengers

(a) Each certificate of inspection issued to a vessel carrying passengers (except a ferry), shall include a statement on the number of passengers that the vessel is permitted to carry.

(b) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel is liable to a person suing them for carrying more passengers than the number of passengers permitted by the certificate of inspection in an amount equal to—

(1) passage money; and

(2) $100 for each passenger in excess of the number of passengers permitted.

(c) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel that knowingly violates subsection (b) of this section also shall be fined not more than $100, imprisoned for not more than 30 days, or both.

(d) The vessel also is liable in rem for a penalty under this section.

(e) An offshore supply vessel may not carry passengers except in an emergency.

§ 3502. List or count of passengers

(a) The owner, charterer, managing operator, master, or individual in charge of the following categories of vessels carrying passengers shall keep a correct list of passengers received and delivered from day to day:

(1) vessels arriving from foreign ports (except at United States Great Lakes ports from Canadian Great Lakes ports).

(2) seagoing vessels in the coastwise trade.

(3) passenger vessels making voyages of more than 300 miles on the Great Lakes except from a Canadian to a United States port.

(b) The master of a vessel carrying passengers (except a vessel listed in subsection (a) of this section) shall keep a correct count of all passengers received and delivered.

(c) Lists and counts required under this section shall be open to the inspection of designated officials of the Coast Guard and the Customs Service at all times. The total number of passengers shall be provided to the Coast Guard when requested.

(d) This section applies to a foreign vessel arriving at a United States port.

(e) The owner, charterer, managing operator, master, or individual in charge of a passenger vessel failing to make a list or count of passengers as required by this section is liable to the United States Government for a civil penalty of $100. The vessel also is liable in rem for the penalty.

§ 3503. Fire-retardant materials

A passenger vessel of the United States having berth or stateroom accommodations for at least 50 passengers shall be granted a certificate of inspection only if the vessel is constructed of fire-retardant materials. Before November 1, 1988, this section does not apply to a vessel operating only on the inland rivers.

§ 3504. Notification to passengers

(a) A person selling passage on a foreign or domestic passenger vessel having berth or stateroom accommodations for at least 50 passengers and embarking passengers at United States ports for a coastwise or an international voyage shall notify each prospective passenger of the safety standards applicable to the vessel in a manner prescribed by regulation.

(b) All promotional literature or advertising through any medium of communication in the United States offering passage or soliciting passengers for ocean voyages anywhere in the world shall include information similar to the information described in subsection (a) of this section, and shall specify the registry of each vessel named, as a part of the advertisement or description of the voyage. Except for the inclusion of the country of registry of the vessel, this subsection does not apply to voyages by vessels meeting the safety standards described in section 3505 of this title.

(c) A person violating this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of not more than $10,000. If the violation involves the sale of tickets for passage, the owner, charterer, managing operator, agent, master, individual in charge, or any other person involved in each violation also is liable to the Government for a civil penalty of $500 for each ticket sold. The vessel on which passage is sold also is liable in rem for a violation of this section or a regulation prescribed under this section.

§ 3505. Prevention of departure

Notwithstanding section 3303(a) of this title, a foreign or domestic vessel of more than 100 gross tons having berth or stateroom accommodations for at least 50 passengers may not depart from a United States port with passengers who are embarked at that port, if the Secretary finds that the vessel does not comply with the standards stated in the International Convention for the Safety of Life at Sea to which the United States Government is currently a party.

§ 3506. Copies of laws

A master of a passenger vessel shall keep on board a copy of this subtitle, to be provided by the Secretary at reasonable cost. If the master fails to do so, the master is liable to the United States Government for a civil penalty of $200.

CHAPTER 37—CARRIAGE OF LIQUID BULK DANGEROUS CARGOES

§ 3701. Definitions

In this chapter—

(1) "existing", when referring to a type of vessel to which this chapter applies, means a vessel that is not a new vessel.

(2) "major conversion" means a conversion of an existing vessel that substantially changes the dimensions or carrying capacity of the vessel or changes the type of vessel or substantially prolongs its life or that otherwise so changes the vessel that it is essentially a new vessel, as decided by the Secretary.

(3) "new", when referring to a type of vessel to which this chapter applies, means a vessel—

(A) for which the building contract is placed after June 1, 1979;

(B) in the absence of a building contract, the keel of which is laid, or which is at a similar stage of construction, after January 1, 1980;

(C) the delivery of which is after June 1, 1982; or

(D) that has undergone a major conversion under a contract made after June 1, 1979, or construction work that began after January 1, 1980, or was completed after June 1, 1982.

(4) "person" means an individual (even if not a citizen or national of the United States), a corporation, partnership, association, or other entity (even if not organized or existing under the laws of a State), the United States Government, a State or local government, a government of a foreign country, or an entity of one of those governments.

(5) "State", in addition to its meaning under section 2101(36) of this title, includes the Trust Territory of the Pacific Islands.

(6) "United States", in addition to its meaning under section 2101(44) of this title, includes the Trust Territory of the Pacific Islands.

§ 3702. Application

(a) Subject to subsections (b)-(e) of this section, this chapter applies to a tank vessel.

(b) This chapter does not apply to a documented vessel that would be subject to this chapter only because of the transfer of fuel from the fuel supply tanks of the vessel to offshore drilling or production facilities in the oil industry if the vessel is—

(1) not more than 500 gross tons;

(2) not a tanker; and

(3) in the service of oil exploitation.

(c) This chapter does not apply to a cannery tender, fishing tender, or fishing vessel of not more than 500 gross tons, used in the salmon or crab fisheries of Alaska, Oregon, or Washington, when engaged only in the fishing industry.

(d) This chapter does not apply to a vessel of not more than 5,000 gross tons used in processing and assembling fishery products of the fisheries of Alaska, Oregon, and Washington. However, the vessel is subject to regulation by the Secretary when carrying flammable or combustible liquid cargo in bulk.

(e) This chapter does not apply to a foreign vessel on innocent passage on the navigable waters of the United States.

§ 3703. Regulations

(a) The Secretary shall prescribe regulations for the design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning of vessels to which this chapter applies, that may be necessary for increased protection against hazards to life and property, for navigation and vessel safety, and for enhanced protection of the marine environment. The Secretary may prescribe different regulations applicable to vessels engaged in the domestic trade, and also may prescribe regulations that exceed standards set internationally. Regulations prescribed by the Secretary under this subsection are in addition to regulations prescribed under other laws that may apply to any of those vessels. Regulations prescribed under this subsection shall include requirements about—

(1) superstructures, hulls, cargo holds or tanks, fittings, equipment, appliances, propulsion machinery, auxiliary machinery, and boilers;

(2) the handling or stowage of cargo, the manner of handling or stowage of cargo, and the machinery and appliances used in the handling or stowage;

(3) equipment and appliances for lifesaving, fire protection, and prevention and mitigation of damage to the marine environment;

(4) the manning of vessels and the duties, qualifications, and training of the officers and crew;

(5) improvements in vessel maneuvering and stopping ability and other features that reduce the possibility of marine casualties;

(6) the reduction of cargo loss if a marine casualty occurs; and

(7) the reduction or elimination of discharges during ballasting, deballasting, tank cleaning, cargo handling, or other such activity.

(b) In prescribing regulations under subsection (a) of this section, the Secretary shall consider the types and grades of cargo permitted to be on board a tank vessel.

(c) In prescribing regulations under subsection (a) of this section, the Secretary shall establish procedures for consulting with, and receiving and considering the views of—

(1) interested departments, agencies, and instrumentalities of the United States Government;

(2) officials of State and local governments;

(3) representatives of port and harbor authorities and associations;

(4) representatives of environmental groups; and

(5) other interested parties knowledgeable or experienced in dealing with problems involving vessel safety, port and waterways safety, and protection of the marine environment.

§ 3704. Coastwise trade vessels

A segregated ballast tank, a crude oil washing system, or an inert gas system, required by this chapter or a regulation prescribed under this chapter, on a vessel entitled to engage in the coastwise trade under section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), shall be installed in

the United States (except the trust territories). A vessel failing to comply with this section may not engage in the coastwise trade.

§ 3705. Crude oil tanker minimum standards

(a) A new crude oil tanker of at least 20,000 deadweight tons shall be equipped with—

(1) protectively located segregated ballast tanks;

(2) a crude oil washing system; and

(3) a cargo tank protection system consisting of a fixed deck froth system and a fixed inert gas system.

(b)(1) An existing crude oil tanker of at least 40,000 deadweight tons shall be equipped with—

(A) segregated ballast tanks; or

(B) a crude oil washing system.

(2) Compliance with paragraph (1) of this subsection may be delayed until June 1, 1985, for any tanker of less than 70,000 deadweight tons that has dedicated clean ballast tanks.

(c) An existing crude oil tanker of at least 20,000 deadweight tons but less than 40,000 deadweight tons, and at least 15 years of age, shall be equipped with segregated ballast tanks or a crude oil washing system before January 2, 1986, or the date on which the tanker reaches 15 years of age, whichever is later.

(d) An existing crude oil tanker of at least 20,000 deadweight tons shall be equipped with an inert gas system. However, for a crude oil tanker of less than 40,000 deadweight tons not fitted with high capacity tank washing machines, the Secretary may grant an exemption if the vessel's owner can show clearly that compliance would be unreasonable and impracticable due to the vessel's design characteristics.

(e) A crude oil tanker engaged in transferring oil from an offshore oil exploitation or production facility on the Outer Continental Shelf of the United States shall be equipped with segregated ballast tanks, or may operate with dedicated clean ballast tanks or special ballast arrangements. However, the tanker shall comply with other applicable minimum standards of this section.

§ 3706. Product carrier minimum standards

(a) A new product carrier of at least 30,000 deadweight tons shall be equipped with protectively located segregated ballast tanks.

(b) A new product carrier of at least 20,000 deadweight tons shall be equipped with a cargo tank protection system consisting of a fixed deck froth system and a fixed inert gas system or, if the product carrier carries dedicated products incompatible with the cargo tank protection system, an alternate protection system authorized by the Secretary.

(c) An existing product carrier of at least 40,000 deadweight tons shall be equipped with segregated ballast tanks or may operate with dedicated clean ballast tanks.

(d) An existing product carrier of at least 20,000 deadweight tons but less than 40,000 deadweight tons, and at least 15 years of age, shall be equipped with segregated ballast tanks or may operate with dedicated clean ballast tanks before January 2, 1986, or the date on which it reaches 15 years of age, whichever is later.

(e) An existing product carrier of at least 40,000 deadweight tons, or an existing product carrier of at least 20,000 deadweight tons but less than 40,000 deadweight tons that is fitted with high-capacity tank washing machines, shall be equipped with an inert gas system.

§ 3707. Tanker minimum standards

(a) A new tanker of at least 10,000 gross tons shall be equipped with—

(1) 2 remote steering gear control systems operable separately from the navigating bridge;

(2) the main steering gear control in the steering gear compartment;

(3) means of communications and rudder angle indicators on the navigating bridge, a remote steering gear control station, and the steering gear compartment;

(4) at least 2 identical and adequate power units for the main steering gear;

(5) an alternative and adequate power supply, either from an emergency source of electrical power or from another independent source of power located in the steering gear compartment; and

(6) means of automatic starting and stopping of power units with attendant alarms at all steering stations.

(b) An existing tanker of at least 10,000 gross tons shall be equipped with—

(1) 2 remote steering gear control systems operable separately from the navigating bridge;

(2) the main steering gear control in the steering gear compartment; and

(3) means of communications and rudder angle indicators on the navigating bridge, a remote steering gear control station, and the steering gear compartment.

§ 3708. Self-propelled tank vessel minimum standards

A self-propelled tank vessel of at least 10,000 gross tons shall be equipped with—

(1) a dual radar system with short-range and long-range capabilities, each with true-north features;

(2) an electronic relative motion analyzer that is at least functionally equivalent to equipment complying with specifications established by the Secretary of Transportation;

(3) an electronic position-fixing device;

(4) adequate communications equipment;

(5) a sonic depth finder;

(6) a gyrocompass; and

(7) up-to-date charts.

§ 3709. Exemptions

The Secretary may exempt a vessel from the minimum requirements established by sections 3704-3706 of this title for segregated ballast, crude oil washing, and dedicated clean ballast if the Secretary decides that shore-based reception facilities are a preferred method of handling ballast and that adequate facilities are readily available.

§ 3710. Evidence of compliance by vessels of the United States

(a) A vessel of the United States to which this chapter applies that has on board oil or hazardous material in bulk as cargo or cargo residue must have a certificate of inspection issued under this part, endorsed to indicate that the vessel complies with regulations prescribed under this chapter.

(b) Each certificate endorsed under this section is valid for not more than 24 months and may be renewed as specified by the Secretary. In appropriate circumstances, the Secretary may issue a temporary certificate valid for not more than 30 days. A certificate shall be suspended or revoked if the Secretary finds that the vessel does not comply with the conditions under which the certificate was issued.

§ 3711. Evidence of compliance by foreign vessels

(a) A foreign vessel to which this chapter applies may operate on the navigable waters of the United States, or transfer oil or hazardous material in a port or place under the jurisdiction of the United States, only if the vessel has been issued a certificate of compliance by the Secretary. The Secretary may issue the certificate only after the vessel has been examined and found to be in compliance with this chapter and regulations prescribed under this chapter. The Secretary may accept any part of a certificate, endorsement, or document, issued by the government of a foreign country under a treaty, convention, or other international agreement to which the United States is a party, as a basis for issuing a certificate of compliance.

(b) A certificate issued under this section is valid for not more than 24 months and may be renewed as specified by the Secretary. In appropriate circumstances, the Secretary may issue a temporary certificate valid for not more than 30 days.

(c) A certificate shall be suspended or revoked if the Secretary finds that the vessel does not comply with the conditions under which the certificate was issued.

§ 3712. Notification of noncompliance

The Secretary shall notify the owner, charterer, managing operator, agent, master, or individual in charge of a vessel found not to be in compliance with a regulation prescribed under this part and state how compliance may be achieved.

§ 3713. Prohibited acts

(a) A person may not—

(1) violate this chapter or a regulation prescribed under this chapter;

(2) refuse to permit any official, authorized by the Secretary to enforce this chapter, to board a vessel or to enter a shore area, place, or premises, under a person's control to make an inspection under this chapter; or

(3) refuse to obey a lawful directive issued under this chapter.

(b) A vessel to which this chapter applies may not—

(1) operate on the navigable waters of the United States or use a port or place subject to the jurisdiction of the United States when not in compliance with this chapter or a regulation prescribed under this chapter;

(2) fail to comply with a lawful directive issued under this chapter; or

(3) carry a type or grade of oil or hazardous material in bulk as cargo or cargo residue unless its certificate is endorsed to allow that carriage.

§ 3714. Inspection and examination

(a)(1) The Secretary shall have each vessel to which this chapter applies inspected or examined at least once each year.

(2) Each of those vessels that is more than 10 years of age shall undergo a special and detailed inspection of structural strength and hull integrity as specified by the Secretary.

(3) The Secretary may make contracts for conducting inspections or examinations in the United States and in foreign countries. An inspector conducting an inspection or examination under contract may not issue a certificate of inspection or a certificate of compliance, but the inspector may issue a temporary certificate.

(4) The Secretary shall prescribe by regulation reasonable fees for an inspection or examination conducted under this section outside the United States, or which, when involving a foreign vessel, is conducted under a contract authorized by paragraph (3) of this subsection. The owner, charter,

or managing operator of a vessel inspected or examined by the Secretary is liable for the fees. Amounts received as fees shall be deposited in the Treasury.

(5) The Secretary may allow provisional entry of a vessel to conduct an inspection or examination under this chapter.

(b) Each vessel to which this chapter applies shall have on board those documents the Secretary considers necessary for inspection and enforcement, including documents listing—

(1) the type, grade, and approximate quantities of cargo on board;

(2) the shipper and consignee of the cargo;

(3) the places of origin and destination of the vessel; and

(4) the name of an agent in the United States authorized to accept service of legal process.

(c) Each vessel to which this chapter applies that operates in the United States shall have a person designated as authorized to accept service of legal process for the vessel.

§ 3715. Lightering

(a) A vessel may transfer oil or hazardous material in a port or place subject to the jurisdiction of the United States, when the cargo has been transferred from another vessel on the navigable waters of the United States or in the marine environment, only if—

(1) the transfer was conducted consistent with regulations prescribed by the Secretary; and

(2) both the delivering and receiving vessels had on board, at the time of transfer, a certificate of inspection or a certificate of compliance, as would have been required under section 3710 or 3711 of this title, had the transfer taken place in a port or place subject to the jurisdiction of the United States.

(b) The Secretary shall prescribe regulations to carry out subsection (a) of this section. The regulations shall include provisions on—

(1) minimum safe operating conditions, including sea state, wave height, weather, proximity to channels or shipping lanes, and other similar factors;

(2) the prevention of spills;

(3) equipment for responding to a spill;

(4) the prevention of any unreasonable interference with navigation or other reasonable uses of the high seas, as those uses are defined by treaty, convention, or customary international law;

(5) the establishment of lightering zones; and

(6) requirements for communication and prearrival messages.

§ 3716. Tank washings

(a) A vessel may not transfer cargo in a port or place subject to the jurisdiction of the United States if, before arriving, the vessel has discharged tank washings containing oil or hazardous material in preparation for loading at that port or place in violation of the laws of the United States or in a manner or quantities inconsistent with a treaty to which the United States is a party.

(b) The Secretary shall establish effective control and supervisory measures to carry out this section.

§ 3717. Marine safety information system

(a) The Secretary shall establish a marine safety information system that shall contain information about each vessel to which this chapter applies that operates on the navigable waters of the United States, or that transfers oil or hazardous material in a port or place under the jurisdiction of the United States. In acquiring this information, the Secretary shall make full use of publicly available information. The Secretary may by regulation require the vessel to provide information that the Secretary considers necessary to carry out this subsection, including—

(1) the name of each person with an ownership interest in the vessel;

(2) details of compliance with the financial responsibility requirements of applicable laws or regulations;

(3) registration information, including all changes in the name of the vessel;

(4) the history of marine casualties and serious repair problems of the vessel; and

(5) a record of all inspections and examinations of a vessel conducted under section 3714 of this title.

(b) On written request from the Secretary, the head of each department, agency, or instrumentality of the United States Government shall provide available information that the Secretary considers necessary to confirm the information received under subsection (a) of this section.

§ 3718. Penalties

(a)(1) A person violating this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of not more than $25,000. Each day of a continuing violation is a separate violation.

(2) Each vessel to which this chapter applies that is operated in violation of this chapter or a regulation prescribed under this chapter is liable in rem for a civil penalty under this subsection.

(b) A person willfully and knowingly violating this chapter or a regulation prescribed under this chapter shall be fined not more than $50,000, imprisoned for not more than 5 years, or both.

(c) Instead of the penalties provided by subsection (b) of this section, a person willfully and knowingly violating this chapter or a regulation prescribed under this chapter, and using a dangerous weapon, or engaging in conduct that causes bodily injury or fear of imminent bodily injury to an official authorized to enforce this chapter or a regulation prescribed under this chapter, shall be fined not more than $100,000, imprisoned for not more than 10 years, or both.

(d) The district courts of the United States have jurisdiction to restrain a violation of this chapter or a regulation prescribed under this chapter.

(e) At the request of the Secretary, the Secretary of the Treasury shall withhold or revoke the clearance required by section 4197 of the Revised Statutes (46 App. U.S.C. 91) of a vessel the owner or operator of which is subject to a penalty under this section. Clearance may be granted on filing a bond or other surety satisfactory to the Secretary.

CHAPTER 39—CARRIAGE OF ANIMALS

Sec.
3901. Regulations for accommodations for export animals.
3902. Penalties.

§ 3901. Regulations for accommodations for export animals

The Secretary of Agriculture may prescribe regulations governing the accommodations on board vessels for cattle, horses, mules, asses, sheep, goats, and swine to be carried from the United States to a foreign country. The regulations shall prescribe standards for space, ventilation, fittings, food and water supply, and other requirements the Secretary of Agriculture considers necessary for the safe and proper transportation and humane treatment of those animals. The Secretary of Agriculture may examine any vessel the Secretary of Agriculture considers necessary to carry out this chapter.

§ 3902. Penalties

When the owner, charterer, managing operator, agent, master, or individual in charge of a vessel carrying animals referred to in section 3901 of this title willfully violates, or causes or permits to be violated, a regulation prescribed under this chapter, the vessel may be prohibited from carrying any such animals from the United States for a period, of not more than one year, that the Secretary of Agriculture directs. The vessel may not be cleared from a port of the United States during that period.

CHAPTER 41—UNINSPECTED VESSELS

Sec.
4101. Application.
4102. Safety equipment.
4103. Exemptions.
4104. Regulations.
4105. Uninspected passenger vessels.
4106. Penalties.

§ 4101. Application

This chapter applies to an uninspected vessel—

(1) on the navigable waters of the United States; or

(2) owned in the United States and operating on the high seas.

§ 4102. Safety equipment

(a) Each uninspected vessel propelled by machinery shall be provided with the number, type, and size of fire extinguishers, capable of promptly and effectively extinguishing burning liquid fuel, that may be prescribed by regulation. The fire extinguishers shall be kept in condition for immediate and effective use and so placed as to be readily accessible.

(b) Each uninspected vessel propelled by machinery shall carry at least one readily accessible life preserver or other lifesaving device, of the type prescribed by regulation, for each individual on board.

(c) Each uninspected vessel shall have the carburetors of each engine of the vessel (except an outboard motor) using gasoline as fuel, equipped with an efficient flame arrestor, backfire trap, or other similar device prescribed by regulation.

(d) Each uninspected vessel using a volatile liquid as fuel shall be provided with the means prescribed by regulation for properly and efficiently ventilating the bilges of the engine and fuel tank compartments, so as to remove any explosive or flammable gases.

§ 4103. Exemptions

Section 4102(a) of this title does not apply to a vessel propelled by outboard motors when competing in a race previously arranged and announced or, if the vessel is designed and intended only for racing, when operated incidental to tuning up the vessel and its engines for the race.

§ 4104. Regulations

The Secretary shall prescribe regulations to carry out this chapter.

§ 4105. Uninspected passenger vessels

Chapter 43 of this title applies to an uninspected passenger vessel.

§ 4106. Penalties

If a vessel to which this chapter applies is operated in violation of this chapter or a

regulation prescribed under this chapter, the owner, charterer, managing operator, agent, master, and individual in charge are each liable to the United States Government for a civil penalty of $100. The vessel also is liable in rem for the penalty.

CHAPTER 43—RECREATIONAL VESSELS

Sec.
4301. Application.
4302. Regulations.
4303. Inspection and testing.
4304. Importation of nonconforming vessels and equipment.
4305. Exemptions.
4306. Federal preemption.
4307. Prohibited acts.
4308. Termination of unsafe operation.
4309. Investigation and reporting.
4310. Repair and replacement of defects.
4311. Penalties and injunctions.

§ 4301. Application

(a) This chapter applies to a recreational vessel and associated equipment carried in the vessel on waters subject to the jurisdiction of the United States and, for a vessel owned in the United States, on the high seas.

(b) Except when expressly otherwise provided, this chapter does not apply to a foreign vessel temporarily operating on waters subject to the jurisdiction of the United States.

(c) Until there is a final judicial decision that they are navigable waters of the United States, the following waters lying entirely in New Hampshire are declared not to be waters subject to the jurisdiction of the United States within the meaning of this section: Lake Winnisquam, Lake Winnipesaukee, parts of the Merrimack River, and their tributary and connecting waters.

§ 4302. Regulations

(a) The Secretary may prescribe regulations—

(1) establishing minimum safety standards for recreational vessels and associated equipment, and establishing procedures and tests required to measure conformance with those standards, with each standard—

(A) meeting the need for recreational vessel safety; and

(B) being stated, insofar as practicable, in terms of performance;

(2) requiring the installation, carrying, or use of associated equipment (including fuel systems, ventilation systems, electrical systems, sound-producing devices, firefighting equipment, lifesaving devices, signaling devices, ground tackle, life- and grab-rails, and navigational equipment) on recreational vessels and classes of recreational vessels subject to this chapter, and prohibiting the installation, carrying, or use of associated equipment that does not conform with safety standards established under this section; and

(3) requiring or permitting the display of seals, labels, plates, insignia, or other devices for certifying or evidencing compliance with safety regulations and standards of the United States Government for recreational vessels and associated equipment.

(b) Each regulation prescribed under this section shall specify an effective date that is not earlier than 180 days from the date the regulation was published, unless the Secretary finds that there exists a recreational vessel safety hazard so critical as to require an earlier effective date. However, this period may not be more than 24 months for cases involving, in the discretion of the Secretary, major product design, retooling, or major changes in the manufacturing process.

(c) In prescribing regulations under this section, the Secretary shall, among other things—

(1) consider the need for and the extent to which the regulations will contribute to recreational vessel safety;

(2) consider relevant available recreational vessel safety standards, statistics, and data, including public and private research, development, testing, and evaluation;

(3) not compel substantial alteration of a recreational vessel or item of associated equipment that is in existence, or the construction or manufacture of which is begun before the effective date of the regulation, but subject to that limitation may require compliance or performance, to avoid a substantial risk of personal injury to the public, that the Secretary considers appropriate in relation to the degree of hazard that the compliance will correct; and

(4) consult with the National Boating Safety Advisory Council established under section 13110 of this title about the considerations referred to in clauses (1)-(3) of this subsection.

(d) Section 8903 of this title does not apply to a vessel being operated for bona fide dealer demonstrations provided without fee to business invitees. However, if on the basis of substantial evidence, the Secretary decides under this section that requiring vessels so operated to be under the control of licensed individuals is necessary for boating safety, then the Secretary may prescribe regulations requiring the licensing of individuals controlling these vessels in the same manner as provided in chapter 89 of this title for individuals in control of vessels carrying passengers for hire.

§ 4303. Inspection and testing

(a) Subject to regulations, supervision, and reviews that the Secretary may prescribe, the Secretary may delegate to a person, private or public agency, or organization, or to an officer or employee under the supervision of that person or agency, any work, business, or function related to the testing, inspection, and examination necessary for compliance enforcement and for the development of data to enable the Secretary to prescribe regulations under section 4302 of this title.

(b) The Secretary may—

(1) conduct research, testing, and development necessary to carry out this chapter, including the procurement by negotiation or otherwise of experimental and other recreational vessels or associated equipment for research and testing purposes; and

(2) subsequently sell those vessels.

§ 4304. Importation of nonconforming vessels and equipment

The Secretary and the Secretary of the Treasury may authorize by joint regulations the importation of any nonconforming recreational vessel or associated equipment on conditions, including providing a bond, that will ensure that the recreational vessel or associated equipment will be brought into conformity with applicable safety regulations and standards of the Government before the vessel or equipment is operated on waters subject to the jurisdiction of the United States.

§ 4305. Exemptions

If the Secretary considers that recreational vessel safety will not be adversely affected, the Secretary may issue an exemption from this chapter or a regulation prescribed under this chapter.

§ 4306. Federal preemption

Unless permitted by the Secretary under section 4305 of this title, a State or political subdivision of a State may not establish, continue in effect, or enforce a law or regulation establishing a recreational vessel or associated equipment performance or other safety standard or imposing a requirement for associated equipment (except insofar as the State or political subdivision may, in the absence of the Secretary's disapproval, regulate the carrying or use of marine safety articles to meet uniquely hazardous conditions or circumstances within the State) that is not identical to a regulation prescribed under section 4302 of this title.

§ 4307. Prohibited acts

(a) A person may not—

(1) manufacture, construct, assemble, sell or offer for sale, introduce or deliver for introduction into interstate commerce, or import into the United States, a recreational vessel, associated equipment, or component of the vessel or equipment unless—

(A) it conforms with this chapter or a regulation prescribed under this chapter; or

(B) it is intended only for export and is so labeled, tagged, or marked on the recreational vessel or equipment, including any markings on the outside of the container in which it is to be exported;

(2) affix, attach, or display a seal, document, label, plate, insignia, or other device indicating or suggesting compliance with standards of the United States Government on, in, or in connection with, a recreational vessel or item of associated equipment that is false or misleading; or

(3) fail to provide a notification as required by this chapter or fail to exercise reasonable diligence in carrying out the notification and reporting requirements of this chapter.

(b) A person may not operate a vessel in violation of this chapter or a regulation prescribed under this chapter.

§ 4308. Termination of unsafe operation

If an official charged with the enforcement of this chapter observes a recreational vessel being operated without sufficient lifesaving or firefighting devices or in an overloaded or other unsafe condition (as defined in regulations prescribed under this chapter) and, in the judgment of the official, the operation creates an especially hazardous condition, the official may direct the operator of the recreational vessel to take immediate and reasonable steps necessary for the safety of individuals on board the vessel, including directing the operator to return to a mooring and to remain there until the situation creating the hazard is corrected or ended.

§ 4309. Investigation and reporting

(a) A recreational vessel manufacturer to whom this chapter applies shall establish and maintain records and reports and provide information the Secretary may require to enable the Secretary to decide whether the manufacturer has acted or is acting in compliance with this chapter and regulations prescribed under this chapter. On request of an officer, employee, or agent authorized by the Secretary, a recreational vessel manufacturer shall permit the officer, employee, or agent to inspect, at reasonable times, factories or other facilities, and records related to deciding whether the manufacturer has acted or is acting in compliance with this chapter and regulations prescribed under this chapter.

(b) Information reported to or otherwise obtained by the Secretary or the representative of the Secretary under this section containing or related to a trade secret or other matter referred to in section 1905 of title 18, or authorized to be exempt from public disclosure by section 552(b) of title 5, is confidential under section 1905. However, on approval of the Secretary, the information may be disclosed to other officers, employees, or agents concerned with carrying out this chapter or when it is relevant in a proceeding under this chapter.

§ 4310. Repair and replacement of defects

(a) In this section, "associated equipment" includes only items or classes of associated equipment that the Secretary shall prescribe by regulation after deciding that the application of the requirements of this section to those items or classes of associated equipment is reasonable and in furtherance of this chapter.

(b) If a recreational vessel or associated equipment has left the place of manufacture and the recreational vessel manufacturer discovers or acquires information that the manufacturer decides, in the exercise of reasonable and prudent judgment, indicates that a recreational vessel or associated equipment subject to an applicable regulation prescribed under section 4302 of this title either fails to comply with the regulation, or contains a defect that creates a substantial risk of personal injury to the public, the manufacturer shall provide notification of the defect or failure of compliance as provided by subsections (c) and (d) of this section within a reasonable time after the manufacturer has discovered the defect.

(c)(1) The notification required by subsection (b) of this section shall be given to the following persons in the following manner:

(A) by certified mail to the first purchaser for other than resale, except that the requirement for notification of the first purchaser shall be satisfied if the recreational vessel manufacturer exercises reasonable diligence in establishing and maintaining a list of those purchasers and their current addresses, and sends the required notice to each person on that list at the address appearing on the list.

(B) by certified mail to subsequent purchasers if known to the manufacturer.

(C) by certified mail or other more expeditious means to the dealers and distributors of the recreational vessels or associated equipment.

(2) The notification required by subsection (b) of this section is required to be given only for a defect or failure of compliance discovered by the recreational vessel manufacturer within a reasonable time after the manufacturer has discovered the defect or failure, except that the manufacturer's duty of notification under paragraph (1) (A) and (B) of this subsection applies only to a defect or failure of compliance discovered by the manufacturer within one of the following appropriate periods:

(A) if a recreational vessel or associated equipment required by regulation to have a date of certification affixed, 5 years from the date of certification.

(B) if a recreational vessel or associated equipment not required by regulation to have a date of certification affixed, 5 years from the date of manufacture.

(d) The notification required by subsection (b) of this section shall contain a clear description of the defect or failure to comply, an evaluation of the hazard reasonably related to the defect or failure, a statement of the measures to correct the defect or failure, and an undertaking by the recreational vessel manufacturer to take those measures only at the manufacturer's cost and expense.

(e) Each recreational vessel manufacturer shall provide the Secretary with a copy of all notices, bulletins, and other communications to dealers and distributors of that manufacturer, and to purchasers of recreational vessels or associated equipment of that manufacturer, about a defect related to safety in the recreational vessels or associated equipment, and any failure to comply with the regulation or order applicable to the recreational vessels or associated equipment. The Secretary may publish or otherwise disclose to the public information in the notices or other information the Secretary has that the Secretary considers will assist in carrying out this chapter. However, the Secretary may disclose any information that contains or relates to a trade secret only if the Secretary decides that the information is necessary to carry out this chapter.

(f) If, through testing, inspection, investigation, or examination of reports, the Secretary decides that a recreational vessel or associated equipment to which this chapter applies contains a defect related to safety or fails to comply with an applicable regulation prescribed under this chapter and notification under this chapter is appropriate, the Secretary shall notify the recreational vessel manufacturer of the defect or failure. The notice shall contain the findings of the Secretary and shall include a synopsis of the information on which they are based. The manufacturer may then provide the notification required by this chapter to the persons designated in this chapter or dispute the Secretary's decision. If disputed, the Secretary shall provide the manufacturer with an opportunity to present views and establish that there is no such defect or failure. When the Secretary considers it to be in the public interest, the Secretary may publish notice of the proceeding in the Federal Register and provide interested persons, including the National Boating Safety Advisory Council, with an opportunity to comment. If, after presentation by the manufacturer, the Secretary decides that the recreational vessel or associated equipment contains a defect related to safety or fails to comply with an applicable regulation, the Secretary may direct the manufacturer to provide the notifications specified in this chapter.

(g) The Secretary may prescribe regulations to carry out this section, including the establishment of procedures that require dealers and distributors to assist manufacturers in obtaining information required by this section. A regulation prescribed under this subsection does not relieve a manufacturer of any obligation imposed by this section.

§ 4311. Penalties and injunctions

(a) A person willfully operating a recreational vessel in violation of this chapter or a regulation prescribed under this chapter shall be fined not more than $5,000, imprisoned for not more than one year, or both.

(b) A person violating section 4307(a)(1) of this title is liable to the United States Government for a civil penalty of not more than $2,000, except that the maximum civil penalty may be not more than $100,000 for a related series of violations. When a corporation violates section 4307(a)(1), any director, officer, or executive employee of the corporation who knowingly and willfully ordered, or knowingly and willfully authorized, a violation is individually liable to the Government for the penalty, in addition to the corporation. However, the director, officer, or executive employee is not liable individually under this subsection if the director, officer, or executive employee can demonstrate by a preponderance of the evidence that—

(1) the order or authorization was issued on the basis of a decision, in exercising reasonable and prudent judgment, that the nonconformity with standards and regulations constituting the violation would not cause or constitute a substantial risk of personal injury to the public; and

(2) at the time of the order or authorization, the director, officer, or executive employee advised the Secretary in writing of acting under this clause and clause (1) of this subsection.

(c) A person violatng any other provision of this chapter or other regulation prescribed under this chapter is liable to the Government for a civil penalty of not more than $1,000. If the violation involves the operation of a vessel, the vessel also is liable in rem for the penalty.

(d) When a civil penalty of not more than $200 has been assessed under this chapter, the Secretary may refer the matter of collection of the penalty directly to the United States magistrate of the jurisdiction in which the person liable may be found for collection procedures under supervision of the district court and under an order issued by the court delegating this authority under section 636(b) of title 28.

(e) The district courts of the United States have jurisdiction to restrain a violation of this chapter, or to restrain the sale, offer for sale, introduction or delivery for introduction into interstate commerce, or importation into the United States, of a recreational vessel or associated equipment that the court decides does not conform to safety standards of the Government. A civil action under this subsection shall be brought by filing a petition by the Attorney General for the Government. When practicable, the Secretary shall give notice to a person against whom an action for injunctive relief is contemplated and provide the person with an opportunity to present views and, except for a knowing and willful violation, shall provide the person with a reasonable opportunity to achieve compliance. The failure to give notice and provide the opportunity does not preclude the granting of appropriate relief by the district court.

(f) A person is not subject to a penalty under this chapter if the person—

(1) establishes that the person did not have reason to know, in exercising reasonable care, that a recreational vessel or associated equipment does not conform with the applicable safety standards of the Government; or

(2) holds a certificate issued by the manufacturer of that recreational vessel or associated equipment to the effect that the recreational vessel or associated equipment conforms to all applicable recreational vessel safety standards of the Government, unless the person knows or reasonably should have known that the recreational vessel or associated equipment does not so conform.

(g) Compliance with this chapter or standards, regulations, or orders prescribed under this chapter does not relieve a person from liability at common law or under State law.

[PART C—RESERVED FOR LOAD LINES OF VESSELS]

PART D—MARINE CASUALTIES

CHAPTER 61—REPORTING MARINE CASUALTIES

Sec.
6101. Marine casualties and reporting.
6102. State marine casualty reporting system.
6103. Penalty.

§ 6101. Marine casualties and reporting

(a) The Secretary shall prescribe regulations on the marine casualties and incidents to be reported and the manner of reporting. The regulations shall require reporting the following marine casualties:

(1) death of an individual.

(2) serious injury to an individual.

(3) material loss of property.

(4) material damage affecting the seaworthiness or efficiency of the vessel.

(b) A marine casualty shall be reported within 5 days as provided in this part and regulations prescribed under this part.

(c) When the owner, charterer, managing operator, or agent of a vessel of the United States has reason to believe (because of lack of communication with or nonappearance of a vessel or any other incident) that the vessel may have been lost or imperiled, the owner, charterer, managing operator, or agent immediately shall attempt to determine the status of the vessel. If the owner, charterer, managing operator, or agent cannot determine the status of the vessel, the owner, charterer, managing operator, or agent immediately shall notify the Coast Guard and provide the name and identification number of the vessel, the names of individuals on board, and any other information that may be requested by the Coast Guard.

(d) This part applies to a foreign vessel when involved in a marine casualty on the navigable waters of the United States.

(e) A marine casualty not resulting in the death of an individual shall be classified according to the gravity of the casualty, as prescribed by regulation, giving consideration to the extent of injuries to individuals, the extent of property damage, the dangers that the casualty creates, and the size, occupation, and means of propulsion of each vessel involved.

§ 6102. State marine casualty reporting system

(a) The Secretary shall prescribe regulations for a uniform State marine casualty reporting system for vessels. Regulations shall prescribe the casualties to be reported and the manner of reporting. A State shall compile and submit to the Secretary reports, information, and statistics on casualties reported to the State.

(b) The Secretary shall collect, analyze, and publish reports, information, and statistics on marine casualties together with findings and recommendations the Secretary considers appropriate. If a State marine casualty reporting system provides that information derived from casualty reports (except statistical information) may not be publicly disclosed, or otherwise prohibits use by the State or any person in any action or proceeding against a person, the Secretary may use the information provided by the State only in the same way that the State may use the information.

§ 6103. Penalty

An owner, charterer, managing operator, agent, master, or individual in charge of a vessel failing to report a casualty or incident as required under section 6101 of this title or a regulation prescribed under section 6101 is liable to the United States Government for a civil penalty of $1,000.

CHAPTER 63—INVESTIGATING MARINE CASUALTIES

Sec.
6301. Investigation of marine casualties.
6302. Public investigations.
6303. Rights of parties in interest.
6304. Subpena authority.
6305. Reports of investigations.
6306. Penalty.
6307. Notifications to Congress.

§ 6301. Investigation of marine casualties

The Secretary shall prescribe regulations for the immediate investigation of marine casualties under this part to decide, as closely as possible—

(1) the cause of the casualty, including the cause of any death;

(2) whether an act of misconduct, incompetence, negligence, unskillfulness, or willful violation of law committed by any individual licensed, certificated, or documented under part E of this subtitle has contributed to the cause of the casualty, or to a death involved in the casualty, so that appropriate remedial action under chapter 77 of this title may be taken;

(3) whether an act of misconduct, incompetence, negligence unskillfulness, or willful violation of law committed by any person, including an officer, employee, or member of the Coast Guard, contributed to the cause of the casualty, or to a death involved in the casualty;

(4) whether there is evidence that an act subjecting the offender to a civil penalty under the laws of the United States has been committed, so that appropriate action may be undertaken to collect the penalty;

(5) whether there is evidence that a criminal act under the laws of the United States has been committed, so that the matter may be referred to appropriate authorities for prosecution; and

(6) whether there is need for new laws or regulations, or amendment or repeal of existing laws or regulations, to prevent the recurrence of the casualty.

§ 6302. Public investigations

Each investigation conducted under this chapter and regulations prescribed under this chapter shall be open to the public, except when evidence affecting the national security is to be received.

§ 6303. Rights of parties in interest

In an investigation conducted under this chapter, the following shall be allowed to be represented by counsel, to cross-examine witnesses, and to call witnesses:

(1) an owner,

(2) any holder of a license or certificate of registry,

(3) any holder of a merchant mariner's document,

(4) any other person whose conduct is under investigation, and

(5) any other party in interest.

§ 6304. Subpena authority

(a) In an investigation under this chapter, the attendance and testimony of witnesses, including parties in interest, and the production of any evidence may be compelled by subpena. The subpena authority granted by this section is coextensive with that of a district court of the United States, in civil matters, for the district in which the investigation is conducted.

(b) When a person fails to obey a subpena issued under this section, the district court of the United States for the district in which the investigation is conducted or in which the person failing to obey is found, shall on proper application issue an order directing that person to comply with the subpena. The court may punish as contempt any disobedience of its order.

(c) A witness complying with a subpena issued under this section may be paid for actual travel and attendance at the rate provided for witnesses in the district courts of the United States.

(d) An official designated to conduct an investigation under this part may issue subpenas as provided in this section and administer oaths to witnesses.

§ 6305. Reports of investigations

(a) The Secretary shall prescribe regulations about the form and manner of reports of investigations conducted under this part.

(b) Reports of investigations conducted under this part shall be made available to the public, except to the extent that they contain information related to the national security.

§ 6306. Penalty

A person attempting to coerce a witness, or to induce a witness, to testify falsely in connection with a marine casualty, or to induce a witness to leave the jurisdiction of the United States, shall be fined $5,000, imprisoned for one year, or both.

§ 6307. Notifications to Congress

(a) The Secretary shall notify the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Merchant Marine and Fisheries of the House of Representatives of any hearing, before the hearing occurs, investigating a major marine casualty involving a death under section 6301 of this title.

(b) The Secretary shall submit to a committee referred to in subsection (a) of this section information on a major marine casualty that is requested by that committee or the chairman of the committee if the submission of that information is not prohibited by a law of the United States.

(c) The Secretary shall submit annually to Congress a summary of the marine casualties reported during the prior fiscal year, together with a brief statement of action taken concerning those casualties.

PART E—LICENSES, CERTIFICATES, AND MERCHANT MARINERS' DOCUMENTS

CHAPTER 71—LICENSES AND CERTIFICATES OF REGISTRY

Sec.
7101. Issuing and classifying licenses and certificates of registry.
7102. Citizenship.
7103. Licenses for radio officers.
7104. Certificates for medical doctors and nurses.
7105. Oaths.
7106. Duration of licenses.
7107. Duration of certificates of registry.
7108. Termination of licenses and certificates of registry.
7109. Renewal of licenses.
7110. Exhibiting licenses.
7111. Licenses for fishing vessels not subject to inspection.
7112. Licenses of masters or mates as pilots.
7113. Exemption from draft.
7114. Fees.

§ 7101. Issuing and classifying licenses and certificates of registry

(a) Licenses and certificates of registry are established for individuals who are required

to hold licenses or certificates under this subtitle.

(b) Under regulations prescribed by the Secretary, the Secretary—

(1) issues the licenses and certificates of registry; and

(2) may classify the licenses and certificates of registry as provided in subsections (c) and (f) of this section, based on—

(A) the tonnage, means of propulsion, and horsepower of machine-propelled vessels;

(B) the waters on which vessels are to be operated; or

(C) other reasonable standards.

(c) The Secretary may issue licenses in the following classes to applicants found qualified as to age, character, habits of life, experience, professional qualifications, and physical fitness:

(1) masters, mates, and engineers.

(2) pilots.

(3) operators.

(4) radio officers.

(d) In classifying individuals under subsection (c)(1) of this section, the Secretary shall establish, when possible, suitable career patterns and service and other qualifying requirements appropriate to the particular service or industry in which the individuals are engaged.

(e) An individual may be issued a license under subsection (c)(2) of this section only if the applicant—

(1) is at least 21 years of age;

(2) is of sound health and has no physical limitations that would hinder or prevent the performance of a pilot's duties;

(3) agrees to have a thorough physical examination each year while holding the license;

(4) demonstrates, to the satisfaction of the Secretary, that the applicant has the requisite general knowledge and skill to hold the license;

(5) demonstrates proficiency in the use of electronic aids to navigation;

(6) maintains adequate knowledge of the waters to be navigated and knowledge of regulations for the prevention of collisions in those waters;

(7) has sufficient experience, as decided by the Secretary, to evidence ability to handle any vessel of the type and size which the applicant may be authorized to pilot; and

(8) meets any other requirement the Secretary considers reasonable and necessary.

(f) The Secretary may issue certificates of registry in the following classes to applicants found qualified as to character, knowledge, skill, and experience:

(1) pursers.

(2) medical doctors.

(3) professional nurses.

§ 7102. Citizenship

Licenses and certificates of registry for individuals on documented vessels may be issued only to citizens of the United States.

§ 7103. Licenses for radio officers

(a) A license as radio officer may be issued only to an applicant who has a first-class or second-class radiotelegraph operator license issued by the Federal Communications Commission.

(b) Except as provided in section 7318 of this title, this part does not affect the status of radiotelegraph operators serving on board vessels operating only on the Great Lakes.

§ 7104. Certificates for medical doctors and nurses

A certificate of registry as a medical doctor or professional nurse may be issued only to an applicant who has a license as a medical doctor or registered nurse, respectively, issued by a State.

§ 7105. Oaths

An applicant for a license or certificate of registry shall take, before the issuance of the license or certificate, an oath before a designated official, without concealment or reservation, that the applicant will perform faithfully and honestly, according to the best skill and judgment of the applicant, all the duties required by law.

§ 7106. Duration of licenses

A license issued under this part is valid for 5 years. However, the validity of a license issued to a radio officer is conditioned on the continuous possession by the holder of a first-class or second-class radiotelegraph operator license issued by the Federal Communications Commission.

§ 7107. Duration of certificates of registry

A certificate of registry issued under this part is not limited in duration. However, the validity of a certificate issued to a medical doctor or professional nurse is conditioned on the continuous possession by the holder of a license as a medical doctor or registered nurse, respectively, issued by a State.

§ 7108. Termination of licenses and certificates of registry

When the holder of a license or certificate of registry, the duration of which is conditioned under section 7106 or 7107 of this title, fails to hold the license required as a condition, the license or certificate of registry issued under this part is terminated.

§ 7109. Renewal of licenses

A license issued under this part may be renewed for additional 5-year periods.

§ 7110. Exhibiting licenses

Each holder of a license issued under this part shall display, within 48 hours after employment on a vessel for which that license is required, the license in a conspicuous place on the vessel.

§ 7111. Licenses for fishing vessels not subject to inspection

Examinations for licensing individuals on fishing vessels not required to be inspected under part B of this subtitle shall be oral.

§ 7112. Licenses of masters or mates as pilots

A master or mate licensed under this part who also qualifies as a pilot is not required to hold 2 licenses. Instead, the qualification of the master or mate as pilot shall be endorsed on the master's or mate's license.

§ 7113. Exemption from draft

A licensed master, mate, pilot, or engineer of a vessel inspected under part B of this subtitle, propelled by machinery or carrying hazardous liquid cargoes in bulk, is not liable to draft in time of war, except for performing duties authorized by the license. When performing those duties in the service of the United States Government, the master, mate, pilot, or engineer is entitled to the highest rate of wages paid in the merchant marine of the United States for similar services. If killed or wounded when performing those duties, the master, mate, pilot, or engineer, or the heirs or legal representatives of the master, mate, pilot, or engineer, are entitled to all the privileges under the pension laws of the United States provided to members of the Armed Forces.

§ 7114. Fees

The Secretary may prescribe by regulation reasonable fees for the inspection of and the issuance of a certificate, license, or permit related to small passenger vessels and sailing school vessels.

CHAPTER 73—MERCHANT MARINERS' DOCUMENTS

Sec.
7301. General.
7302. Issuing merchant mariners' documents and continuous discharge books.
7303. Possession and description of merchant mariners' documents.
7304. Citizenship notation on for merchant mariners' documents.
7305. Oaths for holders of merchant mariners' documents.
7306. General requirements and classifications for able seamen.
7307. Able seamen—unlimited.
7308. Able seamen—limited.
7309. Able seamen—special.
7310. Able seamen—offshore supply vessels.
7311. Able seamen—sail.
7312. Scale of employment.
7313. General requirements for members of engine departments.
7314. Service requirements for qualified members of engine departments.
7315. Training.
7316. Lifeboatmen.
7317. Tankermen.
7318. Radiotelegraph operators on Great Lakes.
7319. Records of merchant mariners' documents.

§ 7301. General

(a) In this chapter—

(1) "service on deck" means service in the deck department in work related to the work usually performed on board vessels by able seamen and may include service on decked fishing vessels and on public vessels of the United States;

(2) 360 days is equal to one year's service; and

(3) a day is equal to 8 hours of labor or duty.

(b) The Secretary may prescribe regulations to carry out this chapter.

§ 7302. Issuing merchant mariners' documents and continuous discharge books

(a) The Secretary shall issue a merchant mariner's document to an individual required to have that document under part F of this subtitle if the individual satisfies the requirements of this part. The document serves as a certificate of identification and as a certificate of service, specifying each rating in which the holder is qualified to serve on board vessels on which that document is required under part F.

(b) The Secretary also may issue a continuous discharge book to an individual issued a merchant mariner's document if the individual requests.

§ 7303. Possession and description of merchant mariners' documents

A merchant mariner's document shall be retained by the seaman to whom issued. The document shall contain the signature, notations of nationality, age, and physical description, the photograph, the thumbprint, and the home address of the seaman. In addition, the document shall specify the rate or ratings in which the seaman is qualified to serve.

§ 7304. Citizenship of notation on merchant mariners' documents

An individual applying for a merchant mariner's document shall provide satisfactory proof that the individual is a citizen of

the United States before that notation is made on the document.

§ 7305. Oaths for holders of merchant mariners' documents

An applicant for a merchant mariner's document shall take, before issuance of the document, an oath that the applicant will perform faithfully and honestly all the duties required by law, and will carry out the lawful orders of superior officers.

§ 7306. General requirements and classifications for able seamen

(a) To qualify for an endorsement as able seaman authorized by this section, an applicant must provide satisfactory proof that the applicant—

(1) is at least 18 years of age;

(2) has the service required by the applicable section of this part;

(3) is qualified professionally as demonstrated by an applicable examination or educational requirements; and

(4) is qualified as to sight, hearing, and physical condition to perform the seaman's duties.

(b) The classifications authorized for endorsement as able seaman are the following:

(1) able seaman—unlimited.

(2) able seaman—limited.

(3) able seaman—special.

(4) able seaman—offshore supply vessels.

(5) able seaman—sail.

§ 7307. Able seamen—unlimited

The required service for the endorsement of able seaman—unlimited, qualified for unlimited service on a vessel on any waters, is at least 3 years' service on deck on board vessels operating at sea or on the Great Lakes.

§ 7308. Able seamen—limited

The required service for the endorsement of able seaman—limited, qualified for limited service on a vessel on any waters, is at least 18 months' service on deck on board vessels of at least 100 gross tons operating on the oceans or navigable waters of the United States (including the Great Lakes).

§ 7309. Able seamen—special

The required service for the endorsement of able seaman—special, qualified for special service on a vessel on any waters, is at least 12 months' service on deck on board vessels operating on the oceans or the navigable waters of the United States (including the Great Lakes).

§ 7310. Able seamen—offshore supply vessels

For service on a vessel of less than 500 gross tons engaged in support of exploration, exploitation, or production of offshore mineral or energy resources, an individual may be rated as able seaman—offshore supply vessels if the individual has at least 6 months' service on deck on board vessels operating on the oceans or the navigable waters of the United States (including the Great Lakes).

§ 7311. Able seamen—sail

For service on a sailing school vessel on any waters, an individual may be rated as able seaman—sail if the individual has at least 6 months' service on deck on sailing school vessels, oceanographic research vessels powered primarily by sail, or equivalent sailing vessels operating on the oceans or navigable waters of the United States (including the Great Lakes).

§ 7312. Scale of employment

(a) Individuals qualified as able seamen—unlimited under section 7307 of this title may constitute all of the able seamen required on a vessel.

(b) Individuals qualified as able seamen—limited under section 7308 of this title may constitute all of the able seamen required on a vessel of less than 1,600 gross tons or on a vessel operating on the Great Lakes and the Saint Lawrence River as far east as Sept Iles. Individuals qualified as able seamen—limited may constitute not more than 50 percent of the number of able seamen required on board other vessels.

(c) Individuals qualified as able seamen—special under section 7309 of this title may constitute—

(1) all of the able seamen required on a vessel of not more than 500 gross tons or on a seagoing barge or towing vessel; and

(2) not more than 50 percent of the number of able seamen required on board other vessels.

(d) Individuals qualified as able seamen—offshore supply vessels under section 7310 of this title may constitute all of the able seamen required on board a vessel of less than 500 gross tons engaged in support of exploration, exploitation, or production of offshore mineral or energy resources.

(e) When the service of able seaman—limited or able seamen—special is authorized for only a part of the required number of able seamen on board a vessel, the combined percentage of those individuals so qualified may not be greater than 50 percent of the required number.

§ 7313. General requirements for members of engine departments

(a) Classes of endorsement as qualified members of the engine department on vessels of at least 100 gross tons (except vessels operating on rivers or lakes (except the Great Lakes)) may be prescribed by regulation.

(b) The ratings of wiper and coal passer are entry ratings and are not ratings as qualified members of the engine department.

(c) An applicant for an endorsement as qualified member of the engine department must provide satisfactory proof that the applicant—

(1) has the service required by section 7314 of this title;

(2) is qualified professionally as demonstrated by an applicable examination; and

(3) is qualified as to sight, hearing, and physical condition to perform the member's duties.

§ 7314. Service requirements for qualified members of engine departments

To qualify for an endorsement as qualified member of the engine department, an applicant must provide proof that the applicant has 6 months' service in the related entry rating as described in section 7313(b) of this title.

§ 7315. Training

(a) Graduation from a nautical school vessel approved under law and regulation may be substituted for the service requirements under section 7307 or 7314 of this title.

(b) The satisfactory completion of other courses of instruction approved by the Secretary may be substituted for not more than one-third of the required service on deck at sea under sections 7307-7311 of this title.

(c) The satisfactory completion of other courses of instruction approved by the Secretary may be substituted for not more than one-half of the required service at sea under section 7314 of this title.

§ 7316. Lifeboatmen

To qualify for an endorsement as lifeboatman, an applicant must provide satisfactory proof that the applicant—

(1) has the service or training required by regulation;

(2) is qualified professionally as demonstrated by examination; and

(3) is qualified professionally by actual demonstration.

§ 7317. Tankermen

(a) The Secretary shall prescribe procedures, standards, and qualifications for the issuance of certificates or endorsements as tankerman, stating the types of oil or hazardous material that can be handled with safety to the vessel and the marine environment.

(b) An endorsement as tankerman shall indicate the grades or types of cargo the holder is qualified and authorized to handle with safety on board vessels.

§ 7318. Radiotelegraph operators on Great Lakes

(a) A radiotelegraph operator on the Great Lakes only shall have a first-class or second-class radiotelegraph operator's license issued by the Federal Communications Commission.

(b) An endorsement as radiotelegraph operator on the Great Lakes only ends if the holder ceases to hold the license issued by the Commission.

§ 7319. Records of merchant mariners' documents

The Secretary shall maintain records on each merchant mariner's document issued, including the name and address of the seaman to whom issued and the next of kin of the seaman. The records are not open to general or public inspection.

CHAPTER 75—GENERAL PROCEDURES FOR LICENSING, CERTIFICATION, AND DOCUMENTATION

Sec.

7501. Duplicates.

7502. Records.

7503. Dangerous drugs as grounds for denial.

§ 7501. Duplicates

(a) If a license, certificate, or document issued under this part is lost as a result of a marine casualty, the holder shall be supplied with a duplicate without cost.

(b) For any other loss, the seaman may obtain a duplicate on payment of reasonable costs prescribed by regulation by the Secretary.

§ 7502. Records

The Secretary shall maintain records on the issuances, denials, suspensions, and revocations of licenses, certificates of registry, merchant mariners' documents, and endorsements on those licenses, certificates, and documents.

§ 7503. Dangerous drugs as grounds for denial

(a) In this section, "dangerous drug" means a narcotic drug, controlled substance, and marihuana (as defined in section 102 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 802)).

(b) A license, certificate, or document authorized to be issued under this part may be denied to an individual who—

(1) within 10 years before applying for the license, certificate, or document, has been convicted of violating a dangerous drug law of the United States or of a State; or

(2) when applying, has ever been a user of, or addicted to, a dangerous drug unless the individual provides satisfactory proof that the individual is cured.

CHAPTER 77—SUSPENSION AND REVOCATION

Sec.
7701. General.
7702. Administrative procedure.
7703. Bases for suspension or revocation.
7704. Dangerous drugs as grounds for revocation.
7705. Subpenas and oaths.

§ 7701. General

(a) The purpose of suspension and revocation proceedings is to promote safety at sea.

(b) Licenses, certificates of registry, and merchant mariners' documents may be suspended or revoked for acts described in section 7703 of this title.

(c) When a license, certificate of registry, or merchant mariner's document has been revoked under this chapter, the former holder may be issued a new license, certificate, or document only after it has been decided, under regulations prescribed by the Secretary, that the issuance is compatible with the requirements of good discipline and safety at sea.

(d) The Secretary may prescribe regulations to carry out this chapter.

§ 7702. Administrative procedure

(a) Sections 551-559 of title 5 apply to each hearing under this chapter about suspending or revoking a license, certificate of registry, or merchant mariners' document.

(b) The individual whose license, certificate of registry, or merchant mariner's document has been suspended or revoked under this chapter may appeal, within 30 days, the suspension or revocation to the Secretary.

§ 7703. Bases for suspension or revocation

A license, certificate, or merchant mariner's document issued by the Secretary may be suspended or revoked if, when acting under the authority of that license, certificate, or document, the holder—

(1) has violated or failed to comply with this subtitle, a regulation prescribed under this subtitle, or any other law or regulation intended to promote marine safety or to protect navigable waters.

(2) has committed an act of incompetence, misconduct, or negligence.

§ 7704. Dangerous drugs as grounds for revocation

(a) In this section, "dangerous drug" means a narcotic drug, controlled substance, and marihuana (as defined in section 102 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 802)).

(b) If it is shown at a hearing under this chapter that a holder of a license, certificate of registry, or document issued under this part, within 10 years before the beginning of the proceedings, has been convicted of violating a dangerous drug law of the United States or of a State, the license, certificate, or document shall be revoked.

(c) If it is shown that a holder has been a user of, or addicted to, a dangerous drug, the license, certificate, or document shall be revoked unless the holder provides satisfactory proof that the holder is cured.

§ 7705. Subpenas and oaths

(a) An official designated to investigate or preside at a hearing on matters that are grounds for suspension or revocation of licenses, certificates, and documents may administer oaths and issue subpenas to compel the attendance and testimony of witnesses and the production of records or other evidence during investigations and at hearings.

(b) The jurisdictional limits of a subpena issued under this section are the same as, and are enforceable in the same manner as, subpenas issued under chapter 63 of this title.

PART F—MANNING OF VESSELS

CHAPTER 81—GENERAL

Sec.
8101. Complement of inspected vessels.
8102. Watchmen.
8103. Citizenship and Naval Reserve requirements.
8104. Watches.
8105. Regulations.

§ 8101. Complement of inspected vessels

(a) The certificate of inspection issued to a vessel under part B of this subtitle shall state the complement of licensed individuals and crew (including lifeboatmen) considered by the Secretary to be necessary for safe operation. A manning requirement imposed on a sailing school vessel shall consider the participation of sailing school instructors and sailing school students in the operation of that vessel.

(b) The Secretary may modify the complement, by endorsement on the certificate, for reasons of changed conditions or employment.

(c) A requirement made under this section by an authorized official may be appealed to the Secretary under prescribed regulations.

(d) A vessel to which this section applies may not be operated without having in its service the complement required in the certificate of inspection.

(e) When a vessel is deprived of the service of a member of its complement without the consent, fault, or collusion of the owner, charterer, managing operator, agent, master, or individual in charge of the vessel, the master shall engage, if obtainable, a number of members equal to the number of those of whose services the master has been deprived. The replacements must be of the same or a higher grade or rating than those whose places they fill. If the master finds the vessel is sufficiently manned for the voyage, and replacements are not available to fill all the vacancies, the vessel may proceed on its voyage. Within 12 hours after the vessel arrives at its destination, the master shall report in writing to the Secretary the cause of each deficiency in the complement. A master failing to make the report is liable to the United States Government for a civil penalty of $50 for each deficiency.

(f) The owner, charterer, or managing operator of a vessel not manned as required by this section is liable to the Government for a civil penalty of $100, or, for a deficiency of a licensed individual, a penalty of $500.

(g) A person may not employ an individual as, and an individual may not serve as, a master, mate, engineer, radio officer, or pilot of a vessel to which this part or part B of this subtitle applies if the individual is not licensed by the Secretary. A person (including an individual) violating this subsection is liable to the Government for a civil penalty of not more than $500. Each day of a continuing violation is a separate offense.

(h) The owner, charterer, or managing operator of a freight vessel of less than 100 gross tons, a small passenger vessel, or a sailing school vessel not manned as required by this section is liable to the Government for a civil penalty of $1,000. The vessel also is liable in rem for the penalty.

§ 8102. Watchmen

The owner, charterer, or managing operator of a vessel carrying passengers during the nighttime shall keep a suitable number of watchmen in the vicinity of the cabins or staterooms and on each deck to guard against and give alarm in case of a fire or other danger. An owner, charterer, or managing operator failing to provide watchmen required by this section is liable to the United States Government for a civil penalty of $1,000.

§ 8103. Citizenship and Naval Reserve requirements

(a) Only a citizen of the United States may serve as master, chief engineer, or officer in charge of a deck watch or engineering watch on a documented vessel.

(b) On each departure of a documented vessel (except a fishing or whaling vessel or yacht) from a port of the United States, 75 percent of the seamen (excluding licensed individuals) must be citizens of the United States. If the Secretary decides, on investigation, that qualified citizen seamen are not available, the Secretary may reduce the percentage.

(c) On each departure from the United States of a vessel (except a passenger vessel) for which a construction or operating differential subsidy has been granted, all of the seamen of the vessel must be citizens of the United States.

(d)(1) On each departure from the United States of a passenger vessel for which a construction or operating differential subsidy has been granted, at least 90 percent of the entire complement (including licensed individuals) must be citizens of the United States.

(2) An individual not required by this subsection to be a citizen of the United States may be engaged only if the individual has a declaration of intention to become a citizen of the United States or other evidence of admission to the United States for permanent residence. An alien may be employed only in the steward's department of the passenger vessel.

(e) If a documented vessel is deprived for any reason of the services of an individual (except the master) when on a foreign voyage and a vacancy consequently occurs, until the vessel's first return to a United States port at which a replacement who is a citizen of the United States can be obtained, an individual not a citizen of the United States may serve in—

(1) the vacancy; or

(2) a vacancy resulting from the promotion of another individual to fill the original vacancy.

(f) A person employing an individual in violation of this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of $500 for each individual so employed.

(g) A deck or engineer officer employed on a vessel on which an operating differential subsidy is paid, or employed on a vessel (except a vessel of the Coast Guard or Saint Lawrence Seaway Development Corporation) owned or operated by the Department of Transportation or by a corporation organized or controlled by the Department, if eligible, shall be a member of the Naval Reserve.

(h) The President may—

(1) suspend any part of this section during a proclaimed national emergency; and

(2) when the needs of commerce require, suspend as far and for a period the President considers desirable, subsection (a) of

this section for crews of vessels of the United States documented for foreign trade.

§ 8104. Watches

(a) An owner, charterer, managing operator, master, individual in charge, or other person having authority may permit an officer to take charge of the deck watch on a vessel when leaving or immediately after leaving port only if the officer has been off duty for at least 6 hours within the 12 hours immediately before the time of leaving.

(b) On an oceangoing or coastwise vessel of not more than 100 gross tons, a licensed individual may not be required to work more than 9 of 24 hours when in port, including the date of arrival, or more than 12 of 24 hours at sea, except in an emergency when life or property are endangered.

(c) On a towing vessel (except a towing vessel operated only for fishing or engaged in salvage operations) operating on the Great Lakes, harbors of the Great Lakes, and connecting or tributary waters between Gary, Indiana, Duluth, Minnesota, Niagara Falls, New York, and Ogdensburg, New York, a licensed individual or seaman in the deck or engine department may not be required or permitted to work more than 8 hours in one day, except in an emergency when life or property are endangered.

(d) On a merchant vessel of more than 100 gross tons (except a vessel only operating on rivers, harbors, lakes (except the Great Lakes), bays, sounds, bayous, and canals, a fishing or whaling vessel, yacht, or vessel engaged in salvage operations), the licensed individuals, sailors, coal passers, firemen, oilers, and water tenders shall be divided, when at sea, into at least 3 watches, and shall be kept on duty successively to perform ordinary work incident to the operation and management of the vessel. The requirement of this subsection applies to radio officers only when at least 3 radio officers are employed. A licensed individual or seaman in the deck or engine department may not be required to work more than 8 hours in one day.

(e) On a vessel designated by subsections (c) and (d) of this section—

(1) a seaman may not be—

(A) engaged to work alternately in the deck and engine departments; or

(B) required to work in the engine department if engaged for deck department duty or required to work in the deck department if engaged for engine department duty;

(2) a seaman may not be required to do unnecessary work on Sundays, New Year's Day, July 4th, Labor Day, Thanksgiving Day, or Christmas Day, when the vessel is in a safe harbor, but this clause does not prevent dispatch of a vessel on a voyage; and

(3) when the vessel is in a safe harbor, 8 hours (including anchor watch) is a day's work.

(f) Subsections (d) and (e) of this section do not limit the authority of the master or other officer or the obedience of the seamen when, in the judgment of the master or other officer, any part of the crew is needed for—

(1) maneuvering, shifting the berth of, mooring, or unmooring, the vessel;

(2) performing work necessary for the safety of the vessel, or the vessel's passengers, crew, or cargo;

(3) saving life on board another vessel in jeopardy; or

(4) performing fire, lifeboat, or other drills in port or at sea.

(g) On a towing vessel (except a vessel to which subsection (c) of this section applies), an offshore supply vessel, or a barge to which this section applies, that is engaged on a voyage of less than 600 miles, the licensed individuals and crewmembers (except the coal passers, firemen, oilers, and water tenders) may be divided, when at sea, into at least 2 watches.

(h) On a vessel to which section 8904 of this title applies, an individual licensed to operate a towing vessel may not work for more than 12 hours in a consecutive 24-hour period except in an emergency.

(i) A person violating subsection (a) or (b) of this section is liable to the United States Government for a civil penalty of $100.

(j) The owner, charterer, or managing operator of a vessel on which a violation of subsection (c), (d), (e), of (h) of this section occurs is liable to the Government for a civil penalty of $500. The seaman is entitled to discharge from the vessel and receipt of wages earned.

§ 8105. Regulations

The Secretary may prescribe regulations to carry out this part.

CHAPTER 83—MASTERS AND OFFICERS

Sec.
8301. Minimum number of licensed individuals.
8302. Staff department.
8303. Service under licenses issued without examination.
8304. Implementing the Officers' Competency Certificates Convention, 1936.

§ 8301. Minimum number of licensed individuals

(a) Except as provided in chapter 89 of this title and except for a vessel operating only on rivers, harbors, lakes, bays, sounds, bayous, and canals, a vessel to which part B of this subtitle applies shall engage a minimum of licensed individuals as follows:

(1) Each of those vessels shall have a licensed master.

(2) A vessel of at least 1,000 gross tons and propelled by machinery shall have 3 licensed mates. However, if the vessel is on a voyage of less than 400 miles from port of departure to port of final destination, it shall have 2 licensed mates.

(3) A vessel of at least 200 gross tons but less than 1,000 gross tons and propelled by machinery shall have 2 licensed mates.

(4) A vessel of at least 100 gross tons but less than 200 gross tons and propelled by machinery shall have one licensed mate. However, if the vessel is on a voyage of more than 24 hours, it shall have 2 licensed mates.

(5) A freight vessel or a passenger vessel of at least 300 gross tons and propelled by machinery shall have a licensed engineer.

(b) An offshore supply vessel on a voyage of less than 600 miles shall have a licensed mate. However, if the vessel is on a voyage of at least 600 miles, the vessel shall have 2 licensed mates. An offshore supply vessel of more than 200 gross tons may not be operated without a licensed engineer.

(c) Subsection (a) of this section does not apply to a fishing or whaling vessel or a yacht.

(d) The Secretary may—

(1) suspend any part of this chapter during a national emergency proclaimed by the President; *and*

(2) increase the number of licensed individuals on a vessel to which this chapter applies if, in the Secretary's judgment, the vessel is not sufficiently manned for safe operation.

§ 8302. Staff department

(a) This section applies to a vessel of the United States except—

(1) a fishing or whaling vessel or a yacht;

(2) a vessel operated only on bays, sounds, inland waters, and lakes (except the Great Lakes); and

(3) a vessel ferrying passengers and cars on the Great Lakes.

(b) The staff department on a vessel is a separate and independent department. It consists of individuals registered under section 7101 of this title, clerks and individuals assigned to the senior registered medical doctor.

(c) The staff department is composed of a medical division and a purser's division. The officer in charge of each division is responsible only to the master. The senior registered medical doctor is in charge of the medical division. The senior registered purser is in charge of the purser's division.

(d) The officer in charge of the purser's division of the staff department on an oceangoing passenger vessel licensed to carry more than 100 passengers shall be a registered chief purser. When more than 3 persons are employed in the purser's division of that vessel, there also shall be at least one registered senior assistant purser and one registered junior assistant purser.

(e) A person may not employ an individual to serve in, and an individual may not serve in, a grade of staff officer on a vessel, when that staff officer is required by this section to be registered, if the individual does not have a certificate of registry as staff officer in that grade. A person (including an individual) violating this subsection is liable to the United States Government for a civil penalty of $100. However, if a registered staff officer is not available at the time of sailing, the vessel may sail with an unregistered staff officer or without a staff officer.

(f) A staff officer may not be included in a vessel's certificate of inspection.

(g) A registered staff officer serving under this section who is a member of the Naval Reserve may wear on the officer's uniform special distinguishing insignia prescribed by the Secretary of the Navy.

(h) The uniform stripes, decoration, or other insignia worn by a staff officer shall be of gold braid or woven gold or silver material. A crewmember (except a staff officer) may not wear any uniform with a staff officer's identifying insignia.

§ 8303. Service under licenses issued without examination

An individual issued a license without examination before October 29, 1941, to serve as master, mate, or engineer on a vessel not subject to inspection under part B of this subtitle, may not serve under authority of that license on a vessel that is subject to inspection under part B.

§ 8304. Implementing the Officers' Competency Certificates Convention, 1936

(a) In this section, "high seas" means waters seaward of the Boundary Line.

(b) The Officers' Competency Certificates Convention, 1936 (International Labor Organization Draft Convention Numbered 53, on the minimum requirement of professional capacity for masters and officers on board merchant vessels), as ratified by the President on September 1, 1938, with understandings appended, and this section apply to a documented vessel operating on the high seas except—

(1) a public vessel;

(2) a wooden vessel of primitive build, such as a dhow or junk;
(3) a barge; and
(4) a vessel of less than 200 gross tons.

(c) A person may not engage or employ an individual to serve as, and an individual may not serve as, a master, mate, or engineer on a vessel to which this section applies, if the individual does not have a license issued under section 7101 of this title authorizing service in the capacity in which the individual is to be engaged or employed.

(d) A person (including an individual) violating this section is liable to the United States Government for a civil penalty of $100.

(e) A license issued to an individual to whom this section applies is a certificate of competency.

(f) A designated official may detain a vessel to which this section applies (by written order served on the owner, charterer, managing operator, agent, master, or individual in charge of the vessel) when there is reason to believe that the vessel is about to proceed from a port of the United States to the high seas in violation of this section or a provision of the convention described in subsection (b) of this section. The vessel may be detained until the vessel complies with this section. Clearance may not be granted to a vessel ordered detained under this section.

(g) A foreign vessel to which the convention described in subsection (b) of this section applies, on the navigable waters of the United States, is subject to detention under subsection (f) of this section, and to an examination that may be necessary to decide if there is compliance with the convention.

(h) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel detained under subsection (f) or (g) of this section may appeal the order within 5 days as provided by regulation.

(i) An officer or employee of the Customs Service may be designated to enforce this section.

CHAPTER 85—PILOTS

Sec.
8501. State regulation of pilots.
8502. Federal pilots required.

§ 8501. State regulation of pilots

(a) Except as otherwise provided in this part, pilots in the bays, rivers, harbors, and ports of the United States shall be regulated only in conformity with the laws of the States.

(b) The master of a vessel entering or leaving a port on waters that are a boundary between 2 States, and that is required to have a pilot under this section, may employ a pilot licensed or authorized by the laws of either of the 2 States.

(c) A State may not adopt a regulation or provision that discriminates in the rate of pilotage or half-pilotage between vessels sailing between the ports of one State and vessels sailing between the ports of different States, or against vessels because of their means of propulsion, or against public vessels of the United States.

(d) A State may not adopt a regulation or provision that requires a coastwise vessel to take a pilot licensed or authorized by the laws of a State if the vessel—

(1) is propelled by machinery and subject to inspection under part B of this subtitle; or

(2) is subject to inspection under chapter 37 of this title.

(e) Any regulation or provision violating this section is void.

§ 8502. Federal pilots required

(a) A coastwise seagoing vessel, when not sailing on register and when underway (except on the high seas), shall be under the direction and control of a pilot licensed under section 7101 of this title if the vessel is—

(1) propelled by machinery and subject to inspection under part B of this subtitle; or

(2) subject to inspection under chapter 37 of this title.

(b) The fees charged for pilotage by pilots required under this section may not be more than the customary or legally established rates in the States in which the pilotage is performed.

(c) A State or political subdivision of a State may not impose on a pilot licensed under this subtitle an obligation to procure a State or other license, or adopt any other regulation that will impede the pilot in the performance of the pilot's duties under the laws of the United States.

(d) A State or political subdivision of a State may not levy pilot charges on a vessel lawfully piloted by a pilot required under this section.

(e) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel operated in violation of this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of $500. The vessel also is liable in rem for the penalty.

(f) An individual serving as a pilot without having a license required by this section or a regulation prescribed under this section is liable to the Government for a civil penalty of $500.

CHAPTER 87—UNLICENSED PERSONNEL

Sec.
8701. Merchant mariners' documents required.
8702. Certain crew requirements.
8703. Tankermen on tank vessels.

§ 8701. Merchant mariners' documents required

(a) This section applies to a merchant vessel of at least 100 gross tons except—

(1) a vessel operating only on rivers and lakes (except the Great Lakes);

(2) a barge (except a seagoing barge or a barge to which chapter 37 of this title applies);

(3) a fishing or whaling vessel or a yacht;

(4) a sailing school vessel with respect to sailing school instructors and sailing school students; and

(5) an oceanographic research vessel with respect to scientific personnel.

(b) A person may not engage or employ an individual, and an individual may not serve, on board a vessel to which this section applies if the individual does not have a merchant mariner's document issued to the individual under section 7302 of this title. Except for an individual required to be licensed or registered under this part, the document must authorize service in the capacity for which the holder of the document is engaged or employed.

(c) On a vessel to which section 10306 or 10503 of this title does not apply, an individual required by this section to hold a merchant mariner's document must exhibit it to the master of the vessel before the individual may be employed.

(d) A person (including an individual) violating this section is liable to the United States Government for a civil penalty of $500.

§ 8702. Certain crew requirements

(a) This section applies to a vessel of at least 100 gross tons except—

(1) a vessel operating only on rivers and lakes (except the Great Lakes);

(2) a barge (except a seagoing barge or a barge to which chapter 37 of this title applies);

(3) a fishing or whaling vessel or a yacht;

(4) a sailing school vessel with respect to sailing school instructors and sailing school students; and

(5) an oceanographic research vessel with respect to scientific personnel.

(b) A vessel may depart from a port of the United States only if at least—

(1) 75 percent of the crew in each department on board is able to understand any order spoken by the officers, and

(2) 65 percent of the deck crew (excluding licensed individuals) have merchant mariners' documents endorsed for a rating of at least able seaman, except that this percentage may be reduced to 50 percent on a vessel permitted under section 8104 of this title to maintain a 2-watch system.

(c) An able seaman is not required on a towing vessel operating on bays and sounds connected directly with the seas.

(d) An individual having a rating of less than able seaman may not be permitted at the wheel in ports, harbors, and other waters subject to congested vessel traffic, or under conditions of reduced visibility, adverse weather, or other hazardous circumstances.

(e) The owner, charterer, managing operator, agent, master, or individual in charge of a vessel operated in violation of this section or a regulation prescribed under this section is liable to the United States Government for a civil penalty of $500.

§ 8703. Tankermen on tank vessels

(a) A vessel of the United States to which chapter 37 of this title applies, that has on board oil or hazardous material in bulk as cargo or cargo residue, shall have a specified number of the crew certified as tankermen as required by the Secretary. This requirement shall be noted on the certificate of inspection issued to the vessel.

(b) The Secretary shall prescribe procedures, standards, and qualifications for the issuance of certificates as tankermen, stating the types of oil or hazardous material that can be handled with safety to the vessel and the marine environment.

(c) A vessel to which section 3702(b) of this title applies shall have on board as a crewmember in charge of the transfer operation an individual certified as a tankerman (qualified for the grade of fuel transferred), unless a master, mate, pilot, engineer, or operator licensed under section 7101 of this title is present in charge of the transfer. If the vessel does not have that individual on board, chapter 37 of this title applies to the vessel.

CHAPTER 89—SMALL VESSEL MANNING

Sec.
8901. Freight vessels.
8902. Small passenger vessels.
8903. Uninspected passenger vessels.
8904. Towing vessels.
8905. Exemptions.
8906. Penalty.

§ 8901. Freight vessels

A freight vessel of less than 100 gross tons shall be operated by an individual licensed by the Secretary to operate that type of

vessel in the particular geographic area, under prescribed regulations.

§ 8902. Small passenger vessels

A small passenger vessel shall be operated by an individual licensed by the Secretary to operate that type of vessel in the particular geographic area, under prescribed regulations.

§ 8903. Uninspected passenger vessels

An uninspected passenger vessel shall be operated by an individual licensed by the Secretary to operate that type of vessel, under prescribed regulations.

§ 8904. Towing vessels

A towing vessel that is at least 26 feet in length measured from end to end over the deck (exluding sheer), shall be operated by an individual licensed by the Secretary to operate that type of vessel in the particular geographic area, under prescribed regulations.

§ 8905. Exemptions

(a) Section 8903 of this title applies to a recreational vessel operated in dealer demonstrations only if the Secretary decides that the application of section 8903 is necessary for recreational vessel safety under section 4302(d) of this title.

(b) Section 8904 of this title does not apply to a vessel of less than 200 gross tons engaged in the offshore mineral and oil industry if the vessel has offshore mineral and oil industry sites or equipment as its ultimate destination or place of departure.

§ 8906. Penalty

An owner, charterer, managing operator, agent, master, or individual in charge of a vessel operated in violation of this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of $1,000. The vessel also is liable in rem for the penalty.

CHAPTER 91—TANK VESSEL MANNING STANDARDS

Sec.
9101. Standards for foreign tank vessels.
9102. Standards for tank vessels of the United States.

§ 9101. Standards for foreign tank vessels

(a) The Secretary shall—

(1) periodically evaluate the manning, training, qualification, and watchkeeping standards prescribed by the certificating country of a foreign vessel to which chapter 37 of this title applies, that operates on the navigable waters of the United States and transfers oil or hazardous material in a port or place under the jurisdiction of the United States; and

(2) after each evaluation made under clause (1) of this subsection, decide whether the foreign country, whose system for licensing and certification of seamen was evaluated, has standards that are equivalent to or more stringent than United States standards or international standards accepted by the United States.

(b) A foreign vessel to which chapter 37 of this title applies that has on board oil or hazardous material in bulk as cargo or cargo residue shall have a specified number of personnel certified as tankerman or equivalent, as required by the Secretary, when the vessel transfers oil or hazardous material in a port or place subject to the jurisdiction of the United States. The requirement of this subsection shall be noted in applicable terminal operating procedures. A transfer operation may take place only if the crewmember in charge is capable of clearly understanding instructions in English.

§ 9102. Standards for tank vessels of the United States

(a) The Secretary shall prescribe standards for the manning of each vessel of the United States to which chapter 37 of this title applies, related to the duties, qualifications, and training of the officers and crew of the vessel, including standards related to—

(1) instruction in vessel and cargo handling and vessel navigation under normal operating conditions in coastal and confined waters and on the high seas;

(2) instruction in vessel and cargo handling and vessel navigation in emergency situations and under marine casualty or potential casualty conditions;

(3) qualifications for licenses by specific type and size of vessels;

(4) qualifications for licenses by use of simulators for the practice or demonstration of marine-oriented skills;

(5) minimum health and physical fitness criteria for various grades of licenses and certificates;

(6) periodic retraining and special training for upgrading positions, changing vessel type or size, or assuming new responsibilities; and

(7) decisions about licenses and certificates, conditions of licensing or certification, and periods of licensing or certification by reference to experience, amount of training completed, and regular performance testing.

(b) The Secretary shall waive the application of criteria required by subsection (a)(5) of this section for an individual having a license or certificate (including a renewal of the license or certificate) in effect on October 17, 1978. When the waiver is granted, the Secretary may prescribe conditions for the license or certificate and its renewal, as the Secretary decides are reasonable and necessary for the safety of a vessel on which the individual may be employed.

CHAPTER 93—GREAT LAKES PILOTAGE

Sec.
9301. Definitions.
9302. Great Lakes pilots required.
9303. United States registered pilot service.
9304. Pilotage pools.
9305. Agreements with Canada.
9306. State regulation prohibited.
9307. Great Lakes Pilotage Advisory Committee.
9308. Penalties.

§ 9301. Definitions

In this chapter—

(1) "Canadian registered pilot" means an individual (except a regular crewmember of a vessel) who is registered by Canada on the same basis as an individual registered under section 9303 of this title.

(2) "Great Lakes" means Lakes Superior, Michigan, Huron, Erie, and Ontario, their connecting and tributary waters, the Saint Lawrence River as far east as Saint Regis, and adjacent port areas.

(3) "United States registered pilot" means an individual (except a regular crewmember of a vessel) who is registered under section 9303 of this title.

§ 9302. Great Lakes pilots required

(a)(1) Except as provided in subsections (d) and (e) of this section, each vessel of the United States operating on register and each foreign vessel shall engage a United States or Canadian registered pilot for the route being navigated who shall—

(A) in waters of the Great Lakes designated by the President, direct the navigation of the vessel subject to the customary authority of the master; and

(B) in waters of the Great Lakes not designated by the President, be on board and available to direct the navigation of the vessel at the discretion of and subject to the customary authority of the master.

(2) The President shall make water designations under this subsection with regard to the public interest, the effective use of navigable waters, marine safety, and the foreign relations of the United States.

(b) An individual of a vessel licensed for navigation on the Great Lakes under section 7101 of this title, or equivalent provisions of Canadian law, and qualified for the route being navigated, may serve as the pilot required on waters not designated by the President.

(c) The authority extended under subsections (a) and (b) of this section to a Canadian registered pilot or other Canadian licensed officer to serve on certain vessels in United States waters of the Great Lakes shall continue as long as Canada extends reciprocity to United States registered pilots and other individuals licensed by the United States for pilotage service in Canadian waters of the Great Lakes.

(d) A vessel may be operated on the United States waters of the Great Lakes without a United States or Canadian registered pilot when—

(1) the Secretary notifies the master that a registered pilot is not available; or

(2) the vessel or its cargo is in distress or jeopardy.

(e) A Canadian vessel regularly operating on the Great Lakes or between ports on the Great Lakes and the Saint Lawrence River, with only an occasional voyage to ports in the maritime provinces of Canada in the Canadian coastal trade, is exempt from subsections (a) and (b) of this section as long as Canada permits enrolled vessels of the United States to be operated on Canadian waters of the Great Lakes under the direction of individuals licensed under section 7101 of this title.

§ 9303. United States registered pilot service

(a) The Secretary shall prescribe by regulation standards of competency to be met by each applicant for registration under this chapter. An applicant must—

(1) have a license as master, mate, or pilot issued under section 7101 of this title;

(2) have acquired at least 24 months licensed service or equivalent experience on vessels or integrated towing vessels and tows of at least 4,000 gross tons, operating on the Great Lakes or oceans, with a minimum of 6 months of that service or experience having been on the Great Lakes; and

(3) agree that, if appointed as a United States registered pilot, the applicant will be available for service when required.

(b) The Secretary shall issue to each registered pilot under this chapter a certificate of registration describing the areas within which the pilot may serve. The pilot shall carry the certificate when in the service of a vessel.

(c) The Secretary shall prescribe by regulation the duration of validity of registration.

(d) The Secretary may prescribe by regulation the conditions for service by United States registered pilots, including availability for service.

(e) Subject to sections 551-559 of title 5, the Secretary may suspend or revoke a certificate of registration issued under this section if the holder fails to comply with a reg-

ulation prescribed under this chapter. Suspension or revocation of the holder's license under chapter 77 of this title includes the holder's certificate of registration.

(f) The Secretary shall prescribe by regulation rates and charges for pilotage services, giving consideration to the public interest and the costs of providing the services.

§ 9304. Pilotage pools

(a) The Secretary may authorize the formation of a pool by a voluntary association of United States registered pilots to provide for efficient dispatching of vessels and rendering of pilotage services.

(b) For pilotage pools, the Secretary may—

(1) limit the number of the pools;

(2) prescribe regulations for their operation and administration;

(3) prescribe a uniform system of accounts;

(4) perform audits and inspections; and

(5) require coordination on a reciprocal basis with similar pool arrangements authorized by the appropriate agency of Canada.

§ 9305. Agreements with Canada

To provide for a coordinated system of pilotage service on the Great Lakes, the Secretary, subject to the concurrence of the Secretary of State, may make agreements with the appropriate agency of Canada to—

(1) fix the number of pilots to be registered in each country;

(2) provide for participation on an equitable basis;

(3) prescribe joint or identical rates and charges;

(4) coordinate pool operations; and

(5) establish conditions for services by registered pilots.

§ 9306. State regulation prohibited

A State or political subdivision of a State may not regulate or impose any requirement on pilotage on the Great Lakes.

§ 9307. Great Lakes Pilotage Advisory Committee

(a) The Secretary may establish a Great Lakes Pilotage Advisory Committee. The Committee—

(1) may review proposed Great Lakes pilotage regulations and policies and make recommendations to the Secretary that the Committee considers appropriate;

(2) may make available to Congress recommendations that the Committee makes to the Secretary; and

(3) shall meet at the call of the Secretary.

(b) The Committee shall consist of 3 members appointed by the Secretary each of whom has at least 5 years practical experience in maritime operations. The term of each member is for a period of not more than 5 years, specified by the Secretary. Before filling a position on the Committee, the Secretary shall publish a notice in the Federal Register soliciting nominations for membership on the Committee.

(c) When attending meetings or otherwise serving at the request of the Secretary, a member of the Committee (except a member regularly employed by the United States Government) may be paid at a rate of not more than $75 a day. When serving away from home or regular place of business, the member may be allowed travel expenses, including per diem in lieu of subsistence as authorized by section 5703 of title 5 for individuals employed intermittently in the Government service.

§ 9308. Penalties

(a) An owner, charterer, managing operator, agent, master, or individual in charge of a vessel knowingly allowing the vessel to be operated in violation of section 9302 of this title is liable to the United States Government for a civil penalty of $500 for each day during which the vessel is in violation. The vessel also is liable in rem for the penalty.

(b) An individual who directs the navigation of a vessel in violation of section 9302 of this title is liable to the Government for a civil penalty of $500 for each day during which the violation occurs.

(c) A person violating a regulation prescribed under section 9303 of this title is liable to the Government for a civil penalty of $500.

PART G—MERCHANT SEAMEN PROTECTION AND RELIEF

CHAPTER 101—GENERAL

Sec.
10101. Definitions.
10102. Designations and duties of shipping commissioners.
10103. Reports.
10104. Regulations.

§ 10101. Definitions

In this part—

(1) "master" means the individual having command of a vessel owned by a citizen of the United States.

(2) "owner" means the person to whom the vessel belongs.

(3) "seaman" means an individual (except scientific personnel, a sailing school instructor, or a sailing school student) engaged or employed in any capacity on board a vessel owned by a citizen of the United States.

§ 10102. Designations and duties of shipping commissioners

(a) The Secretary shall designate officers, employees, and members of the Coast Guard to act as shipping commissioners under this part. The Secretary may designate officers and employees of the Customs Service as shipping commissioners.

(b) The general duties of shipping commissioners are to supervise the engagement and discharge of seamen.

(c) The owner, charterer, managing operator, agent, or master of the vessel shall perform the duties of shipping commissioner when a shipping commissioner is not available.

§ 10103. Reports

(a) A master of a vessel to which section 8701(a) of this title applies, who engages or discharges a seaman without a shipping commissioner being present, shall submit reports in the form, content, and manner of filing as prescribed by regulation, to ensure compliance with laws related to manning and the engagement and discharge of seamen.

(b) This section does not apply to a ferry or towing vessel operated in connection with a ferry operation, employed only in trades other than with foreign ports, lakes, bays, sounds, bayous, canals, or harbors.

§ 10104. Regulations

The Secretary may prescribe regulations to carry out this part.

CHAPTER 103—FOREIGN AND INTERCOASTAL VOYAGES

Sec.
10301. Application.
10302. Shipping articles agreements.
10303. Provisions.
10304. Form of agreement.
10305. Manner of signing agreement.
10306. Exhibiting merchant mariners' documents.
10307. Posting agreements.
10308. Foreign engagements.
10309. Engaging seamen to replace those lost by desertion or casualty.
10310. Discharge.
10311. Certificates of discharge.
10312. Settlements on discharge.
10313. Wages.
10314. Advances.
10315. Allotments.
10316. Trusts.
10317. Loss of lien and right to wages.
10318. Wages on discharge in foreign ports.
10319. Costs of a criminal conviction.
10320. Records of seamen.
10321. General penalty.

§ 10301. Application

(a) Except as otherwise specifically provided, this chapter applies to a vessel of the United States—

(1) on a voyage between a port in the United States and a port in a foreign country (except a port in Canada, Mexico, or the West Indies); or

(2) of at least 75 gross tons on a voyage between a port of the United States on the Atlantic Ocean and a port of the United States on the Pacific Ocean.

(b) This chapter does not apply to a vessel on which the seamen are entitled by custom or agreement to share in the profit or result of a voyage.

(c) Unless otherwise provided, this chapter does not apply to a foreign vessel.

§ 10302. Shipping articles agreements

(a) Before proceeding on a voyage, the master of a vessel to which this chapter applies shall make a shipping articles agreement in writing with each seaman in the crew.

(b) The agreement shall contain the following:

(1) the nature, and, as far as practicable, the duration of the intended voyage, and the port or country in which the voyage is to end.

(2) the number and description of the crew and the capacity in which each seaman is to be engaged.

(3) the time at which each seaman is to be on board to begin work.

(4) the amount of wages each seaman is to receive.

(5) regulations about conduct on board, and information on fines, short allowance of provisions, and other punishment for misconduct provided by law.

(6) a scale of the provisions that are to be provided each seaman.

(7) any stipulation in reference to advances and allotments of wages.

(8) other matters not contrary to law.

§ 10303. Provisions

(a) A seaman shall be served at least 3 meals a day that total at least 3,100 calories, including adequate water and adequate protein, vitamins, and minerals in accordance with the United States Recommended Daily Allowances.

(b) The text of subsection (a) of this section shall be included in the agreement required by section 10302 of this title. A copy of the text also shall be posted in a conspicuous place in the galley and forecastle of each vessel.

(c) This section does not apply to a fishing or whaling vessel or a yacht.

§ 10304. Form of agreement

The form of the agreement required by section 10302 of this title shall be in substance as follows:

UNITED STATES OF AMERICA

(Date and place of first signature of agreement):

It is agreed between the master and seamen of the , of which is at present master, or whoever shall go for master, now bound from the port of to ' (here the voyage is to be described, and the places named at which the vessel is to touch, or if that cannot be done, the general nature and probable length of the voyage is to be stated).

The seamen agree to conduct themselves in an orderly, faithful, honest, and sober manner, and to be at all times diligent in their respective duties, and to be obedient to the lawful commands of the master, or of an individual who lawfully succeeds the master, and of their superior officers in everything related to the vessel, and the stores and cargo of the vessel, whether on board, in boats, or on shore. In consideration of this service by the seamen to be performed, the master agrees to pay the crew, as wages, the amounts beside their names respectively expressed, and to supply them with provisions according to the annexed scale.

It is agreed that any embezzlement, or willful or negligent destruction of any part of the vessel's cargo or stores, shall be made good to the owner out of the wages of the person guilty of the embezzlement or destruction.

If an individual holds himself or herself out as qualified for a duty which the individual proves incompetent to perform, the individual's wages shall be reduced in proportion to the incompetency.

It also is agreed that if a seaman considers himself or herself to be aggrieved by any breach of this agreement or otherwise, the seaman shall present the complaint to the master or officer in charge of the vessel, in a quiet and orderly manner, who shall take steps that the case requires.

It also is agreed that (here any other stipulations may be inserted to which the parties agree, and that are not contrary to law).

In witness whereof, the parties have subscribed their names to this agreement, on the dates beside their respective signatures.

Signed by , master, on the day of , nineteen hundred and .

Signature of seaman	Time of service:
Birthplace	Months
Age	Days
Height:	Hospital money
Feet	Whole wages
Inches	Wages due
Description:	Place and time of entry
Complexion	Time at which seaman is to be on board
Hair	In what capacity
Wages each month	Shipping commissioner's signature or initials
Wages each voyage	Allotment payable to
Advance wages	Conduct qualifications
Amount of monthly allotment	

NOTE.—In the place for signature and descriptions of individuals engaged after the first departure of the vessel, the entries are to be made as above, except that the signature of the consul or vice consul, customs officer, or witness before whom the individual is engaged, is to be entered.

§ 10305. Manner of signing agreement

(a) The agreement required by section 10302 of this title shall be signed—

(1) first by the master and dated at that time, after which each seaman shall sign; and

(2) in the presence of a shipping commissioner.

(b) When the crew is first engaged, the agreement shall be signed in duplicate. One of the copies shall be retained by the shipping commissioner. The other copy shall contain space for the description and signatures of seamen engaged subsequent to the first making of the agreement, and shall be delivered to the master.

(c) An agreement signed before a shipping commissioner shall be acknowledged and signed by the commissioner on the agreement in the manner and form prescribed by regulation. The acknowledgment and certification shall include a statement by the commissioner that the seaman—

(1) has read the agreement;

(2) is acquainted with and understands its conditions; and

(3) has signed it freely and voluntarily when sober.

§ 10306. Exhibiting merchant mariners' documents

Before signing the agreement required by section 10302 of this title, each individual required by section 8701 of this title to have a merchant mariner's document shall exhibit to the shipping commissioner a document issued to the individual, appropriately endorsed for the capacity in which the individual is to serve.

§ 10307. Posting agreements

At the beginning of a voyage, the master shall have a legible copy of the agreement required by section 10302 of this title, omitting signatures, exhibited in a part of the vessel accessible to the crew. A master violating this section is liable to the United States Government for a civil penalty of $100.

§ 10308. Foreign engagements

(a) When a seaman is engaged outside the United States, the agreement required by section 10302 of this title shall be signed in the presence of a consular officer. If a consular officer is not available at the port of engagement, the seaman may be engaged, and the agreement shall be signed at the next port at which a consular officer is available.

(b) A master engaging a seaman in violation of this section is liable to the United States Government for a civil penalty of $100. The vessel also is liable in rem for the penalty.

§ 10309. Engaging seamen to replace those lost by desertion or casualty

(a) If a desertion or casualty results in the loss of at least one seaman, the master shall engage, if obtainable, a number equal to the number of seamen of whose services the master has been deprived. The new seaman must have at least the same grade or rating as the seaman whose place the new seaman fills. The master shall report the loss and replacement to a consular officer at the first port at which the master arrives.

(b) The master is liable to the United States Government for a civil penalty of $200 for each report not made. The vessel also is liable in rem for the penalty.

(c) This section does not apply to a fishing or whaling vessel or a yacht.

§ 10310. Discharge

A master shall deliver to a seaman or a shipping commissioner a full and true account of the seaman's wages and all deductions at least 48 hours before paying off or discharging the seaman. A master failing to deliver the account is liable to the United States Government for a civil penalty of $50.

§ 10311. Certificates of discharge

(a) On discharging a seaman and paying the seaman's wages, the shipping commissioner shall provide the seaman with a certificate of discharge. The form of the certificate shall be prescribed by regulation. It shall contain—

(1) the name of the seaman;

(2) the citizenship or nationality of the seaman;

(3) the number of the seaman's merchant mariner's document;

(4) the name and official number of the vessel;

(5) the nature of the voyage (foreign, intercoastal, or coastwise);

(6) the propulsion class of the vessel;

(7) the date and place of engagement;

(8) the date and place of discharge; and

(9) the seaman's capacity on the voyage.

(b) The certificate of discharge may not contain a reference about the character or ability of the seaman. The certificate shall be signed by the master, the seaman, and the shipping commissioner as witness.

(c) A certificate of discharge may not be issued if the seaman holds a continuous discharge book. The entries shall be made in the discharge book in the same manner as the entries required by subsection (a) of this section.

(d)(1) A record of each discharge shall be maintained by the Secretary in the manner and location prescribed by regulation. The records may not be open for general or public use or inspection.

(2) A duplicate of a record of discharge shall be issued to a seaman at a cost prescribed by regulation.

(e) This section does not apply to a fishing or whaling vessel or a yacht.

§ 10312. Settlements on discharge

(a) When discharge and settlement are completed, the master or owner and each seaman shall sign the agreement required by section 10302 of this title in the presence of a shipping commissioner. The commissioner shall sign the agreement and retain a copy. When signed, it shall serve as a mutual release of all claims for wages for the voyage.

(b) In a dispute about wages or deductions, if the parties agree in writing to submit the dispute to a shipping commissioner, the award made by the commissioner is conclusive in any subsequent legal proceeding. A document signed and sealed by a shipping commissioner purporting to be the award is prima facie evidence of the award.

(c) In a proceeding before a shipping commissioner related to the wages, claims, or discharge of a seaman, the shipping commissioner may call on the owner, charterer, managing operator, agent, master, or a

seaman to produce logbooks or other documents about a matter in question, and may summon before the commissioner and examine any person on the matter. An owner, charterer, managing operator, agent, master, or seaman failing on summons to produce a document in the possession or control of the owner, charterer, managing operator, agent, master, or seaman, or to give evidence, without reasonable cause, is liable to the United States Government for a civil penalty of $100. On application of the shipping commissioner, the owner, charterer, managing operator, agent, master, or seaman may be punished by a district court of the United States as in other cases of contempt of court.

(d) On request, a certified copy of an agreement may be provided to a party to the agreement and is admissible in evidence with the effect of the original in any subsequent proceeding.

(e) When a seaman has been discharged before a shipping commissioner, only the agreement is evidence of the release or satisfaction of any claim.

(f) If a discharge is made under this section, the shipping commissioner, at the request of the master, shall provide the master with a signed statement of the total amount of wages paid. Between the master and the employer, the statement shall be received as evidence that the master has made the payments as stated.

§ 10313. Wages

(a) A seaman's entitlement to wages and provisions begins when the seaman begins work or when specified in the agreement required by section 10302 of this title for the seaman to begin work or be present on board, whichever is earlier.

(b) Wages are not dependent on the earning of freight by the vessel. When the loss or wreck of the vessel ends the service of a seaman before the end of the period contemplated in the agreement, the seaman is entitled to wages for the period of time actually served. The seaman shall be deemed a destitute seaman under section 11104 of this title. This subsection applies to a fishing or whaling vessel but not a yacht.

(c) When a seaman who has signed an agreement is discharged improperly before the beginning of the voyage or before one month's wages are earned, without the seaman's consent and without the seaman's fault justifying discharge, the seaman is entitled to receive from the master or owner, in addition to wages earned, one month's wages as compensation.

(d) A seaman is not entitled to wages for a period during which the seaman—

(1) unlawfully failed to work when required, after the time fixed by the agreement for the seaman to begin work; or

(2) lawfully was imprisoned for an offense, unless a court hearing the case otherwise directs.

(e) After the beginning of the voyage, a seaman is entitled to receive from the master, on demand, one-half of the balance of wages earned and unpaid at each port at which the vessel loads or delivers cargo during the voyage. A demand may not be made before the expiration of 5 days from the beginning of the voyage, not more than once in 5 days, and not more than once in the same port on the same entry. If a master does not comply with this subsection, the seaman is released from the agreement and is entitled to payment of all wages earned. Notwithstanding a release signed by a seaman under section 10312 of this title, a court having jurisdiction may set aside, for good cause shown, the release and take action that justice requires. This subsection does not apply to a fishing or whaling vessel or a yacht. However, this subsection applies to a vessel taking oysters.

(f) At the end of a voyage, the master shall pay each seaman the balance of wages due the seaman within 24 hours after the cargo has been discharged or within 4 days after the seaman is discharged, whichever is earlier. When a seaman is discharged and final payment of wages is delayed for the period permitted by this subsection, the seaman is entitled at the time of discharge to one-third of the wages due the seaman.

(g) When payment is not made as provided under subsection (f) of this section without sufficient cause, the master or owner shall pay to the seaman 2 days' wages for each day payment is delayed.

(h) Subsections (f) and (g) of this section do not apply to a fishing or whaling vessel or a yacht. However, subsections (f) and (g) apply to a vessel taking oysters.

(i) This section applies to a seaman on a foreign vessel when in a harbor of the United States. The courts are available to the seaman for the enforcement of this section.

§ 10314. Advances

(a)(1) A person may not—

(A) pay a seaman wages in advance of the time when the seaman has earned the wages;

(B) pay advance wages of the seaman to another person; or

(C) make to another person an order, note, or other evidence of indebtedness of the wages, or pay another person, for the engagement of seamen when payment is deducted or to be deducted from the seaman's wage.

(2) A person violating this subsection is liable to the United States Government for a civil penalty of not more than $500. A payment made in violation of this subsection does not relieve the vessel or the master from the duty to pay all wages after they have been earned.

(b) A person demanding or receiving from a seaman or an individual seeking employment as a seaman, remuneration for providing the seaman or individual with employment, is liable to the Government for a civil penalty of not more than $500.

(c) This section applies to a foreign vessel when in waters of the United States. An owner, charterer, managing operator, agent, or master of a foreign vessel violating this section is liable to the Government for the same penalty as an owner, charterer, managing operator, agent, or master of a vessel of the United States for the same violation.

(d) The owner, charterer, managing operator, agent, or master of a vessel seeking clearance from a port of the United States shall present the agreement required by section 10302 of this title at the office of clearance. Clearance may be granted to a vessel only if this section has been complied with.

(e) This section does not apply to a fishing or whaling vessel or a yacht. However, this section applies to a vessel taking oysters.

§ 10315. Allotments

(a) Under prescribed regulations, a seaman may stipulate as follows in the agreement required by section 10302 of this title for an allotment of any part of the wages the seaman may earn:

(1) to the seaman's grandparents, parents, spouse, sister, brother, or children;

(2) to an agency designated by the Secretary of the Treasury to handle applications for United States savings bonds, to purchase bonds for the seaman; and

(3) for deposits to be made in an account for savings or investment opened by the seaman and maintained in the seaman's name at a savings bank or a savings institution in which the accounts are insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation.

(b) An allotment is valid only if made in writing and signed by and approved by a shipping commissioner. The shipping commissioner shall examine allotments and the parties to them to enforce compliance with the law. Stipulations for allotments made at the beginning of a voyage shall be included in the agreement and shall state the amounts and times of payment and the person to whom payments are to be made.

(c) Only an allotment complying with this section is lawful. A person falsely claiming qualification as an allottee under this section is liable to the United States Government for a civil penalty of not more than $500.

(d) The owner, charterer, managing operator, agent, or master of a vessel seeking clearance from a port of the United States shall present the agreement at the office of clearance. Clearance may be granted to a vessel only if this section has been complied with.

(e) This section applies to a foreign vessel when in waters of the United States. An owner, charterer, managing operator, agent, or master of a foreign vessel violating this section is liable to the Government for the same penalty as an owner, charterer, managing operator, agent, or master of a vessel of the United States for the same violation.

§ 10316. Trusts

Sections 10314 and 10315 of this title do not prevent an employer from making deductions from the wages of a seaman, with the written consent of the seaman, if—

(1) the deductions are paid into a trust fund established only for the benefit of seamen employed by that employer, and the families and dependents of those seamen (or of those seamen, families, and dependents jointly with other seamen employed by other employers, and the families and dependents of the other seamen); and

(2) the payments are held in trust to provide, from principal or interest, or both, any of the following benefits for those seamen and their families and dependents:

(A) medical or hospital care, or both.

(B) pensions on retirement or death of the seaman.

(C) life insurance.

(D) unemployment benefits.

(E) compensation for illness or injuries resulting from occupational activity.

(F) sickness, accident, and disability compensation.

(G) purchasing insurance to provide any of the benefits specified in this section.

§ 10317. Loss of lien and right to wages

A master or seaman by any agreement other than one provided for in this chapter may not forfeit the master's or seaman's lien on the vessel or be deprived of a remedy to which the master or seaman otherwise would be entitled for the recovery of wages. A stipulation in an agreement inconsistent with this chapter, or a stipulation by which a seaman consents to abandon a right to wages if the vessel is lost, or to abandon a right the seaman may have or obtain in the nature of salvage, is void.

§ 10318. Wages on discharge in foreign ports

(a) When a master or seaman applies to a consular officer for the discharge of the seaman, the consular officer shall require the master to pay the seaman's wages if it appears that the seaman has carried out the agreement required by section 10302 of this title or otherwise is entitled to be discharged. Then the consular officer shall discharge the seaman. A consular officer shall require the payment of extra wages only as provided in this section or in chapter 109 of this title.

(b) When discharging a seaman, a consular officer who fails to require the payment of the wages due a seaman at the time, and of the extra wages due under subsection (a) of this section, is accountable to the United States Government for the total amount.

(c) A seaman discharged under this section with the consent of the seaman is entitled to wages up to the time of discharge, but not for any additional period.

(d) If the seaman is discharged involuntarily, and it appears that the discharge was not because of neglect of duty, incompetency, or injury incurred on the vessel, the master shall provide the seaman with employment on a vessel agreed to by the seaman or shall provide the seaman with one month's extra wages.

(e) Expenses for the maintenance and return of an ill or injured seaman to the United States shall be paid by the Secretary of State. If a seaman is incapacitated by illness or injury and prompt discharge is necessary, but a personal appearance of the master before a consular officer is impracticable, the master may provide transportation to the seaman to the nearest consular officer for discharge.

(f) A deduction from wages of the seaman is permitted only if the deduction appears in the account of the seaman required to be delivered under section 10310 of this title, except for matters arising after delivery of the account, in which case a supplementary account is required. During a voyage, the master shall record in the official logbook the matters about which deductions are to be made with the amounts of the deductions. The entries shall be made as the matters occur. The master shall produce the official logbook at the time of payment of wages, and also before a competent authority on the hearing of any complaint or question about the payment of wages.

§ 10319. Costs of a criminal conviction

In a proceeding about a seaman's wages, if it is shown that the seaman was convicted during the voyage of an offense by a competent tribunal and sentenced by the tribunal, the court hearing the case may direct that a part of the wages due the seaman, but not more than $15, be applied to reimburse the master for costs properly incurred in procuring the conviction and sentence.

§ 10320. Records of seamen

The Secretary may prescribe regulations for reporting by a master of matters about the engagement, discharge, or service of seamen that may be needed in keeping central records of seamen.

§ 10321. General penalty

The owner, charterer, managing operator, agent, or master of a vessel on which a seaman is carried in violation of this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of $200 for each seaman carried in violation. The vessel also is liable in rem for the penalty.

CHAPTER 105—COASTWISE VOYAGES

Sec.
10501. Application.
10502. Shipping articles agreements.
10503. Exhibiting merchant mariners' documents.
10504. Wages.
10505. Advances.
10506. Trusts.
10507. Duties of shipping commissioners.
10508. General penalties.
10509. Penalty for failing to begin voyage.

§ 10501. Application

(a) Except for a vessel to which chapter 103 of this title applies, this chapter applies to a vessel of at least 50 gross tons on a voyage between a port in one State and a port in another State (except an adjoining State).

(b) This chapter does not apply to a vessel on which the seamen are entitled by custom or agreement to share in the profit or result of a voyage.

(c) Unless otherwise provided, this chapter does not apply to a foreign vessel.

§ 10502. Shipping articles agreements

(a) Before proceeding on a voyage, the master of a vessel to which this chapter applies shall make a shipping articles agreement in writing with each seaman on board, declaring the nature of the voyage or the period of time for which the seaman is engaged.

(b) The agreement shall include the date and hour on which the seaman must be on board to begin the voyage.

(c) The agreement may not contain a provision on the allotment of wages or a scale of provisions.

§ 10503. Exhibiting merchant mariners' documents

Before signing the agreement required by section 10502 of this title, a seaman required by section 8701 of this title to have a merchant mariner's document shall exhibit to the master a document issued to the seaman and appropriately endorsed for the capacity in which the seaman is to serve.

§ 10504. Wages

(a) After the beginning of a voyage, a seaman is entitled to receive from the master, on demand, one-half of the balance of wages earned and unpaid at each port at which the vessel loads or delivers cargo during the voyage. A demand may not be made before the expiration of 5 days from the beginning of the voyage, not more than once in 5 days, and not more than once in the same port on the same entry. If a master does not comply with this subsection, the seaman is released from the agreement required by section 10502 of this title and is entitled to payment of all wages earned. Notwithstanding a release signed by a seaman under section 10312 of this title, a court having jurisdiction may set aside, for good cause shown, the release and take action that justice requires. This subsection does not apply to a fishing or whaling vessel or a yacht. However, this subsection applies to a vessel taking oysters.

(b) The master shall pay a seaman the balance of wages due the seaman within 2 days after the termination of the agreement required by section 10502 of this title or when the seaman is discharged, whichever is earlier.

(c) When payment is not made as provided under subsection (b) of this section without sufficient cause, the master or owner shall pay to the seaman 2 days' wages for each day payment is delayed.

(d) Subsections (b) and (c) of this section do not apply to a fishing or whaling vessel or a yacht. However, subsections (b) and (c) apply to a vessel taking oysters.

(e) This section applies to a seaman on a foreign vessel when a in harbor of the United States. The courts are available to the seaman for the enforcement of this section.

§ 10505. Advances

(a)(1) A person may not—

(A) pay a seaman wages in advance of the time when the seaman has earned the wages;

(B) pay advance wages of the seaman to another person; or

(C) make to another person an order, note, or other evidence of indebtedness of the wages, or pay another person, for the engagement of seamen when payment is deducted or to be deducted from the seaman's wage.

(2) A person violating this subsection is liable to the United States Government for a civil penalty of not more than $100. A payment made in violation of this subsection does not relieve the vessel or the master from the duty to pay all wages after they have been earned.

(b) A person demanding or receiving from a seaman or an individual seeking employment as a seaman, remuneration for providing the seaman or individual with employment, is liable to the Government for a civil penalty of not more than $500.

(c) The owner, charterer, managing operator, agent, or master of a vessel seeking clearance from a port of the United States shall present the agreement required by section 10502 of this title at the office of clearance. Clearance may be granted to a vessel only if this section has been complied with.

(d) This section does not apply to a fishing or whaling vessel or a yacht. However, this section applies to a vessel taking oysters.

§ 10506. Trusts

Section 10505 of this title does not prevent an employer from making deductions from the wages of a seaman, with the written consent of the seaman, if—

(1) the deductions are paid into a trust fund established only for the benefit of seamen employed by that employer, and the families and dependents of those seamen (or of those seamen, families, and dependents jointly with other seamen employed by other employers, and the families and dependents of the other seamen); and

(2) the payments are held in trust to provide, from principal or interest, or both, any of the following benefits for those seamen and their families and dependents:

(A) medical or hospital care, or both.

(B) pensions on retirement or death of the seaman.

(C) life insurance.

(D) unemployment benefits.

(E) compensation for illness or injuries resulting from occupational activity.

(F) sickness, accident, and disability compensation.

(G) purchasing insurance to provide any of the benefits specified in this section.

§ 10507. Duties of shipping commissioners

(a) At the option of the owner or master of a vessel to which this chapter applies, a shipping commissioner may engage and discharge the crew.

(b) When a crew is engaged under this section, sections 10302, 10303, 10305, 10307,

10311, 10312, 10313(b)-(f), and 10321, and chapter 107 of this title apply.

§ 10508. General penalties

(a) A master who carries a seaman on a voyage without first making the agreement required by section 10502 of this title shall pay to the seaman the highest wage that was paid for a similar voyage within the 3 months before the time of engagement at the port or place at which the seaman was engaged. A seaman who has not signed an agreement is not bound by the applicable regulations, penalties, or forfeitures.

(b) A master engaging a seaman in violation of this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of $20. The vessel also is liable in rem for the penalty.

§ 10509. Penalty for failing to begin voyage

(a) A seaman who fails to be on board at the time contained in the agreement required by section 10502 of this title, without having given 24 hours' notice of inability to do so, shall forfeit, for each hour's lateness, one-half of one day's pay to be deducted from the seaman's wages if the lateness is recorded in the official logbook on the date of the violation.

(b) A seaman who does not report at all or subsequently deserts forfeits all wages.

(c) This section does not apply to a fishing or whaling vessel or a yacht.

CHAPTER 107—EFFECTS OF DECEASED SEAMEN

Sec.
10701. Application.
10702. Duties of masters.
10703. Procedures of masters.
10704. Duties of consular officers.
10705. Disposition of money, property, and wages by consular officers.
10706. Seamen dying in the United States.
10707. Delivery to district court.
10708. Sale of property.
10709. Distribution.
10710. Unclaimed money, property, and wages.
10711. Penalties.

§ 10701. Application

(a) Except as otherwise specifically provided, this chapter applies to a vessel on a voyage between—

(1) a port of the United States and a port in a foreign country (except a port in Canada, Mexico, and the West Indies); and

(2) a port of the United States on the Atlantic Ocean and a port of the United States on the Pacific Ocean.

(b) This chapter does not apply to a vessel on which a seaman by custom or agreement is entitled to share in the profit or result of a voyage.

(c) This chapter does not apply to a foreign vessel.

§ 10702. Duties of masters

(a) When a seaman dies during a voyage, the master shall take charge of the seaman's money and property. An entry shall be made in the official logbook, signed by the master, the chief mate, and an unlicensed crewmember containing an inventory of the money and property and a statement of the wages due the seaman, with the total of the deductions to be made.

(b) On compliance with this chapter, the master shall obtain a written certificate of compliance from a shipping commissioner. Clearance may be granted to a foreign-bound vessel only when the certificate is received at the office of customs.

§ 10703. Procedures of masters

(a) If the vessel is proceeding to the United States when a seaman dies, the master shall deliver the seaman's money, property, and wages when the agreement required by this part is ended, as provided by regulations prescribed by the Secretary.

(b) If the vessel touches at a foreign port after the death of the seaman, the master shall report to the first available consular officer. The consular officer may require the master to deliver to the officer the money, property, and wages of the seaman. The consular officer shall give the master a receipt for the matters delivered and certify on the agreement the particulars of the delivery. When the agreement ends, the master shall deliver the receipt as prescribed by regulations.

(c) If the consular officer does not require the master to deliver the seaman's money, property, and wages, the officer shall so certify on the agreement, and the master shall dispose of the money, property, and wages as provided under subsection (a) of this section.

(d) A deduction from the account of a deceased seaman is valid only if certified by a proper entry in the official logbook.

§ 10704. Duties of consular officers

When a seaman dies outside the United States leaving money or property not on board a vessel, the consular officer nearest the place at which the money and property is located shall claim and take charge of it.

§ 10705. Disposition of money, property, and wages by consular officers

When money, property, or wages of a deceased seaman comes into possession of a consular officer, the officer may—

(1) sell the property and remit the proceeds and other money or wages of the seaman the officer has received, to the district court of the United States for the district in which the voyage begins or ends; or

(2) deliver the money, property, and wages to the district court.

§ 10706. Seamen dying in the United States

When a seaman dies in the United States and is entitled at death to claim money, property, or wages from the master or owner of a vessel on which the seaman served, the master or owner shall deliver the money, property, and wages as provided by regulations prescribed by the Secretary.

§ 10707. Delivery to district court

The Secretary shall provide for the delivery to a district court of the United States of the money, property, and wages of a deceased seaman within one week from the date of receipt.

§ 10708. Sale of property

A district court of the United States may direct the sale of any part of the property of a deceased seaman. Proceeds of the sale shall be held as wages of the seaman are held.

§ 10709. Distribution

(a)(1) If the money, property, and wages of a seaman, including proceeds from the sale of property, are not more then $1,500 in value, and subject to deductions it allows for expenses and at least 60 days after receiving the money, property, and wages, the court may deliver the money, property, and wages to a claimant proving to be—

(A) the seaman's surviving spouse or child;

(B) entitled to the money, property, and wages under the seaman's will or under a law or at common law; or

(C) entitled to secure probate, or take out letters of administration, although no probate or letters of administration have been issued.

(2) The court is released from further liability for the money, property, and wages distributed under paragraph (1) of this subsection.

(3) Instead of acting under paragraphs (1) and (2) of this subsection, the court may require probate or letters of administration to be taken out, and then deliver the money, property, and wages to the legal representative of the seaman.

(b) If the money, property, and wages are more than $1,500 in value, the court, subject to deductions for expenses, shall deliver the money, property, and wages to the legal representative of the seaman.

§ 10710. Unclaimed money, property, and wages

(a) When a claim for the money, property, or wages of a deceased seaman held by a district court of the United States has not been substantiated within 6 years after their receipt by the court, the court, if a subsequent claim is made, may allow or refuse the claim.

(b) If, after money, property, and wages have been held by the court for 6 years, it appears to the court that no claim will have to be satisfied, the property shall be sold. The money and wages and the proceeds from the sale shall be deposited in the Treasury trust fund receipt account "Unclaimed Moneys of Individuals Whose Whereabouts are Unknown".

§ 10711. Penalties

An owner or master violating this chapter are each liable to the United States Government for a civil penalty of 3 times the value of the seaman's money, property, and wages involved or, if the value is not determined, of $200.

CHAPTER 109—PROCEEDINGS ON UNSEAWORTHINESS

Sec.
10901. Application.
10902. Complaints of unfitness.
10903. Proceedings on examination of vessel.
10904. Refusal to proceed.
10905. Complaints in foreign ports.
10906. Discharge of crew for unsuitability.
10907. Permission to make complaint.
10908. Penalty for sending unseaworthy vessel to sea.

§ 10901. Application

This chapter applies to a vessel of the United States except a fishing or whaling vessel or a yacht.

§ 10902. Complaints of unfitness

(a)(1) If the chief and second mates or a majority of the crew of a vessel ready to begin a voyage discover, before the vessel leaves harbor, that the vessel is unfit as to crew, hull, equipment, tackle, machinery, apparel, furniture, provisions of food or water, or stores to proceed on the intended voyage and require the unfitness to be inquired into, the master immediately shall apply to the district court of the United States at the place at which the vessel is located, or, if no court is being held at the place at which the vessel is located, to a judge or justice of the peace, for the appointment of surveyors. At least 2 complaining seamen shall accompany the master to the judge or justice of the peace.

(2) A master failing to comply with this subsection is liable to the United States Government for a civil penalty of $500.

(b)(1) Any 3 seamen of a vessel may complain that the provisions of food or water for the crew are, at any time, of bad quality, unfit for use, or deficient in quantity. The complaint may be made to the commanding officer of a United States naval vessel, consular officer, Coast Guard shipping commissioner, or chief official of the Customs Service.

(2) The officer, commissioner, or official shall examine, or have examined, the provisions of food or water. If the provisions are found to be of bad quality, unfit for use, or deficient in quantity, the person making the findings shall certify to the master of the vessel which provisions are of bad quality, unfit for use, or deficient.

(3) The officer, commissioner, or official to whom the complaint was made shall—

(A) make an entry in the official logbook of the vessel on the results of the examination; and

(B) submit a report on the examination to the district court of the United States at which the vessel is to arrive, with the report being admissible into evidence in any legal proceeding.

(4) The master is liable to the Government for a civil penalty of not more than $100 each time the master, on receiving the certification referred to in paragraph (2) of this subsection—

(A) does not provide other proper provisions of food or water, when available, in place of the provisions certified as of bad quality or unfit for use;

(B) does not obtain sufficient provisions when the certification includes a finding of a deficiency in quantity; or

(C) uses provisions certified to be of bad quality or unfit for use.

§ 10903. Proceedings on examination of vessel

(a) On application made under section 10902(a) of this title, the judge or justice of the peace shall appoint 3 experienced and skilled marine surveyors to examine the vessel for the defects or insufficiencies complained of. The surveyors have the authority to receive and consider evidence necessary to evaluate the complaint. When the complaint involves provisions of food or water, one of the surveyors shall be a medical officer of the Public Health Service, if available. The surveyors shall make a report in writing, signed by at least 2 of them, stating whether the vessel is fit to proceed to sea or, if not, in what respect it is unfit, making appropriate recommendations about additional seamen, provisions, or stores, or about physical repairs, alterations, or additions necessary to make the vessel fit.

(b) On receiving the report, the judge or justice of the peace shall endorse on the report the judgment of the judge or justice on whether the vessel is fit to proceed on the voyage, and, if not, whether the vessel may proceed to another port at which the deficiencies can be corrected. The master and the crew shall comply with the judgment.

(c) The master shall pay all costs of the survey, report, and judgment. However, if the complaint of the crew appears in the report and judgment to have been without foundation, or if the complaint involved provisions of food or water, without reasonable grounds, the master or owner may deduct the amount of the costs and reasonable damages for the detention of the vessel, as determined by the judge or justice of the peace, from the wages of the complaining seamen.

(d) A master of a vessel violating this section who refuses to pay the costs and wages is liable to the United States Government for a civil penalty of $100 and is liable in damages to each person injured by the refusal.

§ 10904. Refusal to proceed

After a judgment under section 10903 of this title that a vessel is fit to proceed on the intended voyage, or after the order of a judgment to make up deficiencies is complied with, if a seaman does not proceed on the voyage, the unpaid wages of the seaman are forfeited.

§ 10905. Complaints in foreign ports

(a) When a complaint under section 10902(a) of this title is made in a foreign port, the procedures of this chapter shall be followed, with a consular officer performing the duties of the judge or justice of the peace.

(b) On review of the marine surveyors' report, the consular officer may approve and must certify any part of the report with which the officer agrees. If the consular officer dissents from any part of the report, the officer shall certify reasons for dissenting from that part.

§ 10906. Discharge of crew for unsuitability

When a survey is made at a foreign port, the surveyors shall state in the report whether, in their opinion, the vessel had been sent to sea unsuitably provided in any important particular, by neglect or design or through mistake or accident. If by neglect or design, and the consular officer approves the finding, the officer shall discharge a seaman requesting discharge and shall require the master to pay one month's wages to that seaman in addition to wages then due, or sufficient money for the return of the seaman to the nearest and most convenient port of the United States, whichever is the greater amount.

§ 10907. Permission to make complaint

(a) A master may not refuse to permit, deny the opportunity to, or hinder a seaman who wishes to make a complaint authorized by this chapter.

(b) A master violating this section is liable to the United States Government for civil penalty of $500.

§ 10908. Penalty for sending unseaworthy vessel to sea

A person that knowingly sends or attempts to send, or that is a party to sending or attempting to send, a vessel of the United States to sea, in an unseaworthy state that is likely to endanger the life of an individual, shall be fined not more than $1,000, imprisoned for not more than 5 years, or both.

CHAPTER 111—PROTECTION AND RELIEF

Sec.
11101. Accommodations for seamen.
11102. Medicine chests.
11103. Slop chests.
11104. Destitute seamen.
11105. Wages on discharge when vessel sold.
11106. Wages on justifiable complaint of seamen.
11107. Unlawful engagements void.
11108. Taxes.
11109. Attachment of wages.
11110. Seamen's clothing.
11111. Limit on amount recoverable on voyage.

§ 11101. Accommodations for seamen

(a) On a merchant vessel of the United States the construction of which began after March 4, 1915 (except a yacht, pilot vessel, or vessel of less than 100 gross tons)—

(1) each place appropriated to the crew of the vessel shall have a space of at least 120 cubic feet and at least 16 square feet, measured on the floor or deck of that place, for each seaman or apprentice lodged in the vessel;

(2) each seaman shall have a separate berth and not more than one berth shall be placed one above another;

(3) the place or berth shall be securely constructed, properly lighted, drained, heated, and ventilated, properly protected from weather and sea, and, as far as practicable, properly shut off and protected from the effluvium of cargo or bilge water; and

(4) crew space shall be kept free from goods or stores that are not the personal property of the crew occupying the place in use during the voyage.

(b) In addition to the requirements of subsection (a) of this section, a merchant vessel of the United States that in the ordinary course of trade makes a voyage of more than 3 days' duration between ports and carries a crew of at least 12 seamen shall have a hospital compartment, suitably separated from other spaces. The compartment shall have at least one bunk for each 12 seamen constituting the crew (but not more than 6 bunks may be required).

(c) A steam vessel of the United States operating on the Mississippi River or its tributaries shall provide, under the direction and approval of the Secretary, an appropriate place for the crew that shall conform to the requirements of this section, as far as they apply to the steam vessel, by providing a properly heated sleeping room in the engineroom of the steam vessel properly protected from the cold, wind, and rain by means of suitable awnings or screens on either side of the guards or sides and forward, reaching from the boiler deck to the lower or main deck.

(d) A merchant vessel of the United States, the construction of which began after March 4, 1915, having more than 10 seamen on deck, shall have at least one light, clean, and properly heated and ventilated washing place. There shall be provided at least one washing outfit for each 2 seamen of the watch. A separate washing place shall be provided for the fireroom and engineroom seamen, if their number is more than 10, that shall be large enough to accommodate at least one-sixth of them at the same time, and have a hot and cold water supply and a sufficient number of washbasins, sinks, and shower baths.

(e) Forecastles shall be fumigated at intervals provided by regulations prescribed by the Secretary of Health and Human Services, with the approval of the Secretary, and shall have at least 2 exits, one of which may be used in emergencies.

(f) The owner, charterer, managing operator, agent, master, or licensed individual of a vessel not complying with this section is liable to the United States Government for a civil penalty of at least $50 but not more than $500.

§ 11102. Medicine chests

(a) A vessel of the United States on a voyage from a port in the United States to a foreign port (except to a Canadian port), and a vessel of the United States of at least 75 gross tons on a voyage between a port of the United States on the Atlantic Ocean and Pacific Ocean, shall be provided with a medicine chest.

(b) The owner and master of a vessel not equipped as required by subsection (a) of this section or a regulation prescribed under subsection (a) are liable to the United States Government for a civil penalty of $500. If the offense was due to the fault of the owner, a master penalized under this section has the right to recover the penalty and costs from the owner.

§ 11103. Slop chests

(a) A vessel to which section 11102 of this title applies shall be provided with a slop chest containing sufficient clothing for the intended voyage for each seaman, including—

(1) boots or shoes;
(2) hats or caps;
(3) underclothing;
(4) outer clothing;
(5) foul weather clothing;
(6) everything necessary for the wear of a seaman; and
(7) a complete supply of tobacco and blankets.

(b) Merchandise in the slop chest shall be sold to a seaman desiring it, for the use of the seaman, at a profit of not more than 10 percent of the reasonable wholesale value of the merchandise at the port at which the voyage began.

(c) This section does not apply to a vessel on a voyage to Canada, Bermuda, the West Indies, Mexico, or Central America, or a fishing or whaling vessel.

§ 11104. Destitute seamen

(a) A consular officer shall provide, for a destitute seaman of the United States, subsistence and passage to a port of the United States in the most reasonable manner, at the expense of the United States Government and subject to regulations prescribed by the Secretary of State. A seaman, if able, shall be required to perform duties on the vessel giving the seaman passage, in accordance with the seaman's rating.

(b) A master of a vessel of the United States bound to a port of the United States shall take a destitute seaman on board at the request of a consular officer and transport the seaman to the United States. A master refusing to transport a destitute seaman when requested is liable to the United States Government for a civil penalty of $100. The certificate signed and sealed by a consular officer is prima facie evidence of refusal. A master is not required to carry a destitute seaman if the seaman's presence would cause the number of individuals on board to exceed the number permitted in the certificate of inspection or if the seaman has a contagious disease.

(c) Compensation for the transportation of destitute seamen to the United States who are unable to work shall be agreed on by the master and the consular officer, under regulations prescribed by the Secretary of State. However, the compensation may be not more than the lowest passenger rate of the vessel, or 2 cents a mile, whichever is less.

(d) When a master of a vessel of the United States takes on board a destitute seaman unable to work, from a port or place not having a consular officer, for transportation to the United States or to a port at which there is a consular officer, the master or owner of the vessel shall be compensated reasonably under regulations prescribed by the Secretary of State.

§ 11105. Wages on discharge when vessel sold

(a) When a vessel of the United States is sold in a foreign country, the master shall deliver to the consular officer a certified crew list and the agreement required by this part. The master shall pay each seaman the wages due the seaman and provide the seaman with employment on board another vessel of the United States bound for the port of original engagement of the seaman or to another port agreed on. If employment cannot be provided, the master shall—

(1) provide the seaman with the means to return to the port of original engagement;
(2) provide the seaman passage to the port of original engagement; or
(3) deposit with the consular officer an amount of money considered sufficient by the officer to provide the seaman with maintenance and passage home.

(b) The consular officer shall endorse on the agreement the particulars of the payment, provision, or deposit made under this section.

(c) An owner of a vessel is liable to the United States Government for a civil penalty of $500 if the master does not comply with this section.

§ 11106. Wages on justifiable complaint of seamen

(a) Before a seaman on a vessel of the United States is discharged in a foreign country by a consular officer on the seaman's complaint that the agreement required by this part has been breached because the vessel is badly provisioned or unseaworthy, or against the officers for cruel treatment, the officer shall inquire about the complaint. If satisfied of the justice of the complaint, the consular officer shall require the master to pay the wages due the seaman plus one month's additional wages and shall discharge the seaman. The master shall provide the seaman with employment on another vessel or provide the seaman with passage on another vessel to the port of original engagement, to the most convenient port of the United States, or to some port agreeable to the seaman.

(b) When a vessel does not have sufficient provisions for the intended voyage, and the seaman has been forced to accept a reduced ration or provisions that are bad in quality or unfit for use, the seaman is entitled to recover from the master or owner an allowance, as additional wages, that the court hearing the case considers reasonable.

(c) Subsection (b) of this section does not apply when the reduction in rations was for a period during which the seaman willfully and without sufficient cause failed to perform duties or was lawfully under confinement on board or on shore for misconduct, unless that reduction can be shown to have been unreasonable.

(d) Subsection (b) of this section does not apply to a fishing or whaling vessel or a yacht.

§ 11107. Unlawful engagements void

An engagement of a seaman contrary to a law of the United States is void. A seaman so engaged may leave the service of the vessel at any time and is entitled to recover the highest rate of wages at the port from which the seaman was engaged or the amount agreed to be given the seaman at the time of engagement, whichever is higher.

§ 11108. Taxes

Wages due or accruing to a master or seaman on a vessel in the foreign, coastwise, intercoastal, interstate, or noncontiguous trade or a fisherman employed on a fishing vessel may not be withheld under the tax laws of a State or a political subdivision of a State. However, this section does not prohibit withholding wages of a seaman on a vessel in the coastwise trade between ports in the same State if the withholding is under a voluntary agreement between the seaman and the employer of the seaman.

§ 11109. Attachment of wages

(a) Wages due or accruing to a master or seaman are not subject to attachment or arrestment from any court, except for an order of a court about the payment by a master or seaman of any part of the master's or seaman's wages for the support and maintenance of the spouse or minor children of the master or seaman, or both. A payment of wages to a master or seaman is valid, notwithstanding any prior sale or assignment of wages or any attachment, encumbrance, or arrestment of the wages.

(b) An assignment or sale of wages or salvage made before the payment of wages does not bind the party making it, except allotments authorized by section 10315 of this title.

(c) This section applies to a fisherman on a fishing vessel.

§ 11110. Seamen's clothing

The clothing of a seaman is exempt from attachments and liens. A person detaining a seaman's clothing shall be fined not more than $500, imprisoned for not more than 6 months, or both.

§ 11111. Limit on amount recoverable on voyage

When a seaman is on a voyage on which a written agreement is required under this part, not more than $1 is recoverable from the seaman by a person for a debt incurred by the seaman during the voyage for which the seaman is signed on until the voyage is ended.

CHAPTER 113—OFFICIAL LOGBOOKS

Sec.
11301. Logbook and entry requirements.
11302. Manner of making entries.
11303. Penalties.

§ 11301. Logbook and entry requirements

(a) A vessel of the United States on a voyage between a port in the United States and a port in a foreign country, and a vessel of the United States of at least 75 gross tons on a voyage between a port of the United States on the Atlantic Ocean and a port of the United States on the Pacific Ocean, shall have an official logbook.

(b) The master of the vessel shall make or have made in the official logbook the following entries:

(1) each legal conviction of a seaman of the vessel and the punishment inflicted.
(2) each offense committed by a seaman of the vessel for which it is intended to prosecute or to enforce under a forfeiture, together with statements about reading the entry and the reply made to the charge as required by section 11502 of this title.
(3) each offense for which punishment is inflicted on board and the punishment inflicted.
(4) a statement of the conduct, character, and qualifications of each seaman of the vessel or a statement that the master declines to give an opinion about that conduct, character, and qualifications.
(5) each illness of or injury to a seaman of the vessel, the nature of the illness or injury, and the medical treatment.
(6) each death on board, with the cause of death, and if a seaman, the information required by section 10702 of this title.
(7) each birth on board, with the sex of the infant and name of the parents.

(8) each marriage on board, with the names and ages of the parties.

(9) the name of each seaman who ceases to be a crewmember (except by death), with the place, time, manner, and the cause why the seaman ceased to be a crewmember.

(10) the wages due to a seaman who dies during the voyage and the gross amount of all deductions to be made from the wages.

(11) the sale of the property of a seaman who dies during the voyage, including a statement of each article sold and the amount received for the property.

(12) when a marine casualty occurs, a statement about the casualty and the circumstances under which it occurred, made immediately after the casualty when practicable to do so.

§ 11302. Manner of making entries

Each entry made in the official logbook—

(1) shall be made as soon as possible after the occurrence;

(2) if not made on the day of the occurrence, shall be dated and state the date of the occurrence;

(3) if the entry is about an occurrence happening before the vessel's arrival at the final port of discharge, shall be made not later than 24 hours after the arrival;

(4) shall be signed by the master; and

(5) shall be signed by the chief mate or another seaman.

§ 11303. Penalties

(a) A master failing to maintain an official logbook as required by this part is liable to the United States Government for a civil penalty of $200.

(b) A master failing to make an entry in the vessel's official logbook as required by this part is liable to the Government for a civil penalty of $200.

(c) A person is liable to the Government for a civil penalty of $150 when the person makes, procures to be made, or assists in making, an entry in the vessel's official logbook—

(1) later than 24 hours after the vessel's arrival at the final port of discharge; and

(2) that is about an occurrence that happened before that arrival.

CHAPTER 115—OFFENSES AND PENALTIES

Sec.
11501. Penalties for specified offenses.
11502. Entry of offenses in logbook.
11503. Duties of consular officers related to insubordination.
11504. Enforcement of forfeitures.
11505. Disposal of forfeitures.
11506. Carrying sheath knives.
11507. Surrender of offending officers.

§ 11501. Penalties for specified offenses

When a seaman lawfully engaged commits any of the following offenses, the seaman shall be punished as specified:

(1) For desertion, the seaman forfeits any part of the money or property the seaman leaves on board and any part of earned wages.

(2) For neglecting or refusing without reasonable cause to join the seaman's vessel or to proceed to sea in the vessel, for absence without leave within 24 hours of the vessel's sailing from a port (at the begi..ing or during the voyage), or for absence without leave from duties and without sufficient reason, the seaman forfeits from the seaman's wages not more than 2 days' pay or a sufficient amount to defray expenses incurred in hiring a substitute.

(3) For quitting the vessel without leave after the vessel's arrival at the port of delivery and before the vessel is placed in security, the seaman forfeits from the seaman's wages not more than one month's pay.

(4) For willful disobedience to a lawful command at sea, the seaman, at the discretion of the master, may be confined until the disobedience ends, and on arrival in port forfeits from the seaman's wages not more than 4 days' pay or, at the discretion of the court, may be imprisoned for not more than one month.

(5) For continued willful disobedience to lawful command or continued willful neglect of duty at sea, the seaman, at the discretion of the master, may be confined, on water and 1,000 calories, with full rations every 5th day, until the disobedience ends, and on arrival in port forfeits, for each 24 hours' continuance of the disobedience or neglect, not more than 12 days' pay or, at the discretion of the court, may be imprisoned for not more than 3 months.

(6) For assaulting a master, mate, pilot, engineer, or staff officer, the seaman shall be imprisoned for not more than 2 years.

(7) For willfully damaging the vessel, or embezzling or willfully damaging any of the stores or cargo, the seaman forfeits from the seaman's wages the amount of the loss sustained and, at the discretion of the court, may be imprisoned for not more than 12 months.

(8) For smuggling for which a seaman is convicted causing loss or damage to the owner or master, the seaman is liable to the owner or master for the loss or damage, and any part of the seaman's wages may be retained to satisfy the liability. The seaman also may be imprisoned for not more than 12 months.

§ 11502. Entry of offenses in logbook

(a) When an offense listed in section 11501 of this title is committed, an entry shall be made in the vessel's official logbook—

(1) on the day of the offense;

(2) stating the details;

(3) signed by the master; and

(4) signed by the chief mate or another seaman.

(b) Before arrival in port if the offense was committed at sea, or before departure if the offense was committed in port and the offender is still on the vessel—

(1) the entry shall be read to the offender;

(2) the offender shall be given a copy; and

(3) the offender shall be given the opportunity to reply.

(c) After subsection (b) of this section has been complied with, an entry shall be made in the official logbook—

(1) stating that the entry about the offense was read and a copy provided to the offender;

(2) stating the offender's reply;

(3) signed by the master; and

(4) signed by the chief mate or another seaman.

(d) In a subsequent legal proceeding, if the entries required by this section are not produced or proved, the court may refuse to receive evidence of the offense.

§ 11503. Duties of consular officers related to insubordination

(a) A consular officer shall use every means to discountenance insubordination on vessels of the United States, including employing the aid of local authorities.

(b) When a seaman is accused of insubordination, a consular officer shall inquire into the facts and proceed as provided in section 11106 of this title. If the consular officer discharges the seaman, the officer shall endorse the agreement required by this part and enter in the vessel's official logbook the cause and particulars of the discharge.

§ 11504. Enforcement of forfeitures

When an offense by a seaman also is a criminal violation, it is not necessary that a criminal proceeding be brought to enforce a forfeiture.

§ 11505. Disposal of forfeitures

(a) Money, property, and wages forfeited under this chapter for desertion may be applied to compensate the owner of master of the vessel for expenses caused by the desertion. The balance shall be transferred to the Secretary when the voyage is completed, as prescribed by the Secretary.

(b) Within one month of receiving the balance under subsection (a) of this section, the Secretary shall transfer the balance to the appropriate district court of the United States. If it appears to the district court that the forfeiture was imposed properly, the property transferred may be sold in the same manner prescribed for the disposition of the property of deceased seamen. The court shall deposit in the Treasury as miscellaneous receipts the proceeds of the sale and any money and wages transferred to the court.

(c) When an owner or master fails to transfer the balance as required under subsection (a) of this section, the owner or master is liable to the United States Government for a civil penalty of 2 times the amount of the balance, recoverable by the Secretary in the same manner that seaman's wages are recovered.

(d) In all other cases of forfeiture of wages, the forfeiture shall be for the benefit of the owner of the vessel.

§ 11506. Carrying sheath knives

A seaman in the merchant marine may not wear a sheath knife on board a vessel without the consent of the master. The master of a vessel of the United States shall inform each seaman of this prohibition before engagement. A master failing to advise a seaman is liable to the United States Government for a civil penalty of $50.

§ 11507. Surrender of offending officers

When an officer of a vessel of the United States (except the master) has violated section 2191 of title 18, and the master has actual knowledge of the offense or if complaint is made within 3 days after reaching port, the master shall surrender the offending officer to the proper authorities. If the master fails *to use diligence* to comply with this section and the offender escapes, the owner, the master, and the vessel are liable for damages to the individual unlawfully punished.

PART H—IDENTIFICATION OF VESSELS

CHAPTER 121—DOCUMENTATION OF VESSELS

Sec.
12101. Related terms in other laws.
12102. Vessels eligible for documentation.
12103. Certificates of documentation.
12104. Effect of documentation.
12105. Registry.
12106. Coastwise licenses and registry.
12107. Great Lakes licenses and registry.
12108. Fishery licenses and registry.
12109. Pleasure vessel licenses.
12110. Limitations on operations authorized by certificates.
12111. Invalidation of certificates of documentation.

12112. Vessels procured outside the United States.
12113. Ports of documentation.
12114. Home ports.
12115. Names of vessels.
12116. Numbers, signal letters, and identification markings.
12117. Recording of United States built vessels.
12118. Registration of funnel marks and house flags.
12119. List of documented vessels.
12120. Reports.
12121. Regulations.
12122. Penalties.

§ 12101. Related terms in other laws

When used in a law, regulation, document ruling, or other offical act referring to the documentation of a vessel—

(1) "certificate of registry", "register", and "registry" mean a registry as provided in section 12105 of this title.

(2) "license", "enrollment and license", "license for the coastwise (or coasting) trade", and "enrollment and license for the coastwise (or coasting) trade" mean a coastwise license as provided in section 12106 of this title.

(3) "enrollment and license to engage in the foreign and coastwise (or coasting) trade on the northern, northeastern, and northwestern frontiers, otherwise than by sea" means a Great Lakes license as provided in section 12107 of this title.

(4) "license for the fisheries" and "enrollment and license for the fisheries" mean a fishery license as provided in section 12108 of this title.

(5) "yacht" means a pleasure vessel even if not documented.

§ 12102. Vessels eligible for documentation

A vessel of at least 5 net tons not registered under the laws of a foreign country is eligible for documentation if the vessel is owned by—

(1) an individual who is a citizen of the United States;

(2) an association, trust, joint venture, or other entity—

(A) all of whose members are citizens of the United States; and

(B) that is capable of holding title to a vessel under the laws of the United States or of a State;

(3) a partnership whose general partners are citizens of the United States, and the controlling interest in the partnership is owned by citizens of the United States;

(4) a corporation established under the laws of the United States or of a State, whose president or other chief executive officer and chairman of its board of directors are citizens of the United States and no more of its directors are noncitizens than a minority of the number necessary to constitute a quorum;

(5) the United States Government; or

(6) the government of a State.

§ 12103. Certificates of documentation

(a) On application by the owner of a vessel eligible for documentation, the Secretary shall issue a certificate of documentation of one of the types specified in sections 12105–12109 of this title.

(b) The Secretary may prescribe the form of, the manner of filing, and the information to be contained in, applications for certificates of documentation.

(c) Each certificate of documentation shall—

(1) contain the name, the home port, and a description of the vessel;

(2) identify the owner of the vessel; and

(3) contain additional information prescribed by the Secretary.

(d) The Secretary shall prescribe procedures to ensure the integrity of, and the accuracy of information contained in, certificates of documentation.

(e) The owner and master of a documented vessel shall make the vessel's certificate of documentation available for examination as the law or Secretary may require.

§ 12104. Effect of documentation

A certificate of documentation is—

(1) conclusive evidence of nationality for international purposes, but not in a proceeding conducted under the laws of the United States;

(2) except for a pleasure vessel license, conclusive evidence of qualification to be employed in a specified trade; and

(3) not conclusive evidence of ownership in a proceeding in which ownership is in issue.

§ 12105. Registry

(a) A registry may be issued for a vessel eligible for documentation.

(b) A vessel for which a registry is issued may be employed in foreign trade or trade with Guam, American Samoa, Wake, Midway, or Kingman Reef.

(c) On application of the owner of a vessel that qualifies for a coastwise license under section 12106 of this title, a Great Lakes license under section 12107 of this title, or a fishery license under section 12108 of this title, the Secretary may issue a registry appropriately endorsed authorizing the vessel to be employed in the coastwise trade, the Great Lakes trade, or the fisheries, as the case may be.

(d) Except as provided in sections 12106–12108 of this title, a foreign built vessel registered under this section may not engage in the coastwise trade, the Great Lakes trade, or the fisheries.

§ 12106. Coastwise licenses and registry

(a) A coastwise license or, as provided in section 12105(c) of this title, an appropriately endorsed registry, may be issued for a vessel that—

(1) is eligible for documentation;

(2)(A) was built in the United States; or

(B) if not built in the United States, was captured in war by citizens of the United States and lawfully condemned as prize, was adjudged to be forfeited for a breach of the laws of the United States, or qualified for documentation under section 4136 of the Revised Statutes (46 App. U.S.C. 14); and

(3) otherwise qualifies under laws of the United States to be employed in the coastwise trade.

(b) Subject to the laws of the United States regulating the coastwise trade and the fisheries, only a vessel for which a coastwise license or an appropriately endorsed registry is issued may be employed in—

(1) the coastwise trade; and

(2) the fisheries.

§ 12107. Great Lakes licenses and registry

(a) A Great Lakes license or, as provided in section 12105(c) of this title, an appropriately endorsed registry, may be issued for a vessel that—

(1) is eligible for documentation;

(2)(A) was built in the United States; or

(B) if not built in the United States, was captured in war by citizens of the United States and lawfully condemned as prize, was adjudged to be forfeited for a breach of the laws of the United States, or qualified for documentation under section 4136 of the Revised Statutes (46 App. U.S.C. 14); and

(3) otherwise qualifies under the laws of the United States to be employed in the coastwise trade.

(b) Subject to the laws of the United States regulating the coastwise trade, trade with Canada, and the fisheries, only a vessel for which a Great Lakes license or an appropriately endorsed registry is issued may be employed on the Great Lakes and their tributary and connecting waters in—

(1) the coastwise trade;

(2) trade with Canada; and

(3) the fisheries.

§ 12108. Fishery licenses and registry

(a) A fishery license or, as provided in section 12105(c) of this title, an appropriately endorsed registry, may be issued for a vessel that—

(1) is eligible for documentation; and

(2)(A) was built in the United States; or

(B) if not built in the United States, was captured in war by citizens of the United States and lawfully condemned as prize, was adjudged to be forfeited for a breach of the laws of the United States, or qualified for documentation under section 4136 of the Revised Statutes (46 App. U.S.C. 14); and

(3) otherwise qualifies under the laws of the United States to be employed in the fisheries.

(b) Subject to the laws of the United States regulating the fisheries, only a vessel for which a fishery license or an appropriately endorsed registry is issued may be employed in the fisheries.

§ 12109. Pleasure vessel licenses

(a) A pleasure vessel license may be issued for a vessel that is—

(1) eligible for documentation; and

(2) to be operated only for pleasure.

(b) A licensed pleasure vessel may proceed between a port of the United States and a port of a foreign country without entering or clearing with the Customs Service.

(c) The Secretary may prescribe by regulation reasonable fees for issuing, renewing, or replacing a pleasure vessel license, or for providing any other service related to a pleasure vessel license. The fees shall be based on the costs of the service provided.

§ 12110. Limitations on operations authorized by certificates

(a) A vessel may not be employed in a trade except a trade covered by the certificate of documentation issued for that vessel. A documented pleasure vessel may be operated only for pleasure. However, a certificate of documentation may be exchanged, under regulations prescribed by the Secretary, for another type of certificate of documentation or endorsed appropriately for a trade for which the vessel qualifies.

(b) A barge qualified to be employed in the coastwise trade may be employed, without being documented, in that trade on rivers, harbors, lakes (except the Great Lakes), canals, and inland waters.

(c) When a vessel is employed in a trade not covered by the certificate of documentation issued for that vessel, or a documented pleasure vessel is operated except for pleasure, the vessel and its equipment are liable to seizure by and forfeiture to the United States Government.

(d) A documented vessel may be placed under the command only of a citizen of the United States.

§ 12111. Invalidation of certificates of documentation

(a) A certificate of documentation is invalid if the vessel for which it is issued—

(1) no longer meets the requirements of this chapter and regulations prescribed under this chapter applicable to that certificate of documentation; or

(2) is placed under the command of a person not a citizen of the United States.

(b) Except as provided by section 30(O) of the Merchant Marine Act, 1920 (46 App. U.S.C. 961(a)), an invalid certificate of documentation shall be surrendered as provided by regulations prescribed by the Secretary.

§ 12112. Vessels procured outside the United States

(a) The Secretary and the Secretary of State, acting jointly, may provide for the issuance of an appropriate document for a vessel procured outside the United States meeting the ownership requirements of section 12102 of this title.

(b) Subject to limitations the Secretary may prescribe, a vessel for which an appropriate document is issued under this section may proceed to the United States and engage en route in the foreign trade or trade with Guam, American Samoa, Wake, Midway, or Kingman Reef. On the vessel's arrival in the United States, the document shall be surrendered as provided by regulations prescribed by the Secretary.

(c) A vessel for which a document is issued under this section is subject to the jurisdiction and laws of the United States. However, the Secretary may suspend for a period of not more than 6 months, the application of a vessel inspection law carried out by the Secretary or regulations prescribed under that law if the Secretary considers the suspension to be in the public interest.

§ 12113. Ports of documentation

The Secretary shall designate ports of documentation in the United States at which vessels may be documented and instruments affecting title to, or interest in, documented vessels may be recorded. The Secretary—

(1) shall specify the geographic area to be served by each designated port; and

(2) may discontinue, relocate, or designate additional ports of documentation.

§ 12114. Home ports

(a) The port of documentation selected by an owner of a vessel and approved by the Secretary for the documentation of the vessel is the vessel's home port.

(b) Once a vessel's home port is established, it may not be changed without the approval of the Secretary.

§ 12115. Names of vessels

(a) The name of the vessel selected by the owner and approved by the Secretary for the documentation of the vessel is the vessel's name of record.

(b) Once a vessel's name of record is established, it may not be changed without the approval of the Secretary.

(c) The Secretary may prescribe by regulation a reasonable fee for changing a documented vessel's name of record.

§ 12116. Numbers, signal letters, and identification markings

(a) The Secretary shall maintain a numbering system for the identification of a documented vessel and shall assign a number to each documented vessel.

(b) The Secretary may maintain a system of signal letters for a documented vessel.

(c) The owner of a documented vessel shall affix to the vessel and maintain in the manner prescribed by the Secretary the number assigned and any other identification markings the Secretary may require.

§ 12117. Recording of United States built vessels

The Secretary may provide for the recording and certifying of information about vessels built in the United States that the Secretary considers to be in the public interest.

§ 12118. Registration of funnel marks and house flags

The Secretary shall provide for the registration of funnel marks and house flags by owners of vessels.

§ 12119. List of documented vessels

The Secretary shall publish periodically a list of all documented vessels and information about those vessels that the Secretary considers pertinent or useful. The list shall contain a notation clearly indicating all vessels classed by the American Bureau of Shipping.

§ 12120. Reports

To ensure compliance with this chapter and laws governing the qualifications of vessels to engage in the coastwise trade and the fisheries, the Secretary may require owners and masters of documented vessels to submit reports in any reasonable form and manner the Secretary may prescribe.

§ 12121. Regulations

The Secretary may prescribe regulations to carry out this chapter.

§ 12122. Penalties

(a) A person that violates this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of not more than $500.

(b) When the owner of a vessel knowingly falsifies or conceals a material fact, or makes a false statement or representation about the documentation of the vessel, that vessel and its equipment are liable to seizure by and forfeiture to the United States Government.

(c) When a certificate of documentation is knowingly and fraudulently used for a vessel, that vessel and its equipment are liable to seizure by and forfeiture to the Government.

CHAPTER 123—NUMBERING UNDOCUMENTED VESSELS

Sec.
12301. Numbering vessels.
12302. Standard numbering system.
12303. Exemption from numbering requirements.
12304. Certificates of numbers.
12305. Displaying numbers.
12306. Safety certificates.
12307. Regulations on numbering and fees.
12308. Providing vessel numbering and registration information.
12309. Penalties.

§ 12301. Numbering vessels

An undocumented vessel equipped with propulsion machinery of any kind shall have a number issued by the proper issuing authority in the State in which the vessel principally is operated.

§ 12302. Standard numbering system

(a) The Secretary shall prescribe by regulation a standard numbering system for vessels to which this chapter applies. On application by a State, the Secretary shall approve a State numbering system that is consistent with the standard numbering system. In carrying out its numbering system, a State shall adopt any definitions of relevant terms prescribed by regulations of the Secretary.

(b) A State with an approved numbering system is the issuing authority within the meaning of this chapter. The Secretary is the issuing authority in a State in which a State numbering system has not been approved.

(c) When a vessel is numbered in a State, it is deemed in compliance with the numbering system of a State in which it temporarily is operated.

(d) When a vessel is removed to a new State of principal operation, the issuing authority of that State shall recognize the validity of the number issued by the original State for 60 days.

(e) If a State has a numbering system approved after the Secretary issues a number, the State shall recognize the validity of the number issued by the Secretary for one year.

(f) When the Secretary decides that a State numbering system is not being carried out consistent with the standard numbering system or the State has changed the system without the Secretary's approval, the Secretary may withdraw approval after giving notice to the State, in writing, stating the reasons for the withdrawal.

§ 12303. Exemption from numbering requirements

(a) When the Secretary is the authority issuing a number under this chapter, the Secretary may exempt a vessel or class of vessels from the numbering requirements of this chapter under conditions the Secretary may prescribe.

(b) When a State is the issuing authority, it may exempt from the numbering requirements of this chapter a vessel or class of vessels exempted under subsection (a) of this section or otherwise as permitted by the Secretary.

§ 12304. Certificates of numbers

(a) A certificate of number is granted for a number issued under this chapter. The certificate shall be pocket-sized, shall be at all times available for inspection on the vessel for which issued when the vessel is in operation, and may be valid for not more than 3 years. The certificate of number for a vessel less than 26 feet in length and leased or rented to another for the latter's noncommercial operation of less than 7 days may be retained on shore by the vessel's owner or representative at the place from which the vessel departs or returns to the possession of the owner or the owner's representative. A vessel that does not have the certificate of number on board shall be identified when in operation, and comply with requirements, as the issuing authority prescribes.

(b) The owner of a vessel numbered under this chapter shall provide—

(1) the issuing authority notice of the transfer of any part of the owner's interest in the vessel or of the destruction or abandonment of the vessel, within a reasonable time after the transfer, destruction, or abandonment; and

(2) notice of a change of address within a reasonable time of the change, as prescribed by regulation.

§ 12305. Displaying numbers

A number required by this chapter shall be painted on, or attached to, each side of the forward half of the vessel for which it was issued, and shall be the size, color, and type as may be prescribed by the Secretary. No other number may be carried on the forward half of the vessel.

§ 12306. Safety certificates

When a State is the authority issuing a number under this chapter, it may require that the individual in charge of a numbered

vessel have a valid safety certificate issued under conditions set by the issuing authority, except when the vessel is subject to manning requirements under part F of this subtitle.

§ 12307. Regulations on numbering and fees

The authority issuing a number under this chapter may prescribe regulations and establish fees to carry out the intent of this chapter. The fees shall apply equally to residents and nonresidents of the State. A State issuing authority may impose only conditions for vessel numbering that are—

(1) prescribed by this chapter or regulations of the Secretary about the standard numbering system; or

(2) related to proof of payment of State or local taxes.

§ 12308. Providing vessel numbering and registration information

A person may request from an authority issuing a number under this chapter the numbering and registration information of a vessel that is retrievable from vessel numbering system records of the issuing authority. When the issuing authority is satisfied that the request is reasonable and related to a boating safety purpose, the information shall be provided on paying the cost of retrieving and providing the information requested.

§ 12309. Penalties

(a) A person willfully violating this chapter or a regulation prescribed under this chapter shall be fined not more than $5,000, imprisoned for not more than one year, or both.

(b) A person violating this chapter or a regulation prescribed under this chapter is liable to the United States Government for a civil penalty of not more than $1,000. If the violation involves the operation of a vessel, the vessel also is liable in rem for the penalty.

(c) When a civil penalty of not more than $200 has been assessed under this chapter, the Secretary may refer the matter of collection of the penalty directly to the United States magistrate of the jurisdiction in which the person liable may be found for collection procedures under supervision of the district court and under an order issued by the court delegating this authority under section 636(b) of title 28.

PART I—STATE BOATING SAFETY PROGRAMS

CHAPTER 131—RECREATIONAL BOATING SAFETY

Sec.
13101. State recreational boating safety programs.
13102. Program acceptance.
13103. Allocations.
13104. Availability of allocations.
13105. Computation decisions about State amounts expended.
13106. Authorization of contract spending.
13107. National Recreational Boating Safety and Facilities Improvement Fund.
13108. Computing amounts allocated to States and State records requirements.
13109. Consultation, cooperation, and regulation.
13110. National Boating Safety Advisory Council.

§ 13101. State recreational boating safety programs

(a) To encourage greater State participation and uniformity in boating safety and facility improvement efforts, and particularly to permit the States to assume the greater share of boating safety education, assistance, and enforcement activities, the Secretary shall carry out a national recreational boating safety and facilities improvement program. Under this program, the Secretary may make contracts with, and allocate and distribute amounts to, eligible States to assist them in developing, carrying out, and financing State recreational boating safety and facilities improvement programs.

(b) The Secretary shall establish guidelines and standards for the program. In doing so, the Secretary—

(1) shall consider, among other things, factors affecting recreational boating safety by contributing to overcrowding and congestion of waterways, such as the increasing number of recreational vessels operating on those waterways and their geographic distribution, the availability and geographic distribution of recreational boating facilities in and among applying States, and State marine casualty and fatality statistics for recreational vessels;

(2) shall consult with the Secretary of the Interior to minimize duplication with the purposes and expenditures of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l-4—460l-11) and with the guidelines developed under that Act; and

(3) shall maintain environmental standards consistent with the Coastal Zone Management Act of 1972 (16 U.S.C. 1451-1464) and other laws and policies of the United States intended to safeguard the ecological and esthetic quality of the waters and wetlands of the United States.

(c) A State whose recreational boating safety and facilities improvement program has been approved by the Secretary is eligible for allocation and distribution of amounts under this chapter to assist that State in developing, carrying out, and financing its program. Matching amounts shall be allocated and distributed among eligible States by the Secretary as provided by section 13103 of this title.

§ 13102. Program acceptance

(a) The Secretary may make a contract with, and allocate and distribute amounts from the Fund established under section 13107 of this title to, a State that has an approved State recreational boating safety and facilities improvement program, if the State demonstrates to the Secretary's satisfaction that—

(1) the program submitted by that State is consistent with this chapter and chapters 61 and 123 of this title;

(2) amounts distributed will be used to develop and carry out a State recreational boating safety and facilities improvement program containing the minimum requirements of subsection (c), (d), or (f) of this section;

(3) sufficient State matching amounts are available from general revenue, undocumented vessel numbering and license fees, State marine fuels taxes, or from a fund constituted from the proceeds of those taxes and established to finance a State recreational boating safety and facilities improvement program; and

(4) the program submitted by that State designates a State lead authority or agency that will carry out or coordinate carrying the State recreational boating safety and facilities improvement program supported by financial assistance of the United States Government in that State, including the requirement that the designated State authority or agency submit required reports that are necessary and reasonable to carry out properly and efficiently the program and that are in the form prescribed by the Secretary.

(b) Amounts of the Government from sources (except sources referred to in subsection (a)(3) of this section) may not be used to provide a State's share of the costs of the program described under this section. State matching amounts committed to a program under this chapter may not be used to constitute the State's share of matching amounts required by another program of the Government.

(c) The Secretary shall approve a State recreational boating safety program, and the program is eligible to receive amounts authorized to be expended under section 13106 of this title, if the program includes—

(1) a vessel numbering system approved or carried out by the Secretary under chapter 123 of this title;

(2) a cooperative boating safety assistance program with the Coast Guard in that State;

(3) sufficient patrol and other activity to ensure adequate enforcement of applicable State boating safety laws and regulations;

(4) an adequate State boating safety education program; and

(5) a system, approved by the Secretary, for reporting marine casualties required under section 6102 of this title.

(d) The Secretary shall approve a State recreational boating facilities improvement program, and the program is eligible to receive amounts authorized to be expended under section 13106 of this title, if the program includes—

(1) a complete description of recreational boating facility improvement projects to be undertaken by the State; and

(2) consultation with State officials responsible for the statewide comprehensive outdoor recreation plan required by the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l-4—460l-11) and for any program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. 1451-1464).

(e) The Secretary's approval under this section is a contractual obligation of the Government for the payment of the proportional share of the cost of carrying out the program.

(f)(1) A State may submit a combined program to the Secretary for the improvement of recreational boating safety and the improvement of recreational boating facilities in that State. The Secretary shall approve the program if it contains the minimum requirements set forth in subsections (c) and (d) of this section.

(2) Those parts of the combined program of a State that are designed to improve recreational boating safety are eligible to receive amounts authorized to be expended for State recreational boating safety programs under section 13106 of this title. The Secretary's approval of those parts is a contractual obligation of the Government for the payment of the proportional share of the cost of carrying out the State's recreational boating safety program under this chapter.

(3) Those parts of the combined program of a State that are designed to improve recreational boating facilities are eligible to receive amounts authorized to be expended for State recreational boating facilities improvement programs under section 13106 of this title. The Secretary's approval of those parts is a contractual obligation of the Government for the payment of the proportional share of the cost of carrying out the

State's recreational boating facilities program under this chapter.

§ 13103. Allocations

(a) The Secretary shall allocate amounts available for allocation and distribution under this chapter for State recreational boating safety programs as follows:

(1) One-third shall be allocated equally each fiscal year among eligible States.

(2) One-third shall be allocated among eligible States that maintain a State vessel numbering system approved under chapter 123 of this title and a marine casualty reporting system approved under this chapter so that the amount allocated each fiscal year to each eligible State will be in the same ratio as the number of vessels numbered in that State bears to the number of vessels numbered in all eligible States.

(3) One-third shall be allocated so that the amount allocated each fiscal year to each eligible State will be in the same ratio as the amount of State amounts expended or obligated by the State for the State recreational boating safety program during the prior fiscal year bears to the total State amounts expended or obligated during that fiscal year by all eligible States for State recreational boating safety programs.

(b) The Secretary shall allocate the amounts available for allocation and distribution under this chapter for State recreational boating facilities improvement programs as follows:

(1) One-third shall be allocated equally each fiscal year among eligible States.

(2) One-third shall be allocated so that the amount allocated each fiscal year to each eligible State will be in the same ratio as the number of vessels numbered in that State bears to the number of vessels numbered in all eligible States.

(3) One-third shall be allocated so that the amount allocated each fiscal year to each eligible State shall be in the same ratio as the State amounts expended or obligated by the State for a recreational boating facilities improvement program approved under this chapter during the prior fiscal year bears to the total State amounts expended or obligated during that fiscal year by all eligible States for recreational boating facilities improvement programs.

(c) The amount received by a State under this section in a fiscal year may be not more than one-half of the total cost incurred by that State in developing, carrying out, and financing that State's recreational boating safety and facilities improvement program in that fiscal year.

(d) An allocation or distribution of amounts under this section may not be made to a State to maintain boating facilities under that State's approved recreational boating safety and facilities improvement program.

(e) The Secretary may allocate not more than 5 percent of the amounts available for allocation and distribution in a fiscal year for national boating safety activities of national nonprofit public service organizations.

(f) The Secretary may expend from the amounts available for allocation and distribution in a fiscal year those amounts necessary to carry out this chapter. However, the amounts expended in a fiscal year to carry out this chapter may be not more than $250,000 or 2 percent of the amounts available for allocation and distribution in that fiscal year, whichever is greater.

§ 13104. Availability of allocations

(a) Amounts allocated to a State shall be available for obligation by that State for a period of 3 years after the date of allocation. Amounts unobligated by the State at the end of the 3 years shall be withdrawn by the Secretary and shall be available with other amounts to be allocated by the Secretary during that fiscal year.

(b) Amounts available to the Secretary that have not been allocated at the end of a fiscal year shall be carried forward as part of the total allocation of amounts for the next fiscal year that may be expended under this chapter.

§ 13105. Computation decisions about State amounts expended

(a) Consistent with regulations prescribed by the Secretary, the computation by a State of amounts expended or obligated for the State recreational boating safety and facilities improvement program shall include—

(1) the acquisition, maintenance, and operating costs of land, facilities, equipment, and supplies;

(2) personnel salaries and reimbursable expenses;

(3) the costs of training personnel;

(4) public boat safety education;

(5) the costs of carrying out the program; and

(6) other expenses that the Secretary considers appropriate.

(b) The Secretary shall decide an issue arising out of the computation made under subsection (a) of this section.

§ 13106. Authorization of contract spending

(a) To provide financial assistance for State recreational boating safety and facilities improvement programs, the Secretary may expend, subject to amounts provided in appropriations laws for liquidating contract authority, an amount equal to the revenues accruing each fiscal year from the taxes under section 4041(b) of the Internal Revenue Code of 1954 (26 U.S.C. 4041(b)) from special motor fuels used as fuel in motor boats and under section 4081 of that Code (26 U.S.C. 4081) from gasoline used as fuel in motor boats.

(b) Of the amounts available for allocation and distribution for recreational boating safety and facilities improvement programs, one-third shall be allocated for recreational boating safety programs and two-thirds shall be allocated for recreational boating facilities improvement programs.

(c) Amounts authorized to be expended for State recreational boating safety and facilities improvement programs remain available until expended and are deemed to have been expended only if an amount equal to the total amounts authorized to be expended under this section for the fiscal year in question and all prior fiscal years have been obligated. Amounts previously obligated but released by payment of a final voucher or modification of a program acceptance shall be credited to the balance of unobligated funds and shall be immediately available for expenditure.

§ 13107. National Recreational Boating Safety and Facilities Improvement Fund

There is established in the Treasury a separate fund known as the National Recreational Boating Safety and Facilities Improvement Fund consisting of amounts paid into it as provided in section 209(f)(5) of the Highway Revenue Act of 1956. Amounts in the Fund are available for making expenditures as provided in section 13106 of this title.

§ 13108. Computing amounts allocated to States and State records requirements

(a) Amounts allocated and distributed under section 13103 of this title shall be computed and paid to the States as follows:

(1) During the last quarter of a fiscal year and on the basis of computations made under section 13105 of this title and submitted by the States, the Secretary shall determine the percentage of the amounts available for the next fiscal year to which each eligible State is entitled.

(2) Notice of the percentage and of the dollar amount, if it can be determined, for each State shall be provided to the States at the earliest practicable time.

(3) If the Secretary determines that an amount made available to a State for a prior fiscal year is greater or less than the amount that should have been made available to the State for the prior fiscal year, because of later or more accurate State expenditure information, the amount for the current fiscal year may be increased or decreased by the appropriate amount.

(b) The Secretary shall schedule the payment of amounts, consistent with the program purposes and applicable regulations prescribed by the Secretary of the Treasury, to minimize the time elapsing between the transfer of amounts from the Treasury and the subsequent disbursement of the amounts by a State.

(c) The Secretary shall notify a State authority or agency that further payments will be made to the State only when the program complies with the prescribed standards or a failure to comply substantially with standards is corrected if the Secretary, after reasonable notice to the designated State authority or agency, finds that—

(1) the State recreational boating safety and facilities improvement program submitted by the State and accepted by the Secretary has been so changed that it no longer complies with this chapter or standards prescribed by regulations; or

(2) in carrying out the State recreational boating safety and facilities improvement program, there has been a failure to comply substantially with the standards prescribed by regulations.

(d) The Secretary shall provide for the accounting, budgeting, and other fiscal procedures that are necessary and reasonable to carry out this section properly and efficiently. Records related to amounts allocated under this chapter shall be made available to the Secretary and the Comptroller General to conduct audits.

§ 13109. Consultation, cooperation, and regulation

(a) In carrying out responsibilities under this chapter, the Secretary may consult with State and local governments, public and private agencies, organizations and committees, private industry, and other persons having an interest in boating safety and facilities improvement.

(b) The Secretary may advise, assist, and cooperate with the States and other interested public and private agencies in planning, developing, and carrying out boating safety and facilities improvement programs. Acting under section 141 of title 14, the Secretary shall ensure the fullest cooperation between the State and United States Government authorities in promoting boating safety by making agreements and other arrangements with States when possible. Subject to chapter 23 of title 14, the Secretary may make available, on request of a State, the services of members of the Coast Guard

Auxiliary to assist the State in promoting boating safety on State waters.

(c) The Secretary may prescribe regulations to carry out this chapter.

§ 13110. National Boating Safety Advisory Council

(a) The Secretary shall establish a National Boating Safety Advisory Council. The Council shall consist of not more than 21 members appointed by the Secretary, whom the Secretary considers to have a particular expertise, knowledge, and experience in boating safety.

(b)(1) Insofar as practical and to ensure balanced representation, the Secretary shall appoint members equally from—

(A) State officials responsible for State boating safety programs;

(B) recreational vessel manufacturers; and

(C) boating organizations and members of the general public.

(2) Additional individuals from the sources referred to in paragraph (1) of this subsection may be appointed to panels of the Council to assist the Council in performing its duties.

(3) At least once a year, the Secretary shall publish a notice in the Federal Register soliciting nominations for membership on the Council.

(c) In addition to the consultation required by section 4302 of this title, the Secretary shall consult with the Council on other major boating safety matters related to this chapter. The Council may make available to Congress information, advice, and recommendations that the Council is authorized to give to the Secretary.

(d) When attending meetings of the Council, a member of the Council or a panel may be paid at a rate not more than the rate for GS-18. When serving away from home or regular place of business, the member may be allowed travel expenses, including per diem in lieu of subsistence as authorized by section 5703 of title 5 for individuals employed intermittently in the Government service. A payment under this section does not make a member of the Council an officer or employee of the United States Government for any purpose.

[PART J—RESERVED FOR MEASUREMENT OF VESSELS]

MISCELLANEOUS PROVISIONS

SEC. 2. (a) Laws effective after December 31, 1982, that are inconsistent with this Act supersede this Act to the extent of the inconsistency.

(b) A reference to a law replaced by this Act, including a reference in a regulation, order, or other law, is deemed to refer to the corresponding provision of this Act.

(c) An order, rule, or regulation in effect under a law replaced by this Act continues in effect under the corresponding provision of this Act until repealed, amended, or superseded.

(d) An action taken or an offense committed under a law replaced by this Act is deemed to have been taken or committed under the corresponding provision of this Act.

(e) An inference of legislative construction is not to be drawn by reason of the caption or catch line of a provision enacted by this Act.

(f) If a provision enacted by this Act is held invalid, all valid provisions that are severable from the invalid provision remain in effect. If a provision of this Act is held invalid in one or more of its applications, the provision remains in effect in all valid applications that are severable from the invalid application or applications.

(g)(1) Part B of subtitle II and sections 7306 (related to able seaman sail) and 7311 of title 46 (as enacted by section 1 of this Act) take effect April 15, 1984, or when regulations for sailing school vessels under part B are effective, whichever is earlier.

(2) Section 3715(a) of title 46 (as enacted by section 1 of this Act) is effective on the day after the effective date of the regulations prescribed by the Secretary under section 3715(b) of title 46.

(h) Chapter 63 of title 46 (as enacted by section 1 of this Act) does not supersede section 304(a)(1)(E) of the Independent Safety Board Act of 1974 (49 App. U.S.C. 1903(a)(1)(E)).

(i) Each offshore supply vessel described in section 3302(g) of title 46 (as enacted by section 1 of this Act), that was registered with the Secretary of Transportation under section 4426a(7) of the Revised Statutes but that has not been inspected by the Secretary shall be held to be in compliance with all applicable vessel inspection laws pending verification by actual inspection or until one year after the date of enactment of this Act, whichever is earlier.

(j) Within 2 years after the date of enactment of this Act, the Federal Maritime Commission and the Secretary of Transportation each shall submit to Congress a proposed codification of the laws within their respective jurisdictions related to shipping and maritime matters.

CONFORMING CROSS-REFERENCES

SEC. 3. (a) Section 5549(4) of title 5, United States Code is amended to read as follows:

"(4) sections 2111 and 2112 of title 46; and".

(b) Section 10542(c) of title 49, United States Code, is amended—

(1) in the matter before clause (1), by striking "tank vessels" and substituting "a tank vessel"; and

(2) by striking clause (2) and substituting:

"(2) having a certificate of inspection issued under part B of subtitle II of title 46 endorsed to show that the vessel complies with chapter 37 of title 46.".

REPEALS

SEC. 4. (a) The repeal of a law by this Act may not be construed as a legislative implication that the provision was or was not in effect before its repeal.

(b) The laws specified in the following schedule are repealed, except for rights and duties that matured, penalties that were incurred, and proceedings that were begun, before the date of enactment of this Act and except as provided by section 2 of this Act:

The SPEAKER pro tempore. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today I have the pleasure to bring before the House S. 46, a bill to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping".

This bill rewrites the laws related to—

Vessel inspections;

Marine casualties;

Licenses and documents issued to seamen;

Manning of vessels;

Seamen protection and relief;

Identification of vessels; and

State boating safety programs.

Mr. Speaker, the maritime laws were some of the earliest laws passed by the Congress in the 1700's. In many cases they were in direct response to marine casualties—on everything from old steam vessels to modern tankers. As a result they have evolved into an unorganized group of statutes which are very difficult for the individuals affected to understand and for the Coast Guard to administer.

In 1946 the Coast Guard began writing this bill. Unfortunately, for one reason or another, it never made it into law. Today we have before us a very refined piece of legislation which represents a major step forward in maritime law.

In making changes to current law the committee has attempted to limit these changes to those of a noncontroversial nature. After hearings on this legislation, the staff has had numerous meetings with the affected industry groups in order to address their concerns. Our general rule was when in doubt, go back to the existing law.

With the cooperation of the Coast Guard and the maritime industry we have reached a bill which I feel everyone can support.

I would like to take a moment to clarify a provision of concern to a section of the maritime industry.

Tank vessel is a term in corporating the provisions of current law (46 U.S.C. 391(a)(3)) which sets forth the kind of vessel to which section 5 of the Port and Tanker Safety Act of 1978 applies. Instead of repeating the lengthy provisions of current law to describe such a vessel, the committee decided to incorporate the provision in the term "tank vessel" in order to make chapter 37 more concise. This concise term is currently used in the Coast Guard's regulations implementing the 1978 act (see 46 CFR 3001 et seq.). Thus the use of the term tank vessel does not amend, expand, or alter current law, or current Coast Guard authority to prescribe inspection procedures or standards.

For example, it is the committee's intent that the use of the term tank vessle will not result in more vessels being inspected as if they were tankers. The two terms tank vessel and tanker are not interchangeable for purposes of chapter 37 because a tank vessel may be a vessel which is not a tanker.

Mr. Speaker, I would like to take a moment to give special thanks to the sponsors of this bill, Mr. STUDDS, Mr. BIAGGI, Mr. FORSYTHE, and Mr. YOUNG, as well as the committee staff, for the many hours they have put in on this project.

I would also like to thank the Judiciary Committee and the Office of the Law Revision Counsel for the cooperation they provided, and for writing this bill in the readable United States Code style. I only hope that all of the bills reported by our committee will be this readable to nonattorneys.

Mr. Speaker, I give my strong support to this bill, and urge its approval by the House.

□ 1440

Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. STUDDS).

Mr. STUDDS. Mr. Speaker, this legislation is the product of a three-year long effort to rewrite our maritime safety laws in a coherent fashion. There has long been recognized the need for this legislation, as evidenced by the four separate attempts to accomplish the same goal over the past 60 years—one in 1929, one in the 1940's, one in the 1960's, and one in the early 1970's. Each of these efforts failed, and as a result, the existing body of maritime law is a confusing collection of individual statutes that are poorly organized, duplicative, often obsolete, occasionally bizarre, and difficult even for professional lawyers, let alone the public or Members of Congress to understand.

The initial impetus for this latest attempt to revise these laws came from the Coast Guard, the agency that administers them. In 1980, the Coast Guard began meeting with representatives of the maritime industries to solicit their views on a revision of the laws that governed them. Last Congress, I introduced a bill very similar to S. 46 (H.R. 7103), which was based on the Coast Guard's work. At the time, the industry expressed strong support for the general aim of the legislation, and conveyed a willingness to work with the Merchant Marine and Fisheries Committee to iron out specific problems. During two hearings and countless meetings with the public and with the Coast Guard over the past year, the bill before us has evolved. Its present text reflects literally thousands of mostly minor adjustments made for stylistic, conforming clarifying, and substantive but noncontroversial reasons.

S. 46 is, for the most part, a simple restatement of existing maritime safety law, organized in a more understanding and usable fashion. For example, all the inspection laws are now located in one chapter whereas they were formerly found in 13 separate sections scattered throughout title 46 of the United States Code. We have also deleted laws that have become obsolete. For instance, there is no longer the requirement that seamen be served one-fourth pint of pickles and one-half pound of biscuits on Wednesdays, or that they be confined in chains with bread and water for food whenever shipboard rules are violated.

This legislation will make our maritime safety laws easier for the Coast Guard to administer, less cumbersome for the maritime industries to use, and easier for anyone needing to refer to them to understand.

I know it is not generally the role of the Congress to make the law more clear, but S. 46 is the exception to the rule. I cannot promise, but I do want to share with the House my hope that this bill may actually reduce employment opportunities for lawyers both in this town and throughout the Nation. For this reason alone, the public interest requires that it be approved.

Mr. JONES of North Carolina. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. BIAGGI), the distinguished chairman of the subcommittee.

Mr. BIAGGI. Mr. Speaker, I want to commend the chairman of the full committee, Mr. JONES, the chairman of the Coast Guard Subcommittee, Mr. STUDDS, and the ranking minority member, Mr. FORSYTHE.

Mr. Speaker, S. 46—as amended by the Committee on Merchant Marine and Fisheries—has my strong support. Its enactment will conclude efforts—stretching over at least 40 years—to improve the maritime safety laws.

The bill will bring clarity out of ambiguity—simplicity out of complexity—and order out of chaos. It repeals over 300 statutes—many well over 100-years old. In their place is put a coherent, clear, and organized statement of the laws that have been developed to insure safety at sea and the welfare of seamen.

Everyone concerned with maritime safety has long agreed that the present state of the maritime safety laws is unsatisfactory. At the same time, many of those impacted by those laws have been hesistant to change them.

Especially in the case of the maritime labor unions; they have been fearful that a codification of these laws might result in a loss of some of the hard-won protections for merchant seamen. For that reason, they

worked closely with the committee to insure that the bill did not remove any rights, benefits, or protections for merchant seamen that are in the law today.

They did agree, however, with the committee as to the desirability of updating those protections and rights to make them more relevant to today's conditions. The cooperative and responsible attitude of the maritime labor unions in working on this bill made an important contribution to its development.

Since there has been a fair amount of concern over the scope and effect of this bill, I would like to take a few minutes to describe its evolution.

The initial concept of the project to codify and improve the marine safety laws was that it would be done without making any substantive changes in those laws. A pure codification was envisioned in which those laws would only be reorganized and restated in simpler and clearer language.

As the project proceeded, however, it became increasingly clear that this initial concept could not be realized. It became obvious that it was not possible to codify these laws without making substantive changes.

Substantive changes must inevitably result:

First, when conflicts are eliminated between statutes;

Second, when statutes are made consistent internally and with other statutes;

Third, when statutes are modernized to reflect changing conditions;

Fourth, when ambiguities in the laws are eliminated; and

Fifth, when inequalities in the law applicable to different persons or vessels in similar circumstances are removed.

As it became apparent that substantive changes were an inevitable result of the process, a modified guiding precept evolved—namely, that the bill would make no substantive changes of a controversial nature.

This was a shorthand way of saying that the bill would make no changes in the present law:

First, that would harm or adversely affect anyone;

Second, that would impose new duties or responsibilities on anyone;

Third, that would make any significant changes in Federal maritime policy; or

Fourth, that would grant significant new authority to the Government officials charged with enforcement of our maritime safety laws.

This policy statement, however, left room for the committee to recommend some limited substantive changes that it had reason to believe would be acceptable to both the enforcing agency and all aspects of the industry—and that would be consistent with improved maritime safety.

To implement the policy of making no substantive changes of a controversial nature, the committee held extensive hearings on the proposed bill. At those hearings—and at markup sessions before the two subcommittees having jurisdiction and before the full committee, interested parties were asked to work closely with committee staff and bring to their attention instances were they objected to provisions of the bill.

A great many groups and individuals did as the committee asked. Many of them submitted detailed written comments. Many of them met with committee staff to present their concerns with the bill—to make recommendations for changes—and to discuss the provisions of the bill.

All comments, objections, or recommendations were carefully analyzed. In almost every case where an objection was made that the language of the bill resulted in a substantive change from existing law, the committee revised the language so that no change resulted. In many cases, no objection was made to those provisions of the bill that result in substantive changes. In other cases, there was general agreement by all interested reviewers to provisions that result in substantive changes.

It should be understood that practically all of these substantive changes—and they are relatively few in number—are minor. They do not substantially alter the rights, duties, or obligations of persons affected by these laws. They can be characterized more as filling in gaps or interstices in the law—or eliminating overlapping provisions.

I would also like to make it clear that the substantive changes the bill makes all grew out of the codification process itself. The committee did not use this bill as a vehicle for making new policy or imposing new requirements.

In its continuing review of maritime safety and the efficacy of the laws to insure it, the committee will, in the near future, be considering substantive proposals to increase the effectiveness of those laws. Enactment of S. 46 will facilitate the incorporation of new proposals into the law.

The net result of the committee's work is a bill that carries out the stated policy—to reorganize, modernize, clarify, and codify the maritime safety laws without making controversial substantive changes. We now have, I believe, a bill that is satisfactory to all elements of the maritime industry—and to the various Government agencies involved.

The job of rewriting the maritime safety and seamen's welfare laws has been a difficult one. But it is one that is well worth doing. This bill will—in my opinion—make it easier for the Coast Guard to do its job of insuring safety at sea. And it will make available to both operators of vessels and their crews a clearer, more coherent statement of the laws affecting them. It will also, I hope, make a contribution to safety at sea.

The bill deserves the strong support of all Members.

Mr. JONES of North Carolina. Mr. Speaker, I reserve the balance of my time.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to see that the massive effort to revise, clarify, and reorganize a large part of title 46 of the United States Code is moving toward completion. This effort was begun literally decades ago. The collection of laws in title 46, dealing with marine safety, personnel qualifications, and seamen's welfare, had long ago become very difficult to understand and administer.

I want to commend the Coast Guard staff, the staff of the Merchant Marine and Fisheries Committee, and the staff of the Law Revision Counsel, for their dedication to producing this revision. The staffs have spent uncounted hours meeting with all affected groups—labor unions, shipping companies, trade associations, and others. There has been full opportunity for participation by all concerned groups, and I am pleased that the bill before us has virtually unanimous bipartisan support. I also am pleased that the administration strongly supports the prompt enactment of this bill.

I also want to commend our Senate colleagues for their fine work on, and early passage of, S. 46. The bill before us today is essentially the same as that passed by the Senate, with a number of specific, minor technical changes. We look forward to prompt Senate concurrence in the passage of this House's version of S. 46.

The premise of this revision of title 46 is that no substantive changes of a controversial nature have been made. Special efforts have been made to preserve the meaning of current law. After this revision of title 46 is enacted, we will be in a much better position to judge the potential impacts and policy considerations relating to any substantive changes which may be proposed in the future.

Mr. Speaker, S. 46 represents a major investment of time, effort, and legal and technical skill by many, many people. I think the investment is about to pay off, and I compliment all those who worked on this bill for their successful efforts.

I urge my colleagues here in the House to vote in favor of S. 46.

● Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of S. 46, legislation to revise, simplify, and enact certain of

the marine safety and seamen's welfare laws of the United States. The bill before us covers the complex maze of marine safety laws in title 46 of the United States Code administered by the Coast Guard.

The purpose of this legislation is to codify the laws which relate to:

The safe operation of vessels generally;

The inspection, regulation, and documentation of vessels;

The procedures relating to marine casualties;

The licensing, certification, and documentation of merchant marine personnel;

The manning of vessels; and

The protection and relief of merchant seamen.

As one can see from this list of topics, this body of law is very important to the maritime industry of the United States and therefore has received careful attention from the Merchant Marine and Fisheries Committee so that undesirable changes were not made by mistake. To do this, we were careful to consult representatives in each part of the maritime community. Further, the law has been rewritten so that the average person can understand it and not just the handful of maritime lawyers and experts who currently know these laws.

A revision of this size requires that some substantive change in the law be made. However, I understand no changes were made that would be of any controversy. Thus, the existing law so important to the shipping and fishing industries, as well as maritime labor and recreational boating, will be preserved. After we finish this job, we can then go on and use this clear statement of the law to address and correct any problem areas that may arise in this part of title 46. Therefore, it is my hope that this revision will be used without ever looking back to the confusing mass of laws this bill repeals and replaces.

Mr. Speaker, these laws have been enacted in bits and pieces over the last 200 years. This revision effort, therefore, is long overdue. I am confident that we have produced a bill that is a well organized and understandable body of marine safety laws for the United States. Further, the administration fully supports this legislation.

I strongly urge my colleagues to approve this legislation today.●

● Mr. SNYDER. Mr. Speaker, I want to commend you for bringing this bill to the floor today. There has long been an effort by the maritime community to revise and modify certain outdated, obsolete sections of title 46 of the United States Code. Certainly there are parts of our maritime laws that have outlived their usefulness and should be either repealed or modified. The bill before the House today, S. 46, represents the Coast Guard and Merchant Marine Subcommittees' cooperative effort to produce a bill which attempts to clarify and better organize much of our maritime law.

I know that there has been some concern in the maritime industry that the committee might be considering substantive changes of a controversial nature in this bill. However, this bill does not contain any such changes. Instead, the guiding principle in developing S. 46 has been to preserve as closely as possible the precise meaning of current law.

I, again, want to commend both the chairman and ranking members of the subcommittee and full committee for their leadership on this issue.●

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the Senate bill, S. 46, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

SELECTIVE PREAPPOINTMENT TRAVEL TO COAST GUARD ACADEMY FOR CADET APPLICANTS

Mr. JONES of North Carolina. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1256) to amend title 14, United States Code, to provide for selective preappointment travel to the Coast Guard Academy for cadet applicants, as amended.

The Clerk read as follows:

H.R. 1256

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1) chapter 9 of title 14, United States Code, is amended by inserting after section 181 the following new section:

"§ 181a. Cadet applicants; selective preappointment travel to Academy

"The Secretary is authorized to expend appropriated funds for selective preappointment travel to the Academy for orientation visits of cadet applicants.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 181 the following new item:

"181a. Cadet applicants; selective preappointment travel to Academy.".

(b) Section 181a of title 14, United States Code, as added by subsection (a), shall take effect on October 1, 1983.

SEC. 2. (a)(1) Section 42(b) of title 14, United States Code, is amended by striking out ".375" both places it appears and inserting in lieu thereof "0.375".

(2) Section 290 of such title is amended by striking out "Board" in the fourth sentence and inserting in lieu thereof "Boards".

(3) The table of sections at the beginning of chapter 13 of such title is amended by striking out the item relating to section 462a.

(4) Section 724 of such title is amended—

(A) by inserting "(1)" after "(b)";

(B) by striking out the last sentence; and

(C) by adding at the end thereof the following new paragraph:

"(2) The authorized number of Reserve officers in an active status not on active duty in the grades of commodore and rear admiral is a total of two. However, the Secretary may authorize an additional number of Reserve officers not on active duty in the grades of commodore and rear admiral as necessary in order to meet planned mobilization requirements.".

(b)(1) The matter in the table in section 201(a) of title 37, United States Code, under the heading "Navy, Coast Guard, and National Oceanic and Atmospheric Administration" and in the columns for 0-8 and 0-7 is amended to read as follows:

"Rear admiral (Navy and Coast Guard) and Rear admiral (upper half) (National Oceanic and Atmospheric administration)	
"Commodore (Navy and Coast Guard) and Rear admiral (lower half) and commodore (National Oceanic and Atmospheric Administration)".	

(2)(A) the heading of section 202 of such title is amended to read as follows:

"§ 202. Pay grade: retired Coast Guard commodores".

(B) The item relating to section 202 in the table of sections at the beginning of chapter 3 of such title is amended to read as follows:

"202. Pay grade: retired Coast Guard commodores.".

(c) The matter in the table in section 741(a) of title 10, United States Code, under the heading "Navy and Coast Guard" is amended—

(1) by striking out "Rear admiral (Navy) and Rear admiral (upper half) (Coast Guard)" and inserting in lieu thereof "Rear admiral"; and

(2) by striking out "Commodore (Navy) and Rear admiral (lower half) (Coast Guard)" and inserting in lieu thereof "Commodore".

SEC. 3. (a) Chapter 55 of title 10, United States Code, is amended as follows:

(1) Section 1072 is amended—

(A) by striking out "the Secretary of Defense" and all that follows through "may be," in paragraph (2)(D)(iii) and inserting in lieu thereof "the administering Secretary"; and

(B) by adding at the end thereof the following new paragraph:

"(3) 'Administering Secretaries' means the Secretaries of executive departments specified in section 1073 of this title as having responsibility for administering this chapter.".

(2) Section 1073 is amended by striking out "and the Secretary" and all that follows through "Navy, and" ar.d inserting in lieu thereof "the Secretary of Transportation shall administer this chapter for the Coast Guard when the Coast Guard is not operating as a service in the Navy, and the Secretary of Health and Human Services shall administer this chapter".

(3) Section 1074 is amended by striking out "Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "administering Secretaries".

(4) Section 1076 is amended by striking out "the Secretary of Defense and the Secretary of Health and Human services" in subsections (b) and (d) and inserting in lieu thereof "the administering secretaries".

(5) Section 1078 of title 10, United States Code, is amended by striking out "the Secretary of Health and Human Services" in subsections (a) and (b) and inserting in lieu thereof "the other administering Secretaries".

(6) Section 1079 is amended—

(A) by striking out "the Secretary of Defense and the Secretary of Health and Human Services" each place it appears and inserting in lieu thereof "the administering Secretaries"; and

(B) by striking out "with the Secretary of Health and Human Services" in subsection (a) and (h)(2) and inserting in lieu thereof "with the other administering Secretaries".

(7) Section 1080 is amended by striking out "the Secretary of Health and Human Services" in the second sentence and inserting in lieu thereof "the other adminstering Secretaries".

(8) Section 1081 is amended by striking out "the Secretary of Defense or the Secretary of Health and Human Services" and inserting in lieu thereof "one of the administering Secretaries".

(9) Section 1083 is amended by striking out "the Secretary of Health and Human Services" in the second sentence and inserting in lieu thereof "the other administering Secretaries".

(10) Section 1084 is amended—

(A) by striking out "the Secretary of Defense or the Secretary of Health and Human Services" in the first sentence and inserting in lieu thereof "an administering Secretary"; and

(B) by striking out "he" in the second sentence and inserting in lieu thereof "the administering Secretary".

(11) The text of section 1085 of title 10, United States Code, is amended to read as follows:

"If a member of former member of a uniformed service under the jurisdiction of one executive department) or a dependent of such a member or former member) receives inpatient medical or dental care in a facility under the jurisdiction of another executive department, the appropriation for maintaining and operating the facility furnishing the care shall be reimbursed at rates established by the President to reflect the average cost of providing the care.".

(12) Section 1086 is amended—

(A) by striking out "the Secretary of Health and Human Services" in subsection (a) and inserting in lieu thereof "the other administering Secretaries"; and

(B) by striking out "the Secretary of Defense and the Secretary of Health and Human Services" in the second sentence of subsection (e) and inserting in lieu thereof "the administering Secretaries".

The SPEAKER pro tempore. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. JONES) will be recognized for 20 minutes and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. JONES).

□ 1450

Mr. JONES of North Carolina. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1256 is a simple but unusual bill. It is unusual because it is noncontroversial and it costs very little money. This bill will permit the Coast Guard to use appropriated funds for preappointment travel by cadet applicants to the Coast Guard Academy.

Based on the success of two privately funded programs, statistics show that the acceptance rate and the retention rate at the Coast Guard Academy increases when applicants visit the Academy beforehand. It is an opportunity for the applicants to view first-hand what life at the Academy is like. For instance, project AIM—Academy introductory mission—sponsored by the Coast Guard Auxiliary, provides an orientation program at the Academy for 1 week each summer. Of the AIM participants who later accept tendered appointments, 75 percent remain in the Academy compared to an overall retention rate of 55 percent. This program has been sharply reduced, however, due to a shortage of private funds.

There is currently another privately funded Academy program which provides funds for preappointment visits to the Academy by minority applicant finalists. Out of a total of 91 minority applicants who participated in the foundation-sponsored program, 65 individuals accepted their offered appointment to the Academy. The acceptance rate of 71.4 percent compares quite favorably to the 42.6 percent acceptance rate for those minority finalists who did not participate in the program. Unfortunately, because the Coast Guard foundation has less funds now, its sponsorship of this program has been severely reduced.

Another potential benefit of providing travel funds to students interested in the Coast Guard is the opportunity to broaden the geographical representation of cadets at the Academy. Obviously it is a greater financial burden on those students who must travel to the Academy from afar, and in fact, the cost may be prohibitive to many. Because statistics show that acceptance and retention rates increase when applicants visit the Academy, financial assistance to those students living a long distance from the Academy will increase the likelihood that a cross section of students throughout the country will attend the Academy and become commissioned officers.

The cost of H.R. 1256 is quite low. Out of funds already appropriated, and within the authorization levels, no more than $20,000 a year will be spent.

The opportunity to increase minority participation in the Academy, obtain better retention rates, and broaden the geographical representation of cadets at the Academy is provided by H.R. 1256, which grants the necessary authority to the Coast Guard to accomplish these aims.

Two amendments were added to H.R. 1256 at the subcommittee and full committee markups. The first amendment, section 2 of the bill, merely makes a technical change to Public Law 97-417, which created the rank of commodore in the Coast Guard. The second amendment, section 3 of H.R. 1256, authorizes the Secretary of Transportation to administer medical and dental care programs for the Coast Guard. Both amendments were unanimously accepted by the Merchant Marine and Fisheries Committee.

I urge support of H.R. 1256, a simple, but worthy bill.

Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. STUDDS).

Mr. STUDDS. I thank the gentleman for yielding.

Mr. Speaker, not only is there nothing more to say, but the bill itself is considerably shorter than the gentleman's remarks. It speaks for itself, and I join the gentleman in support of this legislation.

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1256, a bill:

First, to authorize the Coast Guard to pay selective preappointment travel costs by cadet applicants to the Coast Guard Academy,

Second, to make technical changes in Public Law 97-417, which re-created the rank of commodore in the Coast Guard, and

Third, to make technical changes in title 10 of the United States Code, to authorize the Secretary of Transportation to administer medical and dental programs for the Coast Guard, when the Coast Guard is not operating in the Navy.

This bill addresses three topics, each of which should be completely non-

controversial. The Department of Transportation prepared the initial draft of the provisions of this bill which deal with preappointment cadet travel and the health and dental care provisions, and the entire bill has the support of the administration.

The cadet travel provision of this bill merely authorizes the Coast Guard to pay travel costs by cadet applicants to the Coast Guard Academy, so that they may obtain an orientation visit to the Academy before deciding whether or not to accept appointment to the Academy. Two existing private programs which provide money for preappointment visits to the Academy have demonstrated that such orientation visits result in a higher acceptance rate, and a higher retention rate once the cadet has enrolled. However, the private funding sources are not sufficient, and do not provide a stable funding source for the future of this program. The bill before us today would authorize the Coast Guard to spend money for this purpose, provided that the money is already available in their budget. The visitation program is estimated to involve approximately $20,000 for each of the first 5 fiscal years. This is not expected to result in any additional appropriations.

The amendments to Public Law 97-417, which recreated the rank of commodore within the Coast Guard, are essentially technical in nature. The Merchant Marine and Fisheries Committee is not aware of any objection to these corrections.

The provision in H.R. 1256 dealing with health and dental care was requested by the Department of Transportation. This legislative change would simply authorize the Secretary of Transportation to administer medical and dental care programs for the Coast Guard, programs for which the Coast Guard already has statutory responsibility so far as funding and actually providing health care are concerned. The amendments transfer administrative responsibilities from the Secretary of Health and Human Services to the Coast Guard for health care programs of Coast Guard personnel, dependents, former Coast Guard personnel. No new funds of personnel will be needed as a result of this amendment.

Mr. Speaker, this health care provision is basically a housekeeping matter. It confirms the Coast Guard's authority to administer health care programs for which the Coast Guard is already legally responsible. The amendments merely place the Secretary of Transportation on an equal par with the Secretaries of the other uniform services in matters relating to provision of medical and dental care for members of the service, dependents, and former members.

It is clear to me that each of the three parts of H.R. 1256 serves a very useful purpose, including correcting minor deficiencies in existing law. I urge the adoption of H.R. 1256 by the Members of the House.

● Mr. GEJDENSON. Mr. Speaker, I rise in strong support of H.R. 1256, a bill which would allow the Coast Guard to pay travel costs for orientation visits of applicants to the Coast Guard Academy.

Mr. Speaker, the availability of these funds is imperative if the Coast Guard Academy is to be able to attract and retain highly qualified minority and underprivileged students. There is a great deal of bipartisan support for this bill, for it would produce tangible results at relatively little cost.

I am extremely proud of the Coast Guard Academy which, as you know, is located within my congressional district. The Coast Guard campus in New London does much to enhance and lend diversity to that city's cultural resources. It is to our benefit if the Academy itself is as culturally diverse as possible. And it will be to the benefit of many young people if, through passage of this bill, they are given access to the resources of one of the finest universities in the nation.

I commend the authors of this bill on the admirable job they have done, and I hope that all of my colleagues will support this bipartisan effort to increase attendance at the U.S. Coast Guard Academy of minority and underprivileged students.●

● Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of H.R. 1256, a bill to authorize the Coast Guard to pay selective preappointment travel costs by candidates for the Coast Guard Academy and to make other improvements in the laws governing the Coast Guard.

Section 1 permits the Coast Guard to pay for selective preappointment travel by Coast Guard cadet applicants so that they will have an opportunity for an orientation visit prior to accepting an appointment. Currently two privately funded programs provide for orientation visits but are inadequately funded. These visitation programs have both increased the acceptance rate of appointments and reduced the dropout rate of cadets. This legislation will permit the Coast Guard to continue this program in an effective manner.

I have had the opportunity to review the geographical representation at the Academy. I am quite concerned that States such as my own State of Alaska and other States with considerable maritime interests were underrepresented in the student body of the Academy. Many of these underrepresented States are great distances from New London, Conn., the home of the Coast Guard Academy. This program will permit the Coast Guard to aid students residing in distant States to take advantage of this unique educational opportunity. we often forget that the Coast Guard Academy is just like the Academies of the other military services. It is my hope that his program will encourage young men and women in Alaska and throughout America to take advantage of this great benefit and opportunity.

Section 2 makes certain technical changes in the law that created the rank of commodore for the Coast Guard. These changes give the Secretary of Transportation the authority to adjust the number of Reserve flag officers as needed for planned mobilization purposes, include the proper references throughout the United States Code, and make other technical improvements in the law.

Section 3 contains technical amendments to title 10 of the United States Code allowing the Secretary of Transportation to administer medical and dental care programs for the Coast Guard. These duties are now performed by the Secretary of Health and Human Services for the Coast Guard. Although the Coast Guard has statutory responsibility to budget for and provide health care for its members, it is stopped from actually administering the programs because of the restrictions of current law. This section corrects this situation and places the responsibility with the Secretary of Transportation where it belongs. It in no way changes the law as it affects the Department of Defense.

Mr. Speaker, no new funds or personnel will be needed as a result of this legislation. Further, the administration supports these legislative measures. Therefore, I urge my colleagues to approve this bill.●

Mr. FORSYTHE. Mr. Speaker, I yield back the balance of my time.

Mr. JONES of North Carolina. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill, H.R. 1256, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to amend title 14, United States Code, to provide for selective preappointment travel to the Coast Guard Academy for cadet applicants, and for other purposes."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that

all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

ANNOUNCEMENT OF ACREAGE LIMITATION AND SET-ASIDE PROGRAMS

Mr. DE LA GARZA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3564) to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program, as amended.

The Clerk read as follows:

H.R. 3564

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ANNOUNCEMENT OF ACREAGE LIMITATION AND SET-ASIDE PROGRAMS

SECTION 1. (a) Effective for the 1984 and 1985 crops of feed grains, the second sentence of section 105B(e)(1)(A) of the Agricultural Act of 1949, as amended by section 124(1) of the Omnibus Budget Reconciliation Act of 1982, is amended to read as follows: "The Secretary shall announce any such feed grain acreage limitation program or set-aside program for the 1984 crop not later than September 30, 1983, and for the 1985 crop not later than September 30, 1984.".

(b) Effective for the 1985 crop of wheat, the second sentence of section 107B(e)(1)(A) of the Agricultural Act of 1949, as amended by section 122(1) of the Omnibus Budget Reconciliation Act of 1982, is amended to read as follows: "The Secretary shall announce any such wheat acreage limitation program or set-aside program for the 1985 crop not later than July 1, 1984.".

The SPEAKER pro tempore. Is a second demanded?

Mr. JEFFORDS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. DE LA GARZA) will be recognized for 20 minutes, and the gentleman from Vermont (Mr. JEFFORDS) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3564, as reported by the House Agriculture Committee.

The bill simply requires the Secretary to make an earlier announcement of any acreage limitation or set-aside program that he may provide for the 1984 and 1985 crops of feed grains and for the 1985 crop of wheat. The bill changes the final date for such announcements, in the case of feed grains, from November 15 until September 30 of the year preceding the year in which the crop is harvested and, in the case of wheat, from August 15, 1984, to July 1, 1984.

H.R. 3564 advances the date of announcement of these programs so as to give farmers adequate notice of program requirements before they make their planting decisions. The date specified in current law results in a delay in the announcement until after farmers have invested money in their new crop. The expense and inconvenience of having to adjust their plans to conform to program requirements discourages many farmers from participating.

Earlier announcement is also important to suppliers of the inputs necessary to produce a crop—the suppliers of fertilizer, seed, pesticides, and farm machinery. It gives them adequate opportunity to adjust their inventories and avoid costly investments in items for which there is no ready market.

Finally, the announcement data specified in H.R. 3564 will still allow Department officials sufficient time to reach an informed judgment on program requirements for the next year's crop. On these dates the Department would have had approximately two weeks to react to the latest information on the size of the crop then being harvested and the expected demand therefor. The Department officials would thus be in a position to decide, given the estimated season end carryover stocks, whether a program would be needed in the next crop year and if so design and announce the details of a program by the specified dates.

H.R. 3564 does not in any way affect Government costs. In fact, it reduces costs to farmers who wish to participate in the program, thereby encouraging participation and making the program more effective.

I urge the Members to join in support of this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. JEFFORDS. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. ROBERTS).

Mr. ROBERTS. Mr. Speaker, it would appear as if the national media has rediscovered agriculture once again, something that seems to happen only if the farmer is going through a crisis or, more to the point, if urban, consumer or labor interests think there may be an issue that affects their food supply. Given that equation, we are hearing a lot about farm program costs, the payment-in-kind program, and the U.S.-Soviet long-term grain agreement. The comments not only fall into the 20/20 hindsight category, but also from folks who fit into the no homework, garden variety gadflies category.

Be that as it may, the No. 1 issue in farm country today is not PIK, the LTA, or farm costs. They are of real concern, of course, but the immediate issue is the one addressed in H.R. 3564. For the third year in a row, farmers are in the midst of cropping plans without a farm program in place. For the third year in a row, politics and budget considerations are denying producers program decisions so they can make intelligent planning decisions.

Mr. Speaker, this legislation would provide the farmer with what he needs most—consistency and predictability and a better planning horizon so that he can make more rational business decisions on his cropping plans. As one producer told me recently, "Pat, I don't care what the USDA and the Congress do to me, just let me know."

This bill, as it was originally introduced, only pertained to the feed grains program. However, during hearings, I introduced an amendment to move the announcement date of the 1985 wheat program from August 15, 1984, to July 1, 1984. This so-called "early announcement date" is really only 2 months before wheat farmers start planting in Kansas and the High Plains—the area where most U.S. production is harvested. For the summer-fallow wheat producer in Kansas, a May 15 announcement would be more timely; however, the USDA objects to this date and the July 1 date is a compromise.

Mr. Speaker, it is important to realize the USDA had committed to announcing the 1984 wheat program by July of this year. However, due to the target price freeze debate and a great number of folks playing politics with the program, we still do not know what the wheat program for this year will be. This bill is a simple matter of equity for the farmer. The road to a sound farm policy is always paved with good intentions, but these intentions do not help the farmer if the USDA and the Congress do not follow through.

I urge the House to adopt this bill.

Mr. JEFFORDS. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. MADIGAN).

Mr. MADIGAN. Mr. Speaker, the gentleman from Kansas (Mr. ROBERTS) has talked about the importance of these announcements being made earlier. Let me say that, at the outset, when this bill was first introduced, I was a cosponsor of this bill. It was at that point a 1-year bill. It is now a 2-year bill.

Let me also say that as the ranking minority Member of the Committee on Agriculture, I was never consulted about this bill being placed on the Suspension Calendar. I object to this bill being on the Suspension Calendar because I would like to have the oppor-

tunity to try to work out some compromise or a resolution of the differences that exist between the administration and this body with regard to this bill.

But I am being denied that opportunity by the placing of this bill on the Suspension Calendar. It is the same as if the bill had a closed rule.

As I said in debate on the floor of the House Friday, all the bills being reported by the Committee on Agriculture are being placed on the Suspension Calendar, which denies to me or to any other Member of the House any opportunity to be a legislator, any opportunity to try to make suggestions with regard to potential changes in the bill that might make it a better bill or a bill where there would be some possibility that it would ultimately become law because we would have had opportunity to resolve the differences between our Chamber and the administration.

□ 1500

Now, the administration is opposing this bill. They are opposing the bill and they intend to work very hard to see that the bill is defeated. As the ranking minority member of the committee, I have no opportunity to try to work out the differences between the administration and this body because we are on the Suspension Calendar and therefore unable to make changes in the bill.

We are asking for an announcement date in September on feed grains. We have, as I said, changed it to a 2-year bill, different than the bill that I originally cosponsored. I thought perhaps we ought to take a look at when these announcements have been made in the past.

In 1978, in November; in 1979, in November; in 1980, in October; in 1981, in November; in 1982, in January. We are trying to move the timetable up from January, from December, from November, up to September.

What is the result of doing that next year? The result, in a Presidential election year, will be to insure that the administration, to avoid the political fallout, will probably announce a program more generous than that which might be absolutely necessary if the administration had waited for the kind of information needed to make intelligent decisions. We have an opportunity to try to work out some accommodation between the administration and this body, but we are denied that opportunity because the bill is on the Suspension Calendar.

Apparently, somewhere it has been written in the rules in the past few weeks that all bills that come from the Committee on Agriculture must be on the Suspension Calendar so that no one can possibly amend them. It seems to me that what we are doing is jeopardizing the long-term constructive involvement of this body in the future of American agriculture policy.

In 1981 the Federal Government spent $4 billion on support prices for agriculture commodities. In 1983 we are going to spend in the neighborhood of $21 billion. The estimates for 1984 are that agricultural expenditures could be in excess of $30 billion, and maybe as high as $40 billion, perhaps 10 times the amount spent in 1981, just 2 years ago. What we are insuring, of course, if we get into that kind of situation, is that it will be nearly impossible to pass a farm bill in 1985. I might remind you ladies and gentlemen in the House that we passed the farm bill in 1981 by only a one- or two-vote margin when we were considering spending only $4 billion through the Commodity Credit Corporation.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Speaker, the gentleman brings up these points at this time, but I am just wondering why these points or why the gentleman did not offer amendments if he wishes to do so, while we were in the Committee on Agriculture.

Mr. MADIGAN. If the gentleman would allow me to reclaim my time, I discussed with the gentleman from Iowa, who is the principal sponsor of the bill, the possibility of one amendment, and indicated to him that I wanted to work on that possibility. Nobody at that point had said anything to me about this bill being on the Suspension Calendar.

I have been trying to work on that amendment and another potential amendment that might have put this bill in the position that it would not be opposed by the administration, and not be vetoed by the President, and perhaps be much more acceptable to the other body. I have been working on these things, only to discover that this bill, like all the rest, is being put on the Suspension Calendar, so the efforts that I have been making have been for naught. I could have a compromise worked out with the Senate where they would pass this bill this afternoon. I could have a compromise worked out with the President where he would sign this bill as quickly as it could get down there, but I have no opportunity to do that because this bill has been put on the Suspension Calendar and no one showed me the courtesy, as the ranking member of the committee, to even tell me the bill was going to be put on the Suspension Calendar.

I talked to the gentleman in the committee on the record about the potential of changing some of the things in this bill, and asked him what his reaction to that would be and got his reaction. I talked to him about the fact that I would like to go to the Senate and see how they would react to some potential changes in this bill. My understanding is that as far as he was concerned, I was free to go do that.

So I went and did those things, but here we are on the Suspension Calendar. So what do I do with all these things that I have worked out, or have attempted to work out?

Mr. VOLKMER. If the gentleman will yield further, the gentleman can still take them to the Senate and the Senate could make any changes they wish, and they could be worked out in the conference committee.

Mr. MADIGAN. No, the gentleman from Illinois, as a Member of this House, just like the gentleman from Missouri, ought to have the opportunity to be a legislator. He ought not be denied that opportunity by always bringing these bills from the Committee on Agriculture to the floor under the Suspension Calendar. I am beginning to believe, and I say this with some trepidation, that the Committee on Agriculture people do not want these bills signed. I am beginning to believe that they are just passing these bills with some other goal in mind, some other ambition, because by doing this repeatedly on these bills, what they are doing, it seems to me, is insuring that no accommodation can be reached and that an attempt has to be made to show that there is support here for a veto, and then we go wherever we go from that point.

Mr. VOLKMER. If the gentleman would yield further, he would agree there was overwhelming support in the House Committee on Agriculture for the bill as it came out.

Mr. MADIGAN. As a matter of fact, in the committee, I voted for the bill, as the gentleman well knows, but I certainly did not vote for it with the understanding that it was going to be on the Suspension Calendar and that we were not going to have the opportunity to amend it.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I would be glad to yield to the gentleman from Iowa.

Mr. BEDELL. I thank the gentleman for yielding.

Mr. Speaker, I think we should clarify what the record would show as to the colloquy between the gentleman from Illinois and the gentleman from Iowa in the committee.

The gentleman, as I recall it, in the committee, asked the gentleman from Iowa if he would object to seeing this made a permanent change rather than a 2-year change.

Mr. MADIGAN. Yes, and if the gentleman would allow me to reclaim my time. I said to the gentleman from Missouri two changes in the bill, and

that is the other one that I wes referring to. I would be happy to make this permanent. I think it should be made permanent, but I think the legislative processs which involves 3 units of government, this body, the other body, and the administrative, recognizes at the outset the need for some kind of compromise.

The gentleman has not indicated any willingness to make any compromise at all by demanding that this bill come on the Suspension Calendar.

Mr. BEDELL. If the gentleman would yield further, did the gentleman say there were two things he brought up in committee? Did he bring up something else in addition to wanting to make this a permanent change in the law?

Mr. MADIGAN. I think the other thing that we would have to deal with would be to see if we could arrive at some date that would be acceptable to the administration with regard to feed grain announcements.

Mr. BEDELL. If the gentleman would yield further, there is nothing in the record to indicate that the gentleman asked for that or indicated that in the committee, is there?

Mr. MADIGAN. The gentleman and I talked before the full committee session started, and the gentleman told me that he was going to accept an amendment by another member. I was at that point intending to talk to the gentleman about the date. The gentleman advised me that he was going to accept an amendment from the other gentleman from Iowa and that that was going to be the conclusion of that effort.

I understood that that amendment, coming from the other gentleman from Iowa, was the administration's date, or the date they desired. I understand now that that is not the case. But that discussion, the gentleman is correct, would not be on the committee record because it occurred between the two of us just before the committee session.

Mr. BEDELL. If the gentleman would yield further, was that not the same date that the gentleman from Illinois had planned to offer, which is now in the bill?

Mr. MADIGAN. No. I was going to make an attempt to find out what the administration's date, or desired date by the administration would be, and then the representation was made to me that that was their date, and I did not pursue the matter further. But that, in fact, was not the case.

So if I may conclude, Mr. Speaker, and ladies and gentlemen of the House, I think the result of insisting that this bill be placed on the Suspension Calendar, the result of amending the bill and changing it to a 2-year bill in committee, is to insure that this bill in the present form is going to be vetoed by the President of the United States. I think that is regrettable because I think we ought to have as an early announcement date as is possible and practicable. It ought to be a manageable date, and it ought to be in permanent law. It ought to be something that would occur every year, year after year, and something that we could all look forward to. I would think that it would help the Department, it would help the agriculture producers, it would help all the suppliers of those agriculture producers to know what the date is going to be and to know that it is going to be there year after year after year.

But the result of doing this, the way it is being done, is to insure that the bill is going to be vetoed, and I think that is regrettable.

Mr. JEFFORDS. I would just like to inform the gentleman that we do have other requests for time, and we are running out, so I would ask the gentleman to be brief so we can yield to the gentleman from Montana.

Mr. ROBERTS. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. Let me yield to the gentleman from Kansas and then I will conclude.

Mr. ROBERTS. I thank the gentleman for yielding.

Mr. Speaker, I would just like to summarize on a point of clarification.

The gentleman is not so much concerned with the legislative package here, with the substance of the legislation, as he is so much with the schedule of the legislation?

□ 1510

Mr. MADIGAN. Mr. Speaker, if the gentleman will allow me to reclaim my time, I am concerned that, without having been advised that we were going to have this on the Suspension Calendar, with my being sent off to work on this thing to see if it could be improve and then finding out on Friday that it was going to be on the Suspension Calendar so it could not be amended, I just think that I am being denied the opportunity to be a legislator.

Mr. ROBERTS. Mr. Speaker, I thank the gentleman.

Mr. MADIGAN. Mr. Speaker, if the gentleman from Montana (Mr. MARLENEE) wishes me to yield, I would be happy to yield to him.

Mr. MARLENEE. I would like to have my own time, Mr. Speaker.

Mr. JEFFORDS. Mr. Speaker, I yield 3 minutes to the gentleman from Montana (Mr. MARLENEE).

Mr. MARLENEE. Mr. Speaker, as ranking minority member of the Wheat, Soybeans, and Feed Grains Subcommittee from which this bill originated, I rise in support of H.R. 3564. I am acutely aware of the need, particularly on the part of wheat farmers, to know as early as possible what Government programs are available so that they can begin their cropping plans.

Past announcements to date have been a disaster. Winter wheat farmers must begin planting as early as August 1, and late August is one of the most common dates. The current statutory program announcement date is August 15. As an example of the problem, today is August 1, and wheat farmers still do not know for sure what the 1984 wheat program will be. That is so despite the Secretary's earlier stated intention to announce that program by this past July 1.

In the past, grain producers have not only not had the opportunity for some stability in long-range planning, but they have also been denied the ability to formulate short-term cropping plans. A late announcement on grain programs is like forcing producers to maneuver an automobile at night without lights. They cannot see where they have been and do not know where they are going or what kind of trouble lies ahead. This bill would help turn those lights on for the grain producers and should facilitate short-term managerial planning.

The administration opposed this bill in an earlier version when it contained an earlier date than the present 1984 feed grain date.

The change in date is one in and toward the administration's direction. We asked the administration for a date. They gave us no date. We have moved in their direction toward a later date, and I think if they want to play ball with us, they should come down here and communicate with the members of this committee and tell us what date they want. They have not done that to this time.

Mr. Speaker, they are going to have to try to play ball with the members of the Agriculture Committee if we are in fact going to come up with legislation like this that is beneficial to the American producer.

I urge my colleagues to support this needed and timely measure.

Mr. DE LA GARZA. Mr. Speaker, I yield 5 minutes to the gentleman from Iowa (Mr. BEDELL), the main author of the legislation.

Mr. BEDELL. Mr. Speaker, I must tell the Members that it comes as quite a great surprise that there would be opposition to this legislation. As is well known, it passed without a dissenting vote in the full committee. The original bill had a September 16 date in it for the date of announcement of the feed grains program.

In the testimony of the Department, they indicated that this earlier date gave them some trouble. Let me read from their testimony:

Barring some unforeseen developments, we intend to announce the 1984 feed grain program by September 30. This would be a full month and a half before the statutory deadline. Moreover, an announcement by

the end of September will allow most farmers and input suppliers ample time to make their planting decisions for the coming season.

Based upon that, the bill was amended by the gentleman from Iowa (Mr. EVANS). The gentleman from Iowa (Mr. BEDELL) accepted the amendment, trying to reach agreement, and indeed we felt that we had pretty well met their requirements.

I would say quite clearly that people should understand that this was amended in subcommittee in the following manner: It originally started as simply a feed grains bill calling for an announcement of the 1984 feed grain program by September 16, 1983. The wheat people said, "we need an early announcement on wheat as well," and the only way that could be done would be for the next season's requirement, so we put in July of next year for the announcement for the wheat program, and it was agreed that if we were going to do that, we should also include feed grains for next year as well.

That was in the bill that passed the subcommittee. It was in the bill all the way through the full committee, with no member offering any effort to amend it to a 1-year bill.

The committee has tried, I think, very, very hard to meet the requirements or the wishes of the Department by putting it back 2 weeks in order to do that and putting it on the date that their testimony indicated was the date they planned to make such an announcement.

Mr. Speaker, I am very sorry for this disturbance we have here, and I am sorry that apparently there is some disagreement on it. I would only call attention to the fact that it passed without dissenting votes in the full committee.

Mr. Speaker, I support H.R. 3564, and urge its prompt adoption by the House.

This measure, which would require the Secretary of Agriculture to make an earlier announcement of the 1984 and 1985 feed grains program and the 1985 wheat program, was introduced on July 14 by myself and 40 of my colleagues.

I particularly want to thank the chairman of the Committee on Agriculture, Mr. DE LA GARZA, and the chairman of the Subcommittee on Wheat, Soybeans, and Feed Grains, Mr. FOLEY, for their cooperation in assuring the expeditious approval of this legislation. Thanks to their interest and support, this measure has been brought to the floor less than 2 weeks since its introduction.

The timely announcement of the 1984 feed grains program, and the 1985 wheat and feed grains program, is essential if farmers are to have sufficient time to weigh various program options, make a decision with respect to program participation, and plan accordingly. Similarly, the farm supply businesses which serve producers must know program details well in advance so that they can estimate farmers' needs and prudently determine their required inventory.

The early announcement of our farm programs is particularly important in view of the hardships created for producers and farm suppliers alike by the late implementaion of this year's rather drastic payment-in-kind (PIK) program.

The PIK program was not announced until January 11 of this year, and it took several days for the details of the program to reach farmers and rural businesses. Because farmers had to make a final decision on program participation by March 11, many had a difficult time establishing their eligibility for program benefits, and those that had applied fertilizer the previous fall or otherwise made planting decisions found the program less attractive. In 1983, as in some previous years, the late announcement of the farm program led to lower program participation than what might have been expected with early announcement.

The delayed PIK announcement also put agribusinesses in a severe bind. Although these rural businesses generally recognized that the PIK program was necessary to lay the groundwork for recovery in the agricultural economy, most nevertheless suddenly found themselves burdened by costly inventories of fertilizer, farm chemicals, machinery, and other supplies. Many of these businesses were forced to curtail their operations and reduce their number of employees just as businesses elsewhere were beginning to feel the impact of an improving economy.

Mr. Speaker, the disappointment of a late farm program announcement is not an infrequent experience for farmers. Despite promises to the contrary, farmers over recent years regularly have been forced to accept an announcement issued just before the statutory deadline for such announcements.

In 1980, I authored legislation to move up the announcement date on the feed grains program from November 15 to October 15. Unfortunately, even that modest legislation, as approved by the Committee on Agriculture with an amendment setting the date at November 1, did not become a part of permanent law.

I would also like to point out, Mr. Speaker, that in fashioning the details of H.R. 3564, I and the other members of the Committee on Agriculture made every effort to work with the Department of Agriculture in the hopes of finding a date, or dates, that would be acceptable to all.

When H.R. 3564 was first introduced, it called for the Secretary to announce the 1984 feed grains program on September 16 of this year. I thought that this date would have provided the Department with sufficent time to analyze its September 12 crop estimate before deciding on the details of next year's program. As the following information indicates, USDA's early crop estimates have been rather remarkably reliable in predicting the final size of the feed grains crop.

Average error in USDA forecasts of annual feed grain crop over the past 20 years

[In percent]

August estimate	6.7
September estimate	5.1
October estimate	3.8

However, in testimony before the Subcommittee on Wheat, Soybeans, and Feed Grains on July 21, Assistant Secretary William G. Lesher stated that, although a mandatory September 16 announcement was unacceptable to the Department:

> Barring some unforseen developments, we intend to announce the 1984 feed grains program by September 30 . . . we believe that a 1984 feed grains program announcement by September 30 would also be helpful to farmers and to the total agricultural sector.

In the spirit of accommodation, the full Committee on Agriculture approved an amendment changing the required announcement date from the September 16 date originally called for in the bill to September 30.

Unfortunately, Mr. Speaker, even this change apparently was not successful in securing the administration's endorsement of the bill.

Mr. Speaker, we are quite certain, even at this early date, and despite recent dry weather, that an acreage reduction program will be needed for feed grains next year. We believe that our surplus of feed grains after this year's harvest will, despite the PIK program, be excessive, and the administration has already outlined the parameters of the program it is likely to announce for 1984. The current controversy over the administration's request for a freeze on target prices—which had led to an unfortunate and frustrating delay in the announcement of the specifics of the 1984 wheat program—is likely to be resolved one way or another by the Congress in the very near future, leaving no legitimate reason for a delay in announcing the 1984 feed grains program in a timely manner.

Mr. Speaker, I urge the prompt consideration and timely enactment of this needed legislation.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, I want to point out that there are no statistical reports and there is no basis

or no evidence upon which the Department could make a different decision after September 30 until some time in November, so there is no need to delay after September 30 unless we are going to delay until November. November is just too late.

For 6 or 8 years we have been talking about getting earlier announcements so that farmers, before they commit themselves on fertilizer, can make their plans and sign their contracts and know what they are going to do the following year.

So the only reason for delaying an announcement later than September 30 would be to delay until some time in November, and that is just too late.

I want to commend the administration for having made the announcement last week on the wheat program. If they can make an announcement last week on the wheat program, they can certainly make one on feed grains by September 30.

I do not believe there is as much opposition in the Agriculture Department as indicated anyway. I have been informed, and I think fairly reliably, that the Senate may not send this bill to committee. I think it may be all worked out over there so they can readily pass this bill. They know the importance of this bill.

I think that this is the time to get a date set no later than provided in the bill and especially with all of these PIK acres out there. Farmers are already out there starting to till some of the PIK acres—they are getting ready for wheat, and they needed that announcement last week. They need this feed grains announcement certainly by September 30 this year, and there is no need to delay it after that.

Mr. BEDELL. Mr. Speaker, I thank the gentleman from Iowa (Mr. SMITH) for his remarks.

An issue has been made as to whether or not this should have been brought up under suspension. I would call the attention of the body to two things. First of all, we are planning to adjourn at the end of this week, and we have a tremendous amount of legislation ahead of us. This is a bill that passed the committee without a single dissenting vote.

Mr. MADIGAN. Mr. Speaker, will the gentleman yield?

Mr. BEDELL. If I might finish, Mr. Speaker, I doubt if there is a committee in the House, facing those problems, that would not have felt that the bill should be brought up under suspension. Certainly, that would be the opinion of this gentleman, and particularly when we felt that we had met all the requirements of the administration and when we had done what they indicated in their testimony was what they intended to do anyway.

So I cannot understand it. If there is a problem, it has to be a communications problem, it would appear to me.

Mr. Speaker, now I will be pleased to yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Speaker, does the gentleman recall the two of us having a conversation in the full committee about making a change in the bill?

Mr. BEDELL. Mr. Speaker, I recall very clearly in the full committee that the gentleman asked the gentleman from Iowa how he would feel about an amendment to make a change in the bill to make a change in the law; so that rather than a 2-year bill, it would be a permanent change in the law.

The gentleman from Iowa replied that he would be supportive of such efforts, but that we needed to get this passed within the next 2 weeks if it was going to have any effect, and said that he would plead with the gentleman not to offer an amendment at this time, but that if he wanted to at a later date, the gentleman from Iowa would be interested in supporting him.

□ 1520

But we should understand quite clearly that that really would not be particularly different from what we have done, because what we have done is changed the date for the balance of the current farm bill.

The SPEAKER pro tempore. The time of the gentleman from Iowa has expired.

Mr. DE LA GARZA. Mr. Speaker, I yield 2 additional minutes to the gentleman.

Mr. BEDELL. Mr. Speaker, it is very difficult for the gentleman from Iowa to understand why the gentleman from Illinois could object to making it a 2-year bill instead of a 1-year bill; but in committee the gentleman indicated what he would like to do is make it a permanent change in the law.

Mr. MADIGAN. If the gentleman will yield, I would remind the gentleman that when I had the time and I was in the well I yielded to the gentleman.

Mr. BEDELL. Surely. I am yielding.

Mr. MADIGAN. I appreciate the gentleman yielding to me.

I am objecting at the outset to the fact that the gentleman and I talked about making that change, but nobody told the gentleman from Illinois that we were going to bring this to the floor on the Suspension Calendar.

Now, we do not have to do that, we do not have to do that. There are bills that are passed out of committee that get a rule and get to the floor the following week and are considered the following week without going on the Suspension Calendar. No one told the gentleman from Illinois that we were going on the Suspension Calendar, No. 1.

No. 2, the representations were made to me in the committee that the amendment changing the date being offered by the other gentleman from Iowa was an amendment which made the bill then acceptable to the administration, then acceptable to the Department of Agriculture. That is not true.

Are we interested here at all in dealing with the truth? The change made in the committee that was supposed to make the bill acceptable to the administration did not make it acceptable to the administration; so we are not talking about a bill that was represented in the committee as then having administration support; in fact, having administration support as we consider it here under the Suspension Calendar. So the fact it passed out of the committee on a voice vote with no dissent is of no consequence to this debate, because the debate there was not a factual debate. There was a misrepresentation made.

I would think that we would as honorable men and women want the truth to be known as we consider the bill here, and I thank the gentleman for yielding.

Mr. BEDELL. If this gentleman can reclaim his time, I do not think there was any misrepresentation at all. If the gentleman was there for the hearing, let me again read the testimony that was submitted.

The SPEAKER pro tempore. The time of the gentleman from Iowa has again expired.

Mr. DE LA GARZA. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. BEDELL. This is the testimony——

Mr. MADIGAN. If the gentleman will yield to me, the gentleman represents me as having voted for the bill in the subcommittee, and I did not. I am not even a member of the subcommittee. I was present for the hearing, but I certainly did not vote.

Mr. BEDELL. If this gentleman may reclaim his time, this is the testimony of William Lesher, Assistant Secretary for Economics, before our Subcommittee on Wheat, Soybeans and Feed Grains, of the Committee on Agriculture. I read it already once. I will read it again:

> Barring some unforeseen developments, we intend to announce the 1984 feedgrains program by September 30. This would be a full month and a half before the statutory deadline. Moreover, an announcement by the end of September would allow most farmers and input suppliers ample time to make their planning decisions for the coming season.

Most of us would assume that that would mean that the Department felt that that was the date at which it should be, rather than the 16th.

Mr. MARLENEE. Mr. Speaker, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Speaker, I thank the gentleman for yielding.

There have been a lot of points made about the bill being acceptable to the administration; but they would not tell us a date. They would not give us a date that they would accept in this particular piece of legislation.

I find that objectionable.

Second, if the gentleman will yield further, the perception that it is a 2-year program, if we were to go back and make this a 1-year bill, it would nullify completely the good work that my colleague, the gentleman from Kansas (Mr. ROBERTS) did in including wheat in the wheat announcement date on this particular program. Wheat is for 1 year and 1 year only. It is not for this coming crop year.

Mr. JEFFORDS. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. ROBERTS).

Mr. ROBERTS. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, while I respect the position of my ranking Republican member on the committee and I understand that he is concerned about the legislative process and what is acceptable to the administration, let me point out that the gentleman from Illinois has already stated that it is not particularly the substance of the legislation that he is objecting to, it is the legislative process. For the gentleman, in fact, in the colloquy with the gentleman from Iowa, did indicate that this was a matter of equity and that perhaps we ought to end this practice of delaying farm programs endlessly for years and years and make them permanent.

Now, I do not know what is acceptable to the administration and what is not. As my colleague, the gentleman from Montana, has already pointed out, this has been delayed again due to budget considerations and a fight over a target price freeze.

How much more time are we going to have to wait with these farm programs? The producer does not know what is going on at the very time he is in the field trying to make some cropping plans and incurring costs as to whether or not he is going to enter the farm program.

We are talking about a 45-day-earlier announcement. For 3 years in a row we have delayed these farm programs through budget considerations and policies.

Now, I know that doubtless there are some economists in the USDA that would like to have the program announcement delayed as long as possible. They say, well, on the one hand we are going to consider this computer model and then say perhaps on another hand we are going to consider some sort of weather pattern.

Why do we not make a farm program announcement pertaining to the producer? It is his program. As you can tell, I get a little blood pressure worked up about this where for the third year in a row we are delaying this.

The administration said they would announce the feed grain program on exactly the date that the gentleman from Iowa moved in his legislation and exactly the date, July 1, for the wheat producer as my amendment called for.

There is nothing wrong with the substance of this bill. If anything is wrong, it is the politics being played on both sides with the consideration of this program at the expense of the farmer.

Mr. JEFFORDS. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. MADIGAN).

Mr. MADIGAN. Mr. Speaker, I thank the gentleman for yielding.

I just want to respond to the gentleman from Kansas by saying that I do object to the procedure and I did object to the procedure in my initial remarks on the floor; but to quote me as saying that I do not object to the substance of the bill is not correct, because I did in my remarks on the floor object to the second year having been added here, making it different from the bill originally sponsored by the gentleman from Kansas and the gentleman from Illinois and all of the other sponsors of the bill and did also object to the substance of the bill in the sense that we do not have the opportunity to try to work out some accommodation here that would put this bill in a form in which it could be signed.

I would say to the people serving in this Chamber who are interested in the budgetary problem that this Government has and in the inability of some of our crops to be competitive in the world market that to continue to do the kinds of things that we are doing is to continue to insure that American agriculture is going to become less competitive in the world market, that food prices in this country are going to be higher than they have been as the result of the Government inflated support prices that are put under these products, and to force an administration in an election year to make an announcement before they have all the facts in, before they know what the September and October freeze situation is going to be, is to force them to make an announcement that is probably going to be too generous to avoid their having political problems as the result of that announcement, to avoid those political problems, a program that is too generous, that artificially pushes prices even further, that has a terrible impact not only upon our budget, but upon food prices in the country for the consumer, and finally upon American agriculture, because we tend by doing those things to make it less and less competitive in the world market, if we do not make some changes in this Congress, we are just headed for trouble.

The CHAIRMAN. All time has expired on the minority side.

Mr. DE LA GARZA. Mr. Speaker, I yield myself such time as I may consume.

I do this only, Mr. Speaker, to say that the floor of the House is not the place to discuss the internal administrative workings of the Agriculture Committee. Apparently there has been some breakdown in communication on the minority side. We work through the staff and the staff informs the minority staff what we intend to do. It is no secret.

The minority whip's notice on Thursday had notice that this was being asked.

I, as chairman, asked for suspension of the rules treatment of this bill when asked by the subcommittee chairman and the ranking member of the subcommittee. I did not take it upon myself.

Usually we make mention of this at the committee meeting, but this time we did not.

No one is hiding anything. It was known to everyone.

The norm is that if there is a unanimous vote and there seems to be apparent agreement, that a good legislator works to bring this quickly before the House.

□ 1530

This is the responsibility of a chairman; that as expeditiously as possible you move legislation which is reported from your committee.

I did not know, except what was on the record, that the administration was interested in any compromises. We have a constant communication not only with the Department of Agriculture but with the White House. I do not know whether it will impress anyone, but I had about six or eight calls last week from the administration, from the White House, from all of the departments, urging me to vote for this legislation or that legislation.

The same phone number is available to the Department of Agriculture, which they use from time to time. But I will say that I think that my distinguished colleague and friend from Illinois and I need to sit down together so that we might have personal communication, because apparently it has broken down at the staff level.

But we should be willing, of course, to do everything possible to facilitate the timely and expeditious handling of legislation reported by the committee. That is my responsibility.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Speaker, the chairman is correct. He did communi-

cate to us that suspension would be asked on this bill. Had I known that the ranking member had great objection to this bill I certainly would have asked him about the particular objections he had.

I think communication could be improved in this whole area. I can see the problem the ranking member has if protocol and communication was not in place.

But I think we all need to communicate a little bit further and I do not think that that should impede the passage of this bill.

I thank the gentleman for yielding.

Mr. DE LA GARZA. I thank the gentleman for this contribution.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA) that the House suspend the rules and pass the bill, H.R. 3564, as amended.

The question was taken.

Mr. MADIGAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3564, the bill just under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT TO THE MARKETING ORDER PROGRAMS FOR FILBERTS AND POTATOES

Mr. DE LA GARZA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2590) to amend the Agricultural Adjustment Act to authorize marketing research and promotion projects, including paid advertising, for filberts, as amended.

The Clerk read as follows:

H.R. 2590

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8c(6)(I) of the Agricultural Marketing Agreement Act, as reenacted with amendments by the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 608c(6)(I)) is amended by inserting "filberts (otherwise known as hazelnuts)," after "almonds," each place such term appears.

SEC. 2. (a) Section 308 of the Potato Research and Promotion Act (7 U.S.C. 2617) is amended by—

(1) amending paragraph (b) to add at the end thereof the following: "The requirement for inclusion of public representatives on the board shall not be subject to producer approval in a referendum.";

(2) amending paragraph (e) to read as follows:

"(e) Providing that the board shall recommend to the Secretary and the Secretary shall fix the assessment rate at not more than one cent per one hundred pounds of potatoes handled; except that if approved by producers pursuant to section 314, the rate of assessment shall not exceed one-half of 1 per centum of the immediate past ten-calendar-year United States average price received for potatoes by growers as reported by the Department of Agriculture."; and

(3) amending paragraph (f)(1) by adding immediately before the semicolon at the end thereof the following: ": *Provided,* That the provision for payment to the Department of Agriculture for any referendum and administrative costs so incurred shall not be subject to producer approval in a referendum".

(b) The failure of potato producers in December 1982 to approve amendments to the plan issued under this title shall not be deemed to invalidate the plan.

The SPEAKER pro tempore. Is a second demanded?

Mr. JEFFORDS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. DE LA GARZA) will be recognized for 20 minutes, and the gentleman from Vermont (Mr. JEFFORDS) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2590. The bill would amend the Agricultural Adjustment Act, as amended by the Agricultural Marketing Agreement Act of 1937, to add filberts (otherwise known as hazelnuts) to the list of 22 commodities for which research and marketing promotion, including paid advertising, may be undertaken through a Federal marketing order.

In the United States, filberts are produced commercially essentially only in Oregon and in Washington with the greatest production in Oregon. The handling of these filberts is currently conducted under a Federal marketing order which has been in effect since 1949. This order, however, only provides for regulation of the volume of in-shell filberts that may be marketed domestically and of the quality of shelled filberts that may be marketed domestically and for export.

U.S. production has increased substantially in the past decade. In 1982 there was a record crop about 50 percent higher than the recent 5-year average. Domestic filbert production has grown from 7,170 tons in 1976 to 18,400 tons in 1982, and it appears to be continuing on an upward trend.

The major domestic market for domestic filberts is in the inshell variety. The in-shell filberts are sold for winter holidays, and sales have remained at an average of 5,000 tons per year. Exports have also remained at a low level.

The domestic filbert industry believes that market growth, required by recent and continued increased production, can only come about by expanding the demand for their product. This legislation would give them this tool. It would permit them to advertise with funds collected under the marketing order, and it would also authorize handlers to offset at least a part of their direct advertising costs against program assessments.

Currently, promotion of filberts is governed by an Oregon State regulation permitting assessment of growers only. Under this program approximately $61,000 is spent on market promotion which amount is entirely inadequate to do an effective job. This legislation would amend the current Federal marketing order program to authorize raising the much needed funds for market promotion through expanding consumer demand, both in the United States and abroad, for this nutritious food. It would also allow the domestic filbert industry to compete more effectively with foreign production, which currently accounts for 97 percent of the world market.

The general consensus of the industry is that the Federal filbert marketing board which represents both handlers and growers is the only industry-wide body with the authority to collect and manage the amount of money needed to properly promote filberts nationwide.

Implementation of the authority contained in section 1 of H.R. 2590 would only occur through a formal rulemaking process to amend the current filbert marketing order. It would require a public hearing and approval in a referendum of producers.

Mr. Speaker, the provisions of section 2 of this bill require a short explanation. Last year, the Congress passed the Potato Research and Promotion Act Amendments of 1982 (Public Law 97-244). The Secretary of Agriculture ordered a referendum held on amendments to the potato plan in order to conform with the 1982 act. This referendum failed to pass. An opinion was subsequently issued by the General Counsel's Office of USDA that the rejection of the amendments in the 1982 referendum had the effect of terminating the then existing plan. The committee does not agree with this opinion.

To resolve the controversy and avoid possible litigation, section 2 of H.R. 2590 would amend the Potato Re-

search and Promotion Act to make clear that the failure of potato producers in December 1982 to approve certain amendments to the plan issued under the act did not invalidate the then existing plan. Furthermore, this section would also exempt from producer approval in a referendum the requirement for public representation on the board and the provision requiring the USDA to be reimbursed for any referendum and administrative costs incurred by it under the act.

Section 2, Mr. Speaker, is simply a curative legislative provision.

I ask all Members to join me in supporting enactment of H.R. 2590.

Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, I rise in support of H.R. 2590 which was unanimously voted out of the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition which I chair. I recognize the vitally important role that marketing research and promotion activities play in educating consumers about the versatility and nutritional quality of our farm commodities.

Section 1 of H.R. 2590 amends the Agricultural Marketing Agreement Act of 1937 to add filberts to the list of 22 other marketing order commodities authorizing handlers to raise self-assessed funds for marketing research and promotional activities, including paid advertising. Authority is also provided to permit filbert handlers to continue to promote their private brands of filberts and offset at least part of their direct promotional expenditures against their assessments.

The marketing and handling of filberts has operated under a Federal marketing order since 1949. However, this order has not included authority to voluntarily assess handlers or to conduct paid advertising and other promotional activities.

Currently, promotion of filberts, otherwise known as hazelnuts, is governed by a State regulation which permits the Oregon Filbert Commission to assess only growers at a maximum rate of 1½ percent of the average grower price. Under this program, growers are assessed $10 per ton for a total of $60,600 in 1982. When compared to the promotional funds allocated for other commodities, the average of less than 0.4 cents a pound of kernel weight spent to promote U.S. grown filberts is quite small.

With a significant increase in production of 29 percent over the past 4 years and 56 percent over the past 6 years, and a stable consumer demand, the filbert industry needs to expand its domestic and foreign markets. Both growers and handlers also need additional revenues to increase promotional activities, including paid advertising. The filbert industry strongly supports H.R. 2590 which gives them the tools required to secure their position in the market and to begin to build new markets at home and abroad.

Section 2 of H.R. 2590 amends the Potato Research and Promotion Act to clarify that the failure of potato producers in December 1982 to approve amendments to a marketing plan issued under the act did not invalidate the plan. This section also exempts from producer approval in a referendum the requirement for public representation on the board and the provision for reimbursement of USDA for administrative costs associated with the referendum.

It is my belief that the original 1982 amendments, enacted in Public Law 97-244 are still valid. These amendments authorized an increase in rate of assessment and provided for both public representation on the board and reimbursement of USDA expenses for administering referendums under this act. I understand that it is the Department's official position that failure of producers to approve a second referendum has resulted in a situation where provisions in the plan are no longer authorized by the act. I also understand that the Office of the General Counsel at USDA has concluded that the existing potato research and promotion plan is no longer valid.

As the original sponsor of the 1982 amendment, I strongly object to the Department's position. This legal opinion runs completely contrary to the express language and spirit of the law which required that the plan not be terminated in the event of a second grower referendum rejecting the amendment. Because I want to protect the potato growers and the National Potato Research and Promotion Board from any unfair treatment, I offered an amendment to H.R. 2590 to include provisions which will correct any potential problem in the future arising from USDA's current position in regard to the validity of the existing plan of the board.

I urge my colleagues to offer their support for H.R. 2590.

Mr. JEFFORDS. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri (Mr. EMERSON).

Mr. EMERSON. Mr. Speaker, I rise in support of H.R. 2590. This bill adds filberts to the list of 22 commodities for which paid advertising is authorized, using funds collected by assessments on the handlers of this commodity. Additionally, H.R. 2590 clarifies the 1982 amendments to the Potato Research and Promotion Act.

The domestic filbert industry reports that filbert acreage has increased over the past years and continued market growth can come about by increasing the demand for filberts, both here and abroad. Promoting the consumption of filberts can accomplish this goal. In the hearings before the Subcommittee on Domestic Marketing, Consumer Relations and Nutrition, both handlers and growers testified in support of H.R. 2590. All felt that since production has increased and demand has remained fairly stable—promotion is needed for the filbert industry.

As with other commodities authorized to conduct market research, including paid advertising, the Secretary of Agriculture is responsible for administering the referendum—in which the filbert producers will vote on the increased assessment for paid advertising—insuring that the law is followed, and protecting the public interest.

H.R. 2590 also clarifies the 1982 amendments to the Potato Research and Promotion Act relating to public representation of the Potato Board, reimbursement to the Department of Agriculture for administration of the potato program and referendum costs, and the assessment provisions of the act. The potato producers failed to approve the amendments to their plan corresponding to the 1982 amendments. This has created some uncertainty with regard to the status of the plan. These amendments, incorporated into H.R. 2590, clarify the plan and protect its validity.

The Secretary of Agriculture supports H.R. 2590 and I know of no opposition to this bill.

I urge my colleagues to support this bill.

Mr. DE LA GARZA. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Oregon (Mr. AUCOIN) the author of the legislation.

Mr. AUCOIN. Mr. Speaker, as the sponsor of H.R. 2590, I thank my colleague, Congressman LEON PANETTA, for moving it through the Agriculture Committee and bringing it to the House floor for timely consideration. I also thank the chairman of the full committee, the gentleman from Texas (Mr. DE LA GARZA).

I urge the House to act favorably on my legislation because it allows the U.S. filbert industry to expand its advertising efforts. This bill will not require a single dollar to be appropriated from the Treasury. In fact it will generate revenue for the Treasury through increased sales of filberts. I call that a good deal for the industry, and for the economy.

H.R. 2590 amends the Agricultural Adjustment Act of 1957 to authorize marketing research and promotion projects, including paid advertising, for filberts.

My colleagues should understand that filberts are an important part of the Northwest's agricultural economy. Last year, sales in Oregon amounted to $11.3 million.

The major area of U.S. production of filberts is in Oregon's Willamette

Valley. Some are also grown in the State of Washington. Oregon and Washington combined, filberts occupy 22,000 acres in the Northwest.

Northwest filbert farmers grow, on the average, about 15,000 tons of filberts annually. This is not enough to meet consumer demand. Production is increasing and the industry will soon be capable of producing all the filberts needed for domestic consumption. The industry has doubled its production ability in the last decade and will probably double it again in the next 10 years.

With increased production, the industry must increase its advertising efforts.

Under State regulation, the Oregon Filbert Commission now assesses growers a certain amount of money which, in part is used for promotion and advertising projects. However, the industry needs additional revenues to augment its current promotional activities.

The Filbert/Hazelnut Marketing Board wants the authority, under the filbert marketing order, to collect an assessment from handlers for paid advertising.

H.R. 2590 gives them that authority.

I assure my colleagues that the marketing board will work with the commission to put this additional revenue to good use. It will develop sound advertising and promotional projects.

Many people stand to benefit from a good advertising program. The filbert growers will produce more filberts and increase their income. Bakers, candymakers, and others will be able to learn more about the product and buy it. Consumers will be better informed. Promotion programs will educate them in terms of nutrition.

Keeping these needs in mind, I urge my colleagues to approve H.R. 2590.

□ 1540

Mr. JEFFORDS. Mr. Speaker, I yield back the balance of my time.

Mr. DE LA GARZA. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA) that the House suspend the rules and pass the bill, H.R. 2590, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to amend the Agricultural Adjustment Act to authorize marketing research and promotion projects, including paid advertising, for filberts, and to amend the Potato Research and Promotion Act."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

MAINTAINING CURRENT EFFORTS IN FEDERAL NUTRITION PROGRAMS TO PREVENT INCREASES IN DOMESTIC HUNGER

Mr. DE LA GARZA. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 40) expressing the sense of the Congress that the Federal Government should maintain current efforts in Federal nutrition programs to prevent increases in domestic hunger, as amended.

The Clerk read as follows:

H. CON. RES. 40

Whereas Federal nutrition programs, including school lunch, school breakfast, child care food, summer food, special supplemental food program for women, infants, and children (WIC), nutrition education and training, special milk, elderly nutrition, food stamps, and commodity supplemental food programs have been effective in reducing hunger and malnutrition in the United States;

Whereas legislation enacted in the Ninety-seventh Congress reduced funding for child nutrition and food stamps by 30 per centum and 20 per centum respectively, resulting in significant reductions in participation and benefits for the needy;

Whereas current high levels of unemployed, underemployed, and discouraged workers have greatly increased the number of low-income families dependent on some kind of Federal food assistance;

Whereas the valiant efforts of churches and other volunteer organizations in the United States are unable to meet fully the growing need for food created by reductions in nutrition programs and by poor economic conditions;

Whereas nutrition assistance to mothers and children at critical periods of growth represents a cost-effective way to reduce infant mortality and promote long-term health;

Whereas nutrition benefits through the school lunch program and other child nutrition programs significantly contribute to the health maintenance and learning potential for our Nation's children;

Whereas nutrition programs for elderly people, including the food stamp program, can prolong health, allow for independent living, and preserve the dignity of our Nation's senior citizens;

Whereas the food stamp program has provided emergency nutrition benefits to those without the means to obtain a nutritionally adequate diet and is often the only form of Federal assistance available to many unemployed workers;

Whereas over the last six years, six food stamp laws have been enacted involving substantial limitations and modifications of the program that have created confusion and instability among both State administrators and recipients;

Whereas a Federal role in meeting the nutritional needs of low-income Americans is appropriate since the costs of obtaining an adequate diet do not vary significantly throughout the country; and

Whereas further reductions in the Federal Government's responsibility to provide adequate nutrition to the needy would cause increasing hardship and hunger to those least able to survive in our society: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) Funding for Federal nutrition programs including all child nutrition programs, elderly nutrition programs, and food stamps should be protected from further budget cuts and should continue to respond effectively to the urgencies of unemployment and food prices.

(2) The supplemental food program for women, infants, and children (WIC) should be funded at a level that would at least maintain the fiscal year 1983 year-end case load.

(3) The Federal Government should maintain current efforts and responsibility in Federal nutrition programs to prevent increases in domestic hunger.

The SPEAKER pro tempore. Is a second demanded?

Mr. JEFFORDS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. DE LA GARZA) will be recognized for 20 minutes, and the gentleman from Vermont (Mr. JEFFORDS) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Concurrent Resolution 40, expressing the sense of the Congress that the Federal Government should maintain current efforts in Federal nutrition programs to prevent increases in domestic hunger.

The basic thrust of the resolution, which has over 200 cosponsors, is that in the 98th Congress there should be no further cutbacks in benefits for eligible recipients under the Federal nutrition programs. A brief review of actions by the 97th Congress in this field, along with the current situation regarding hunger in the United States, will put the resolution in the proper perspective.

With respect to the food stamp program, which falls within the jurisdiction of the Committee on Agriculture, legislation enacted in 1981 and 1982 under the duress of reconciliation and other constraints resulted in savings estimated by the Congressional Budget Office to total in excess of $8

billion. While this legislation addressed many aspects of the program, including a series of provisions designed to combat fraud and abuse, the savings largely reflected reductions in benefits for the needy.

Similar consequences were felt in nutrition programs under the jurisdiction of the Committee on Education and Labor. For example, child nutrition legislation enacted in the 97th Congress resulted in a drop in school lunch participation of about 3 million children a day, with about 35 percent of the decline occurring among children receiving free and reduced price meals. Of the half-million children dropped from the school breakfast program due to budget cuts, more than two-thirds were from poor and near-poor households. Cutbacks in the summer food service program resulted in 500,000 fewer children from low-income areas—26 percent of program participants—receiving free lunches in the summer of 1982.

The impact of these measures was compounded by substantial reductions in other programs such as unemployment insurance and aid to families with dependent children.

Hearings held this year by the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition in Washington and various locations throughout the country disclosed serious conditions of hunger among the needy and unemployed. A report issued in June by the U.S. Conference of Mayors corroborated these findings. The House has voted this year in a responsible fashion to address an aspect of this problem. By a vote of 389 to 18, it passed H.R. 1590, the Emergency Food Assistance and Commodity Distribution Act of 1983. The bill would continue and improve the surplus commodity distribution program now being carried out under the 1983 Jobs bill (P.L. 98-8) and other legislation.

However, the distribution of surplus commodities can relieve only a small segment of the problem of hunger in America. The main line of defense against hunger in the Nation is the ongoing Federal programs that have proved to be so effective in the past—the food stamp program; the child nutrition programs; the special supplemental food program for women, infants and children—commonly known as the WIC program—and various feeding programs for the elderly. These programs, as I have indicated, have already been cut to the bone, and then some. Any further cuts in the benefits for those who are eligible under these programs will have devastating effects among those of us who are least able to sustain this burden.

I have summarized what the resolution would do; I would likewise summarize what it would not do. It would not preclude reductions in the current funding level for the food stamp program in all circumstances—for example, if employment rises and the number of persons on the rolls thus declines; it would in no way foreclose support for legislation that truly addresses the areas of fraud, abuse, and improved accountability; it would not be an obstacle to changes in legislation giving the States additional administrative flexibility, so long as benefits are not reduced for eligible participants; and it would not prevent legislation to improve administration of the school lunch program, so long as the objective is not the reduction of benefits properly available to children. The report of the Committee on Agriculture on the resolution makes these points abundantly clear.

The resolution sums up the various actions taken by the 97th Congress to cut back Federal nutrition programs, laregly at the expense of the benefits available to eligible participants. It recognizes the continuing prevalence of hunger in various segments of our society. It acknowledges the enormous contribution of the Federal nutrition programs to the general welfare of the Nation. Finally, to put it in plain terms, the resolution expresses the sense of Congress, with respect to any further reductions in benefits under Federal food programs "enough is enough."

Mr. Speaker, before I conclude, I want to recognize the great contribution which has been made in this matter by Chairman PERKINS and his Committee on Education and Labor. They have worked shoulder to shoulder with us earlier this year on hunger legislation which was the responsibility of both of our committees, and they have done it again in this matter. I thank Chairman PERKINS and the members of his committee for their cooperation and contribution as we have together fashioned legislation to assist the less fortunate among us.

Mr. Speaker, I hope that my colleagues will join in overwhelming support for House Concurrent Resolution 40 as they did in the case of the Emergency Food Assistance and Commodity Distribution Act of 1983 earlier this year.

Mr. Speaker, I yield 7 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, House Concurrent Resolution 40, the preventing hunger at home resolution, was introduced by myself, Mr. JEFFORDS, and many others on January 27, 1983. Since that time the number of cosponsors has increased to 201. On July 19, this resolution was approved by unanimous voice vote by the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, where I serve as chairman. On July 26, the full Agriculture Committee approved it and it now comes to the floor with the consent of the Education and Labor Committee, to which it has been jointly referred.

Mr. Speaker, I want to express my thanks to the chairman of the full Committee on Agriculture, Mr. DE LA GARZA, and also the chairman of the Committee on Education and Labor, Mr. PERKINS, for their help in bringing the resolution here, as well as the ranking minority members on both of those committees.

Mr. Speaker, before proceeding to describe House Concurrent Resolution 40 any further, I would like to extend my thanks and appreciation to BILL EMERSON, the ranking minority member of the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, for his support for the resolution and for his diligent work on the issue of hunger. Not only has he travelled throughout the country to observe the problem firsthand, but his thoughtful work here in Washington has not only helped clarify the intent of House Concurent Resolution 40, but has added immeasurably to the content of H.R. 1590, the Emergency Food Assistance and Commodity Distribution Act of 1983. It has been an honor and pleasure to work with him.

Basically, House Concurrent Resolution 40 states that there should be no nutrition program benefit cutbacks for the duration of the 98th Congress and that the Federal Government should maintain its current responsibilities in nutrition assistance. It calls for a maintenance of the WIC program at the fiscal year 1983 year-end case load of about 2.8 million persons, consistent with the fiscal year 1984 budget resolution and fiscal year 1984 agriculture appropriations bills passed by both the House and Senate.

Reports of widespread increases in hunger in this country prompted Mr. JEFFORDS and me to introduce this resolution back in January of this year. Since that time, the subcommittee has conducted hearings on hunger throughout the country. The subcommittee received testimony showing without question that the incidence of poverty-related hunger has risen significantly, and in some instances dramatically, in many areas of the United States. Testimony received by the subcommittee indicates that there is a clear pattern of increased need throughout the country.

On June 6, 1983, I entered a summary of these hearings into the RECORD. While I will not now reiterate all that we heard and saw, I would again like to provide a sampling of the testimony. I would add that despite signs of economic recovery, I understand that the conditions described below are just as bad now, if not worse, than when we visited several months ago.

Never has hunger been more acute in Northern Ohio than right now. We are serving more meals by far than in the past. You are probably talking about a 50 percent increase when compared with 1981 and 1980.

We opened a meal site several months ago in a middle class neighborhood with a lot of media attention as to why in the world would you open a hunger site amongst middle class people. But when the doors opened and the people came in there was understanding that people down the street we didn't know were hungry were hungry, and I think this is happening all over Northern Ohio, and indeed all over our country.

I am sorry to say I think that if we doubled our feeding programs tomorrow, I don't think we would meet the need.—Major Paul Kelly, Divisional Commander, Salvation Army, Cleveland, Ohio, February 28, 1983.

Now for the last two years, I have seen an emergence of increased hunger in Alabama. We have food pantries which have been developed all across the State in nearly every county. We have soup kitchens which have developed in Huntsville, in Birmingham, in Bessemer, and in Montgomery. All of these efforts are not meeting the need of hunger in 1983 . . .

Now the case is that across this State food stamp recipients run out of food stamps approximately one week to ten days before they get their food stamps for the next month. That has been a problem. That problem has been growing in the last two years as we have had cutbacks in the food stamp program, or as food stamp increases have failed to keep pace with inflation.—Bill Edwards, Alabama Council on Human Relations, Birmingham, Alabama, March 25, 1983.

Statistically, we began to notice increased needs for food in November, 1981. The first effects of the Administration's policies began to be felt, and our already full case load was almost doubled. These numbers have increased steadily from providing food for 947 people during October, 1981, to last month's (March 1983) number of 5,588. To give you a comparison of March numbers for the last three years: we provided food for 623 people in March of 1981, 2,458 in March of 1982, and 5,588 in March of 1983. The crisis has come from welfare cuts, unemployment, and from cutbacks in government funded agencies—all of which cause people to seek aid from private agencies.—Sister Marilyn Rudy, C.S.J., Founder and Director, St. Joseph Center, Venice, California. Los Angeles, California, April 30, 1983.

I've compiled a directory of Los Angeles area pantries . . . I've been able to locate 90 pantries, but from conversations I've had with church people, I estimate that there are around 150 . . .

Most pantries have seen an increase of at least 3 times the numbers of people that they were serving, or trying to serve, at this time last year. Not one program has been a decrease in the demand for food assistance since last year—Dianne Wright, Southern California Interfaith Hunger Coalition, Los Angeles, California. April 30, 1983

I would also note that a report issued in June 1983, by the U.S. Conference of Mayors entitled "Hunger in American Cities" confirms our findings. The report provides information on the status of hunger in eight American cities around the country. Included in the report was the following statement made by Detroit Mayor Coleman A. Young, president, U.S. Conference of Mayors, at Michigan State University on March 29, 1983:

Hunger is perhaps the most prevalent and detrimental problem facing American cities today. The face of hunger has changed as the economy has worsened, and for the first time we are seeing families who have always had a breadwinner forced into a situation with nowhere to turn.

I am pleased that in response to these conditions and the existence of surplus commodities, the House last month approved H.R. 1590, the Emergency Food Assistance and Commodity Distribution Act of 1983, by a vote of 389 to 18. The bill would greatly improve the current surplus commodity distribution program so that more people in need could receive commodities. I would hope the administration would withdraw its objections to the bill and that prompt Senate approval will occur.

However, it is my view that the distribution of surplus commodities cannot alone eliminate the problem of hunger in America. The primary line of defense against hunger in this country lies in the ongoing Federal programs that have proved to be so effective in the past—the food stamp program, child nutrition programs, the special supplemental food program for women, infants, and children (WIC), and various feeding programs for the elderly. If these programs were to be cut back any further, it would undermine whatever success the distribution of surplus commodities has had in alleviating hunger in the country.

The primary thrust of House Concurrent Resolution 40 is that there should be no nutrition program benefit cutbacks in the 98th Congress. The potential costs, both in human terms and long-term health and education costs, of additional benefit cutbacks far outweigh the value that any short-term budgetary savings might have. There is too much at stake for those in need to put their nutritional well-being in any further jeopardy. And this is especially true given the major reductions in these programs that were enacted in the 97th Congress. These cutbacks amounted to about $2 billion a year, or 15 percent, in food stamps, and almost $1.5 billion a year, or nearly 30 percent, in child nutrition programs.

In light of the seriousness of the current hunger problem I believe House Concurrent Resolution 40 expresses what our starting point should be in addressing this problem. It simply calls for a maintenance of Federal nutritional assistance efforts. It does not call for any additional program expenditures. And adoption of the resolution would not be inconsistent with any effort to simplify administration or enhance accountability in these programs so long as program benefit levels are protected.

Passage of this resolution should be seen as a signal to all concerned that nutrition program cutbacks should not be sought or adopted in 1983 or 1984. Unless and until there is clear-cut evidence that additional cutbacks can occur without placing more Americans at nutritional risk, current Federal efforts and responsibilities to provide nutritional assistance should be maintained.

I have often stated in the past few months that for anyone to be hungry in this land of plenty is a national shame. That hunger should be so widespread in times of agricultural surplus makes the situation all the more shameful. I urge my colleagues to support House Concurrent Resolution 40 and join in this statement of compassion and concern for those in need.

Following is an updated list of House Concurrent Resolution 40 cosponsors:

LIST OF COSPONSORS

Mr. Panetta, Mr. Jeffords, Mr. Wright, Mr. Perkins, Mr. Miller of California, Mrs. Schneider, Mr. de la Garza, Mr. Mazzoli, Mr. Kolter, Mr. Oberstar, Mr. Fauntroy, Mr. Wirth, Mr. Bonior of Michigan, Mr. Murphy, Mr. Feighan, Mr. Moakley, Mr. Weiss, Mr. Sabo, Mr. Markey, Mr. Crockett, Mr. Stokes, Mr. Boland, Ms. Kaptur, Mr. Coyne, Mr. McHugh, Mr. McNulty, Mr. Rodino, Mr. Fazio, Mr. Wolpe, Mr. Wise, Mr. Edwards of California, Mr. Walgren, Mr. Wortley, Mr. Dixon of California, Mr. Williams of Montana, Mr. Foglietta, Mrs. Kennelly, Mr. Frank, Mr. Murtha, Mr. Durbin, Mr. Gephardt, Mr. Olin, Mr. Dellums, Mr. Stark, Mr. Morrison of Connecticut, Mr. Hertel of Michigan, Mrs. Schroeder, Mr. Burton of California, Mr. Traxler, Mr. Brown of California, Mr. Lowry of Washington, Mr. Gejdenson, Mr. Wyden, Mr. Harrison, Mr. Ratchford, Mr. Washington, Mr. Lantos, Mr. Zablocki, Mr. Horton, Mr. Matsui, Mr. Guarini, Mr. Ottinger, Mr. Minish, Mr. Lehman of Florida, Mrs. Hall of Indiana, Mr. Alexander, Mr. Mavroules, Mr. Vento, Mr. Hall of Ohio, Mr. Gillis W. Long, Mr. Glickman, Mr. Owens, Mr. Kildee, Mr. Rahall, Mr. Nowak, Mr. Shannon, Mr. Stratton, Mr. Levine of California, Mr. de Lugo, Mr. Smith of New Jersey, Mr. Borski, Mr. Kastenmeier, Mr. Dorgan of North Dakota, Mr. Sikorski, Mr. Aspin, Mr. Mitchell of Maryland, Mr. Gore, Mr. Daschle, Mr. Mollohan, Mr. Corrada, Ms. Snowe, Mr. Rangel, Mr. Lundine, Mr. Downey, Mr. Conyers, Mrs. Holt, Mr. Barnes, Mr. Derrick, Mr. Sunia, Ms. Oakar, Mr. Huckaby, Mr. Carr, Mr. Ford of Michigan, Mr. Hughes, Mr. Hamilton, Mr. Waxman, Mr. Schumer, Mrs. Boggs, Mr. Kazen, Mr. Eckart, Mr. Edgar, Mr. Studds, Mr. Leland, Mr. Seiberling, Mr. Towns, Mr. Donnelly, Mr. Ford of Tennessee, Mr. Mrazek, Mr. Wylie, Mr. Mineta, Mr. Synar, Mr. Garcia, Mr. Savage, Mr. Weaver, Mr. Moody, Mr. Scheuer, Mr. Anderson, Mr. Fascell, Mr. Berman, Mr. Dwyer of New Jersey, Mr. Levin of Michigan, Mr. Fish, Mr. Fowler, Mr. Rose, Mr. Swift, Mr. Boner of Tennessee, Mr. Dymally, Mr. Gray, Mr. Kostmayer, Mr. Torres, Mr. Pease, Mr. Richardson, Mr. Jacobs, Mr. Bates, Mr. Albosta, Mr. Solarz, Ms. Mikulski, Mr. Hoyer, Mr. Torricelli, Mr. McKinney, Mr. Udall, Mr. Boucher, Mr. Penny, Mr. Hawkins of California, Mr. Wheat, Ms. Ferraro, Mr.

Biaggi, Mr. Akaka, Mr. Sisisky, Mr. Simon, Mr. D'Amours, Mr. Leach of Iowa, Mr. Dingell, Mr. Yates Mr. Andrews of North Carolina, Mr. Clay, Mr. Howard, Mr. Evans of Illinois, Mr. Zschau, Mr. McGrath, Mr. Obey, Mr. Goodling, Mr. Slattery, Mr. Tallon, Mr. Patterson, Mr. Luken, Mr. Martinez, Mr. Hatcher, Mr. McKernan, Mr. Dicks, Mr. Neal, Mr. Lehman of California, Mr. Smith of Florida, Mr. AuCoin, Mr. McDade, Mr. Harkin, Mr. Pepper, Mr. Carper, Mr. Gilman, Mr. Roybal, Mr. Dyson, Mr. Heftel of Hawaii, Mr. Clarke, Mr. Bonker, Mr. Gaydos, Mr. Ackerman, Mr. Conte, Mr. McCloskey, Mr. Early, Mr. Bedell, Mr. Kogovsek, Mr. Jones of Tennessee.

□ 1550

Mr. JEFFORDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of House Concurrent Resolution 40, the preventing hunger at home resolution. I commend Mr. PANETTA for his work on this bill, and thank the more than 200 Members of Congress who have joined Mr. PANETTA and myself as sponsors of this legislation.

Just over 6 months ago, when we introduced this bill, the news was full of stories of hardship across our land. We read of food banks and soup kitchens unable to keep up with the demands placed upon them. We saw television reports of people living on the streets in the dead of winter.

The sheer volume and frequency of these reports made them compelling. Added to them was the testimony of constituents across my home State, who left me with no doubt but that hunger was on the increase, and that the needs of Vermonters were going unmet.

This is telling, for my State has traditionally done its utmost to see that the needs of its citizens for basic necessities are met. Vermont was among the first States to participate in the food stamp program, as its participation in the women, infants, and children program is the highest in the country. Its people are not rich, but they are generous.

My impressions of the problem have been confirmed by the findings of Chairman PANETTA and the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition. Its hearings across the country have documented what each of us saw in the news stories on January.

These stories seem to have been crowded out by fresher topics. Apparently our appetite for despair is limited, for the reality is still there. People are still going hungry in our land. As encouraging as the signs of economic recovery may be, we must be careful not to confuse health signs with healthy times.

The fact that the sun shines more in July than January has very little to do with whether or not a person has enough to eat. We may not be seeing people sleeping on heat grates these days, but hunger, largely unseen, continues.

This legislation will by no means eliminate hunger. But it will express the sense of Congress that the Federal role in combating hunger should not be diminished. This is a moderate and reasonable statement of purpose, one that I hope every single Member of Congress can support. If there is indeed to be a social safety net, then there can be no more important component than the Federal nutrition programs.

The ability of these programs to fulfill their purpose has been severely strained over the past few years. The food stamp program has been cut sharply, as have other nutrition programs. Some of these cuts have been justifiable improvements in the targeting and delivery of benefits. Others have been unjustifiable decreases in benefits to deserving individuals.

It is the latter which this resolution is aimed at preventing. With this resolution we are not signing a blank check. We are not claiming that these programs are free from error or above improvement. I have long supported efforts to insure that benefits be directed to the truly needy. I will continue to do so. This legislation in no way bars us from enacting legitimate reforms in Federal nutrition programs designed to eliminate fraud and waste.

This resolution does, however, put the Congress on record in opposition to further cuts in benefits. Legitimate needs will continue to be met. At a time of severe recession, and at a time when we are faced with enormous surpluses in certain commodities, it is criminal that Americans should go hungry.

Finally, I want to make it clear that this resolution expresses opposition to further benefit cuts masquerading as administrative improvements. The burden of proof lies on those who would seek once again to change these nutrition programs to show that their changes will not adversely affect eligible recipients. We should cast a careful eye on any reforms that purport to save a great deal of money without affecting needy individuals. The food stamp program has undergone change after change over the past 6 years. We have whittled away at it to the point where I am not sure that there is much fat left. The error rate is still too high, to be sure. But let us not mistake efforts to correct this problem with efforts to reduce benefits to individuals.

Again, I want to commend all those Members involved in this legislation, and I want to urge each of my colleagues to give this resolution their full and continuing support.

Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri (Mr. EMERSON).

Mr. EMERSON. Mr. Speaker, I rise in support of House Concurrent Resolution 40, a resolution that expresses the sense of Congress that the Federal Government should maintain current efforts in Federal nutrition programs.

First of all I would like to commend the chairman of the Subcommittee on Domestic Marketing, Consumer Relations and Nutrition on the positive steps he has taken to hold hearings, both around the country and here in Washington, to receive testimony on existing and proposed programs to help feed needy Americans. He has been thorough and fair in all hearings of the subcommittee.

I especially appreciate his cooperativeness during consideration of House Concurrent Resolution 40. I support this resolution, I did have several questions concerning the intent of this resolution and the chairman of the subcommittee responded in a clear and forthright manner to my questions.

I do not support budget cuts in individual benefits in the food stamp program this year. I believe that the actions taken by Congress in the past 2 years have served to tighten the administration of the food stamp program and have redirected program benefits to those people most in need. Further changes may be needed in the food stamp program—for example, I would like to see a significant reduction in the $1 billion spent in error each year. However, whatever changes take place in the future should be carefully crafted to make sure abuses are corrected and those administering the food stamp program can insure benefits go to only those in need.

The gentleman from California (Mr. PANETTA) and I, during the subcommittee consideration of this resolution engaged in a colloquy to clarify the intent of the resolution. The gentleman indicated that the resolution is intended to remain in force for the duration of the 98th Congress and that the resolution is not intended to require that food stamp expenditures must remain at current levels under all circumstances. He indicated that a reduction in food stamp spending due to an improvement in the economy and lower food stamp participation would be consistent with the resolution.

Additionally, it was clarified that adoption of legislation to address error, fraud, and abuse in the food stamp program would be consistent with the resolution, as long as program benefits are not reduced. Legislation to enhance State flexibility in program administration would be consistent with the resolution if benefits are fully protected.

Finally, approval of the resolution would not prevent efforts to improve the accuracy of income reporting by households in the national school

lunch and other child nutrition programs.

This discussion clarified the intent of House Concurrent Resolution 40 for me. I could not support any legislation that could be viewed as tying the hands of the Congress or preventing improvement in programs over which this committee has jurisdiction.

Based on the dialog between the chairman of the subcommittee and me, I am reassured that passage of this resolution in no way restricts any action aimed at improving the Federal nutrition programs, while protecting benefits to individuals and families in need.

I urge my colleagues to support this resolution.

Mr. JEFFORDS. Mr. Speaker, in conclusion, I also think that we should recognize the efforts of Secretary John Block in this area. The distribution of food far exceeded what I had anticipated when I was able to get an amendment on the 1981 farm bill to increase the distribution of dairy products.

I would say that the enthusiasm that the administration has shown for making surplus products available to our poor should not go unnoticed.

Finally, I would say again I commend the gentleman from California for his efforts in this area.

I yield back the balance of my time.

Mr. DE LA GARZA. Mr. Speaker, I yield 3 minutes to the gentleman from Kentucky (Mr. PERKINS), the distinguished chairman of the Committee on Education and Labor.

Mr. PERKINS. Mr. Speaker, I rise in support of House Concurrent Resolution 40. This resolution was introduced earlier this year by Congressman PANETTA and myself with the support of dozens of our colleagues.

I support this resolution because its message is one which needs to be sent across the country; there should be no further cutbacks in Federal nutrition programs, including those programs for children and the elderly.

The Agriculture Committee and the Education and Labor Committee shared joint jurisdiction over this resolution. The Agriculture Committee reported it on July 29. The Committee on Education and Labor did not report the resolution because of the press of other business, but our members have agreed to proceed to immediate floor consideration of the resolution. Last year, the Committee on Education and Labor reported out a similar resolution pertaining only to child nutrition programs, and the House approved that resolution on September 29, 1982.

I would like to explain for the Members why this resolution is needed and why its message needs to be stated loudly and clearly.

Over the course of the last 2 years severe budget cuts have occurred in Federal child nutrition programs.

In 1981 $1½ billion was cut from those programs—a 35-percent cutback.

In 1982 3½ million children dropped out of the national school lunch program due to this cutback; 1½ million of these children were poor children.

One-half million children were forced out of the school breakfast program, also as a result of these budget cuts. Three-fourths of these children leaving the breakfast program were from poor families.

The other cutbacks were made in the child care program, the summer feeding program and the nutrition education program.

As if those cutbacks were not traumatic enough, the administration is now proposing further cutbacks in its fiscal 1984 budget. An additional $250 million will be cut from these programs if the administration has its way.

The cutbacks which occurred and the new proposed cutbacks have caused great uncertainty at the local level. School boards are unclear about the Federal commitment to these programs. This resolution is essential if that commitment is to be made known across the land.

But I must point out that this resolution is merely a first step. The Congress must act on additional legislation this year which will help to reverse some of those worst cutbacks. The congressional budget resolution provides for a restoration of approximately $150 million in child nutrition funding and an increase of approximately $300 million in the funding for the women, infants, and children program. When the House considers H.R. 3520 after the August recess, it will have an opportunity to implement the recommended increase for the WIC program. Later in the year, the Committee on Education and Labor will send to the floor a bill providing the other $150 million increase in funding.

These increases will add back less than 10 percent of the amount cut out of these programs in 1981. But just as this resolution is important in giving a signal of Federal commitment, so these bills restoring some funding, however inadequate, are important also as a signal that the Federal Government will remain committed to providing adequate nutrition for children and others in need.

Mr. Speaker, I urge the adoption of the resolution.

● Mr. BIAGGI. Mr. Speaker, I rise to join with my colleagues to lend my strong support for this resolution to "prevent hunger at home." Clearly, at no time in modern American history since the Great Depression have we encountered such a severe challenge to the basic hunger needs of Americans. This resolution (H. Con. Res. 40) places Congress firmly on record that we cannot afford to reduce our domestic feeding programs beyond existing levels. More importantly, it reaffirms the Federal role in protecting the nutritional needs of those less fortunate who cannot afford an adequate diet for themselves or their families.

Congress has already acted in a timely fashion to pass legislation that would authorize the commodity donation programs beyond this fiscal year. As the author of one of the approaches taken prior to the passage of H.R. 1590, I am firmly committed to working to insure that our agricultural abundance can continue to be shared with hungry Americans. This is, however, a first-step approach to attacking domestic hunger and should not be construed as a replacement for any of our other Federal nutrition programs. Instead, this should be considered a new component to an overall Federal strategy to protect the nutritional needs of the poorest of our citizenry.

This resolution is consistent with the need to build a Federal strategy by calling for maintained service levels in these nutrition programs. It also calls for current service levels for the women, infants, and children—WIC—programs in order to maintain services to the 2.8 million persons now supported by the program in this year.

Nutrition programs have been disproportionate victims of budget cuts over the past several years—child nutrition programs have been almost halved—and food stamps have been reduced to dangerously low levels so that the very people now needing food stamps the most are some of the very same people who are getting food stamp cuts. It is my own intent to work to reverse many of these cuts which have impacted the lives of children, the working poor as well as the elderly—in great numbers.

I also wish to commend the sponsors of this resolution—Mr. PANETTA, chairman of the Agriculture Subcommittee which considered this legislation and who has spent many days of hearings around the country working to address this issue, as well as JIM JEFFORDS, who serves with me on the House Education and Labor Committee which has authored our child and elderly feeding programs.

Mr. Speaker, I urge my colleagues to join us in the worthwhile effort to reaffirm our support for domestic feeding programs by voting for House Concurrent Resolution 40.●

● Mr. GILMAN. Mr. Speaker, I rise in support of the aims of House Concurrent Resolution 40, which expresses congressional support for the various Federal food programs. This preventing hunger at home resolution comes at a time when it has become increasingly evident that many people in this country do not eat adequately. For a nation acknowledged to be the leader of food production, these sad facts

only underscore the problems we have at home.

New York State ranks fourth in the production of food. I know that many Members in this body do not think of New York as an agricultural State; however, in my own district are many dairy farmers, vegetable growers, and egg producers. These fine men and women contribute to the breadbasket of New York and the Nation, and are keenly aware when their product is in demand.

All too often, many of us feel that the Federal food programs are an enigma, programs we hear about but do not feel. These vital programs include the school breakfast and lunch programs, the child care and summer feeding programs, special supplements for women with young children and infants, and the food stamp program. By far the best known of all of these is the latter. Yet I am certain, Mr. Chairman, that there are many people who take advantage of these other programs I mentioned, without their neighbors being aware that they are in need of foodstuffs.

The dilemma many parents have faced of late has been unemployment. They try desperately to maintain an aura of continuity for their children, and this is reflected in the food prepared for the family. Should families and individuals be in need of food, it should be there for them. No one in this country should go hungry, for any reason. The overriding need to alleviate hunger both here and abroad is the primary reason for my having introduced House Resolution 15, which would establish a Select Committee on Hunger. There is a compelling need to investigate the causes of hunger in this country, to fully understand the "whys" and "hows." In other countries, it is an easier problem to understand, but in our own—it is an impossibility for most to even comprehend. With much bipartisan support, House Resolution 15 has now garnered the attention of many, and I am hopeful that the House will soon act on that proposal.

Mr. Chairman, House Concurrent Resolution 40 recognizes the importance of the aforementioned Federal programs. If we are to maintain the moral fiber of this Nation as a humane and caring one, we must insure that the most vital aspect of our lives—food—is available to those in need. Accordingly, I urge the adoption of this measure by my colleagues.●

● Ms. KAPTUR. Mr. Speaker, I rise in support of House Concurrent Resolution 40, the preventing hunger at home resolution. As one of the cosponsors of House Concurrent Resolution 40, I congratulate Mr. PANETTA and Mr. JEFFORDS for their leadership in introducing this legislation and helping to move it expeditiously. Hunger is on the rise in our Nation. Passage of House Concurrent Resolution 40 will be viewed as a significant statement of concern and compassion for those Americans going without adequate nutrition.

At its heart, this resolution calls for the maintenance of present Federal nutritional assistance programs. It states that Federal nutrition programs, including all child nutrition programs, elderly nutrition programs, and food stamps should be protected from further budget cuts. Further, it states that these programs need to continue to respond effectively to the urgencies of rising unemployment and food prices. Second, it calls for the protection of the supplemental food program for women, infants and children (WIC) at the full level of funding authorized by law. Finally, it urges the Federal Government to maintain current efforts and responsibility in Federal nutrition programs.

It is inexplicable that in a land so richly endowed with bountiful food resources that dire poverty and hunger should exist in American society. According to the U.S. Conference of Mayors, hunger is now the most prevalent and the most insidious challenge facing U.S. cities. This rising level of hunger has resulted in the establishment of thousands of food distribution centers, soup kitchens, and private relief centers across the country. Still, the growing demand for help is not being met by these voluntary efforts. Given this situation, it hardly seems appropriate for the U.S. Government to be cutting back on its programs to feed those in need.

The allegedly "robust recovery" will undoubtedly alleviate some cases of hunger. But even Reagan administration economists concede that unemployment will remain historically high throughout 1983 and 1984. Therefore, it is necessary for Congress to affirm that needy and hungry Americans will not continue to bear further reductions in nutrition benefits.

My district, the Toledo, Ohio area, is not experiencing much of a recovery. The unemployment rate remains around 13 percent. The demand for food assistance is very high and growing each day. Last week, a woman who runs a feeding center informed me of the large numbers of unemployed people who walked across town in 90° heat to receive a meal. Why, I ask, in a land as blessed as the United States, should any person be forced into such circumstances?

I urge my colleagues to vote for House Concurrent Resolution 40, and send a clear message to the Nation, especially to those dependent on Government food programs for their subsistence, that we will not allow further cuts in Federal nutrition programs.●

● Mr. CORRADA. Mr. Speaker, I rise in support of House Concurrent Resolution 40, brought to the House floor today by our distinguished colleague, Congressman LEON PANETTA, chairman of the House Agriculture Subcommittee on Domestic Marketing, Consumer Relations and Nutrition.

As a cosponsor of this resolution, I want to commend Congressman PANETTA and both majority and minority members of the House Agriculture Committee for bringing this resolution to the floor.

In expressing the sense of Congress that the Federal Government should maintain current efforts in Federal nutrition programs, we are reaffirming a congressional commitment that this Nation should never retreat from the admirable goal of keeping tried and tested nutrition programs in place, and operating at a reasonable level.

While the economic recovery we see in evidence hopefully increases, there are and will still be many Americans confronted with the stark reality of feeding their families and their children, and of schoolchildren who need a lunch to enable them to attain academic goals. Commonsense tells us that a hungry child is a child who finds it difficult to learn; a hungry family cannot be a happy family.

I believe all of us should remember, as this resolution reminds us, that the mothers participating in the women, infant and children, WIC, program and many other Americans who receive the benefits of commodity food distribution and either the food stamp program or, in the case of Puerto Rico, participate in our island's nutritional assistance plan which was implemented when the Omnibus Reconciliation Act of 1981 took us out of the food stamp program, have a right to a sound and adequate diet.

This resolution simply states that no further cutbacks should take place, cutbacks which would deepen the growing problem of hunger in the United States.

Child nutrition programs fall within the jurisdiction of the Education and Labor Committee, on which I serve, and I want to take special note in commending the members of the Agriculture Committee for bringing this issue before the full House of Representatives with our concurrence and approval.

Mr. Speaker, House Concurrent Resolution 40 is a commonsense resolution and a commendable effort to remind this country of a congressional commitment we have made to those in need in the Nation and in Puerto Rico and it merits our support.

I urge its speedy passage.●

● Mr. ALBOSTA. Mr. Speaker, today, I rise in support of House Concurrent Resolution 40, which expresses the sense of the Congress that essential Federal food programs, especially those directed to children—including school lunch, child care food,

supplemental food program for women, infants, and children (WIC) and food stamps—be protected from further budget cuts. In addition, it urges the Federal Government to continue to respond to the urgencies of increasing unemployment and rising food prices through the administration of the surplus food distribution program.

My fellow colleagues, my constituents, the residents of Michigan know all too well that the problems of hunger in this Nation have not disappeared, and indeed are growing. While the rest of the country celebrated a slight decline in the unemployment rate, my home State of Michigan continued to show an increase in unemployment. For many of those who are unemployed, hunger is a tragic reality.

Under the direction of the Governor of Michigan, Jim Blanchard, a report on "The Nutritional Status of Michiganians" was submitted by the Michigan Statewide Nutrition Commission in March of this year. The findings are startling. I request at this time that a section of this report subtitled," Diagnosing Hunger and Malnutrition" be inserted into the RECORD along with the commission's conclusions and recommendations. I welcome any of my colleagues who are interested in reviewing this report to contact my office for a copy.

DIAGNOSING HUNGER AND MALNUTRITION

Population groups known to be at high risk regardless of socio-economic status are women of child-bearing age, children and adolescents, and the elderly. There is no single test to quickly determine malnutrition. One cannot go out on the street in our society and see a starving child. People in the twenty to fifty-five year age range can withstand food withdrawal of the 10% to 20% level for long periods of time. Nothing will show up except that they will be hungry, irritable, less effective at their work, and short tempered. This can lead to spouse and child abuse, depression, substance abuse and suicide.

There are other groups with greater risks. A 10% to 20% food intake reduction for the elderly, will not only make them hungry, but will make them more susceptible to disease. They will die a little earlier.

Then there are the very young trying to grow, learn and socialize. Intake reduction slows their growth rate and their ability to learn. They sit in school and they are hungry. They have assignments to do and instead they are thinking about eating. Learning falls off tremendously. Every year we get three, five and seven year old grade level scores on math, reading, etc. We talk about the schools getting better or worse, when in fact it is sometimes simply that the kids are eating better or worse. It would often be more beneficial to look at the kids nutritional status when looking for reasons why a school district's test scores went down. Hungry kids do have school problems.

The young adolescent girl needs a sufficient diet or she will end up with smaller babies, whether pregnant as an adolescent, or later in life.

In summary, the first to go when there is hunger is learning; the second is socialization—the ability to interact and interrelate; the third is the ability to perform on the job; and the fourth is the increase in disease and illness.

CONCLUSION

A study is currently being conducted by the University of Michigan, School of Social Work and others in New York, Georgia, and Michigan. It is a study of people who have been cut off or dropped from the basic public assistance programs since the cutbacks in 1981. In Michigan, the preliminary findings include a sharp increase in anxiety. People run out of food the last week of the month, they have no dental or health care. There is an increase in hypertension, diabetes, and ulcers. There is a low self-esteem. Some are sending their kids to the shopping centers to "pick-up" whatever they can. There is lower food intake. People give up psychologically. Young kids are deprived of food. The army with such a large pool of people available to it, is screening potential enlistees and reenlistees for their levels of body fat and will not let them enlist or reenlist if they are too fat. What we are doing is guaranteeing through the cuts that have already been made, let alone those proposed, severe and chronic malnutrition. We are reducing the employability of the next generation.

RECOMMENDATIONS

The Michigan Statewide Nutrition Commission believes that food necessary to a healthful nutritious diet should be a right. The moral and economic consequences of not doing so are astronomical. Therefore, The Michigan Statewide Nutrition Commission recommends the following:

1. Restoration of the federal food programs to the 1980 levels. Commodities should never replace or substitute for these basic programs.
2. Continuation of emergency food drives, coordinated at the local level, so people can be immediately referred to other sources, as well as help to get onto federal programs if eligible.
3. Emergency food should be available without the complicated eligibility requirements now in place for food stamps.
4. Need to develop food banks throughout the state, such as the one in Lansing.
5. Campaign to inform the private sector of the Michigan Gleaner's law.
6. Support of federal legislation to spend more money for emergency food, including paying for shipping and transportation, solely for emergency purposes. More money should be spent on this, instead of further reducing the commodities available to nonprofit institutions including soup kitchens.
7. Seek print and electronic media cooperation in producing and showing nutrition education spots and programs.
8. More and continuous campaigns for donations.

As the report states, "The first to go when there is hunger is learning." What a legacy we are leaving to our children. Clearly, the time is now to act accordingly by reemphasizing our commitment to maintaining Federal funding for these important nutrition programs. The health and education of our children depend on it.●

□ 1600

Mr. DE LA GARZA. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA) that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 40, as amended.

The question was taken.

Mr. PANETTA. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

STUDENT LOAN CONSOLIDATION AND TECHNICAL AMENDMENTS ACT OF 1983

Mr. SIMON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3394) to provide additional authority for the consolidation of student loans and to make certain other changes in Federal student financial assistance, as amended.

The Clerk read as follows:

H.R. 3394

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Student Loan Consolidation and Technical Amendments Act of 1983".

EXTENSION OF EXISTING STUDENT LOAN CONSOLIDATION AUTHORITY

SEC. 2. Section 439(o) of the Higher Education Act of 1965 (hereafter in this Act referred to as "the Act") is amended by striking out "on August 1, 1983" in paragraph (5) and inserting in lieu thereof "on November 1, 1983".

DISCLOSURE OF INFORMATION TO STUDENT BORROWERS

SEC. 3. (a) Section 433A of the Act is amended to read as follows:

"STUDENT LOAN INFORMATION BY ELIGIBLE LENDERS

"SEC. 433A. (a) Each eligible lender shall, at or prior to the time such lender disburses a loan to a borrower which is insured or guaranteed under this part, provide thorough and accurate loan information on such loan to the borrower. Any disclosure required by this subsection may be made by an eligible lender as part of the written application material provided to the borrower, or as part of the promissory note evidencing the loan, or on a separate written form provided to the borrower. The disclosures shall include—

"(1) the name of the eligible lender, and the address to which communications and payments should be sent;

"(2) the principal amount of the loan;

"(3) the amount of any charges, such as the origination fee and insurance premium, collected by the lender at or prior to the disbursal of the loan and whether such charges are deducted from the proceeds of the loan or paid separately by the borrower;

"(4) the state interest rate on the loan;

"(5) the yearly and cumulative maximum amounts that may be borrowed;

"(6) an explanation of when repayment of the loan will be required and when the borrower will be obligated to pay interest that accrues on the loan;

"(7) a statement as to the minimum and maximum repayment term which the lender may impose, and the minimum annual payment required by law;

"(8) an explanation of any special options the borrower may have for loan consolidation or other refinancing of the loan;

"(9) a statement that the borrower has the right to prepay all or part of the loan, at any time, without penalty, a statement summarizing circumstances in which repayment of the loan or interest that accrues on the loan may be deferred, and a brief notice of the program for repayment of loans, on the basis of military service, pursuant to section 902 of the Department of Defense Authorization Act, 1981 (10 U.S.C. 2141, note);

"(10) a definition of default and the consequences to the borrower if the borrower defaults, including a statement that the default may be reported to a credit bureau or credit reporting agency;

"(11) to the extent practicable, the effect of accepting the loan on the eligibility of the borrower for other forms of student assistance; and

"(12) an explanation of any cost the borrower may incur in the making or collection of the loan.

"(b) Each eligible lender shall, at or prior to the start of the repayment period of the student borrower on loans made, insured, or guaranteed under this part, disclose to the borrower the information required under this subsection. Any disclosure required by this subsection may be made by an eligible lender either in a promissory note evidencing the loan or loans or in a written statement provided to the borrower. The disclosures shall include:

"(1) the name of the eligible lender, and the address to which communications and payments should be sent;

"(2) the scheduled date upon which the repayment period is to begin;

"(3) the estimated balance owed by the borrower on the loan or loans covered by the disclosure as of the scheduled date on which the repayment period is to begin (including, if applicable, the estimated amount of interest to be capitalized);

"(4) the stated interest rate on the loan or loans, or the combined interest rate of loans with different stated interest rates;

"(5) the nature of any fees which may accrue or be charged to the borrower during the repayment period;

"(6) the repayment schedule for all loans covered by the disclosure including the date the first installment is due, and the number, amount, and frequency of required payments;

"(7) an explanation of any special options the borrower may have for loan consolidation or other refinancing of the loan;

"(8) the projected total of interest charges which the borrower will pay on the loan or loans, assuming that the borrower makes payments exactly in accordance with the repayment schedule; and

"(9) a statement that the borrower has the right to prepay all or part of the loan or loans covered by the disclosure at any time without penalty.

"(c) Such information shall be available without cost to the borrower. The failure of an eligible lender to provide information as required by this section shall not (1) relieve a borrower of the obligation to repay a loan in accordance with its terms, (2) provide a basis for a claim for civil damages, or (3) be deemed to abrogate the obligation of the Secretary under a contract of insurance or reinsurance, or the obligation of a State or nonprofit private agency or organization which has an agreement with the Secretary under section 428(b) under a contract of guaranty. The Secretary may limit, suspend, or terminate the continued participation of an eligible lender in making loans under this part for failure by that lender to comply with this section.".

(b) Section 463A of the Act is amended to read as follows:

"STUDENT LOAN INFORMATION BY ELIGIBLE INSTITUTIONS

"SEC. 463A. (a) Each institution of higher education, in order to carry out the provisions of section 463(a)(8), shall, at or prior to the time such institutions makes a loan to a student borrower which is made under this part, provide thorough and adequate loan information on such loan to the student borrower. Any disclosure required by this subsection may be made by an institution of higher education as part of the written application material provided to the borrower, or as part of the promissory note evidencing the loan, or on a separate written form provided to the borrower. The disclosures shall include:

"(1) the name of the institution of higher education, and the address to which communications and payments should be sent;

"(2) the principal amount of the loan;

"(3) the amount of any charges collected by the institution at or prior to the disbursal of the loan and whether such charges are deducted from the proceeds of the loan or paid separately by the borrower;

"(4) the stated interest rate on the loan;

"(5) the yearly and cumulative maximum amounts that may be borrowed;

"(6) an explanation of when repayment of the loan will be required and when the borrower will be obligated to pay interest that accrues on the loan;

"(7) a statement as to the minimum and maximum repayment term which the institution may impose, and the minimum monthly payment required by law;

"(8) an explanation of any special options the borrower may have for loan consolidation or other refinancing of the loan;

"(9) a statement that the borrower has the right to prepay all or part of the loan, at any time, without penalty, a statement summarizing circumstances in which repayment of the loan or interest that accrues on the loan may be deferred, and a brief notice of the program for repayment of loans, on the basis of military service, pursuant to section 902 of the Department of Defense Authorization Act, 1981 (10 U.S.C. 2141, note);

"(10) a definition of default and the consequences to the borrower if the borrower defaults, including a statement that the default may be reported to a credit bureau or credit reporting agency;

"(11) to the extent practicable, in effect of accepting the loan on the eligibility of the borrower for other forms of student assistance; and

"(12) an explanation of any cost the borrower may incur in the making or collection of the loan.

"(b) Each institution of higher education shall enter into an agreement with the Secretary under which the institution will, prior to the start of the repayment period of the student borrower on loans made under this part, disclose to the student borrower the information required under this subsection. Any disclosures required by this subsection may be made by an institution of higher education either in a promissory note evidencing the loan or loans or in a written statement provided to the borrower. The disclosures shall include—

"(1) the name of the institution of higher education, and the address to which communications and payments should be sent;

"(2) the scheduled date upon which the repayment period is to begin;

"(3) the estimated balance owned by the borrower on the loan or loans covered by the disclousre as of the scheduled date on which the repayment period is to begin (including, if applicable, the estimated amount of interest to be capitalized);

"(4) the stated interest rate on the loan or loans, or the combined interest rate of loans with different stated interest rates;

"(5) the nature of any fees which may accrue or be charged to the borrower during the repayment period;

"(6) the repayment schedule for all loans covered by the disclosure including the date the first installment is due, and the number, amount, and frequency of required payments;

"(7) an explanation of any special options the borrower may have for loan consolidation or other refinancing of the loan;

"(8) the projected total of interest charges which the borrower will pay on the loan or loans, assuming that the borrower makes payments exactly in accordance with the repayment schedule; and

"(9) a statement that the borrower has the right to prepay all or part of the loan or loans covered by the disclosure at any time without penalty.

"(c) Such information shall be available without cost to the borrower. The failure of an eligible institution to provide information as required by this section shall not (1) relieve a borrower of the obligation to repay a loan in accordance with its terms, (2) provide a basis for a claim for civil damages, or (3) be deemed to abrogate the obligation of the Secretary to make payments with respect to such loan.".

STUDENT FINANCIAL ASSISTANCE TECHNICAL AMENDMENT ACT OF 1982 REVISIONS

SEC. 4. (a) The Student Financial Assistance Technical Amendments of 1982 is amended by striking out sections 3 through 6 and inserting in lieu thereof the following:

"COST OF ATTENDANCE

"SEC. 3. (a) Except as provided in subsection (b), but notwithstanding any other provision of law, the cost of attendance criteria used for calculating eligibility for and the amount of Pell Grants for academic years 1983-1984, 1984-1985, and 1985-1986 shall be the same as those criteria in effect for academic year 1982-1983.

"(b) The cost of attendance allowance for room and board for students not residing at home or in institutionally owned or operated housing for the academic year 1984-1985

shall be a standard amount determined by the institution of higher education based on the expenses reasonably incurred by such student for room and board, which shall be at least $1,100 but not more than $1,600.

"(c) The cost of attendance allowance for room and board for students not residing at home or in institutionally owned or operated housing for the academic year 1985-1986 shall be a standard amount determined by the institution of higher education based on the expenses reasonably incurred by such student for room and board, which shall be at least $1,100 but not more than $2,100.

"SEPARATION OF PELL GRANT FAMILY CONTRIBUTION SCHEDULE FROM CAMPUS-BASED PROGRAMS

"SEC. 4. The Secretary of Education shall establish or approve separate systems of need analysis for the academic years 1983-1984, 1984-1985, and 1985-1986 for the programs authorized under subpart 2 of part A, part C, and part E of title IV of the Higher Education Act of 1965.

"PELL GRANT FAMILY CONTRIBUTION SCHEDULES FOR ACADEMIC YEARS 1984-1985 AND 1985-1986

"SEC. 5. (a) Except as provided in subsections (b) and (c), the family contribution schedule for academic year 1983-1984 for Pell Grants under subpart 1 of part A of title IV of the Higher Education Act of 1965 shall be the family contribution schedule for such grants for each of the academic years 1984-1985 and 1985-1986.

"(b)(1) Each of the amounts allowed as an offset for family size for dependent and independent students in the family contribution schedule for each of the academic years 1984-1985 and 1985-1986 shall be computed by increasing (or decreasing) the comparable amount (for the same family size) in the family contribution schedule for the preceding academic year (as set by this section) by a percentage equal to the percentage increase (or decrease) in the Consumer Price Index for Wage Earners and Clerical Workers published by the Department of Labor, and rounding the result to the nearest $100.

"(2) For purposes of paragraph (1) of this subsection, the percentage increases (or decrease) in the Consumer Price Index for Wage Earners and Clerical Workers is the change, expressed as a per centum, between the arithmetic mean of such index—

"(A) for the period from October 1, 1981, through September 30, 1982, and the arithmetic mean of such index for the period from October 1, 1982, through September 30, 1983, in the case of the academic year 1984-1985; and

"(B) for the period from October 1, 1982, through September 30, 1983, and the arithmetic mean of such index for the period from October 1, 1983, through September 30, 1984, in the case of the academic year 1985-1986.

"(3) The Secretary of Education shall publish in the Federal Register the changes in amounts allowed as an offset for family size as a consequence of the requirements of this subsection immediately after publication by the Secretary of Labor of the Consumer Price Index for September 1983 (with respect to academic year 1984-1985) and immediately after such publication for September 1984 (with respect to academic year 1985-1986).

"(c) For purpose of subsection (a), the family contribution schedule for academic year 1983-1984 shall be modified by the Secretary of Education for use for each of academic years 1984-1985 and 1985-1986—

"(1) to reflect the most recent and relevant data, and

"(2) to comply with section 482(b)(3) of the Higher Education Act of 1965 with respect to the treatment of payments under title 38 of the United States Code.

"(d) The modified family contribution schedule under this section shall be published in the Federal Register—

"(1) not later than fifteen days after the date of enactment of the Student Loan Consolidation and Technical Amendments Act of 1983 for academic year 1984-1985; and

"(2) not later than April 1, 1984, for academic year 1985-1986.

"INDEPENDENT STUDENT DETERMINATION

SEC. 6. Notwithstanding any rule or regulation, the criteria for the determination of independent student status, prescribed under section 482(c)(2) of the Higher Education Act of 1965, in effect for academic year 1982-1983 shall be the criteria for such determinations for each of the academic years 1983-1984, 1984-1985, and 1985-1986.".

"(b) Section 9 of such Act is amended—

(1) by inserting "from July 1, 1984, through June 30, 1985, and from July 1, 1985, through June 30, 1986," after "June 30, 1984," in subsection (a);

(2) by striking out "the period of instruction from July 1, 1983, through June 30, 1984," in subsection (b) and inserting in lieu thereof "each of the periods of instruction (beginning after June 30, 1983) described in subsection (a)"; and

(3) by striking out "subsection (c) and inserting in lieu thereof the following:

"(c) The modified family contribution schedule under this section shall be submitted not later than—

"(1) April 1, 1983, for the period of instruction from July 1, 1983, through June 30, 1984;

"(2) April 1, 1984, for the period of instruction from July 1, 1984, through June 30, 1985; and

"(3) April 1, 1985, for the period of instruction from July 1, 1985, through June 30, 1986,

and shall otherwise be subject to the provisions of section 482(a) of the Higher Education Act of 1965.".

CLARIFICATION OF APPLICABILITY OF 8 PER CENTUM RATE

SEC. 5. (a) Section 427A(a) of the Act is amended—

(1) by striking out "other than" and all that follows through "this subsection" in paragraph (1) and inserting in lieu thereof "for which the interest rate does not exceed 7 per centum";

(2) by striking out "any loan made, insured" and all that follows through "this paragraph" in paragraph (2) and inserting in lieu thereof "any loan described in paragraph (1) or any loan for which the interest rate is determined under paragraph (1)"; and

(3) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) be 8 per centum per annum on the unpaid principal balance of the loan for a loan to cover the cost of education for any period of enrollment beginning on or after a date which is three months after a determination made under subsection (b) in the case of any borrower who, on the date of entering into the note or other written evidence of the loan, has no outstanding balance of principal or interest on any loan for which the interest rate is determined under paragraph (1) or (2) of this subsection.".

(b)(1) Section 427A of the Act is further amended by adding at the end thereof the following new subsection:

"(e) For the purposes of subsection (a) of this section—

"(1) the term 'period of instruction' shall, at the discretion of the lender, be any academic year, semester, trimester, quarter, or other academic period; or shall be the period for which the loan is made as determined by the institution of higher education; and

"(2) the term 'period of enrollment' shall be the period for which the loan is made as determined by the institution of higher education and shall coincide with academic terms such as academic year, semester, trimester, quarter, or other academic period as defined by such institution.".

(2) The amendment made by this subsection shall be effective as if enacted as part of the amendment made by section 415(a)(1) of the Education Amendments of 1980.

NONDISCRIMINATION

SEC. 6. Section 421 of the Act is amended—

(1) by inserting "; nondiscrimination;" after "statement of purpose" in the heading of such section;

(2) by inserting "(1)" after "SEC. 41. (a)"; and

(3) by inserting before subsection (b) the following new paragraph:

"(2) No institution, bank, credit union, corporation, or other lender who regularly extends, renews, or continues credit or provides insurance under this part shall exclude from receipt or deny the benefits of, or discriminate against any borrower or applicant in obtaining, such credit or insurance on the basis of race, national origin, religion, sex or marital status, age, or handicapped status.".

RESTRICTION ON SPECIAL ALLOWANCES

SEC. 7. (a) Section 438 of the Act is amended by redesignating subsection (d) as subsection (e) and inserting before such subsection the following:

"(d)(1) In order for the holders of loans which were made or purchased with funds obtained by the holder from an Authority issuing obligations, the income from which is exempt from taxation under the Internal Revenue Code of 1954, to be eligible to receive a special allowance under subsection (b)(2) of this section, the Authority shall submit to the Secretary a plan for doing business. The Secretary shall approve or disapprove such plan within thirty days after the date of its submission. Each such plan shall contain provisions designed to assure that—

"(A) no eligible lender in the area served by the Authority will be excluded from participation in the program of the Authority and all eligible lenders may participate in the program on the same terms and conditions if eligible lenders are going to participate in the program;

"(B) no director staff member of the Authority who receives compensation from the Authority may own stock in, or receive compensation from, any agency that would contract to service and collect the loans of the Authority;

"(C) student loans will not be purchased from participating lenders at a premium or discount amounting to more than 1 per centum of the unpaid principal amount borrowed plus accrued interest to the date of acquisition, but a reasonable loan transfer fee may be paid by the purchaser;

"(D) the Authority will within the limit of funds available and subject to the applicable State and Federal law, make loans, to or purchase loans incurred by, all eligible students who are residents of, or who attend an

eligible institution within, the area served by the Authority;

"(E) the Authority has a plan under which the Authority will pursue the development of new lender participation in a continuing program of benefits to students together with assurances of existing lender commitments to the program;

"(F) there will be an annual audit of the Authority by a certified public accounting firm which will include review of compliance by the Authority with the provisions of the plan; and

"(G) the Authority will not issue obligations for amounts in excess of the reasonable needs for student loan credit within the area served by the Authority, after taking into account existing sources of student loan credit in that area.

"(2) In order for the holders of loans which were made or purchased with funds obtained by the holder from an Authority issuing obligations, the income from which is exempt from taxation under the Internal Revenue Code of 1954, to be eligible to receive a special allowance under subsection (b)(2) of this section on any such loans, the Authority shall not engage in any pattern or practice which results in a denial of a borrower's access to loans under this part because of the borrower's race, sex, color, religion, national origin, age, handicapped status, income, attendance at a particular eligible institution within the area served by the Authority, length of the borrower's educational program, or the borrower's academic year in school.".

(b) Section 420(b) of the Education Amendments of 1980 is repealed.

(c) Section 438(b)(2)(B)(iii) of the Act is amended by striking out "section 420(b) of the Education Amendments of 1980" and inserting in lieu thereof "subsection (d) of this section".

(d) Until two years after the date of enactment of this Act, section 438(d)(2) of the Act (as added by subsection (a) of this section) shall not operate to prevent the payment of special allowances on loans described in such section 438(d)(2) because an Authority described in such section denies access to loans under part B of title IV of the Act to students in attendance at particular institutions with specified high default rates on such loans, if such denial is pursuant to a rule of such Authority adopted prior to August 1, 1983.

STUDENT LOAN MARKETING ASSOCIATION

SEC. 8. Section 439(l) of the Act is amended by striking out "issued or incurred on or before September 30, 1984".

ADMINISTRATIVE COSTS

SEC. 9. The amendments made by section 417(c) of the Education Amendments of 1980 shall be effective as if enacted as part of the amendment made by section 127(a) of the Education Amendments of 1976.

REPAYMENTS STATUS

SEC. 10. Section 427(a)(2)(B) of the Act is amended by striking out "six months after the date on which" and inserting in lieu thereof "six months after the month in which".

(b) Section 428(b)(1)(E) of the Act is amended—

(1) by inserting "the month in which" after "ten years beginning six months after"; and

(2) in clause (i), by inserting "the month in which" after "not earlier than six months after".

(c) The amendments made by this section shall be effective with respect to any loan under part B of title IV of the Act on which repayment has not commenced prior to the date of enactment of this Act.

NATIONAL COMMISSION ON STUDENT FINANCIAL ASSISTANCE

SEC. 11. Section 491(d)(3) of the Act is amended by striking out "90 days following the submission of its final report." and inserting in lieu thereof "on November 1, 1983".

DEFERMENTS OF AUXILIARY LOANS

SEC. 12. Section 428B(a)(1) of the Act is amended by inserting before the period at the end of the second sentence the following: ", but such a parent borrower shall not be eligible for any deferment pursuant to section 427(a)(2)(C) or 428(b)(1)(M)".

The SPEAKER pro tempore. Is a second demanded?

Mr. COLEMAN of Missouri. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. SIMON) will be recognized for 20 minutes, and the gentleman from Missouri (Mr. COLEMAN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, first of all, we had a committee amendment today that was put on at the last minute because, all of a sudden, while we thought we were going along with the administration and had this thing in good shape, all of a sudden we get word from OMB that the loan consolidation provision is not in order.

I understand that OMB has some time constraints, but so does Congress. I hope that they get their house in order and can notify us a little earlier about these kinds of changes.

What we have done in order to comply with OMB and so that we do not have a veto on this important legislation, we have pulled it back from a 2-year extension to a 3-month extension so that we can get this thing worked out.

There are several other provisions in the law in addition to the 3-month extension. One is, it sets up the contribution schedules for the Pell grants. We have had a problem with regulations coming in on time. This is part of a tradition now, at least it is not unprecedented, that we do this.

We increase the commuter allowance. And that is more than just commuting; it is a total living expense for those not living in dormitories and those not living in their homes from $1,100 to $1,600, and that can go up in the 1985-86 academic year to $2,100, certainly not an excessive amount. In fact, it is unrealistically low.

We make the Sallie Mae equal access provision in the event of involuntary bankruptcy or liquidation, and we make that permanent.

We extend the life of the National Commission on Student Financial Assistance through November 1, 1983, so they can follow through on their work.

We clarify the application of the new 8 percent guaranteed loan interest rate as applicable to new borrowers only, and we provide new nondiscrimination provisions for lenders who make guaranteed student loans. That is simply because of the new classification on the loans.

Mr. Speaker, I yield such time as he may consume to the chairman of the full committee, the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I rise in support of H.R. 3394. This bill has as its principal purpose bringing stability to the Pell grant and guaranteed student loan programs by prescribing the eligibility for those grants and loans for school years 1984-85 and 1985-86.

H.R. 3394 was introduced by Congressman PAUL SIMON with Congressman TOM COLEMAN and myself as cosponsors. Mr. SIMON and Mr. COLEMAN deserve a great deal of the credit for achieving the passage of this legislation.

I would also like to commend the efforts of the other members of the Subcommittee on Postsecondary Education: WILLIAM D. FORD, IKE ANDREWS, RAY KOGOVSEK, FRANK HARRISON, TIMOTHY PENNY, MAJOR R. OWENS, GARY ACKERMAN, STEVE GUNDERSON, JAMES JEFFORDS, WILLIAM GOODLING, THOMAS PETRI, and RON PACKARD.

As I mentioned, the principal purpose of this bill is to bring stability to the Pell grant and guaranteed student loan programs. The Pell grant program currently benefits over 2,250,000 students and involves an appropriation of $2.4 billion. Since the inception of the student loan program, more than 18 million students have benefited under this program. The current appropriation is $3 billion. These two programs are the largest Federal programs providing student assistance for postsecondary education.

For the last 2 years these programs have suffered from a great deal of instability because of the administration's attempt to cut their funding. As a consequence, the Congress has had to enact statutes rejecting the administration's attempts to limit eligibility and thereby reduce funding.

For the third year in a row now, we are faced with the same threat from the administration to limit eligibility for these programs, and, we must respond by assuring students that they will not lose their grants and loans through these efforts. That is the reason that the bill before us pre-

scribes an exact family contribution schedule to be used for the Pell grant program and for the guaranteed student loan program for school years 1984-85 and 1985-86.

Earlier this year on May 13, 1983, the administration published family contribution schedules which would have eliminated thousands of students from these programs. This bill rejects those schedules and instead requires that the currently used family contribution schedules will be updated for inflation and used for those school years.

By passing this bill today we will help to make it possible for the printing of the applications and other information concerning eligibility for these programs so that families and students can use them this fall in helping to make their decisions about which schools to enroll in for the next school year.

H.R. 3394 also clarifies the rules for these two programs by prescribing the use of the current definition for "independent student" for the 1984-85 and 1985-86 school years and by clarifying the types of information which will have to be made available to students under the current truth-in-lending provisions of the law.

The bill also contains long overdue increases in the commuter allowance for determining Pell grant eligibility. Students residing at home have been limited to an $1,100 commuter allowance since the inception of the program in 1972. The bill would increase the commuter allowance from the current $1,100 to $1,600 for school year 1984-85 and then to $2,100 for school year 1985—86.

Another purpose of the bill is to extend for 3 months the loan consolidation opportunities of students holding guaranteed and direct loans. Under current law the Student Loan Marketing Association, Sallie Mae, has the authority to help students with consolidated loans. This authority expires today, August 1, 1983. The bill before us extends Sallie Mae's authority to make these loans to November 1, 1983. Originally our bill would also have permitted State guarantee agencies to make consolidated loans on the condition that no individual State's consolidated loans can exceed 15 percent of the outstanding principal on loans held by that State agency. However, David Stockman this morning objected to this provision. So we deleted it, and will consider it again in committee within the next 3 months.

Mr. Speaker, this bill is important to millions of students throughout the country. It will bring stability to the Federal Government's largest student loan and student grant programs by prescribing the exact rules for these programs for 2 full school years. This bill will also help to discourage student default on loans by encouraging loan consolidation. I urge its passage.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Illinois (Mr. SIMON) I think has stated the proposition correctly.

Mr. Speaker, I would like to rise and echo the words of the gentleman from Illinois about the lateness of the suggestion by OMB that the bill is unacceptable. We all put things off, but I would hope that OMB would not put things off so late, to the 11th hour and 59th minute, before we come to the floor with a bill.

In order to save the good parts of this bill that are not objectionable, we are going forward today. But I certainly hope my friends over at OMB will take notice that nobody is extremely happy with the lateness of their objection to this particular bill.

There are several portions of the bill which remain which are positive, and that is why the gentleman from Illinois (Mr. SIMON) wants to go forward with them, and he has laid those out.

First of all, the disclosure requirements on GSL and NDSL programs are rewritten and, second, the Family Contribution Act schedules for 1984-85 and 1985-86 are continued in the present assessment rates.

This gives people the indication as to what their contribution will be for their youngsters going into college in the next several years, and clarifies any questions along that line.

We will have to come back with some legislation in September and October in order to meet some reauthorization requirements for Sallie Mae, and I hope that OMB will come forward and let us know what their problems are before then.

I was going to congratulate the subcommittee chairman, the gentleman from Illinois (Mr. SIMON) on bringing forward the bill which he had involved the minority in substantially, and I know that because of that section being taken out, I hope we can go forward together in working along these lines in a bipartisan effort on future legislation. I thank him for his courtesies in the past and on this particular bill.

Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, I rise in support of H.R. 3394.

Let me first, Mr. Speaker, thank the gentleman from Illinois (Mr. SIMON), and our chairman, the gentleman from Kentucky (Mr. PERKINS), for their cooperation in responding to the objections raised by the Office of Management and Budget.

Mr. Speaker, this bill was developed over the last 2 months, and I am unhappy, as well as the other Members who have expressed themselves here today, that we did not have this information from OMB before.

I must say, Mr. Speaker, however, that concerns along the line raised by OMB but not backed up by the mathematics that they were able to perform were raised by me during consideration of the bill in full committee. The Office of Management and Budget has done a complete analysis of this beyond the 5 years which was the limit of the analysis done by the Congressional Budget Office.

I mentioned in committee, Mr. Speaker, that the first 5 years of this bill would be the least expensive of the 15- to 20-year impact and beyond that this legislation would have, and that I was unhappy at the time we acted on the bill in full committee that no one had made an analysis of the cost 10 years, 15 years from now, and that is what OMB has done since the full committee has acted.

Mr. Speaker, the question of consolidation of student loans is important and is yet to be resolved as a result of the amendment that is being offered by the committee, and I do hope that we will be able to meet again together in bipartisan cooperation to resolve that issue.

An important provision in H.R. 3394 relates to the disclosure of information to student borrowers under both the guaranteed student loan and the national direct student loan programs. It addresses concerns raised by the lending community regarding student loan disclosure provisions enacted in the Student Financial Assistance Technical Amendments of 1982 concerning the technical feasibility of some of the disclosure items required. Foremost among the concerns raised was the required redisclosure information relating to the GSL loan origination fee and insurance premium. Lenders doubted whether this information relating to these items would be readily available in that student loan accounts are often maintained on computerized systems with minimal amounts of information on each account. Lenders felt that the mandatory disclosure of these items would necessitate searches for the notes originally signed at the time student loans are disbursed. These notes are often stored in warehouses where they are largely inaccessible.

The loan disclosure provisions included in H.R. 3394 were developed in close cooperation with both the lending community and student organizations. They will assure that students are provided with the basic information they need regarding their student loan obligation. They are also designed to be administratively workable and will help hold down administrative costs associated with lender participation in the GSL program.

Another major provision in H.R. 3394 relates to the Pell grant and GSL programs. The legislation establishes the family contribution schedules for the 1984-85 and 1985-86 academic years. As you know, Mr. Speaker, the family contribution schedule determines what amount of a family's discretionary income the family is expected to contribute to their son's or daughter's postsecondary education. By establishing the schedule for the next 2 years in the Higher Education Act, we will be taking a big step toward assuring stability in both of these important student aid programs. Under this provision families will be able to improve their planning for meeting postsecondary education costs.

The legislation also raises the Pell grant cost-of-attendance allowance for students not residing at home or in institutionally owned or operating housing for the 1984-85 and 1985-86 academic years. The increases included in the bill for this allowance represent modest additions to a maximum allowance that has not been altered for 10 years. By making this adjustment, the Pell grants of some of our Nation's poorest postsecondary students will be increased.

I urge my colleagues to support H.R. 3394.

□ 1610

Mr. SIMON. Mr. Speaker, I yield 4 minutes to the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise to lend my support to the legislation now before us, H.R. 3394. Passage of this bill today is essential if we are to maintain the availability of student loans in the coming fiscal years.

As one of the original authors of the 1978 Middle Income Student Assistance Act as well as the 1980 higher education amendments, I believe that this legislation is an essential step in carrying out the 1980 law which sought to provide financial assistance to each needy student in both the public and the private sectors. This balance of interest must be maintained if we are to continue to support and nurture choice and access in higher education.

I am pleased that this legislation reflects an long-overdue increase in the commuter allowance for students at public schools. Under this bill, the allowance will be raised to $1,600 for the 1984-85 school year and $2,100 in the 1985-86 school year. For students at public schools, especially the 40,000 students who attend the City University of New York—who do not live with their parents or on campus—this increase will correct a long standing inequity.

At the same time, I wish to underscore my concern that this increase does not disproportionately impact upon students who are equally needy who attend high-priced schools. The ideal answer to this situation is that we work to insure that the Pell grant program remain funded at a level of $2.8 billion in order to fund a $2,000 award. If we are faced with insufficient funding in the Pell grant program, I would hope that we can actively work to insure that inequities do not occur.

I also wish to point out that I supported efforts in full committee to allow State agencies to guarantee student loans—something that is now provided only to the student loan marketing association. It is clearly unfair to allow one single agency to operate in a monopolistic fashion and I would hope that the committee will make some adjustments in this area in the future with relation to the 3-month Sallie Mae extension.

I strongly support the provisions in the bill, specifically the provisions which lock in the Pell grant and GSL contribution schedules so that students and the schools they attend will not be unnecessarily burdened by the continued bureaucratic foot-dragging by the Department of Education as has been the case in the past.

I am disappointed that the committee did not agree to extend authority to guarantee loans to State agencies despite the fact that we have given them authority to consolidate loans. I supported efforts to extend this authority and break the monopolistic situation I feel that we will be creating. I intend to work in committee to rectify this matter so that the final product will be more equitable to those lenders that want to take advantage of the same options that we have given to Sallie Mae.

Finally, I wish to commend the chairman of the subcommittee PAUL SIMON, for his steering of this bill through our committee in a bipartisan fashion as well as our distinguished chairman CARL PERKINS, who remains a champion for all educational interests in this Nation. As New York's senior member of the Education and Labor Committee, I share the concerns of my colleagues in passing this bill in a timely manner so that Sallie Mae can continue its activities, but more importantly, so that students in all segments of the higher education community can be assured that their awards will be distributed in a timely fashion.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 4 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. I thank the gentleman for yielding this time to me.

Mr. Speaker, I wonder if I could engage the chairman of the subcommittee in a colloquy.

Mr. SIMON. I would be pleased to.

Mr. JEFFORDS. Mr. Speaker, as the gentleman knows, the provisions which I fought for in committee have been whisked away by this little amendment. I was happy to get these provisions, and thought, due to their de minimis revenue impact, that they were acceptable to everyone.

This committee amendment amendment obviously concerns me. It looks to me like we are giving OMB everything they want. But we are taking away much which would be of assistance and benefit to the student.

I would just urge the gentleman, and I can understand the reaction to the threat of the administration pounding down on us tomorrow when we need a two-thirds vote, but I would hope that when the remnants go to the other body, that he urge the other body to put back in some of these useful things. Then we can get back to a more normal way of negotiating with OMB in conference. I would ask the gentleman, first of all, as to whether or not, as I understand it, you have just a short elongation of the time for which Sallie Mae can consolidate, which is going to force us to face this issue again. Is that correct?

Mr. SIMON. If the gentleman will yield, that is correct.

Mr. JEFFORDS. At that time, assuming the States are not granted the ability to consolidate loans in conference, we can take up the issue?

Mr. SIMON. If the gentleman will yield further, that is correct.

Let me just add, if the gentleman, who probably has some influence with the senior Senator from his State, it seems to me if something is worked out on the other side and we get OMB approval in the next few days, we may be able to do more than what we have in this House bill. I cannot guarantee that, obviously, but if we are not able to do anything more than what we have here, then within the next 3 months we will certainly reconsider the suggestion of my colleague from Vermont.

Mr. JEFFORDS. I can assure the gentleman I am going to take his advice on that matter, and I do hope that more can be put back in this bill, which was so enthusiastically agreed to by our committee, than we apparently can get through at this time due to the exigencies of time.

But I do want to commend the gentleman for his work on this bill, and also for his willingness to work with us who wanted to try to give the States the right to consolidate. It kind of intrigues me that OMB, would disagree with the State consolidation amendment. Is this not what they have been trying to get done, that is to ask the States to take more of the burden in these matters and to relieve the Federal Government of its obligations in

student financing and all. I am amazed that this would be one of the matters which they complain about. This amendment seems to be totally consistent with the policy that this administration has been trying to drum into us. I find it somehow ironic that they would pick upon that particular amendment to use as one of the reasons for discouraging us from proceeding as we had planned.

Mr. SIMON. If the gentleman would yield further, I want to apologize for not discussing this amendment with the gentleman from Vermont. I found out about it about 45 minutes or an hour before this bill came up, that we had the problem with OMB, so we had to move quickly and I did consult with my colleague from Illinois and my colleague from Missouri.

Mr. JEFFORDS. I suppose my real complaint is that my eloquent statement in support of your bill and my amendment now becomes somewhat irrelevant and I will have to engage in some corrective surgery on it. But other than that, I understand the plight and will do all I can hopefully to resurrect the provisions of the bill.

Mr. SIMON. If the gentleman would yield further, he can save his eloquence. We need all of it we can get in the House.

Mr. ERLENBORN. Mr. Speaker, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Illinois.

Mr. ERLENBORN. I thank the gentleman for yielding.

Mr. Speaker, let me say that the gentleman's comment a moment ago about the States taking over part of this obligation of consolidation fits right in with the administration's philosophy.

I would question that since the States do that with tax-free bonds.

□ 1620

The SPEAKER pro tempore. The time of the gentleman from Vermont (Mr. JEFFORDS) has expired.

Mr. COLEMAN of Missouri. Mr. Speaker, I yield 1 additional minute to the gentleman from Vermont (Mr. JEFFORDS).

Mr. ERLENBORN. Mr. Speaker, will the gentleman yield further?

Mr. JEFFORDS. I yield to the gentleman from Illinois.

Mr. ERLENBORN. Mr. Speaker, I thank the gentleman for yielding.

They do that with tax-free bonds, and there actually is a profit within this for the State agencies. That is one of the things that concerns the Office of Management and Budget. As we know, that is one of the reasons why in committee we reduce the ability of the States to consolidate to no more than 15 percent——

Mr. JEFFORDS. I understand, and I was willing to restrict use to 15 percent under the pressure of OMB, to make the revenue impact de minimis. But I would also like to point out that the experience has been that the States have had a much better record on student loan default and other matters than the Federal loans have. So in that respect, the States have been more effective in saving money than has the Federal Government. In fact allowing the States to consolidate may very well end up a net saving.

Mr. ERLENBORN. Mr. Speaker, if the gentleman will yield further, let me say that the States have had a good record, and if we allow them to consolidate those loans that would have been repaid with that good record and stretch them out for 15 to 20 years instead of the 10 years now allowed under the guaranteed student loan program, it means an additional 5 to 10 years' subsidy for the interest.

Mr. JEFFORDS. And a substantial decrease in the number of defaults. I thank the gentleman for his comment.

Mr. ERLENBORN. Well, Mr. Speaker, I doubt that. I think they have a good record already.

Mr. COLEMAN of Missouri. Mr. Speaker, if the gentleman will yield, just so there is no question, since there has been a lot of dialog on some things that are not even before the House, this side of the aisle supports H.R. 3394 and hopes that it will pass under suspension.

● Mr. FORD of Michigan. Mr. Speaker, I rise in support of H.R. 3394, the Student Loan Consolidation and Technical Amendments Act of 1983. This bill makes a number of largely technical but very important modifications in the student financial aid programs. These amendments will insure that the student aid programs serve students with as much equity as is possible under the circumstances and without the delays that have often been synonymous with a denial of opportunity in recent years. With the adoption of these amendments the student financial aid system will be able to effectively serve students for the 1984–85 and the 1985–86 academic years by which time the next reauthorization of the Higher Education Act will have taken place.

Mr. Speaker, I would like to commend the chairman of the Subcommittee on Postsecondary Education, the gentleman from Illinois (Mr. SIMON), and the ranking minority member of the subcommittee, the gentleman from Missouri (Mr. COLEMAN), for their efforts and their leadership in bringing this legislation before the House in a timely manner.

Perhaps the most significant provisions of this bill are those which keep in place the current family contribution schedule for the Pell grant program and the guaranteed student loan program with adjustments for inflation. The family contribution schedule is the basic mechanism for determining the financial strength of a student and his or her family in order to determine their eligibility for a Pell grant or a guaranteed student loan. By continuing the current family contribution schedule, the bill precludes the implementation of a revised family contribution schedule proposed by the administration which would have resulted in severe decreases in awards to students from moderate income families only slightly above the poverty line as well as the elimination of several hundred thousand middle-income students from the programs.

The bill also maintains the current definition of an independent student. This provision will prevent the administration from implementing a new complex and arbitrary definition of independent students. Forestalling this proposed new definition of independent students will enable these students, who are generally older students returning to school, to continue to benefit from the programs.

The legislation will extend for 3 months the loan consolidation program of the Student Loan Marketing Association which expires today. This program provides to students with large outstanding loan balances or student loans from multiple lenders the opportunity to negotiate extended and variable repayments. This program has proved effective in aiding students to manage the repayment of their student loans and to prevent loan defaults. I hope that agreement can be reached expeditiously to extend this valuable program beyond 3 months.

In addition, this bill clarifies the disclosure requirements that require lenders to fully inform student borrowers of their responsibilities and the terms of their student loans. Since student loans were removed from the requirements of the Truth in Lending Act in the last Congress, the Student Financial Assistance Technical Amendments Act of 1982 provided for new disclosure requirements for lenders. Implementation of these new disclosure requirements without the modifications contained in this bill would have worked a severe hardship on lenders in terms of administrative burdens and cost without any gain in relevant information for students. The adoption of this bill will enable students to be fully informed about their loan obligations without needless burdens on lenders.

Finally, this legislation extends permanently the provision of current law which provides that in the event of the bankruptcy of the Student Loan Marketing Association, all of its creditors, including the Federal Government, will have equal standing in their claims against Sallie Mae's assets. This provision will insure that Sallie Mae will not be unfairly hampered in its efforts to raise funds in the private mar-

kets and that it can therefore continue to serve the needs of the guaranteed student loan program as well as comply with the intent of Congress with respect to obtaining its financing in the private markets.

I take particular pride in several provisions of this legislation to which I devoted a great deal of personal attention. First, the bill provides that the living allowance for students who do not live on campus and who do not commute from their parents home—those who commute from their own apartment or home—will be increased by $500 for the 1984-85 academic year and by another $500 for the academic year 1985-86. This allowance along with tuition charges are key elements in determining the cost of attendance at a postsecondary institution which in turn establishes the limit on a student's eligibility for student aid. This living allowance for commuting students has not been modified since the creation of the Pell grant program in 1972, and this has resulted in artificially and arbitrarily lowering the Pell grant awards particularly of low-income students attending low-cost schools such as community colleges and State colleges. I am very pleased that this bill begins to redress this longstanding inequity.

This bill also preserves and clarifies the change in the interest rate under the guaranteed student loan program for students who begin borrowing this fall. For new borrowers the interest rate will decrease from 9 to 8 percent this fall. This will enable students to share in some of the benefits of the decline in interest rates.

The bill also requires that State direct lenders or State secondary markets who raise their capital through the sale of tax-exempt bonds must justify to the Secretary of Education in their plan of doing business that the amount of bonds issued are not in excess of the reasonable needs for student loan credit. I expect that the Secretary will begin to police the amounts of capital raised through tax-exempt bonds to insure that excessive amounts beyond the reasonable needs of student credit are not being sold. The Federal revenue foregone because of the tax-exempt status of these bonds increases the Federal deficit. This Federal cost should not be incurred beyond the level necessary to serve the legitimate educational credit needs of students.

Finally, the bill provides that these State authorities who raise capital through the sale of tax-exempt securities may not engage in any pattern or practice which denies access to loans to students which results in discrimination against student borrowers on the basis of race, sex, color, religion, national origin, age, handicapped status, income, attendance at a particular institution, length of the borrower's educational program, or the borrower's year in school. The provision begins to address the need to insure that eligible students are not denied access to student loans for arbitrary and unfair reasons which frustrate the program's intent of helping to provide equal educational opportunity.

This is a modest and noncontroversial bill. It appropriately leaves to the reauthorization process important issues such as repeal of the loan origination fee, establishment of a single needs analysis system for the Federal student financial aid programs, establishment of more certainty in the delivery of student aid and improvements in the basic equity of the programs. However, this bill will provide for a period of order and stability during which the reauthorization efforts can proceed free from unnecessary distractions.

Mr. Speaker, I urge my colleagues to support this bill.●

Mr. SIMON. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. SIMON) that the House suspend the rules and pass the bill H.R. 3394, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

IRISH WILDERNESS ACT OF 1983

Mr. SEIBERLING. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 64) to establish the Irish Wilderness in Mark Twain National Forest, Mo., as amended.

The Clerk read as follows:

S. 64

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Irish Wilderness Act of 1983".

SEC. 2. (a) In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131-1136), certain lands in the Mark Twain National Forest, Missouri, which comprise approximately fifteen thousand five hundred acres, as generally depicted on a map entitled "Irish Wilderness Proposed", dated July 1983, are hereby designated as wilderness and shall be known as the Irish Wilderness.

(b) Subject to valid existing rights, the wilderness area designated under subsection (a) shall be administered by the Secretary of Agriculture (hereinafter in this Act referred to as the "Secretary") in accordance with the provisions of the Wilderness Act of 1964 16 U.S.C. 1131-1136) governing areas designated by that Act as wilderness except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

(c) As soon as practicable after the date of the enactment of this Act, the Secretary shall submit a map and legal description of the wilderness area designated by subsection (a) to the Committee on Energy and Natural Resources of the Senate and the Committees on Agriculture and Interior and Insular Affairs of the House of Representatives. Such map and legal description shall have the same force and effect as if included in this Act, except that any clerical or typographical error in such map or legal description may be corrected. The Secretary shall place such map and legal description on file, and make them available for public inspection in the office of the Chief of the Forest Service, Department of Agriculture.

The SPEAKER pro tempore. Is a second demanded?

Mr. LUJAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. SEIBERLING) will be recognized for 20 minutes, and the gentleman from New Mexico (Mr. LUJAN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 64. This bill would end a decades-long effort by many Missourians to designate the so-called Irish Wilderness as a component of the National Wilderness Preservation System.

The Irish area was first recognized by Aldo Leopold as an outstanding natural area in 1929 and was first proposed for wilderness in 1949. In 1973, a bill to designate the area a wilderness passed the Senate, and similar legislation has been introduced by both Missouri Senators in every Congress since that date. S. 64 passed the Senate unanimously earlier this year.

The 15,500 acres of proposed wilderness is the largest remaining roadless and undeveloped area in Missouri and, therefore, contains unique opportunities for primitive recreation and the preservation of outstanding watershed, wildlife, and other natural values. The area is also directly adjacent to the Eleven Point National Scenic River and offers a multifaceted terrain containing numerous caves, sinkholes, springs, and pools.

Having visited it myself this spring, I can personally testify to the outstanding character of this area in terms of both interesting terrain and interesting flora and fauna. I visited one area where there were blue herons nesting in a tall grove of trees, and you could hear the young herons in their nests giving a strange clucking sound and the adult herons flying overhead in a rather wonderful and mysterious pattern.

I visited some of the springs and pools and took pictures of the beauti-

ful wildflowers and splendid forest cover.

Designation of this wilderness appears to have very strong statewide support in the State of Missouri. Virtually every major newspaper in the State has run editorials in favor of the wilderness designation. In fact, major newspapers in Kansas City and St. Louis have run repeated editorials supporting wilderness designation.

Further discussion of the wilderness attributes of the area can be found in the committee report on S. 64, so, given our crowded schedule today, I will not elaborate further. I urge my colleagues to support this bill.

Mr. Speaker, I also wish to commend our colleagues on the Committee on Agriculture for the expeditious treatment they have given in order that we might take this up on the Suspension Calendar today, and I want to thank my colleagues on the Committee on Interior and Insular Affairs for their help in working out a bill that meets with the support of the Members sufficiently to take it up on the Suspension Calendar.

Mr. Speaker, I yield to the gentleman from Texas (Mr. DE LA GARZA), the distinguished chairman of the Committee on Agriculture.

Mr. DE LA GARZA. Mr. Speaker, as you are aware, under House rule X, clause 1(a), the Committee on Agriculture has jurisdiction over forestry in general and forest reserves other than those created from the public domain. Speaking as chairman of the Agriculture Committee, I can say that we feel very strongly about protecting the jurisdictional interests of the committee.

The Missouri wilderness bill was reported by the Committee on Interior and Insular Affairs at the beginning of today's session and referred to the Committee on Agriculture for a period of 2 hours. I have personally followed the development of this legislation and have been assured that all concerned parties are satisified with the compromise that has been struck in the Committee on Interior and Insular Affairs. Thus, because the Congress will soon enter its summer recess, the Committee on Agriculture has been asked to expedite its review and allow this bill to be presented on today's Suspension Calendar. I have no objection to the House considering the bill today and support its passage as a compromise that meets the needs of all the concerned parties.

Mr. Speaker, the expedited consideration of this bill is done in light of the severe time restrictions which are now present. However, if any of the provisions of this bill relating to matters within the jurisdiction of the Committee on Agriculture should become an issue with the Senate, I intend to request that the Agriculture Committee be represented in any conference which may be held.

Mr. SEIBERLING. Mr. Speaker, I reserve the balance of my time.

Mr. LUJAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in qualified support of this legislation.

This legislation, as originally introduced, was to set aside 17,000 acres in the Irish Wilderness as the Irish Wilderness. In a true bipartisan way, in the Committee on Interior and Insular Affairs, the gentleman from Louisiana (Mr. HUCKABY) offered an amendment that would have reduced that to 13,000 acres. The gentleman from Arizona (Mr. MCNULTY) then put 2,000 acres back in, so it results now in a wilderness area of about 15,000 acres.

Mr. Speaker, there is one concern that I have in how we handle wilderness legislation, and this is probably a prime example. The Irish Wilderness or, rather, this particular area has a lead production capacity equal to about 90 percent of all the lead production in the United States. I have heard it said that as a matter of fact it is 15 percent of the entire world production of lead. Yet we find ourselves, in designating wilderness areas, disregarding that completely. We disregard the natural resources that exist, the richness that exists in resources in various areas, and there is always an attempt to make it a wilderness area whether it has any mineral value or whether it does not.

In this particular case, with bipartisan support, we were able to pinpoint certain areas that are truly rich in mineral potential. There is a lot of lead mining going on in the area. The maps that we saw indicated that there is a good likelihood that with regard to those 2,000 acres that were set aside to see if there is any potential there, the indications are that there is some there. Only time will tell, only exploration will tell whether there is or there is not.

So, Mr. Speaker, I do rise in support of this legislation and urge my colleagues to support it also.

Mr. EMERSON. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Missouri.

Mr. EMERSON. Mr. Speaker, the area in question here, the Irish Wilderness, lies entirely within the Eighth Congressional District of Missouri, which I have the honor and the privilege to represent, and I want the record to show, and show quite clearly, that it is not I who am sponsoring this legislation. I certainly would prefer to leave the entire Irish Wilderness in its current multiple use status and under the exemplary management of the Forest Service. That has always been my position, and it remains my preference.

However, if I have to give up something in the neighborhood of 15,000 acres in order to preserve the economic hopes of thousands of my constituents, I will do so. That is what compromise is all about, and I am anxious to be a part of an acceptable compromise on this issue. We have been talking throughout the debate on this matter, and this is not the first time it has been up for consideration in this House. We had the rule up last year, and it was defeated. We have had lengthy field inspection trips, and we have had hearings in the subcommittee and the full committee this year.

We have largely been talking about 17,500 acres, and in a bipartisan compromise in the Committee on Interior and Insular Affairs last week we took 15,000 plus acres out and said, "OK, this will be wilderness. Let us save somewhere in the neighborhood of 2,000 acres, that which has been designated or determined to have the highest mineral potential. Let us save that for exploration and potential development."

Now, the action of the committee last week was certainly not a total victory for me, nor was it a total victory for the wilderness proponents. It was, however, in my view, a partial victory for all interests, and I hope as such it was a victory for the public interests.

□ 1630

We have through the action taken by the full Interior Committee, I believe, preserved the economic hopes of the people of Oregon County and the surrounding areas, because what we are saving out from the wilderness is that part of the proposed wilderness which appears to have the greatest mineral potential.

So I am hoping that all sides of this issue will let the matter rest where we have now arrived at and that there will not be further attempts in conference to cut back further on that which is going to be reserved for potential economic development.

Mr. Speaker, I am not going to take a lengthy amount of time here this afternoon to go into all the issues related to the Irish Wilderness. It may well be that we will have another opportunity when this bill comes back from conference to talk further about that, depending on how the conference comes out; but I would also like the record to show and to alert my colleagues in the House that through the deliberations of the subcommittee and the full committee, we have arrived at what I think is a very, very generous compromise.

I hope that we may back away from the all or nothing attitude that the proponents of wilderness designation have been putting forth.

Now, I just want to take a minute or two here to make a couple points. Under the Wilderness Act of 1964, this area, this potential wilderness area, does not by any standard of definition

meet the wilderness criteria. It is not roadless. It is not pristine. It is not untrammeled by man. Much has been made of the point that most of the newspapers in Missouri and, quite frankly, I am never quite sure who newspapers represent, other than the opinion of the editorial writer, which is, you know, maybe we have a hundred dailies in Missouri. I am not sure of the number, but if so, that would represent the opinions of a hundred people who write the editorials. I do not think that editorials necessarily connote subscription by all the readers of the newspapers; but we have had it bandied about that virtually all the newspapers in Missouri support the wilderness designation. I suppose the total readership of all the newspapers in Missouri would be several million people; but I think really these editorials in favor of the wilderness designation only represent the opinions of the editorial writers.

But let us get more specific. A lot has been said about the fact that the Missouri Wilderness Coalition represents 43 different wilderness environmentalists organizations in Missouri, with a total combined membership of something in the neighborhood of 40,000 people. Now, that is significant and I acknowledge the fact that those people deserve representation.

My dear friend, the gentleman from Missouri, my colleague (Mr. VOLKMER) is giving voice to those people, as are the cosponsors of the bill, the gentlemen from Missouri (Mr. CLAY and Mr. WHEAT), and the two Senators from Missouri; so there are five people fighting on behalf of the Missouri Wilderness Coalition; but I happen to represent the Eighth District of Missouri. There is no one else to give voice to the concerns, the economic considerations of the people in the four-county area of Oregon, Carter, Shannon, and Shipley, which have a combined population of about 40,000 people themselves.

So I find a bit spurious the reasoning that here we have got this wilderness coalition of 40,000 people and that they deserve the premier consideration for them to have this set aside as wilderness, for them to go down and have their annual hikes; but that very little attention should be given to the 40,000 people who live in the region surrounding the Irish, who are desperately in need of jobs and who want to see if indeed there are minerals beneath the Irish and, if so, if they could not be extracted.

Back on the newspaper point, virtually all the newspapers in Missouri do not support the designation. The newspaper of largest circulation within the Eighth Congressional District, the Southeastern Missourian, has said that there are interests to be balanced here and they thought in their editorial judgment last week that the compromise struck by the Interior Committee was a good one.

Also, the St. Louis Globe Democrat said that there are interests to be balanced and that one side or the other here should not necessary prevail.

So I would come back to my point. I do not think we have had in the Interior Committee a victory for all one side or all the other side. I think in giving up something in excess of 15,000 acres to the wilderness and preserving something a little less than 2,000 acres for potential mineral exploration and development is necessarily equitable and fair; but I think that my people and I can live with that. I just hope that this all-or-nothing attitude does not persist and that we may proceed to have a reasonable conference with the Senate, which has taken the all-or-nothing position in their passage of their bill (S. 64).

So I hope that as we go to conference with the Senate, assuming that this bill passes today, and it will pass, I trust, and I will support it in the spirit of compromise. I just hope and trust that when we go to the Senate, we may stand up for the House position, because I believe that the people of Oregon County and the surrounding areas have already paid their dues vis-a-vis this issue.

Mr. ROBERTS. Mr. Speaker, will the gentleman yield?

Mr. EMERSON. I am glad to yield to my friend, the gentleman from Kansas.

Mr. ROBERTS. Mr. Speaker, I am not a member of the committee, but it would be my observation that many times when we get to a position like this in the House, why this all or nothing attitude that the gentleman refers to is usually taken by editorial writers or perhaps Members of this body who do not reside in that congressional district.

I know from a personal friendship with the gentleman how long and how hard he has fought for a reasonable compromise. He has mentioned the number of acres here, 15,000 acres which are going to be committed to wilderness, only 2,000 acres would be then available for some mineral rights in that regard.

I would just hope that the conferees would back the House position. It is a reasonable compromise for the folks in that district and I think certainly a reasonable compromise for the environmentalists in Missouri as well.

I compliment the gentleman for his efforts.

Mr. EMERSON. Mr. Speaker, I thank the gentleman for his comments.

Mr. SEIBERLING. Mr. Speaker, I yield 7 minutes to the gentleman from Missouri (Mr. VOLKMER).

Before I do, I would like to commend the gentleman for the leadership that he has shown in attempting to get this bill in final form. We would not have the progress that we have had if it had not been for his efforts, along with that of several others in the Missouri delegation.

Mr. VOLKMER. Mr. Speaker, I first wish to commend the gentleman from Ohio for the diligent work that he has done with the Irish Wilderness, not only this year, but last year and in previous times in attempts to designate the approximately 17,000 acres in Oregon County in the State of Missouri, presently a part of the Mark Twain National Forest, as the Irish Wilderness in Missouri.

I know that many Members other than the freshmen Members have heard the discussion last year as to how the Irish Wilderness came about; but I think a short brief summary should be noted, that back in the early 1800's a group of Irishmen, led by an Irish priest, looking to find an area outside the St. Louis metropolitan area to farm, since they were basically mostly multifamily settlements in this area; but it was during the Civil War. At that time when marauders from other parts made it uninhabitable for them to stay there, they had to leave.

As a result of their locating there, though, we got the name of the Irish. The wilderness formed up around it and then in the 1930's the National Forest Service started acquiring the land.

It is not new, it may be new to some Members, that this land was to be designated or wished to be designated as wilderness; but it goes back in Missouri again to the 1930's when people were starting to talk about setting it aside because of its beauty to be made a wilderness area.

It was in the 1940's that the first articles were written in Missouri, articles in Missouri periodicals about the Irish Wilderness and how it should be preserved.

I am just one of many in Missouri who have worked for the protection of this preeminent wilderness area in the State. In the 1930's conservationists began suggesting that the area should be spared from development.

In 1937, the area was designated as a wilderness refuge.

Then strong concerns were expressed for the protection of the Irish by the Forest Service in 1971. They proposed special management.

Nearly 20,000 acres in 1974 were recommended for the designation of the Irish as an Eastern wilderness.

During the roadless area review and evaluation of RARE II, the Irish received the highest wilderness quality rating of any area in the State of Missouri. Throughout the struggle to achieve wilderness designation for the Irish, we have encountered stiff opposition.

Because of the possibility, and I say possibility, for lead mining in some of the area, as well as a great deal of the Mark Twain National Park in southern Missouri generally, the proposed wilderness has been reduced from time to time. The 20,000-acre special management area of 1971 was reduced to 19,000 acres when the Forest Service recommended designation in 1974.

□ 1640

The bill was reported by the Committee on Interior and Insular Affairs last year and passed by the other body last year and again this year but covered a smaller area, about 17,500 acres. This modest area has been further reduced by the amendment of the Committee on Interior and Insular affairs this year by another 2,000 acres.

I am going to support the bill. I am disappointed in the Interior and Insular Affairs Committee amendment because, as I said before, it has been constantly reduced in size. I take the position that the land, if it does not contain lead, will remain there. The lead mining company primarily interested in it has reserves in its present operations to last at least until the year 2000 and maybe beyond, depending on the amount of demand for lead.

We also have 45 miles between this area and where they are and a lot of the area in the Mark Twain National Forest and right outside of it and along the Viburnum Belt has been applied for licenses by that company.

The probability is there will be lead found outside to the wilderness that would be exploited long before we need this, and we may be 30 or 40 years before they will ever get to lead mining in this area.

The idea of a raised potential for a great amount of employment, et cetera, as a result of setting aside this additional 2,000 acres I think is wrong. I would much rather preserve it as wilderness and then if they needed the lead in the future generations the Congress could come back then and say this is the only possibility of lead in the United States and let us open it up.

Yes, I would agree to open it up if I was still here. I would not disagree with that.

But the idea of possibly tearing it up, you can never replace a wilderness and make a wilderness out of it.

But I would like to read a little letter that I just received. I am sorry the gentleman from Kansas has left because it is from the State of Kansas, from Prairie Village, Kans. It says,

Dear Sir, this spring my father and me went backpacking in Irish Wilderness. I am 9 years old. Please save the Irish Wilderness because it is such a beautiful place. When I grow up I hope I can take my children there, too. Sincerely, Heather Houston.

I think that tells the story of most of the people in the State of Missouri.

Mr. EMERSON. Will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Missouri.

Mr. EMERSON. Has the gentleman received any letters from his district on this?

Mr. VOLKMER. I would say to the gentleman, I was out in my District yesterday and I went to two meetings in my district. I had a number of people—because it has got quite a bit of publicity in my district—I had a number of people come up and ask me how the bill was going because they felt we should preserve the Irish Wilderness.

I have received only one letter from my district in opposition to my position. Many more the other way.

Mr. EMERSON. If the gentleman would yield further, I have received petitions bearing the signatures of thousands of my constituents and many hundreds of letters in addition in opposition to this wilderness designation.

But I want to take this opportunity to thank the gentleman from Missouri for his profound interest in southeast Missouri. I hope he will give us his help on the occasions when we would like to have it as well as those in which we would really like to resist.

But, in addition, if I may, and I will get the gentleman additional time if he wants, just to rebut a couple of points, back to my point about this not meeting the criteria of wilderness under the 1964 Wilderness Act except as Congress on individual wilderness acts changes the criterion from time to time. The gentleman says we should not have a mine in there because it would permanently damage the land.

Not so. There was an iron mine in the area.

The SPEAKER pro tempore. The time of the gentleman from Missouri (Mr. VOLKMER) has expired.

Mr. LUJAN. Mr. Chairman, I yield such time as he may consume to the gentleman from Missouri, (Mr. EMERSON).

Mr. EMERSON. There was an iron mine there in the early 1900's and in 1980 they cannot even find it, the area so lends itself to be reclaimed by nature.

The gentleman makes a point about how beautiful it is. It is beautiful. It was once burned off and used for grazing. It is beautiful because it has been managed back to good health by the excellent management of the Forest Service.

I would maintain that we would be better off leaving it in its current multiple use status, well managed, so at least we could fight forest fires and take out timber that gets knocked down occasionally, as it does, such as we had a tornado in there last winter and about $30,000 worth of good timber is lying on the ground there now.

I offered an amendment in the subcommittee to try to get that removed in accordance with the established practices of the Forest Service but the gentleman from Ohio prevailed in his argument on the committee on the ground that the humus for the insects was more important than any economic good that can come from extraction of $30,000 worth of timber lying there rotting.

So that this is a pristine area and you are counting it as such, it is not. There are railroad beds in there. There are seven ponds in there that were man-made to provide water for steam for the engines that used to haul the logs out of there.

Now that activity does not go on anymore. It is a beautiful area. No one denies that. I have said that all along.

The local people are anxious to protect this area but they also want some opportunity for economic development.

So I think we have arrived at a reasonable compromise here. We have given up 15,000, a little better than 15,000 acres. We have about 2,000 left for mineral exploration and potential development and I think really that the House ought to stick to its guns when we go to conference with the other body.

Mr. VOLKMER. If the gentleman would yield, I only want to close and say in passing that it is my understanding that if we did have a vote on this that both the gentleman from the Eighth District of Missouri and I would both support the bill as it presently stands on the floor; is that correct?

Mr. EMERSON. As it presently stands, I intend to vote for the bill.

Mr. TAYLOR. Mr. Speaker, will the gentleman yield?

Mr. EMERSON. I yield to my colleague from Missouri.

Mr. TAYLOR. I thank the gentleman for yielding.

I would just like to say that first of all I want to express my appreciation to the chairman of the subcommittee for going to Missouri and holding hearings. To respond to my colleague from Missouri relative to his letter from Prairie Village, Kans., the little girl that said she appreciated the wilderness area of the Irish that she was in, actually she was not in the Irish, she was in the national forest, because it is still not a wilderness area.

And it is beautiful in its present condition as a national forest.

But I certainly think that our colleague from Missouri, the Representative of that district, has made a very reasonable overture in his willingness to accept what came out the committee with the 2,000 set aside out of the 17,000 acres.

I just hope that in the spirit of compromise, and our chairman of the subcommittee did say in St. Louis, and is quoted as saying he thought a compromise could be reached, and I think the exact quotation was that he hoped we could have our cake and eat it too, and I think the way it came out of the committee is an opportunity to fulfill that, to have our cake and eat it, too, with 15,000 being set aside for wilderness designation and 2,000 set aside which would still be available for exploration for the people who live in that area and who have a concern for this.

So I am hopeful that this will pass the House in its present form. I will support it.

I hope our conferees will support the House position in conference so that we may be able to support it when the conference report comes back.

If it comes back in this form I am sure we will support it. Otherwise I think we may have no alternative than to oppose the conference report and I thank the gentleman for yielding.

Mr. SEIBERLING. Mr. Speaker, I yield 2 minutes to the gentleman from Arkansas (Mr. ALEXANDER), the distinguished deputy whip on the Democratic side.

Mr. ALEXANDER. I thank the gentleman for yielding

Mr. Speaker, I am proud to be a cosponsor in the House of S. 64, the Irish Wilderness bill. The gentleman from Missouri (Mr. EMERSON) has laid claim to the affected area as belonging to his district, and I would presume to claim a relationship to it, too—both through the fact that Eleven Point Scenic River weaves its course—and its spell—through my district, and because the Irish Wilderness Area was the scene of an unforgettable boyhood experience of mine.

I can recall exploring the Mark Twain Cave in the wilderness area, and, locked there among the stalagmites and stalactites, I relived "Tom Sawyer" through the mind, I thought, of Tom himself and Becky Thatcher. No child in America should be deprived of the opportunity for such an adventure, and, surely, Twain's masterpiece, with the gripping scene of Tom and Becky lost in the cave foremost, is still one of the books that every American boy and girl reads.

I remember, too, listening to the lore and legends of the Irish Wilderness and tracing the springs back to their headwaters. One of the legends is that one of the rivers disappears into a cave, and is thought to be the source of Mammoth Spring, the largest such natural wonder in the world.

Twain had it right, and the truth that he based his novel on was both stranger and more exciting than any fiction, even his own.

Our Nation is caught these days in a dilemma. We must continue to explore natural resources for our society's exploitation and development. But we have learned that our human needs are equally dependent on a preservation of the natural heritage, and it is imperative that we safeguard as much of our God-given legacy as possible. The Irish Wilderness is preeminently worth preserving. After all, every kid needs a place to dream.

I commend the Interior and Insular Affairs Subcommittee for a Solomonlike decision, which makes this bill satisfactory to both the environmental minded and those who see illegitimate and needed possibilities for development in the area.

All in all, I think Mark Twain would be pleased. As someone who stood in for Tom Sawyer on a memorable day once, I certainly am.

□ 1650

Mr. SEIBERLING. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. LUJAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri (Mr. EMERSON).

Mr. EMERSON. Mr. Speaker, I want to thank the gentleman for his expression of interest here. Our districts do adjoin. He is close to that part of the district. Oregon County borders on Arkansas, Mr. ALEXANDER's district there. Let me say to my friend from Arkansas, we are not talking about destroying anything here; we are not talking about something not being preserved for generations to come. The Eleven Point River, the caves, the caves are well protected in the bill that is before this House.

As a matter of fact, in the full Interior Committee we took a great deal of territory out that had been proposed to be left in for exploration and development; White Creek Cave, which I believe is the most prominent cave, at least it was the one that the subcommittee chose to visit, is well preserved as wilderness.

So, I can agree with an awful lot of what the gentleman from Arkansas had to say. I also want to reiterate the point that I think in the compromise the full Interior Committee has struck, we have given up a lot for wilderness, we have preserved that which offers up the best potential for mineral exploration and development.

This is a compromise everyone ought to be able to live with.

So, I thank the gentleman for his support of this bill. I intend to support it myself and just hope that the Senate does not try to wear us down further.

Mr. LUJAN. I yield back the balance of my time.

● Mr. BIAGGI. Mr. Speaker, as chairman of the Ad Hoc Congressional Committee for Irish Affairs I am pleased to lend my support to S. 64 to designate more than 15,000 acres within the Mark Twain National Forest in Missouri as the Irish Wilderness Area.

While I have never had the pleasure of visiting this particular area, accounts I have heard indicate that this is truly one of the most beautiful and unspoiled of all forest areas in the United States of America. It therefore comes as no surprise that the Irish American community seeks to have this area designed as the Irish Wilderness Area.

I wish to acknowledge the active support and work done by the Ancient Order of Hibernians the oldest and largest of all Irish American organizations on behalf of this legislation. I have enjoyed a long and fruitful relationship with the AOH in the almost 6 years that I have served as chairman of the Ad Hoc Congressional Committee for Irish Affairs.

I am especially pleased to acknowledge the activities of former national president of the AOH, Jack Keane from the great State of Missouri. It was during Jack Keane's term as president that the ad hoc committee was established—and it was at his urging that I became chairman. Jack Keane has worked tirelessly on this legislation and I hope his efforts will be rewarded with the passage of this legislation.

Ireland is a land of great and natural beauty. The Irish Wilderness Area would be in that same tradition and let us honor the Irish American community of this Nation with the passage of S. 64.●

● Mr. WHEAT. Mr. Speaker, I rise in support of S. 64. I want to express my appreciation to my distinguished colleague from Missouri on this side of the aisle (Mr. VOLKMER) and the distinguished chairman of the Public Lands Subcommittee (Mr. SEIBERLING) for bringing this legislation to the floor.

Mr. Speaker, the Irish Wilderness is properly referred to as the "crown jewel" of Missouri's wilderness. It is without question the clearest and strongest expression of Ozark landscape, geology, and natural beauty. The Missouri Wilderness coalition says of the area: "The Irish is the best of its kind and the last of its kind."

It seems to me that the last point is extremely important. The Ozarks have already been severely scarred by roads, dams, mines, and fields. Passage of this legislation would restrict commercial exploitation of the area and preserve for future generations a small fragment of this treasured land.

Currently, thousands of Missourians and out-of-State visitors enjoy hiking, camping, fishing, canoeing, and other outdoor recreational pursuits in the Irish Wilderness. It would be irresponsible of us if we did not insure that

future generations have the same opportunity to walk in and enjoy the pristine beauty of the Irish.

Legislation to preserve the Irish Wilderness has already been approved in the other Chamber. Passage by this body would end a 10-year effort to place the Irish under the National Wilderness Preservation System. All Missourians have waited a long time for this legislation. I urge my colleagues to support the legislation. We need the Irish Wilderness because our children and grandchildren must have a place to see nature in its undisturbed glory, a place where man visits but does not stay.●

● Mr. WHITLEY. Mr. Speaker, I would like to concur with the fine statement just given by my chairman. As chairman of the Subcommittee on Forests, Family Farms, and Energy, I share Chairman DE LA GARZA's concern that the Agriculture Committee maintain its jurisdiction as described in the House rules. However, in the interest of time, and with the assurance that the individual Members who are affected by this legislation are in full support of its passage, I have no objection to the House considering it today.

Further, Mr. Speaker, I would like to report that this bill does indeed represent a workable compromise to the wilderness needs of Missouri, and I urge its passage.●

● Mr. GEJDENSON. Mr. Speaker, I rise in support of S. 64, the Irish Wilderness Act of 1983. People who have had the opportunity to experience the pristine beauty of the Irish Wilderness invariably return, again and again, to this unique and spectacular region. In this Ozark Mountain preserve, one finds a vast array of foliage and wildlife which is unparalleled in the United States. Irish Wilderness is a botanist's paradise, as it is abundant in rich soils, timber, and flowers. Wildlife is varied and plentiful, and the many rivers and streams are ideal for canoeing, hunting, fishing, and camping. In eastern Connecticut, we are especially sensitive to the need to preserve such pristine lands, and approach natural resources with a sense of ecological responsibility. We recognize the significance of the "only chance for preservation of wilderness in southern Missouri."

At the turn of the century, large timber companies exploited the Irish Wilderness, leaving a barren wasteland in their wake. However, due to the foresight of the National Forest Service in the thirties, a forest has been regenerated. Unfortunately, the St. Joe Mining Corp., along with other private companies, has applied for a permit to explore the area for mineral resources; namely lead. Such a permit would mean degradation and destruction of the Irish Wilderness, and threaten the natural environment therein.

The area which S. 64 seeks to protect is a mere 18,000 acres, and constitutes only 18 percent of the total for which St. Joe Mining Co. has sought a permit to explore. In fact, there is an abundance of unexplored, potential mining land outside of the region. Furthermore, the mines which are presently being utilized by the St. Joe Mining Co. have a lead supply which is estimated to last until the year 2020.

Although it has been argued that new mineral exploration might lead to jobs for Oregon County residents, Senator EAGLETON points out that the existence of lead in the Irish Wilderness is a speculative proposition. There may not be any lead at all. Since lead is not a scarce mineral, it is imperative that we restrain exploitation of the region until such time as we do face such scarcity. Congress could then reassess the "wilderness" status of the "Irish" based on investigations and inventory taken while the land was a wilderness preserve. Furthermore, extensive drilling in adjacent lands will prove quite informative as to the probability of finding lead in the Irish Wilderness, should the need for additional lead arise in the future.

As for the economy of Oregon County, and the region in general, it is unlikely that there will be an increase in employment due to lead mining. There is already a steady downward trend in the demand for lead. On the other hand it has been postulated that a wilderness preserve would attract visitors to the region, who would, in turn, contribute to the economy of Oregon County.

The Irish Wilderness is an "area with unique natural and historic value," which far exceeds that of short-term mining interests. In the last 10 years, the Senate has thrice passed legislation to protect the region by unanimous consent. The House of Representatives should join this recent effort to support future environmental needs, and long-term ecological concerns.●

● Mr. CLAY. Mr. Speaker, I rise in strong support of S. 64, the legislation designating Missouri's Irish Wilderness as part of the National Wilderness Preservation System. The Irish Wilderness is the largest, undisturbed, near pristine ecosystem left in the State of Missouri; and Missourians have fought for more than a decade to see this land preserved as part of our Nation's wilderness system.

The 15,500 acres of proposed wilderness designation is located in the 11 point river country of southern Missouri. The region offers an abundance of attractions that no institution of modern society can ever hope to replicate. The diversity of biological communities, both terrestrial and aquatic, results from the coordination of geology, topgraphy, soils, plants, and animal life. The interesting flora and fauna and impressive geological features, like the Whites Creek Cave and Fiddler Spring, have long been appreciated by Missouri campers, hunters, and bikers. In recent years, the Irish has become better known and appreciated by the residents of our State and statistics show a 100-percent increase in recreational visitors since 1975. The beauty of the area is beyond dispute.

In addition, the Irish Wilderness plays an important role in our State's heritage and the culture of Irish-Americans. The region's name derives from its earliest settlers, a band of Irish immigrants who came to settle in Missouri's countryside and escape the famine that plagued their homeland in the mid-19th century.

Earlier this year, the Senate gave overwhelming approval to S. 64. Most of Missouri's major newspapers have endorsed this legislation. I believe it is of the utmost importance that we act to protect and preserve this invaluable piece of natural history from the pressures of modern-day civilization. The Irish Wilderness is an invaluable piece of land that we cannot ever afford to lose. As a society, we are only beginning to understand the high price we pay for narrow future vision. Congress has a responsibility to protect the environment—upon which every individual is equally dependent. There is no reason to deny this legislation, but there is every reason to designate the Irish Wilderness a component of the National Wilderness Preservation System. I encourage my colleagues to support this bill.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING) that the House suspend the rules and pass to the Senate bill, S. 64, as amended.

The question was taken.

Mr. EMERSON. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

CORRECTING PUBLIC LAW 98-63 DUE TO ERROR IN ENROLLMENT OF H.R. 3069

Mr. YATES. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House of the joint resolution (H.J. Res. 338) to correct Public Law 98-63 due to an error in the enrollment of H.R. 3069.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the joint resolution as follows:

H.J. RES. 338

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to correct an error in the enrollment of H.R. 3069, the following paragraph is inserted after the first paragraph under the heading, "Department of Education, Student financial assistance" on page 32 of Public Law 98-63:

"EMERGENCY SCHOOL ASSISTANCE

To enable the Secretary of Education to comply with the order issued in U.S. District Court in the Case of the United States of America v. the Board of Education for the City of Chicago (80 C 5124) there is hereby appropriated $20,000,000 to be derived by transfer from available balances in the current appropriation for 'Guaranteed student loans'."

Mr. YATES. Mr. Speaker, on Friday I offered a motion to the student financial assistance portion of the Labor, Health and Human Services and Education chapter of the 1983 Supplemental Appropriation Act.

The amendment which I offered to an amendment which was in disagreement was approved by the House. But, unfortunately, it was not included in the enrolled bill that was sent to another body. The bill that I offer today seeks to correct that error by making the amendment a part of the bill that became Public Law 98-63. It has been cleared by the minority, Mr. Speaker.

Mr. O'BRIEN. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield to the gentleman.

Mr. O'BRIEN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, this has been cleared on this side. We have no objection.

Mr. YATES. Mr. Speaker, I thank the gentleman from Illinois for his courtesy and graciousness and for having come over here.

I really appreciate it. Mr. Speaker, I ask for adoption of the resolution.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and motion to reconsider was laid on the table.

RAILROAD RETIREMENT SOLVENCY ACT OF 1983

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 286 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 286

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1646) to amend the Railroad Retirement Act of 1974, and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce and one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered for amendment under the five-minute rule. In lieu of the amendments recommended by the Committee on Energy and Commerce and Ways and Means now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill H.R. 3619, said substitute shall be considered as having been read for amendment, and all points of order against said substitute for failure to comply with the provisions of clause 5(a), rule XXI are hereby waived. No amendment to the bill or to said substitute shall be in order except the following amendments, which shall not be subject to amendment except as herein specified: (1) Amendments recommended by the Committee on Energy and Commerce and Ways and Means: (2) the amendment printed in the Congressional Record of July 25, 1983, by, and if offered by, Representative Florio of New Jersey or Representative Schroeder of Colorado inserting a new section 419 in said substitute, and said amendment shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Florio and a Member opposed thereto; (3) the amendment printed in the Congressional Record of July 25, 1983, by and if offered by, Representative Pickle of Texas to said substitute, said amendment shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Pickle and a Member opposed thereto, and said amendment shall be subject to the amendment printed in the Congressional Record of July 25, 1983, by, and if offered by, Representative Florio of New Jersey, said amendment shall be debatable for not to exceed thirty minutes, to be equally divided and controlled by Representative Florio and a Member opposed thereto, and all points of order against said amendment are hereby waived; and (4) amendments printed in the Congressional Record of July 26, 1983, by Representative Ridge of Pennsylvania and if offered by Representative Florio of New Jersey or Representative Rostenkowski of Illinois and each said amendment shall be debatable for not to exceed fifteen minutes, to be equally divided and controlled by Representative Florio and a Member opposed thereto. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

□ 1700

The SPEAKER pro tempore. The gentleman from Michigan (Mr. BONIOR) is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 286 provides for the consideration of H.R. 1646, the Railroad Retirement Solvency Act which amends the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974. In order to bring this very important legislation to the floor of the House of Representatives for expeditious consideration, House Resolution 286 provides for a modified closed rule allowing 2 hours of general debate. One hour of debate shall be divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means and the other hour shall be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce.

In lieu of amendments offered by the Committees on Ways and Means and Energy and Commerce printed in the bill (H. Res. 286) provides for the consideration of H.R. 3619 as an amendment in the nature of a substitute. In order to consider H.R. 3619 as an amendment in the nature of a substitute, it was necessary for the Committee on Rules to waive points of order against the substitute pursuant to clause 5(a) of House rule XXI which prohibits appropriations in a legislative bill. This waiver is necessary because the substitute in several sections contains language which technically would be classified as an appropriation.

House Resolution 286 also makes in order the consideration of amendments to H.R. 3619 offered by the Committee on Ways and Means and the Committee on Energy and Commerce. These amendments shall not be subject to amendment and shall be debated under the 5-minute rule.

House Resolution 286 further provides for the consideration of an amendment printed in the CONGRESSIONAL RECORD of July 25 by Repre-

sentative PICKLE. Representative PICKLE's amendment is debatable for not to exceed 30 minutes to be equally divided and controlled by Representative PICKLE and a Member opposed to the amendment. Representative PICKLE's amendment shall not be open to amendment except by an amendment offered by Representative FLORIO which shall also be printed in the CONGRESSIONAL RECORD of July 25. Representative FLORIO's amendment shall be debatable for up to 30 minutes to be equally divided and controlled by Representative FLORIO and a Member opposed to the amendment. Representative FLORIO's amendment is not amendable. House Resolution 286 also waives all points of order against the Florio amendment to the Pickle amendment.

House Resolution 286 also allows for the consideration of an amendment printed in the CONGRESSIONAL RECORD of July 25 by Representative FLORIO. This amendment may be offered by Representative FLORIO or Representative SCHROEDER. It adds a new section 419 to the substitute. This amendment is not amendable but is debatable for 30 minutes to be equally divided between Represenative FLORIO and a Member opposed thereto.

House Resolution 286 further allows for the consideration of two amendments printed in the CONGRESSIONAL RECORD of July 26 by Representative RIDGE if offered on the floor by Represenative FLORIO or Representative ROSTENKOWSKI. The amendments shall be debatable for no longer than 15 minutes each with the time equally divided and controlled by Representative FLORIO and a Member opposed to the amendments. The amendments shall not be open to further amendments.

Finally, House Resolution 286 provides for one motion to recommit with or without instructions.

Mr. Speaker, on February 18, 1983, the Railroad Retirement Board announced that, without congressional action, it would have to reduce tier II benefits to railroad retirees by 40 percent on October 1, 1983, and by an estimated 80 percent on October 1, 1989. This action would decimate the financial stability of 1 million railroad retirees. The legislation we have before us today provides a reasonable method of averting this catastrophe by providing sufficient financial resources to pay current and future benefits.

H.R. 1649 was sequentially referred to the Committee on Ways and Means and the Committee on Energy and Commerce. The two committees' version of the bill have been combined in H.R. 3619 which will be offered as an amendment in the nature of a substitute. House Resolution 286 provides for the consideration of amendments to the substitute from the two committees as well as four additional amendments.

Mr. Speaker, House Resolution 286 is a fair rule which will facilitate adequate and orderly debate on legislation of utmost importance to many of this Nation's retired people who are depending on the wisdom of this body to maintain their financial stability and permit individual dignity. Without further comment, I move the adoption of House Resolution 286.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, our railroad retirement system is facing a great crisis. Unless we take action on this measure and pass the bill on the floor of the House as speedily as possible, more than 1 million retirees will suffer.

By October 1, tier 2 benefits will be cut by 40 percent. By October 1, 1984, the reduction will double to 80 percent.

So I would urge the House to support this rule which is crafted to get the job done. Even though it is a modified closed rule, I support it. I urge the adoption of the resolution and adoption of the bill when it comes to the floor of the House.

Mr. GEKAS. Mr. Speaker, will the gentleman yield?

Mr. QUILLEN. I am happy to yield to the gentleman from Pennsylvania.

Mr. GEKAS. Would the gentleman explain and perhaps the gentleman from Michigan would care to answer.

The gentleman from Michigan indicated that in the sequential referral to Ways and Means that a substitute bill was the outcome and that is going to be presented.

Am I to take from that that the gentleman's committee—not the Rules Committee—but the original committee—where did this go originally, may I ask?

Mr. BONIOR of Michigan. If the gentleman will yield, with the Energy and Commerce first.

Mr. GEKAS. Before it came to Rules? And then in sequential motion it went to Ways and Means; is that correct?

Mr. BONIOR of Michigan. It went to Energy and Commerce, then to Ways and Means, and then to the Rules Committee.

Mr. GEKAS. But the substitute one that we are going to be considering later is the product of the Ways and Means Committee; is that correct?

Mr. BONIOR of Michigan. It is a compilation. It is a product of both committees.

Mr. GEKAS. Both committees. Then the question is answered. Then I am to take it that the substitute rule is a product of an agreement between the Ways and Means Committee and the committee that had the original jurisdiction.

Mr. BONIOR of Michigan. The gentleman is correct.

Mr. GEKAS. All right. That is what I wanted to know.

I thank the gentleman.

Mr. QUILLEN. Mr. Speaker, I have a number of retirees in my district. I think this legislation is most important. Nationwide a million retirees will suffer unless we do something.

I commend this to the membership. I have no requests for time and I yield back the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 286 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1646.

□ 1710

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1646) to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes, with Mr. BONIOR of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Jersey (Mr. FLORIO) will be recognized for 30 minutes; the gentleman from North Carolina (Mr. BROYHILL) will be recognized for 30 minutes; the gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 30 minutes; and the gentleman from New York (Mr. CONABLE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the House today is considering H.R. 1646, the Railroad Retirement Solvency Act of 1983.

As we all know, passage of this bill is absolutely crucial to insuring the continued solvency of the Railroad Retirement System. One million retirees depend upon this system for their livelihood. If corrective action is not taken, these 1 million retirees will see their tier II benefits reduced by 40 percent on October 1. This reduction would grow to 80 percent on October 1, 1984. We just cannot let this happen.

In response to this serious crisis, rail labor and management negotiated an agreement in February on changes in the system to assure its solvency. Shortly thereafter, I introduced H.R. 1646, to provide for the solvency of this system, which also incorporated most of the changes suggested by labor and management. This legislation was reported out of the Energy and Commerce Committee in early March.

The legislation had also been referred to the Ways and Means Committee. That committee made certain changes in the legislation, primarily involving taxes and the railroad unemployment insurance system, and reported out the bill on July 1.

Since then, the two committees have agreed on a joint substitute, which was introduced by myself, Mr. PICKLE and Mr. FORD last Thursday as H.R. 3619. The rule makes the text of this substitute in order as an amendment in the nature of a substitute for H.R. 1646, to be considered as original text for purposes of amendment.

This bill is a difficult compromise. Labor and management have made concessions neither is happy with. Labor has sacrificed much in benefits. They are not happy that their members who retire in the future will receive reduced benefits.

Under this bill management will pay billions of dollars in new taxes. This is a difficult burden for an industry which is fighting to maintain its position in the transportation industry and faces strong competition. Management is not happy with these taxes and would prefer that they not be imposed. It is only because of the imminent disaster we face and the need to provide fiscal stability to the fund that we must impose this burden.

I will be offering an amendment later dealing with the change in the early retirement or 60/30 benefit proposed by labor and management. My amendment would phase this change in over several years to protect those close to retirement.

This is an important bill, and I urge the House's support.

I ask to include a summary of the substitute, as follows:

SUMMARY OF JOINT ENERGY AND COMMERCE AND WAYS AND MEANS SUBSTITUTE TO H.R. 1646

(H.R. 3619, introduced Thursday, July 21 by Congressmen Florio, Pickle, and Ford of Tennessee)

I. BENEFIT CHANGES (AS PER LABOR MANAGEMENT AGREEMENT) (ENERGY AND COMMERCE JURISDICTION)

A. 60-30 change

Under current law, individuals can retire at age 60 with 30 years service and receive full benefits. Under proposed change, individuals retiring before age 62 would receive a reduced Tier I benefit. (Mr. Florio will offer an amendment to phase this change in over several years to protect those close to retirement).

B. Tier II COLA delay

Tier II COLA scheduled for July 1, 1984 will be deferred to January 1, 1985, to be consistent with timing on Social Security COLA's.

C. Tier I COLA offset against tier II benefit

The Tier I COLA, up to one-time cumulative total of five percent, will be offset against the Tier II benefit. For example, the Tier I COLA in January will be 3.5 percent. The dollar amount of the increase in Tier I will be offset against the Tier II benefit. The same will occur with the first 1.5 percent of the Tier I COLA in January of 1985. In no event would this provision operate to reduce a Tier II benefit below ten dollars.

D. Conforming of annuity beginning dates

The beginning dates of annuities would be conformed to Social Security. For example, there would be a five month waiting period for disability annuities.

E. Conforming of student benefits

Student benefits under Railroad Retirement would be conformed to changes made in Social Security.

F. Conforming of retirement age

The Retirement age would be conformed to the long term changes made in Social Security.

G. Annualization of benefits

Benefit computations would be annualized to conform to the annualization of the taxable wage base in Title II.

II. TAX CHANGES (WAYS AND MEANS JURISDICTION)

A. Employee tier II taxes

Employee tier II taxes would increase as follows: Current, 2.00 percent; July 1, 1984, 2.75 percent; January 1, 1985, 3.50 percent; January 1, 1986, 4.25 percent.

B. Employer tier II taxes

Employer tier II taxes would increase as follows: Current, 11.75 percent; July 1, 1984, 12.75 percent; January 1, 1985, 13.75 percent; January 1, 1986, 14.75 percent.

C. Annualization of tax base

The tier I and tier II tax bases would be converted from a monthly to an annual base on January 1, 1985.

D. Taxation of tier II benefits

Tier II benefits would be subject to income tax like a private pension. Thus, benefits in excess of employee contributions would be includible in gross income. Revenue from this tax would be returned to the Railroad Retirement Account until the earlier of fiscal year 1989 or the amount of revenue transferred equals $877 million.

E. Taxation of dual benefits

Dual benefits would be subject to income tax like a private pension. Revenue would be returned to the Railroad Retirement Account until fiscal year 1989. After that, revenue would be returned to the Dual Benefits Payments Account.

F. Conforming of deposit schedules

The schedules for deposit of railraod retirement taxes would be conformed to Social Security on January 1, 1986.

G. Temporary repayment tax

A temporary repayment tax would be imposed on railroads between July 1, 1986 and September 30, 1990 to help repay the debt owed by the Railroad Unemployment Insurance Account to the Railroad Retirement Account. The tax will start at 2 percent of the first $7,000 in annual wages and will go up 0.3 percent each January 1.

H. Taxation of sick pay

Sick pay received under the Railroad Unemployment Insurance Act would be subject to income tax starting January 1, 1984, under the same conditions as other sick pay.

III. BORROWING AUTHORITY ADJUSTMENTS (ENERGY AND COMMERCE JURISDICTION)

A. Current borrowing against financial interchange

The Railroad Retirement system would be able to borrow on a current basis from the general treasury against the financial interchange payment owed by Social Security.

B. Borrowing of unemployment system from retirement system limited

The ability of the Railroad Unemployment Insurance Account to borrow from the Railroad Retirement Account would stop on September 30, 1985.

IV. OTHER BENEFIT-RELATED AMENDMENTS (ENERGY & COMMERCE JURISDICTION)

A Repayment of debt owed to system

The Railroad Retirement System would be repaid the debt owed it by the Treasury as a result of past underfunding of the dual benefit. This repayment would be made in three installments, on July 1, 1984, January 1, 1985, and January 1, 1986. Interest will accrue until date of payment.

B. Increase in waiting period for unemployment benefits during strike

The waiting period for receipt of railroad unemployment benefits during a strike would be increased from 7 to 14 days, effective January 1, 1984.

C. Surviving parents benefits conformed to social security

Surviving parents would be assured the same benefit they would receive under social security.

D. Deduction for military compensation eliminated

The deduction or offset for the receipt of compensation received for service connected disabilities would be eliminated.

E. Board transmits budget directly to Congress

The Railroad Retirement Board would be required to transmit its budget request and testimony directly to Congress.

F. Return revenue from uncashed retirement checks to system

The revenue from uncashed Railroad Retirement checks would be returned to the system.

G. Inspector general

An independent inspector general would be established for the Railroad Retirement Board.

V. OTHER AMENDMENTS (JOINT ENERGY AND COMMERCE/WAYS AND MEANS JURISDICTION)

A. Separate social security equivalent benefit account

A separate account would be established for the payment of social security equivalent benefits.

B. Annual report by board

The Railroad Retirement Board would be required to submit an annual report to Congress on the actuarial status of the retirement system.

C. Increase in monthly wage base for railroad unemployment insurance

The monthly wage base for the Railroad Unemployment Insurance System would be increased from $400 to $600 effective January 1, 1984.

D. Railroad unemployment compensation committee

A five member Railroad Unemployment Compensation Committee would be established for the purpose of reviewing all aspects of the railroad unemployment program and submitting a report to Congress no later than April 1, 1984 containing recommendations based on its review of the program and recommended adjustments in contributions and benefits which will enable the program to repay all loans from the Railroad Retirement Account by the end of the year 2000. There would be two labor representatives, two management representatives, and one neutral member.

Mr. BROYHILL. Mr. Chairman, I yield myself 7 minutes.

Mr. Chairman, I rise in support of this bill, the railroad retirement legislation. It is important that we pass this legislation as soon as we can. It is necessary in order to assure the continued financial integrity of the railroad retirement and unemployment systems.

It has already been pointed out in earlier debate that these two systems provide for the retirement benefits and the unemployment coverage of some 1 million retirees and 400,000 active workers, and these two systems at the present time are unable to meet their obligations, that is, the promises of benefits that have been made in the past.

Now, the railroad retirement system was originally supposed to be a pay-as-you-go pension system. But at the present time the system has a 3 to 1 ratio of retirees to active employees, that is, there are three people retired for every one person working. And unless this legislation is passed, it will be necessary for the Railroad Retirement Board which administers this program to cut back or reduce the private pension portion of each retiree's annuity by some 40 percent sometime this fall. As has been stated—we will not get into the parliamentary situation; I think Members understand that—a substitute bill has been agreed on, and that will be the bill that we will be using for purposes of amendment.

I would point out that, notwithstanding my support for this bill, I do feel constrained to voice to the Members of the committee and of the House my concern about some of the things that this bill lacks. This substitute is still not a perfect product even though it is, in my judgment, a vast improvement over the bill as it came out of the Energy and Commerce Committee.

It seems to me that we should be concerned about the unemployment part of the program. I had proposed during the deliberations and discussions on this bill, to try to come up with solutions for the problems with this system, that we try to resolve the problems that are facing the unemployment system. I was hopeful that railroad labor and management would take a more serious look at the suggestion that I brought forward.

Under the present system, railway workers are covered under a separate unemployment system. I had suggested that we work out ways to transfer the railway workers' coverage under the State unemployment system as opposed to their present coverage under the existing separate system administered by the Railroad Retirement Board. I believe that this would have enured to the benefit of railway workers and also railroad management.

In this regard, I would note that daily unemployment benefits are higher in 42 of the 50 States than under the separate railroad employment system. Now, beyond that, I think that some kind of transfer mechanism could have been worked out, could have been provided, that would have met any of the legitimate concerns not only of railroad labor and management but also the States.

Now, hopefully, the study committee that is provided in section 504, which has my support, will carefully review the merits of this proposal that I put forward and see if we cannot come back with modernizing the railroad unemployment system so that we will not have to be coming back here time after time to try to shore up the financial stability of that program.

Another suggestion that I put forward that is not incorporated in this bill that I think has merit and will continue to press for would have been provided greater freedom to railroad labor and management to collectively bargain over the type of private pension benefits that would be available to them in the future.

Now, our presence here today demonstrates that existing procedures show that Congress does play a very active and leading role in determining the level of benefits and the amount of revenue that are necessary to pay for these benefits.

I believe that we should be getting the Congress out of this system and permitting the railroad labor and management to collectively bargain over the benefits of their retirement system. I believe that with proper safeguards, the removal of the Federal Government as the third party to negotiations in what is a private pension plan is both a healthy and a desirable result that is achievable.

So, Mr. Chairman, I regret that these two reforms that I advocated are not in this bill but will continue working for them. But having said that, I support this bill, and I would urge that it be passed as quickly as possible so that we can have it signed into law to insure that those who are receiving benefits from this program are not going to be losing those benefits, which could happen if we do not act expeditiously.

□ 1720

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentlewoman from Maryland (Ms. MIKULSKI) a member of the subcommittee.

Ms. MIKULSKI. I thank the gentleman for yielding this time to me.

Mr. Chairman, one of the most important concerns of any employee is the knowledge that their retirement program is sound and secure. That is why the current threat to the solvency of the railroad retirement system demands our urgent attention. One million railroad retirement beneficiaries face immediate and permanent loss of railroad retirement benefits.

Congress must take immediate action. The railroad retirement system must be maintained to fulfill the needs of the railroad retiree. I believe that it would be a basic inequity to deprive people of the benefits that they worked for and contributed to. In this regard, let me make it clear that I am working to assure railroad retirees of a sound and viable railroad retirement program.

To avert this crisis, and achieve a sound railroad retirement system, certain sacrifices must be made (much like our experience with the social security system). We are asking the retirees and their spouses to bite the bullet. I know this leaves a bitter taste, but it is imperative that we rescue the railroad retirement system.

Rail labor and rail management have agreed upon a method to avoid this disaster. Their compromise is included in pending legislation, and consists of three major items: savings, taxes, and payment of Federal obligations. This legislation can return the railroad retirement system to solvency, and I will continue my efforts to work in that direction. Any plan will require all participants, the retirees, the employees, and management, to sacrifice in order to insure a sound retirement system. They have indicated their desire to work toward a solvent railroad retirement system, and now it is up to Congress to do its part.

I think railroad retirees and their families deserve a better deal than this—but given our tough economic times, this is the best deal we can get. I will vote for this legislation and will continue to work for a just and stable railroad retirement system.

Mr. BROYHILL. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. LENT) who is the ranking minority member of the subcommittee who played a very key role in the development of this legislation.

Mr. LENT. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of H.R. 1646, the Railroad Retirement Solvency Act of 1983 and want to commend the gentleman from New Jersey (Mr. FLORIO) and the gentleman from

North Carolina (Mr. BROYHILL) for their leadership.

As most of us know, the railroad retirement system is again in serious financial difficulty. Employment assumptions used in 1981 have, as many of us believed at the time, proven to have been overly optimistic.

Although I have several reservations about H.R. 1646, enactment of this legislation is essential to assure the continued payment of full benefits to the 1 million railroad retirees.

Under the rule adopted for consideration of this bill today, the text of H.R. 3619 will be before the Members as a substitute for H.R. 1646, as reported by the Committees on Energy and Commerce and Ways and Means. This substitute combines features from both committee versions of H.R. 1646. In addition, several new provisions are incorporated in the substitute.

One positive addition contained in the substitute will provide for the appointment by the President of an independent inspector general for the Railroad Retirement Board. The Retirement Board pays out approximately $6 billion a year in benefits. Given evidence on the record of irregularities in the payment of certain disability benefits, I believe this provision has great merit.

Taken as a whole, the substitute is much improved from the version of H.R. 1646, as reported by the Committee on Energy and Commerce. The minority views filed with the Energy and Commerce Committee report on H.R. 1646 noted four fundamental shortcomings with the bill as reported by the Committee. Specifically, these shortcomings were that H.R. 1646 as reported: First, placed an unwarranted burden on Federal taxpayers; second, failed to address the railroad unemployment system's problems; third, failed to guarantee social security equivalent benefits to railroad workers; and fourth, subsidized certain commuter railroads. The substitute before us today seeks to address all of these shortcomings.

A great deal of credit for improving this bill must be given to the Members on both sides of the aisle of the Ways and Means Committee. I would particularly like to commend the chairman of the Social Security Subcommittee for his leadership, the gentleman from Texas (Mr. PICKLE).

Although the version of the bill that will be considered shortly for amendment is a much improved product, I believe further improvements could be made had we not been faced with a deadline of October 1. For example, as the distinguished ranking minority member of the Energy and Commerce Committee has noted, I believe the two structural changes that would have covered railroad workers under the State unemployment systems and given greater freedom to rail labor and management to structure the industry pension program through the collective bargaining process would have markedly improved this product. Unfortunately, these structural changes were not pursued by the parties, and therefore, are not reflected in the bill before us today. I would hope that in the near future rail labor and management will carefully explore these modest reforms.

On balance, Mr. Chairman, I intend to vote for H.R. 1646 as amended by the substitute. Despite my reservations about the bill, I believe its enactment is essential to assure that those covered by the retirement system will continue to receive their industry pension benefits.

Mr. FLORIO. Mr. Chairman, I yield 3 minutes to the gentleman from New Mexico (Mr. RICHARDSON) a member of the subcommittee.

Mr. RICHARDSON. I thank the gentleman for yielding this time to me.

Mr. Chairman, the Railroad Retirement Solvency Act is based on an agreement between rail labor and management. I think we should applaud the courage and diligence they displayed in arriving at this compromise agreement. It is a fragile compromise however, many like the social security legislation which was recently approved by the Congress. But the railroad retirement system is in even worse shape than the social security system was and if we do not take swift action, retirees will have their benefits cut by 40 percent as early as October 1. We must not let this happen. Too many railroad retirees in my district in New Mexico and throughout the Nation rely on these payments.

Like any compromise, this legislation will require concessions from all affected groups. Taxes will be increased for both labor and management while benefits will be slightly reduced for some beneficiaries. I was disappointed the Ways and Means Committee altered two important provisions of the bill as reported by the Energy and Commerce Committee.

First, the Ways and Means Committee decided to allow the railroad unemployment insurance account to continue to borrow from the railroad retirement account instead of borrowing from the general revenues as provided by the Energy and Commerce Committee. One of the major reasons the retirement system is in such dire financial shape is the unemployment the railroad industry has suffered the past few years. Since 1981, employment in the rail industry has dropped by 31 percent. This has had a devastating effect on the retirement system due to lost tax revenues and borrowing from the system to pay for unemployment benefits. Allowing this borrowing to continue is not in the best interest of the railroad retirement system.

In addition, I was not pleased with another change made in the bill by Ways and Means which provides that revenues raised by the new tax on tier II benefits will be contributed in the General Treasury as opposed to going back into the railroad retirement fund. It is unfortunate that we had to impose any tax on benefits at all. But it is even worse that these funds will not be used to help support the retirement system.

I am pleased this bill calls on the Federal Government to reimburse the railroad retirement system $1.7 billion for dual-benefit payments. Between 1975 and 1981 the Government neglected its legal duty to reimburse the railroad retirement system for these dual benefits as required by law. It was this Federal irresponsibility combined with the drastic increase in rail unemployment that helped bring on the problems the retirement system is now facing.

Mr. Chairman, it took courage and a lot of hard work to develop a compromise on social security. We saved that system from collapse. Let us show the Nation that was not a one time act of bipartisanship and cooperation. Let us act now to save the ailing railroad retirement system from the fate it surely awaits if we do not pass this legislation.

□ 1730

Mr. BROYHILL. Mr. Chairman, I yield 2 minutes to the gentleman from Utah (Mr. NIELSON).

Mr. NIELSON of Utah. Mr. Chairman, I rise in support of this bill.

When the bill first came before the Energy and Commerce Committee, I wondered how we could possibly afford to contribute the $4 billion necessary from the Treasury to save the system at that time. I realized at that time we had in fact promised the rail workers that their retirement would be assured and that we had a commitment that was a moral commitment.

I would like to give special credit to the gentleman from New York (Mr. LENT), the gentleman from North Carolina (Mr. BROYHILL), the gentleman from New York (Mr. FLORIO), and also to the gentleman from Illinois (Mr. ROSTENKOWSKI), and the gentleman from New York (Mr. CONABLE), and the Ways and Means Committee, because they have come up with a solution to the problem which requires less than half of that amount of money, part of which would be financed by increased contributions by the employer and the employee.

It is a sensible solution to a problem that is very acute. I do support the bill in its amended form.

I would like to recommend that we support the Pickle amendment, which

I think will do as it did for social security, make it financially solvent and make it feasible so that the system will in fact stay fiscally sound.

I would like to mention from a personal experience that I realize how important the railroads are. During the recent mudslide in the State of Utah, the railroad, of course, was cut off. About 3 miles of track were submerged under an artificial lake and the Carbon County and Emory County which produce a lot of coal were completely cut off from their chance to ship their products to Geneva Steel and other of their customers.

The NRG Railroad and the employees thereof built the railroad in 65 days which would normally take 6 months to complete, right through a solid mountain. They have shown great skill and great innovation in getting that accomplished.

So, I just salute the railroad industry in general, and the D&RG and the railworkers of Utah in particular.

I do rise in support of this bill.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Chairman, I am very happy to come to the floor today and support this bill and commend the good work that has been done by the chairman of the subcommittee, the gentleman from New Jersey (Mr. FLORIO). Indeed, his work was predicated on the agreement between rail labor and rail management. I know that he was thrust into a very tough position, as was the entire Energy and Commerce Committee, because it was an imperfect compromise, one that was not agreed to by the administration and all the major groups; so he has done a great job in terms of keeping his eye on the ball and coming to the floor today with this bill in a very timely manner. I want to especially commend the gentleman. I think he has done an outstanding job.

Mr. Chairman, during the past several months I, like many of my colleagues in this Chamber, have received hundreds of letters, cards, and phone calls from constituents pleading to do what is necessary to insure the future solvency of the railroad retirement system. In my home State of Minnesota, we have over 22,000 railroad retirees and over 21,000 railroad workers with more than 10 years of service, thereby making them potentially eligible for railroad retirement benefits. These Minnesotans, along with several hundred thousand retirees, employees, and their families across this country will be affected by what we do with regard to this issue. By acting to pass this bill or by failing to act, we will decide the future of the railroad retirement system. If we do what is needed and what is right and pass legislation, we will demonstrate constructive action concerning railroad retirement and the future well-being of the people who depend upon it. If we fail to enact new legislation we could well insure that there will be a 40-percent cut in tier II benefits on October 1, 1983. The Railroad Retirement Board has already printed its notices to advise railroad retirees that unless Congress acts, their benefits will be cut. The notices are ready and will be sent in the absence of timely action and agreement by the Congress and the administration.

I want to highly commend the chairman of the subcommittee, Mr. FLORIO, who has worked diligently to bring this matter before the House. This was especially difficult because as the chairman, Mr. FLORIO, well knows there was not always acceptance and compromise to back him up.

The current financial problems facing the railroad retirement trust fund did not develop overnight. They have developed over a period of years during which time the railroad industry in this country has gone into a steep decline. This decline has resulted in thousands of workers being laid off from their jobs or being forced into early retirement. Because of this situation, the number of workers supporting the railroad retirement system has sharply dropped. In 1981, the railroads employed 510,000 people. Today, in 1983, this number has fallen to 338,000.

This unprecedented drop in railroad employment means that fewer revenues are supporting a retirement system whose ranks are increasing. Fortunately, the railroad retirement system has been able to borrow funds from its retirement account to support its unemployment fund. The railroad unemployment fund, unlike its private sector counterpart, does not have the ability to borrow from the National Government. Rather it has borrowed about $400 million from the retirement system and is further seriously jeopardizing the solvency of the retirement system.

Mr. Chairman, railroad workers, retirees and their families are realistic. They know and understand that their retirement system is in trouble and they are looking to us for leadership in solving this problem. They know they may not get everything that they would like in this bill. Indeed, there are several provisions in the bill which would delay or reduce some benefits. I am hopeful that we can reduce the impact of some of these changes by adopting several of the amendments which will be proposed to the bill during this debate. This legislation, which is the result of a compromise agreement reached between railroad labor and management, is a declaration of concern for the future of the railroad retirement system. But perhaps most importantly, it calls for compromise and sacrifice from all three principal partners in the railroad retirement system: labor, management, and the Federal Government. Most of labor, made up of both workers and retirees, is willing to accept an increase in the payroll taxes which they must pay to support this system. They are also willing to accept a delay in the payment of cost-of-living adjustments on their pensions so that the railroad retirement system's benefit structure will be brought more into conformity with the social security law which we passed earlier this spring. Some have also indicated that they can reluctantly accept a delay in retirement with full benefits if that is what is necessary to guarantee that there will be a retirement system for them in the future. I can think of no stronger example of why we should act to support this bill than to look at the sacrifices which these railroad workers and retirees have made in the past and are still willing to make in the future to insure the survival of their retirement system. This is indeed an outstanding example of sacrifice and a good faith effort to resolve the crisis in the railroad retirement program.

The railroad carriers themselves are also being called upon to sacrifice something to assure the future success of railroad retirement. The increase in the employer-paid portion of payroll will be expensive for many carriers, but these carriers recognize that they owe a considerable debt of gratitude to these retirees who have given the best years of their working lives to their companies and the railroad industry.

Finally, the Federal Government is being called upon to repay the railroad retirement trust fund for the cost of "dual benefits." It is estimated that a total of about $1.7 billion is owed by the Federal Government to the railroad retirement trust fund to cover the costs of these dual benefits. Earlier legislation in the midseventies bound the National Government to make such payments.

Mr. Chairman, earlier this year this Congress was able to pass legislation which guaranteed the future solvency of our social security system. There were many provisions in that bill which were unpleasant and the problem was significantly different from the railroad retirement problem that is before us today. Indeed, there was something in the social security bill similar perhaps to this measure which displeased just about everyone affected. However, the point is that we were able to overcome our differences and do what had to be done with social security. We passed a social security bill which will raise an estimated $167 billion in additional revenues over the next 7 years. We guaranteed that the 36 million persons who relied on their Government's promise to save social

security would continue to receive their benefits and would not be disappointed. We certainly owe our Nation's railroad retirees and railroad workers and their families no less. Their railroad retirement system, like social security, is backed by the commitment of the Federal Government. Let us fulfill our commitment both to them and to ourselves by supporting this compromise bill.

Moving forward, we must today face the reality of the economic shortfall and the drastic reduction in the railroad labor force numbers which has shaken the very foundation of the railroad retirement program. The solution to the current difficulties is within our grasp; railroad labor and management have made their commitment. Hopefully, Congress and the administration will follow suit and those affected by the programs will be safeguarded from default.

Mr. BROYHILL. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia (Mr. BLILEY), a member of the committee.

Mr. BLILEY. Mr. Chairman, I thank the gentleman from North Carolina for yielding me the time.

Mr. Chairman, I certainly want to commend the gentleman from North Carolina and particularly the gentleman from New Jersey (Mr. FLORIO) and the gentleman from New York (Mr. LENT) for their outstanding work on this legislation, as well as the Ways and Means Committee for bringing to us a bipartisan approach to this very complicated and very difficult problem that will prevent a very severe hardship and a great injustice being done to over a million of our retired railway employees.

This is a good example for all of us to consider as we consider other legislation dealing with other problems.

I hope that we will pass it overwhelmingly and that it will soon be on the President's desk so that come October the recipients will not have any adverse effect on their pension checks.

Mr. BROYHILL. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. CLINGER).

Mr. CLINGER. Mr. Chairman, I rise in support of H.R. 1646, the Railroad Retirement Solvency Act of 1983. Although not perfect in nature, this legislation will protect the welfare of those retired workers who have served our Nation's rail industry during a lifetime of service. The bill is the result of lengthy negotiations between representatives of railroad labor and industry in order to prevent a 40-percent cut in benefits which is looming in the wings should Congress fail to act. To prevent such drastic cutbacks, H.R. 1646 provides for increases in net railroad retirement revenues by approximately $4 billion from fiscal year 1984 through fiscal year 1988.

The increases in revenues to the railroad retirement system will be achieved in a balanced and equitable manner under the provisions of H.R. 1646. In addition to phased-in increases in both employee and employer contributions to retirement funds, this legislative solution provides for a series of three payments, estimated at a total of $2 billion, to be made by the General Treasury of the United States to the railroad retirement system. These Federal moneys are designed to cover unfunded dual benefits paid between January 1, 1975, and October 1, 1981. Once these benefits are covered by these funds, the other provisions of this bill will operate to place the retirement system on firm financial footing. A one-time deferral of cost-of-living increases and restricting the ability of the railroad unemployment compensation account to borrow funds from either the Federal unemployment compensation accounts or railroad pension funds will help to make the retirement fund more responsible and avert the kinds of financial crises which face the retirement system now.

Mr. Chairman, there are thousands of retired railroad workers across the country as well as in the 23d Congressional District of Pennsylvania which I have the privilege of representing in Congress. These men and women have labored long and hard to move our Nation's people and cargo. I urge my colleagues to support this legislation as a means of insuring that these retired workers are provided for in their golden years and to prevent the slashing of benefits which railroad workers have duly bought and paid for over their years of service.

Mr. BROYHILL. Mr. Chairman, I yield 2 minutes to the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. Mr. Chairman, as Representative of a district in Nebraska which includes a large number of railroad retirees and their families, I am pleased to have the opportunity to discuss this Railroad Retirement Solvency Act.

The railroad retirement system faces severe financial difficulties. Employment in the railroad industry has declined sharply from 510,000 in August 1981 to 388,000 at present. The payroll tax revenues from these employees must support the annuities of the approximately 1 million beneficiaries.

Because a cash shortfall is projected for fiscal year 1984 and beyond, the Railroad Retirement Board has announced that it will not be able to fund full benefits after fiscal year 1983, which ends on September 30. Therefore, the Board will have to reduce the tier II portion of monthly rail industry pensions by 40 percent beginning October 1, 1984, barring corrective action.

I commend rail labor and management for presenting to the Congress an agreement to alleviate the financial difficulties of the railroad retirement system, and therefore avoid any reduction in benefits. In addition, I commend the Committees on Energy and Commerce and Ways and Means for their efforts on this legislation.

I support this legislation as the most fair and equitable solution to the financial difficulties of the railroad retirement system. The bill provides for some form of contribution to the system by all those connected with the railroad retirement system, including employers, employees, retirees, and the Federal Government.

I support the amendment to provide for a more lengthy phase-in of the changes in the 60/30 benefit. It is unfair to allow a change in such a retirement benefit without allowing those who would be affected by the provision in the near future the opportunity to adjust their plans.

This bill is important to the retirees, to assure them that their current benefits are safe, and that they will not be subject to the huge reductions in tier II benefits that could occur. In addition, the current employees must be assured that the system will be solvent and provide them the benefits they have worked for and been promised when they retire. They must not be penalized by the railroad retirement system for the difficulties that have occurred as a result of economic circumstances over which they had no control.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. RUSSO).

Mr. RUSSO. Mr. Chairman, I would like to engage in a colloquy with the distinguished gentleman from New Jersey. As the gentleman knows, I am concerned with a number of Rock Island employees in my district who will soon lose their jobs as a result of the liquidation of the Rock Island. I am particularly concerned about the effect of the change in the early retirement benefit upon these employees, who do not have the choice to continue working.

Mr. FLORIO. Mr. Chairman, if the gentleman will yield, that is a very legitimate concern. I share the gentleman's concern about Rock Island employees and their fate. Last year, Congress passed the Rail Safety and Service Improvement Act of 1982 which authorized $35 million in labor protection benefits for Rock Island employees. I understand the conference report on the fiscal year 1984 Department of Transportation appropriation bill includes this $35 million, as authorized.

Mr. RUSSO. That is my understanding and I commend the gentleman's past efforts to help Rock Island employees. However, under the law, the Secretary of Transportation issued a

benefit schedule on April 28, 1983, to implement the Rock Island labor protection. Unfortunately, under the benefit schedule, employees who accepted jobs with the trustee of the Rock Island and who remained employed through June 30, 1982, are not protected, even though they will soon lose their jobs. Some of the employees in my district are so affected.

Mr. FLORIO. The gentleman has raised a very valid concern. I agree with the gentleman. I believe it is incumbent upon the Secretary of Transportation to review the benefit schedule to try to accommodate the needs of these employees. Certainly these individuals are adversely affected as a result of the reduction in service by the Rock Island.

Mr. RUSSO. I agree with the gentleman's point and I thank the gentleman for his efforts.

□ 1740

Mr. FLORIO. I yield 2 minutes to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, I rise in support of H.R. 1646, the Railroad Retirement Solvency Act, because it secures the compact of trust between the generations of American railroad workers. Passage of this legislation will send the same clear and positive message to our railroaders, both active and retired, as was sent to their counterparts covered by social security last spring.

I applaud the committees and Chairmen ROSTENKOWSKI and FLORIO that crafted this critical compromise legislation. As was the case with social security, a compromise was required and a compromise was reached—one that calls for an equal sharing of the burden. Most importantly, railroad retirees throughout this Nation, including 53,300 in Ohio will continue to receive their checks, on time, and without a reduction in benefits.

Mr. Chairman, in the letters I have received and people with whom I have spoken, I have felt a sense of great urgency and concern on this issue. Unlike social security, this issue has not received a great deal of media attention. The lack of information and the complexity of the issue have created much fear and anguish.

A wife of one railroad retiree in my district wrote, "Please, Ms. KAPTUR, I urge you and all the other Congressmen and Senators not to let the system die. It is too important to too many families." One railroader put it this way, "Approximately 10,000 recipients of railroad retirement in our district depend on the continued good health of the system for a share of the better life as promised in the American way." And finally, one widow wrote, "I am entirely dependent on my widow's railroad retirement check and if any part of it was taken away from me, I do not know what I would do. I am 78 years old and just getting by now."

Mr. Chairman, we are at the 11th hour. By passing H.R. 1646, today, we will avoid a calamity. We can leave for the recess knowing that we have saved the system that provides dignity and decurity to so many. I look forward to returning home, a rail center in northwest Ohio and being able to let the railroaders there know that we have kept the faith with them and their families.

Mr. BROYHILL. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. RIDGE).

Mr. RIDGE. Mr. Chairman, I rise to commend my colleagues on both committees that reported this legislation, for their efforts to restore fiscal integrity to the troubled railroad retirement system.

They have worked long and hard to negotiate a compromise that successfully balances the interests of rail labor, rail management, railroad retirees, and the Federal Government.

And, as a Member who represents quite a few railroaders—both working and retired—let me say that I fully intend to vote for this bill on final passage. But I do so with more than a little regret, Mr. Chairman, not because of what this bill does, but because of what it fails to do.

One million retired rail workers are now drawing railroad retirement benefits, and in this bill we reach out to them, we have taken into account their special needs.

Roughly 400,000 railroaders are now working, and in this bill we have reached out to them, too, we have taken into account their special needs.

But what of the roughly 100,000 unemployed railworkers now drawing railroad unemployment benefits?

Yes, we have kept the system afloat, and surely that will benefit them as it will the others who depend upon it in one way or another. And surely I would be the last Member to underestimate the importance of keeping those unemployment benefits coming.

But I am concerned, Mr. Chairman, very concerned, that this House will not have an opportunity here today to consider two modest amendments which would have made a real difference in the lives of thousands of unemployed railroaders and their families—at little or no cost to the system itself.

To those of my colleagues who are unfamiliar with all of the details of compensation to unemployed rail workers, let me say: Their system is separate from ordinary unemployment compensation; their benefits total just $25 per day; and they are permitted to earn no more than $10 additional per day before forfeiting their benefits. What is more, under current law, none of an unemployed worker's $10 per day in outside earnings may be earned in a regularly scheduled job. Take a job driving a schoolbus for just an hour or two each morning, and you lose your unemployment benefits.

My colleagues, I had hoped we could vote here today to lift the prohibition on regularly schedule part-time employment—because I feel strongly that anytime we in the House can remove in a responsible fashion any obstacle to an unemployed worker feeding his family, we should lift it.

And I had hoped we could also vote here today to raise from $10 to $15 per day the amount we will permit an unemployed railroader to earn on his own to meet the needs of his family—because if this legislation will not raise their benefits, then the least we can do, in my view, is to permit every unemployed rail worker the chance to earn an extra $5 per day for his family.

Mr. Chairman, it now appears we will not be voting on either of those amendments today, and I think that is unfortunate. The Railroad Retirement Board itself estimates that one of those amendments would increase costs to the unemployment portion of the system by no more than 1 percent. The Board predicted the other amendment would cost the system nothing.

I had hoped to return to my district this weekend—in the particularly hard hit northwestern corner of Pennsylvania—with good news for my unemployed rail workers. Does "studying" the problem over the next year or two qualify as good news? Yes, I suppose it does, if you have the good fortune not to lose your job with the railroad before then.

But I would have to say to those rail workers unfortunate enough to be without work today: We have not done enough; we could have done more to help you help yourselves.

As I said before, Mr. Chairman, I will be voting for this bill on final passage. I think Chairman ROSTENKOWSKI, Chairman PICKLE, Congressmen BROYHILL and FLORIO, and their colleagues on their respective committees should be commended for weaving their way through a treacherous minefield of controversy and competing claims. It was, in many ways, a thankless job. Dividing up a shrinking pie always is.

But I could not cast my vote in favor of this bill without making sure that those 100,000 unemployed rail workers out there were aware that their plight has not gone unnoticed, and that our lack of action on these two amendments reflects not our lack of concern but a lack of political consensus about how best to insure the passage of the other very vital changes proposed in this bill.

Before yielding back my time. I would just like to express my apprecia-

tion to Chairman PEPPER, Congressmen LONG and QUILLEN, and their fellow members of the Rules Committee. I was honored by their willingness to receive this freshman Member at the 11th hour, and their willingness to make in order two amendments I believe merited consideration by the House.

Mr. FLORIO. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. GAYDOS).

Mr. GAYDOS. Mr. Chairman, I thank my colleague for yielding.

The area I represent, the city of Pittsburgh and the seven-county area has a special interest in railroads and their problems. It has been the hub of the railroad activities in the last century.

I want to commend the chairman of the committee, the gentleman from New Jersey, Mr. FLORIO, and the ranking minority member from North Carolina, Mr. BROYHILL, and all of the members of the committee for taking this legislation to task at an unreasonable time and in an emergency.

Although I am not in complete concert with the legislation, I think the major portion of the legislation is directed to the highlights, and I would urge the committee to continue their studies and possibly in the future there would be supplemental legislation.

I have received to date literally thousands, and I repeat, thousands of letters from railroaders, retirees, those about to retire, all voicing their opinion one way or another as to the legislation, its implications and its essence, and in some instances its deficiencies.

So in closing I wish to say that this bill in my opinion, based upon the many observations of my colleagues, deserves the support of our colleagues and I urge my colleagues to support the bill.

□ 1750

Mr. BROYHILL. Mr. Chairman, I have no other requests for time.

Mr. FLORIO. I reserve the balance of our time if that is appropriate, Mr. Chairman.

The CHAIRMAN. Does the gentleman from North Carolina yield back his remaining time?

Mr. BROYHILL. If the gentleman does, Mr. Chairman, I will yield back my time and let the Ways and Means Committee go ahead.

Mr. FLORIO. Mr. Chairman, I yield back the balance of my time.

Mr. BROYHILL. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 30 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Congress was recently notified by the railroad retirement board that on September 1, 1983 a million railroad retirement beneficiaries may be sent a notice that their tier 2 benefits may be cut by as much as $235 per month effective with their October 1 check. The legislation which we have before us today insures that railroad retirement benefits will not be cut on October 1 and that under reasonable economic assumptions the railroad retirement system will be able to meet all of its obligations for the foreseeable future.

The Railroad Retirement Solvency Act of 1983 will improve the financial status of the railroad retirement system through numerous adjustments to both the income and outgo of the system. Like the social security amendments which were passed earlier this year, this package does not rely exclusively on any one solution to the problem. Everyone associated with the system is asked to bear some of the burden. Management, labor, and retirees all will contribute to the final solution, a solution which all hope will be a lasting one.

This bill was originally intended to address only the financial problems of the railroad retirement system. However, it quickly became obvious to the Committee on Ways and Means, that in addition to being a significant financial drain on the retirement system, the railroad unemployment compensation program has its own severe financial problems which must also be addressed immediately.

Faced with these two sets of problems the Committee on Ways and Means reported provisions which increase payroll tax revenue to both the railroad retirement and unemployment compensation systems thereby restoring the railroad retirement system to solvency and improving the financial status of the railroad unemployment compensation system. The committee also set up a framework in which the issues concerning the railroad unemployment compensation system's future solvency and structure can be resolved.

In addition, the Committee on Ways and Means also believes that it is desirable to make certain changes concerning the railroad retirement wage bases and financial operation of the railroad retirement system in order to more closely conform the operation of the railroad retirement system with the social security system.

With regard to the railroad retirement system, the committee approved provisions would increase income to the railroad retirement system by approximately $3.5 billion over the next 5 years. This is done through a variety of different mechanisms, including tax rate increases and the taxation of railroad retirement benefits.

The committee also adopted a number of provisions to improve the solvency of the railroad unemployment insurance program. Currently, that program is borrowing from the railroad pension fund in order to pay unemployment benefits. The provisions we have adopted will increase income to this system by $500 million through fiscal 1988, reduce the drain on the pension funds, and allow the unemployment program to begin repaying its outstanding loans from the pension fund.

It should be noted that while we are today considering the text of H.R. 3619 as an original text for purposes of amendment, this clean substitute makes no changes with respect to the provisions which were reported by the Committee on Ways and Means. Although a few provisions have been reallocated among the bill's titles to better distinguish the jurisdictional interests of the two committees which reported this bill.

Those provisions which were reported by the Committee on Ways and Means are contained in either title II or V. Title II contains those items which are clearly within the jurisdiction of the Committee on Ways and Means. Those provisions contained in title V which were reported by the Committee on Ways and Means concern matters which the committee feels are properly within its jurisdiction. The Committee on Energy and Commerce has asserted, however, that it has at least coequal jurisdiction on these matters. In order to insure timely passage of this legislation, the Committee on Ways and Means has not pressed for a resolution of this jurisdiction issues and has consented to the procedure of not placing these jurisdictionally disputed items within the revenue title of this bill which is the procedure that had been followed when the committee reported the bill. The committee notes that its agreement not to press at this for a resolution of the jurisdictional questions raised by this legislation does not in any way indicate its acquiesence to the Committee on Energy and Commerce's assertion of jurisdiction.

The most significant disputed provision is section 503 which increases the railroad retirement unemployment compensation monthly wage base. The committee notes that, while prior to this legislation it has traditionally not enacted legislation affecting railroad unemployment compensation revenues, House rule X(1)(h)(11) describes the jurisdiction of the Committee on Energy and Commerce in this area as "railroads, including railroad labor, railroad retirement and unemployment, except revenue measures related thereto." While income to the railroad

unemployment system is often described as contributions, the committee notes that House rules provide that jurisdiction in this area lies with the Committee on Ways and Means which has jurisdiction over "revenue measures generally" (rule X(1)(V)(3)).

The Committee on Ways and Means also disagrees with the assertion of the Committee on Energy and Commerce that section 501 establishing a social security equivalent benefit account is a matter within the jurisdiction of that committee. Under this provision, certain earmarked tax revenues which are equivalent to social security taxes will be deposited in the new account in order to finance the payment of specific railroad retirement benefits which are equivalent to those payable under title II of the Social Security Act.

Since House rules provide that the jurisdiction of the Committee on Ways and Means includes the deposit of public moneys (rule X(1)(V)(6)), the committee feels that the establishment of such an account is clearly within its jurisdiction and is inextricably linked with the concept of earmarked taxes such as those raised by the Railroad Retirement Tax Act.

A summary of the major revenue provisions in this bill which were approved by the Committee on Ways and Means follows:

I. RAILROAD RETIREMENT SYSTEM

A. INCREASED RETIREMENT TAX RATES

Tier 2 tax rates would be increased by a total of 2.25 percentage points for employees and by 3 percentage points for employer and employee representatives. These increases would be provided in three equal steps—.75 percentage points for employees and 1 percentage point for employers—and would become effective on July 1, 1984, January 1, 1985 and January 1, 1986.

B. TAXATION OF RETIREMENT BENEFITS

Effective for benefits received after January 1, 1984, tier 2 benefits and dual benefit payments—windfall—would be treated for income tax purposes as benefits received under a tax qualified pension plan. The revenues derived from the taxation of these benefits would be deposited in the railroad retirement account until fiscal year 1989 and be available for the payment of benefits. Beginning in fiscal year 1989 or, if earlier, when the revenues attributable to the taxation of tier 2 benefits reaches $877 million, the proceeds derived from the taxation of tier 2 benefits would be deposited in the general fund of the Treasury. After this point the revenue derived from the taxation of windfall benefits would be deposited in the dual benefits payments account.

C. ANNUALIZATION OF RETIREMENT WAGE BASES

The current monthly tier 1 wage base which is equal to one-twelfth of the annual social security wage base—estimated to be $3,125 per month in 1984—would be changed to an annual amount equal to the social security wage base—estimated to be $37,500 in 1984. The current monthly tier 2 base would also be changed to an annual amount equal to 12 times the monthly amount. The estimates for the monthly and annual bases in 1984 are $2,350 and $28,200, respectively. Both changes are effective January 1, 1985 and, both wage bases would be increased at a rate equal to average wage growth in the economy.

D. SOCIAL SECURITY EQUIVALENT BENEFIT ACCOUNT

Effective October 1, 1984, there would be created a "Social Security Equivalent Benefit Account" and all social security equivalent revenues—including tier 1 taxes, the revenues derived from the taxation of social security equivalent benefits, and amounts transferred to the railroad reitrement system through or borrowed against the financial interchange—would be deposited in the account, rather than into the retirement account. In addition, all social security equivalent benefits would be paid out of the account. If the operation of the financial interchange results in a transfer from the social security equivalent account to the social security trust funds such transfers are also authorized under this provision.

The transfers and credits to the social security equivalent benefit account would be made at the same time and in the same manner as transfers and credits are now made to the railroad retirement account. The social security equivalent benefit account also would be invested in the same manner as the railroad retirement account.

The creation of this account would not significantly affect the financial condition of either account. Nor would the creation of this account affect, in any way, benefits currently payable under the Railroad Retirement Act.

E. DEPOSITS OF RAILROAD RETIREMENT EMPLOYMENT TAXES

Effective on and after January 1, 1986, the schedule under which railroad employers would be required to deposit railroad retirement employment taxes would be the same as the schedule which applies to nonrailroad employers for purposes of depositing social security and income taxes.

II. RAILROAD RETIREMENT UNEMPLOYMENT AND COMPENSATION SYSTEM

A. DELETION OF AUTHORITY FOR UNEMPLOYMENT COMPENSATION PROGRAM TO BORROW FEDERAL FUNDS

Repeal, effective September 30, 1985, the current authority for the railroad unemployment system to borrow from rail pension funds.

B. INCREASED UNEMPLOYMENT TAX BASE

Effective January 1, 1984 railroad retirement unemployment compensation employer taxes would be increased by 50 percent, by increasing the amount of monthly wages subject to the tax from $400 to $600.

C. UNEMPLOYMENT COMPENSATION REPAYMENT TAX

Effective July 1, 1986 through September 30, 1990, a Federal repayment tax would be imposed on railroad companies. The tax would be equal to 2 percent on the first $7,000 in annual wages paid to each employee. This tax will increase by 0.3 percent on each subsequent January 1, up to a maximum of 5 percent. Revenue raised by this repayment tax would be used only to repay loans the railroad retirement account has made to the railroad retirement unemployment compensation program.

D. TAXATION OF SICKNESS BENEFITS

Sick pay benefits provided under the railroad retirement unemployment compensation program, except for sick pay resulting from on-the-job injuries, would be subject to the Federal income tax the same limitations and conditions that apply to the taxation of such pay received by workers in other industries. This would be effective for sick pay benefits received after December 31, 1983.

E. RAILROAD UNEMPLOYMENT COMPENSATION COMMITTEE

A railroad unemployment compensation committee would be established for the purpose of reviewing all aspects of the railroad unemployment program and submitting a report to Congress no later than April 1, 1984 containing: First, recommendations based on its review of the program and second, recommended adjustments in contributions and benefits which will enable the railroad retirement unemployment compensation program to repay all loans from the railroad retirement account by the end of the year 2000.

Mr. Chairman, the bill before us embodies many recommendations jointly made earlier this year by rail management and labor. The most significant deviation from their proposals is the deletion of the suggestion that the railroad unemployment compensation system be authorized to borrow from the Federal unemployment insurance trust fund in the same manner—except for repayment requirements—in which States borrow from this fund. This borrowing authority would have allowed the unemployment compensation system to repay its debt to the railroad retirement system—estimated to be $650 million by fiscal year 1984. Under this proposal, future borrowing from the railroad retirement system would have been prohibited.

The committee questioned the appropriateness of allowing the railroad unemployment compensation system to borrow Federal funds with no requirement to repay borrowed amounts and no demonstrable ability to repay

these amounts in the foreseeable future. Questions of equity vis-a-vis the various States, who are required to repay such loans, also arose. In light of these concerns, the committee passed an amendment which deleted that provision of the bill which authorized borrowing from the Federal unemployment insurance trust fund.

Since this action reduced the reserve levels which had been provided under the labor-management agreement and which they had judged to be reasonable and prudent, this action, while necessary, only heightened the committee's concern with the reserve levels in the retirement program, especially under adverse employment and economic assumptions.

As a result of these concerns, the committee was forced to go beyond the labor-management agreement and to increase revenue raised through employment taxes paid by the sector itself. Even with these increases, the reserve levels provided in the bill are lower than those provided under the labor-management agreement. While the committee would have preferred those larger reserve levels, since they would provide more confidence that the system could meet all benefit obligations even under adverse economic conditions, the committee recognized that it is possible that the industry, relying solely on employment taxes, could not sustain at this time the tax increase which would be necessary to provide these reserve levels.

However, the committee is confident that as a result of this legislation the railroad retirement system will be able to pay benefits for the foreseeable future. This statement is based on actuarial projections done by the Railroad Retirement Board under what it considers to be both intermediate and pessimistic assumptions. I have attached to my statement the analysis of this legislation prepared by the chief actuary of the Railroad Retirement Board for the interest of my colleagues.

Mr. Chairman, I believe that the joint product of the Committees on Ways and Means and Energy and Commerce is a sound response to the railroad retirement and unemployment compensation systems' financial problems. I urge its adoption.

RAILROAD RETIREMENT BOARD,
May 26, 1983.

To: Board Members.
From: Chief Actuary.
Subject: Progress of Railroad Retirement Account under revised labor-management agreement.

Labor and management have revised their original agreement, which was embodied in H.R. 1646. The most important change, from the point of view of the railroad retirement account, is that the retirement account would receive no relief from the cash-flow problems caused by lending money to the Railroad Unemployment Insurance account. The attached table shows my estimate of the progress of the retirement account under two employment assumptions taking into consideration all the revisions. This information was prepared at the request of the staff of the Social Security Subcommittee and has been transmitted to them.

The "best-guess" employment assumption is that which has been referred to as assumption A. The "pessimistic" assumption has been used in material prepared previously for the Social Security Subcommittee. It now seems too pessimistic to be regarded as plausible, at least for the 1983 employment level. The two assumptions are shown below.

Calendar year	Employment assumption (thousands)	
	"Best-guess"	"Pessimistic"
1983	385	365
1984	370	350
1985	360	335
1986	355	320
1987	350	305
1988	345	290
1989–92	340	290

The attached table indicates that the agreement would still resolve the system's financial problems through 1992, even under the "pessimistic" employment assumption. The loss of the RUIA debt relief, however, has made the procurement of dual benefit shortfall appropriations much more important. The agreement would fail under the "pessimistic" assumption without them in 1985 or 1986. In addition, I estimate that the amount available for benefit payments immediately before the first dual benefit installment on July 1, 1984 will be between $700 million and $900 million. This in substantial and makes the possibility of a cash-flow problem at that time remote, but does not eliminate it completely.

NORMAN SOLOMON.

AMOUNT AVAILABLE FOR BENEFIT PAYMENTS UNDER REVISED LABOR-MANAGEMENT AGREEMENT

(In millions of dollars)

NA—Not available.

[1] Excludes tax income to Railroad Unemployment Insurance Account. Includes appropriations for windfall shortfall in 1984, 1985 and 1986, and financial interchange advances in all years.

[2] Excludes money lent to Railroad Unemployment Insurance Account. Includes repayment of financial interchange advances in 1985 and later.

[3] Recognizes that money lent to Railroad Unemployment Insurance Account and not repaid is not available for benefit payments.

[4] Includes unused borrowing authority.

I reserve the balance of my time.

Mr. CONABLE. Mr. Chairman, I yield myself such time as I may consume.

I have no requests for time other than the few remarks I would like to make.

Somebody may show up but as of now, I think this is not being considered a controversial piece of legislation.

Mr. Chairman, I support this measure and urge my colleagues to vote for it today. The sooner it becomes law, the better off the railroad retirement and unemployment compensation programs will be.

That is not to say that every part of the bill is good. Some aspects leave much to be desired, and I wish that they had been improved. But this bill represents the best package we are going to get on the subject in this Congress.

I strongly favor the provisions of the bill which represent action by the Committee on Ways and Means. Our committee I believe substantially enhanced the legislation which was referred to us. Among the improvements: An end to authority for the railroad unemployment system to borrow from the railroad retirement system; a mechanism designed to move the unemployment program toward solvency and a capacity to repay loans from the pension fund; and the establishment of a special committee to study all aspects of this program, including the possibility of bringing railroad workers under the regular Federal-State unemployment compensation system.

In many respects, Mr. Chairman, the retirement and unemployment compensation programs covered in H.R. 3619 are anachronistic. They were established in an era in which the railroad industry occupied a truly unique position in this country. Today, the rationale for these programs appears unrealistic in some respects. For example, it would seem logical now to treat railroad retirees the same way we treat retirees under other corporate pension plans, and to treat unemployed railroad workers the same way we treat the unemployed in other sectors of commerce and industry. But it is obvious we cannot make these major adjustments immediately. I hope we can make more progress in those general directions as time permits.

Today, we have a compromise measure which includes a number of progressive provisions. It is far from perfect, but it deserves our approval. I hope the other body also will act expeditiously on it, and that the President will be able to sign it into law very soon.

Time is of the essence.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, I simply want to add my voice to the many we have heard this afternoon in support of this legislation.

I particularly want to commend the members of the two committees that crafted this solution to a very difficult problem.

I know that many of the railroad retirees and potential retirees have been very uneasy about the future of the system. With the passage of this legislation it will give a measure of confidence to them in terms of their future and the security of the railroad retirement system. It certainly is a tough problem and the committee members deserve a lot of credit for their efforts. I yield back the balance of my time.

Mr. CONABLE. Mr. Chairman, I reserve the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. I thank the chairman for yielding.

Mr. Chairman, the bill before us is a consensus bill. It has been agreed to by all the parties, that is labor, management, Democrats, and Republicans; it has been agreed to by the two committees which have jurisdiction over the benefit and tax areas. Therefore, it is not a controversial matter, and we should have no difficulty in moving this bill forward today.

But I think it is time for us to pause again to realize that our railroad employment system has been in a mess, if we want to be just plain about it. It has been brought about by overly optimistic employment projections which have just not materialized.

Now, we face heavy unemployment expenses brought about because of these projections, and it has taken a terrible drain on our trust funds.

So, we are having to make some changes and face up to some changes we should have done 5, 10 years ago.

I look back on my service here, I was on the Committee on Commerce some 8 or 9 years ago when we reorganized the railroad retirement system and we thought we had solved the problems of the railroad retirees.

We did not. We have postponed and rolled with it; although in 1981 we passed another law.

But we did say then that by this year, October 1, 1983, if the funds ran short then there would be a reduction in benefits. That has caused us to bring this legislation forward because we, of course, do not want and cannot accept the fact that employees would have their benefits reduced 40 percent. The legislation we have today is a very valid means of keeping that from happening.

□ 1800

Let me summarize just four or five things that this bill does.

First, in general the ways and means portion of the bill raises about $1 billion more than the original package. And that is about evenly divided between the employees and employer retirement system and the unemployment system.

Second, it precludes open ending borrowing from the general treasury. And, of course, we could not allow that type of practice.

Third, it curtails future borrowing from the railroad retirement program by limiting the borrowing to between now and September 30, 1985.

Fourth, it provides sufficient reserves to pay retirement benefits under continuing unfavorable economic conditions; and

Fifth, it provides the mechanism, which the gentleman from Tennessee (Mr. FORD) will explain in more detail, to insure a more solvent unemployment program in the future.

And it provides for repayment of loans which have been made to the unemployment fund by the retirement fund.

These are important changes necessary to point this system in a direction of solvency.

Now when the general debate has concluded, Mr. Chairman, under the rule I will offer an amendment to raise some additional funds and the purpose of offering that amendment, in addition to the bill that we have agreed to by all the parties here, will be to provide for sufficient funds to make changes in the 60/30 retirement provisions. That is, early retirement at 60 years of age and 30 years of service.

When my amendment is offered, the gentleman from New Jersey (Mr. FLORIO), under the rule, will offer an amendment that will make those changes. Together we hope to move that amendment forward.

So, though we are making changes that are a little bit more liberal in the early retirement aspects, we are also paying for those changes as we move this bill along.

I think we are all in general agreement that that is the procedure. And everyone has agreed that that is the way to proceed.

The fact is that there are about three railroad retirees for every railroad worker.

Any way you slice it, that is going to cause problems—severe problems. In the past there has not been a full effort to face up to those problems. In the 1981 amendments we said that we would cut benefits if the fund again ran out of money.

Well, this is 1983, and we know that we are not going to cut benefits. We are acting today to avert a 40-percent reduction in the tier II benefits now scheduled for October 1.

Nevertheless, I do think that there is cause for some optimism. This bill, while it does not solve all the problems we face, takes a little different direction than we have had in the past. We have done a better job this time, I think, of facing up to the fact that the railroad industry will suffer from a high retiree worker ratio for some time to come. The impending fact of a benefit cut has produced changes—both higher contributions to the fund and future reductions in retirement benefits—that show a greater willingness to face this problem head on. My colleague from Tennessee has made it clear that we will be looking for more lasting solutions to the problems with the unemployment fund, too.

In sum, Mr. Chairman, we do not propose to bring before this House a final solution to this problem. We do bring before this body a serious attempt by all parties involved to come to grips with the problems in this area. Certain areas, such as the unemployment area, will require further action later on, and we know that. But we are moving together, without blinders and with a firm conviction that the Congress and those in charge of the railroad funds will not settle for less than open and balanced solutions which do not impose burdens on the American taxpayer. By next April the Railroad Unemployment Compensation Committee must make its recommendation. It must be a responsible recommendation. The Congress will be watching. I serve notice to employers and employees that I will be watching.

Most Members of the House are well aware of the need for legislation in the railroad retirement area. That need also carries with it a timetable we are striving to meet here today.

Specifically, current law stipulates that if the retirement fund does not have sufficient expected revenue to pay benefits throughout the entire fiscal year, then the money available will be prorated through smaller benefit checks throughout the year. Because the railroad fund will not have sufficient money to pay benefits throughout fiscal 1984, under current law railroad retirement beneficiaries will begin receiving reduced retirement checks on October 1, 1983. This will be a cut in the tier II benefit averaging $100 a month per beneficiary, but with a possible cut of up to $235 a month. These reduced checks would be followed by further cuts next October 1984, unless legislation is enacted shoring up this system.

Labor and management have come together at least twice this year to produce agreements to avert these benefit cutbacks. The burden of their agreements is shared by railroad em-

ployers and employees as well as, to some degree, by the retirees. There is also assistance provided from the Federal Government, but chiefly this will be in the area of the so-called windfall benefits, an area we assumed responsibility for when we reorganized railroad retirement in 1974. The Ways and Means and the Commerce Committees have passed legislation which is based upon these agreements and which will both avert the impending benefit cuts and—just as critically—provide a better foundation for the railroad retirement and unemployment benefit systems in the future. We bring that legislation before you today and I urge its passage.

This legislation is a strong improvement over the initial bill. The Members may recall that we passed railroad legislation in 1981 which was supposed to secure the retirement system for sometime in the future. Since that date, however, employment in the railroad industry has dropped dramatically and far below projections used in the 1981 legislation. In 1981 the railroad industry employed 510,000 persons, and that number dropped to 388,000 by the beginning of this year. Also since that date, the railroad unemployment fund has borrowed extensively from the retirement fund. By this October, the unemployment fund will owe the retirement fund some $650 million, and over the next 4 fiscal years it could borrow an additional $1.2 billion. The unemployment fund will have no ability to pay this loan for the foreseeable future.

The combination of the worsening unemployment and borrowing from the retirement fund by the unemployment fund has precipitated the benefit cut railroad retirees currently face.

The first response contained in a labor management agreement was to raise approximately $3 billion for the retirement fund in fiscal years 1984–88 but allow the railroad unemployment fund to borrow from the Federal unemployment fund. That amounted to an open-ended tap on the General Treasury. Since there was no prospect for repayment the Ways and Means Committee asked the industry to come up with a better solution.

Through discussions with the industry and committee action we now have the combined package which is before you today.

In addition, to the changes I outlined earlier, the ways and means bill contains important amendments which bring the tier I railroad retirement benefits in closer conformity to the social security program which they are set up to equate. These amendments both will provide greater uniformity between the two parallel systems but also will provide greater protection for the tier I benefits in the future in order to insure that whatever else happens railroad retirees will have the protection of their benefit which is a social security equivalent.

I think therefore, Mr. Chairman that we have proceeded responsibly and have set this program on a more sound footing for the future.

To be more specific, in the railroad retirement provisions acted upon by Ways and Means, the bill before us would:

First, provide for three equal tax rate increases for both employers (1 percent) and employees (.75 percent), effective July 1, 1984, January 1, 1985 and January 1, 1986, according to the following chart:

	Employee		Employer	
	Current law	H.R. 3619	Current law	H.R. 3619
1984	2	2.75	11.75	12.75
1985	2	3.50	11.75	13.75
1986 and after	2	4.25	11.75	14.25

Second, place the railroad retirement wage bases on an annual amount. In tier I, this would be identical to the social security annual wage base, and in tier II, this would be 12 times the monthly amount. This would be effective January 1, 1985, according to the following chart:

	Tier I		Tier II	
	Monthly base	Annual base	Monthly base	Annual base
1983	$2,975	$35,700	$2,225	$26,700
1984 estimate	3,125	37,500	2,350	28,200

Under current law a railroad employee who worked for 9 months of 1983 at $3,500 a month ($31,500 a year) would pay tier I taxes on only $26,775 (9 times $2,975) and tier II taxes on only $20,025 (9 times $2,225) of his total annual wages—and upon retirement would receive benefits based on these lower wage amounts.

Under this change, the railroad employee would pay taxes on his full annual earnings up to the annual wage amounts listed above. He would also receive benefits based on these higher amounts.

Third, the bill would include windfall benefits and tier II benefits received after January 1, 1984 in taxable income as a private pension. In the case of revenue raised through the inclusion of windfall benefits in taxable income, the estimated revenue amounts would be deposited in the railroad retirement account until fiscal year 1989 and in the windfall benefits account after that. In the case of revenue raised through the inclusion of tier II benefits in taxable income, the estimated revenue amounts would be deposited in the railroad retirement account until the earlier of fiscal year 1989 or the amount of revenue transferred reaches $877 million. After that, these proceeds will remain in the General Treasury.

Fourth, the bill places the employer payroll tax deposit schedule on the same basis as the FICA deposit schedule, beginning January 1, 1986.

Fifth, the bill creates a social security equivalent benefit account as of October 1, 1984, to which will be deposited all social security equivalent revenues, including tier I taxes, revenue from the inclusion of these benefits in taxable income, and transfers under the financial interchange with the social security trust funds. This will provide an important safeguard for these benefits which are equivalent to social security benefits for railroad retirees.

Sixth, the bill provides that on July 1, 1985 and each subsequent July 1 the Railroad Retirement Board will submit to the Congress a full report on the railroad retirement system. Currently this is done only about every 3 years, but it will be important for the Congress to have a more up to date view of the system in the next few years along with any recommendations the board may want to make.

Finally, although Mr. FORD will explain in more detail the provisions affecting railroad unemployment, I want to say that I think those provisions take significant steps toward a solution of problems in that area and toward protecting the retirement fund in the future.

Among other things, these provisions put a time limit on how long the unemployment fund can borrow from the retirement fund, include a report due next April on a better approach in this area, and impose, effective July 1, 1986, a repayment tax to repay loans to the retirement fund. We know that we will have to address this issue again, when the report comes back, but this is a significant improvement in this area and meets the objections raised against an open-ended borrowing situation which we faced earlier.

Following are estimates from CBO on the specific effects of these provisions:

TABLE 2. ESTIMATED REVENUE CHANGES TO THE UNIFIED FEDERAL BUDGET RESULTING FROM PROVISIONS IN H.R. 1646, THE RAILROAD RETIREMENT SOLVENCY ACT OF 1983, AS AMENDED BY THE COMMITTEE ON WAYS AND MEANS

[By fiscal year, in millions of dollars]

	1983	1984	1985	1986	1987	1988
Revenue increases						
Annualization of tier I wage base	0	0	72	26	24	26
Tax on employees [1]	0	16	127	218	251	261
Tax on employers [1]	0	17	140	313	359	371
Tax railroad retirement benefits	0	50	171	180	188	196

TABLE 2. ESTIMATED REVENUE CHANGES TO THE UNIFIED FEDERAL BUDGET RESULTING FROM PROVISIONS IN H.R. 1646, THE RAILROAD RETIREMENT SOLVENCY ACT OF 1983, AS AMENDED BY THE COMMITTEE ON WAYS AND MEANS—Continued

[By fiscal year, in millions of dollars]

	1983	1984	1985	1986	1987	1988
Tax windfall benefits	0	13	42	40	38	37
Tax railroad sick pay	0	8	11	11	11	11
Accelerate employer tier I and II deposit schedule	0	0	0	133	41	15
Increase unemployment tax base	0	36	73	72	70	69
Impose a railroad unemployment insurance prepayment tax	0	0	0	14	62	70
Total revenue changes	0	140	636	1,007	1,044	1,056

[1] Includes effect of annualization of tier II wage base.

In sum, we need to act quickly. If we do not benefits will be cut October 1. Notice of the potential cut will go out to beneficiaries September 1, and the deadline for the Railroad Board on a decision for sending out a reduced check is September 23, approximately 2 weeks after Congress comes back in from the August recess. The other body needs time to act on this measure before the date, and we have reason to believe they will act expeditiously.

Finally, this is a solid bill, dividing out the burdens and responsibilities and responding sensibly to the very real problems facing this industry and the retirement and unemployment funds.

I urge its immediate adoption and yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 5 minutes to the gentleman from Tennessee (Mr. FORD).

Mr. FORD of Tennessee. Mr. Chairman, I would like to outline for the Members those provisions of the bill effecting the railroad unemployment insurance system. Initially, I would like to remind Members that the primary concern of both committees was to avoid an automatic decrease in rail pensions, and to assure the long range solvency of the rail pension system.

Rail workers are covered by the Railroad Unemployment Insurance Act, they are not covered by regular State unemployment laws. Under this act, whenever the rail UI program has insufficient funds to pay unemployment benefits, it can borrow from the rail pension fund. Because of a rapid drop in rail employment over the last 2 years, this borrowing has increased dramatically. By October 1, 1983, the rail UI program will owe the rail pension fund $650 million. Without any changes in the rail UI program, it would have to borrow an additional $1.2 billion over the next 5 years. Therefore, within the context of assuring a sound pension fund, something had to be done to reduce this drain on the pension fund.

The bill as reported by the Committee on Energy and Commerce would have transferred this borrowing authority to the Federal unemployment account. This is the account from which States borrow when they have insufficient funds to pay benefits. There were no provisions in the bill, however, for a specific repayment procedure for such loans to the rail UI fund. In addition, we were concerned that by simply transferring the borrowing authority to the Federal unemployment account we would be giving up any chance of substantive changes being made in the rail UI program that would reduce and ultimately eliminate its borrowing needs.

The committee struck the provisions of the bill that would have allowed borrowing from the Federal unemployment account. Rather than allow such borrowing, we adopted a number of provisions designed to improve the solvency of the railroad unemployment insurance program. These provisions will reduce the drain on the pension fund and begin the repayment of outstanding loans to the pension fund.

Specifically, the unemployment provisions would—

First, increase employer-paid unemployment taxes by 50 percent, effective January 1, 1984.

Second, increase the amount of wages a rail employee must earn in order to qualify for unemployment benefits from $1,000 to $1,500, effective January 1, 1984.

Third, increase the waiting period for unemployment benefits in the case of a strike from 7 days to 14 days.

Fourth, make sick pay benefits, which are paid out of the railroad unemployment insurance fund, subject to Federal income tax.

Fifth, establish, effective July 1, 1986, to September 30, 1990, a railroad unemployment repayment tax which will be used solely to repay outstanding loans from the unemployment insurance program to the pension fund.

Sixth, repeal, effective September 30, 1985, the authority for the railroad unemployment system to borrow from rail pension funds.

Seventh, establish a Railroad Unemployment Compensation Committee, to be comprised of two labor representatives, two management representatives, and one public member. The committee will report to the Congress, no later than April 1, 1984, recommendations addressing all aspects of the railroad unemployment insurance system, including the possibility of covering rail workers under the Federal-State unemployment system. In addition, the committee is specifically mandated to recommend adjustments in employer contributions to the system and benefit reductions which will enable the rail unemployment system to repay all loans from pension fund by the year 2000.

I know that some Members wanted us to go further in the rail UI area, particularly by extending the repayment tax beyond 1990. I want to point out, however, that the Railroad Unemployment Committee must report to the Congress no later than April 1, 1984, a specific plan for the repayment of all loans by the year 2000. We have started the repayment tax. If we had made it permanent or extended it much beyond 1990, the committee we have established would simply have no incentive to examine all aspects of the rail UI system, including tax increases, benefit reductions, and the possibility of covering rail workers under the regular State programs.

We have cut off the borrowing authority from the pension fund after September 30, 1985. This will provide another incentive for rail management and labor to bargain seriously and in good faith about the future of the rail UI system.

As I indicated at the outset, our concern is the long-range solvency of the pension fund. Frankly, the industry, management and labor alike, did not focus on the UI program when this legislation was first being considered. They were bargaining over pension changes. We have taken substantial steps in improving the solvency of the UI program, but we have also allowed the industry a framework for addressing the remaining problems.

I believe that these provisions are fiscally responsible; by assuring that the Federal Government does not pay what the industry should be paying. And they are fair, by allowing the industry time to consider further changes in the rail UI system and making recommendations to the Congress by a date certain. I urge my colleagues to approve the legislation.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, I rise in support of H.R. 1646, the Railroad Solvency Act of 1983. This legislation is based upon an agreement reached by railroad labor and management which was finalized on February 22, 1983.

The railroad retirement system currently faces severe financial problems. During the past few years there has been a precipitous decline in railroad employment—a reported decrease from 510,000 in August of 1981 to 388,000 in January of this year. This large, unexpected drop in rail employment has reduced the payroll tax revenues flowing into the retirement system.

On February 18 the Railroad Retirement Board issued a report to Congress confirming the serious cash shortfalls the system is facing. The Board indicated that, if corrective action is not taken, as a result of these shortfalls, tier II retirement benefits

will have to be reduced by 40 percent as of October 1, 1983, and by 80 percent as of October 1, 1984. We cannot allow this to happen.

The bill before us today seeks to improve the solvency of the railroad pension system and the railroad unemployment compensation program. The primary goal of H.R. 1646 is to assure a sound pension system for both present and future retirees of the railroad industry. This goal will be accomplished by this comprehensive plan containing benefit modifications, tax increases, improvements in borrowing authority, and repayment of money owed to the railroad retirement account.

H.R. 1646 is not an ideal solution; not every element of the package is absolutely perfect. But it will move us toward the goal of restoring railroad retirement to a firm financial footing. The people of northern Iowa, through hundreds of letters and phone calls to me, have made it quite clear that they support this action. The present and future railroad retirees in my district deserve to be assured that the railroad retirement checks they have earned by their hard work continue to come—now and in the future.

I certainly share my constituents' support for long overdue action to build a strong financial foundation for the retirement system. Thousands of men and women have spent their working lives in the railroad industry, an industry which has helped—and continues to help—build a strong America. Their future retirement is at stake, and we must not fail them.

Finally, I want to comment on the concern some have raised about the Federal Government shouldering the financing of a pension and unemployment system of a single industry. I believe this is a legitimate concern, and I am pleased to see that the actions taken by the Ways and Means and Energy and Commerce Committees address these concerns in a responsible manner.

Again, by taking sensible and fair action today, we will help bring the railroad retirement system back to financial health, not only to ensure that benefits continue to be paid to those who are presently retired, but so that the men and women working in the railroad industry regain confidence in the system and are assured that retirement benefits will be available to them when they retire in coming years.

I commend the commitment expressed by the committees in the House with jurisdiction over H.R. 1646 for their prompt action and urge my colleagues to support this much needed legislation.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Chairman, I rise briefly to commend the members of the Energy and Commerce Committee and the members of the Ways and Means Committee, on which I serve, for the work on this bill.

It seems to me that this is a good example of cooperation at its best which hopefully will alleviate, with its passage and signature by the President, the concerns of many, many railroad retirees that I have heard about imminent reductions in their pensions.

I think we owe these people some reassurance that their pensions will not be cut.

Again, I commend our committee and the Energy and Commerce Committee for its good work on the bill.

Mr. ROSTENKOWSKI. Mr. Chairman, I reserve the balance of my time.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Chairman, I rise in support of this legislation.

I would like to commend the leadership and the members of the two committees for bringing us H.R. 1646. The parties involved are diverse, the issue is complex, but I think that at least in the short term we have a product that seems to be satisfactory to most reasonable parties.

I particularly want to associate myself with the remarks of the gentleman from Pennsylvania (Mr. RIDGE) with respect to his comments on unemployment compensation.

□ 1810

Again, I congratulate the parties involved, and I ask the Members to support this legislation.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. FIELDS).

Mr. FIELDS. Mr. Chairman, I rise in support of H.R. 1646, the Railroad Retirement Solvency Act of 1983. I am pleased the House is finally considering this important legislation so that the hard-earned benefits of our Nation's railroad retirees will be protected from the threat of a 40-percent reduction beginning October 1 of this year. The October 1 deadline for some legislative action is in fact drawing very near and for many of us who are most concerned about protecting railworkers and retirees, I am satisfied with the work of both the Energy and Commerce Committee and the Ways and Means Committee. As a member of the Energy and Commerce Committee I know of the long, hard hours of work which went into this delicately balanced legislative package.

Since early this year when the Railroad Retirement Board reported to Congress pursuant to section 22 of the Railroad Retirement Act that tier II benefits would be reduced by 40 percent beginning in fiscal year 1984, many of us have been working diligently and expeditiously to come up with an acceptable legislative package to address this situation. I believe H.R. 1646 resolves the short-term threat of a tier II benefit reduction as early as October while at the same time this legislation restructures the railroad retirement system to assure long-term financial security for this program. In light of the demographic changes in the railroad industry of late, I believe the structural changes incorporated into H.R. 1646 go a long way toward guaranteeing economic solvency for this program.

Mr. Chairman, I am particularly pleased with the amendment to be offered on the so-called 60/30 provision and plan to support this amendment. One of the original provisions of the initial rail labor and management agreement was an immediate reduction in tier I benefits of those individuals who have at least 30 years service in the railroad industry but who have not yet reached the age of 62. Current law provides that an individual with 30 years of service could retire at age 60 with full benefits. This 60/30 provision most directly and adversely affects those who are close to retirement age and is undoubtedly one of the most emotionally charged topics of this entire debate. We all know the long years of planning and calculation which goes into an individual's decision to retire. Plans must be made for not only everyday living expenses but unanticipated expenses must also be taken into account. And so it is with the thousands of railroad workers who are planning to retire in the near future.

The amendment to be offered will provide for a longer and smoother transition for the scheduled change in 60/30. Instead of taking effect immediately, this change will be phased in over 18 months beginning July 1, 1984, and will not take full effect until January 1986. I am pleased with this amendment and believe it goes a long way toward buffering those railroad workers planning to retire in the next couple of years. Although I would have preferred no change at all in the 60/30 provision, I feel the approach taken in this amendment is the most fair of all those considered. Further, this new 60/30 provision will provide younger railworkers with more time to adequately plan for their own retirement, thus minimizing the overall economic impact of this legislation.

Mr. Chairman, in summary I commend everyone involved in the development of this legislation and hope that the Senate will act quickly on their version of this legislation so we in Congress can assure the thousands of railworkers and retirees that we are committed to protecting their retirement system.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. LEWIS).

Mr. LEWIS of California. I thank my colleague for yielding.

Mr. Chairman, I rise in strong support of this measure.

I want to first congratulate the chairman and the ranking minority Member for dealing with one of the toughest areas of legislation that there is. The pension field, to say the least, is a complex one. My district in southern California involves communities such as Needles, Barstow, and San Bernardino, where railroad workers are among the most important of our constituency. If the social security issue was significant, indeed this issue is just as significant to those people who are depending upon the promises made in these programs for their futures. Indeed, it is clear that government has played a role in some of the problems here. Interfund borrowing, the way we use those moneys, the lack of rules that apply to private sector pensions are only pieces of the very complex puzzle.

I want to commend the committee for a very, very fine job in attempting to really bail out a very difficult circumstance.

Mr. RITTER. Mr. Chairman, I rise in support of H.R. 1646, the Railroad Retirement Solvency Act of 1983. This bill is of great importance to nearly 1 million railroad retirees throughout this country who are heavily dependent on the railroad retirement pension system and the benefits they receive from the system.

In my own district, Pennsylvania's Lehigh Valley, there are several hundred rail retirees who are extremely concerned about the impact on the system should Congress not enact legislation to make the system a financially healthy one. We need to enact H.R. 1646 today to insure that these retirees who have contributed to the system all their lives are not forced to accept a 40-percent reduction in their pensions this year and an 80-percent reduction in their pensions in 1984.

This bill is by no means perfect. It calls for higher taxes on employers, employees, and retirees. It also calls for the Federal Government to contribute about $2 billion to the system over the next 4 years to keep the system afloat. It is not the ideal bill for either rail labor, management, or the administration. However, it appears to be a bill which we can all live with. It is a consensus bill. It addresses my greatest concern, the financial integrity of the railroad retirement system which protects rail retirees within my district and across the country.

It is my hope that in the future, Congress will try to improve the financial integrity of the system for future retirees by examining ways which will ease some of the Federal restrictions that were placed on the railroad retirement system since the 1930's. Earlier this year in a hearing before the Subcommittee on Commerce, Transportation, and Tourism, on which I serve, Mr. Fred Hardin, president of the UTU, told me that if the Federal Government had not taken such an active role in regulating the retirement system it could have purchased income property and made other investments to insure the system's financial integrity over the years. It may be wise for us in the future to loosen some of these restrictions which we have put on the railroad retirement system so that it can invest in the private sector, and see a greater return on its investment. It is possible that if the Government had not placed such prohibitive restrictions on the system, and allowed the railroad retirement system to invest like other pension funds, the action we are taking today which raises taxes on employees and retirees would not have been necessary.

Again, I urge my colleagues to support H.R. 1646. It is a bill that keeps the retirement system for railroad retirees solvent. That is good for the country.

Mr. HUBBARD. Mr. Chairman, I rise today in support of the Railroad Retirement Solvency Act of 1983. Passage of this legislation is urgently needed. As we know, if enacted this legislation will rescue the railroad retirement system in the same way that the social security system had to be rescued, and it will also prevent a 40-percent cut in pension benefits scheduled to begin in October 1983.

Mr. Chairman, I have many constituents who are railroad employees and railroad retirees. This legislation is extremely important to them and to their families. It is for this reason that I cosponsored H.R. 1646, the original bill.

Both H.R. 1646 and the substitute amendment, H.R. 3619, have been carefully reviewed and endorsed by both railroad labor and management as the best means to resolve the critical problems with which the railroad retirement fund is faced.

In addition, both the Committee on Energy and Commerce and the Committee on Ways and Means have carefully considered this legislation. They have brought before the House the compromise bill, H.R. 3619, which is acceptable to railroad labor and management.

Therefore, for the benefit of railroad employees and retirees throughout the Nation, I urge my colleagues to vote "Yes" to the Railroad Retirement Solvency Act of 1983.

Mr. GILMAN. Mr. Chairman, I rise in support of H.R. 1646, the Railroad Retirement Solvency Act of 1983. This measure is a complex one that required much deliberation and discussion in order to insure its solvency. The legislation averts the cuts in benefits slated to take effect on October 1, 1983, because of lack of funds. H.R. 1646 is designed to raise revenues by several billion dollars over the next 5 fiscal years, primarily from increases in payroll taxes paid by both the employee and employer.

There are many complicated provisions of this legislation; provisions which will insure the solvency of the system brought about by hard work and compromise on the part of all the participants in fashioning this bill.

The tier II benefit COLA will be deferred for 6 months, as was the case with the COLA under the Social Security Act Amendments, and will take effect on January 1984. H.R. 1646 repeals the authority for the railroad unemployment program to borrow funds from either the retirement account or from the Federal unemployment insurance trust fund, and modifies the 60/30 benefit provision.

The Congressional Budget Office estimates that this measure will result in increases in unified budget revenues of $140 million in fiscal year 1984, $636 million in fiscal year 1985, and over $1 billion per year in fiscal years 1986 to 1988. Having been considered by both the Committee on Energy and Commerce as well as the Committee on Ways and Means, I am confident that H.R. 1646 is a viable means for seeking the solvency of a retirement system that is so vital to many of my constituents. Accordingly, Mr. Chairman, I urge prompt passage of this legislation by my colleagues.

Mr. MORRISON of Connecticut. Mr. Chairman, I rise in support of the Railroad Retirement Solvency Act of 1983. This legislation is needed if we are to avoid a drastic reduction in benefits on October 1 of this year.

H.R. 1646 will not please everyone. It is, however, a fair compromise of the interests at stake. The bill would require each of the major participants—retirees, management, current workers and the Federal Government—either to give up some benefits or pay a little more in order to maintain the financial soundness of the system. I believe that this is a reasonable response since each of these groups benefits substantially from the existence of a reliable pension system and no one group can afford to bear the burden of the funding shortfall which will occur without some change.

I want to commend the chairman of the subcommittee, Mr. FLORIO, for putting together a bill that has the support of railroad management and the majority of labor unions representing the workers. The retirees of my district have made it clear to me that they also support this legislation.

I also want to thank the chairman for moving to protect the immediate interests of railroad workers who were about to retire under the 60/30 benefit

rules. As originally proposed, the bill would have required a 20-percent reduction in the 60/30 benefit, effective July 1, 1983. The Florio amendment protects workers who are about to retire by keeping the present 60/30 benefit for persons eligible to retire on or before June 30, 1984. As amended, the bill provides for a 10-percent reduction in early retirement benefits for persons eligible to retire from July 1, 1984, through December 31, 1985. The full 20-percent reduction will not take effect until January 1, 1985. This is a substantial improvement over the original bill.

I urge my colleagues to support this important legislation.

● Mr. MONTGOMERY. Mr. Chairman, I rise in support of the Railroad Retirement Solvency Act and would like to commend the Ways and Means Committee and Energy and Commerce Committee for the very hard work they have put into the legislation and for the compromise they have brought to us for consideration.

While I feel sure that the parties affected by this legislation will not be totally pleased with every single provision of the measure, I do feel the bill represents an important step forward in assuring the financial stability of the railroad retirement fund.

The bill will require some sacrifices, not unlike the sacrifices required in the social security legislation earlier this year, but it will also assure our railroad retirees of earned benefits during their retirement years.

Mr. Chairman, I hope my colleagues will support this legislation and that it will be passed by the House.●

● Mr. MATSUI. Mr. Chairman, I am most pleased to rise in support of H.R. 1646, the Railroad Retirement Solvency Act of 1983. Without this legislation, railroad retirees would face a 40-percent reduction in their tier 2 benefits on October 1, 1983. This measure contains other important provisions, which make needed changes in the railroad unemployment compensation system.

I am supporting this bill for the fundamental reason that it ends the yearly guessing game that railroad retirees have faced about the level of their pension benefits since the enactment of the Reagan administration's budget in 1981. H.R. 1646 reaffirms that railroad employees and retirees are entitled to pension certainty.

H.R. 1646 represents a compromise worked out between rail labor and management, and the Reagan administration. The legislation imposes new taxes on rail employers and employees, accelerates employer payroll tax deposits to conform with recent modifications in social security laws, and taxes windfall and tier 2 benefits as a private pension depositing the proceeds into the railroad retirement account. In addition, H.R. 1646 requires the Railroad Retirement Board to submit an annual report on the financial status of the railroad retirement system along with any recommended financing changes to the Ways and Means Committee.

As a member of the Ways and Means Committee, I worked aggressively to insure that a fair and equitable solution was reached to avert this pension crisis. The final recommendations of the Ways and Means Committee, as endorsed by rail labor and management, are responsible and deserve the support of the House.●

● Mr. ROGERS. Mr. Chairman, I rise today in support of the Railroad Retirement Solvency Act. And I would like to begin by commending my colleagues on the Energy and Commerce Committee and the Ways and Means Committee, and especially the leadership of these committees for their prompt action on this vitally important legislation.

Mr. Chairman, over the past half year, scarcely a day has gone by when I have not found several letters on my desk sent by railroad retirees in my district. The handwriting on these letters varied, the postmarks on the envelopes varied—but there was one message that came through every last one of these letters.

In letter after letter, they made their plea. These railroad retirees told me how hard it already was for them to make ends meet. They told me how important their annuities were—how they and their families were counting on these annuity checks to pay the bills, buy the groceries, and keep a roof over their heads. They asked me to do everything in my power to help keep their benefits safe and to prevent these crippling cuts in their benefits.

And Mr. Chairman, for every last one of these railroad retirees who listens for the news each day, waiting to find out whether his benefits will be cut, for every last one of these retirees who has such a reasonable demand to make, I would like to present their message to the U.S. Congress.

Mr. Chairman, there are parts of this legislation which some of my colleagues might like better than others. I know some of my colleagues are concerned about the dual benefits and other long-term problems in the system. And there are many of us who would have preferred to have avoided tax increases on these benefits or raising the retirement age to qualify for full benefits. But Mr. Speaker, on behalf of my constituents, constituents who probably would not be able to keep body and soul together if they were to suffer a 40-percent cut in their annuities, I urge you to bury your differences and to adopt the legislation we have before us today. The committees have done a good job in working with labor and management to develop a compromise solution. And it is the only way we have to prevent a devastating cut in retirement benefits. And across our land, there are 1 million, yes, that is 1 million railroad retirees who are waiting for us to do the responsible and right thing and save their benefits.

I would also like to point out to my colleagues that railroad retirement benefits are not gifts—they are benefits which have been earned by our retirees by hard work over the course of many years. And if they were to suffer that 40 percent cut, it would be through no fault of their own.

The primary cause of the financial problems facing the railroad retirement system stems from the recession—which has led to a drop in railroad employment from 510,000 in August of 1981 to 388,000 as of last January. This drop in employment has meant that fewer workers were paying into the fund, so tax revenues flowing into the retirement system have been dropping. Making the problem worse, with the hard times, more workers have decided to retire early, so we have been paying more out from the fund for benefits. And for all these reasons, along with the depletion of the fund for unemployment benefits, the retirement fund has been drawn down to dangerous levels, until we have reached the point where there would not be enough money to pay for the benefits in fiscal year 1984 unless we take strong legislative action.

And Mr. Chairman, the bill before us today is the strong action we need to save railroad retirement benefits.

Mr. Chairman, from McCreary County to Pulaski County, from Harlan County to Whitley County, railroad retirees in my district have sent me a message which I would like to repeat to my colleagues here today: Railroad retirement benefits have been earned by our retirees, railroad retirement benefits are needed by our retirees, and railroad retirement benefits should be protected by our Congress. I urge my colleagues to join with me today in taking the fair and responsible action we need to take, and vote in favor of the Railroad Retirement Solvency Act.●

● Mr. MARLENEE. Mr. Chairman, I rise today in support of the railroad retirement system. For railworkers this is an emotional issue akin to that of social security. We in Congress must take steps to insure a solvent railroad retirement system. This is not the time to debate the higher question of whether or not there should be such a system. No, this is a bread and butter issue, and without immediate action, we will cause railroad retirement tier 2 benefits to be cut 40 percent in October. If we do not act now to solve the financial problems of the system we will throw 991,000 retirees, of which 81 percent are 65 or older,

into confusion and undeserved financial despair.

Granted, this bill is not perfect: I specifically would have preferred to see a greater phase-in of a change in the 60/30 (full retirement benefits after reaching 60 years of age with 30 years of service). I have 7,265 railworkers in my State between 50 and 60 who have made retirement plans based on the promise of full retirement benefits. It is unfortunate we have to pull the rug out from under these workers in our effort to save the whole system.

This bill asks sacrifices from workers, retirees, industry, and the taxpayer. It gives us time to reexamine the railroad retirement system without a crisis hanging over us. I urge my colleagues on both sides of the aisle to take this opportunity to monitor the system to avoid these crisis situations in the future. It is inexcusable for retirees, their survivors and dependents to fear a loss of income and to experience reductions in income in the future.

I support this bill, and I hope it will be the beginning of a new relationship between Congress and railroad retirees. We owe them this dignity.●

● Mr. BROWN of California. Mr. Chairman, we all know that the railroad retirement system is in trouble. Declining employment levels have reduced revenues to the system and exacerbated its deficit. According to legislation passed in 1981, benefits for retirees will have to be reduced by 40 percent in order to bring disbursements in line with available funds. The agreement we are considering today—which includes benefit cuts, tax increases, and the taxation of industry pensions—is a commendable effort by the rail industry to achieve a bittersweet solution to save its retirement system.

No one likes benefit cuts or cost-of-living delays and no one likes tax increases. But the nature of the problem is such that without these corrective measures, we face a much worse dilemma. I believe we owe the hundreds of thousands of railworkers the peace of mind that comes from knowing that drastic benefit cuts are not on the horizon; the peace of mind that comes from seeing that their years of long, hard work will result in promised retirement benefits.

This legislation is a good example of a cooperative approach to solving a complex and difficult problem. Between rail labor, management, industry, and the respective committees in the House, a solution which addressed immediate and long-term solvency of the railroad retirement system has been achieved. I would hope that if the rail industry is willing to take this bitter pill as a cure to its retirement ills, the House will do the same.●

● Mr. SEIBERLING. Mr. Speaker, I rise in support of the amendment offered by Mr. FLORIO. I want to commend him and the gentlewoman from Colorado for their efforts to rid the statute books of laws which unjustly deprive women of their pension rights. Many women in this country owe them both a deep debt of gratitude for their persistence.

Mr. Chairman, this amendment was made necessary by a 1979 Supreme Court decision which overturned a unanimous California Supreme Court ruling in the case of Hisquierdo against Hisquierdo. Jess Hisquierdo sued his wife Angela for divorce in 1975, after 14 years of marriage, during which she was a homemaker and he a worker for the Atchison, Topeka & Santa Fe Railway. The California Supreme Court ruled unanimously that Mrs. Hisquierdo was entitled as a matter of ownership under California's community property laws to half his pension benefits attributable to his labor during their marriage. The U.S. Supreme Court revised that decision, holding that section 14 of the Railroad Retirement Act protects railroad retirement benefits from legal process "notwithstanding any other law * * * of any State."

I have introduced legislation since 1979 to overturn the Hisquierdo decision. It seems outrageous to me to argue that Congress intended to deprive a former spouse of the pension benefits she contributed to by her labors in the home. Marriage is an economic partnership, and I frankly think Congress should recognize that fact by establishing joint worker-spouse ownership of Federal pensions. At the very least, we should not frustrate the laws of those eight States which have already established a community property interest in pension benefits.

Mr. Chairman, this amendment will not mean any additional expense for either the Federal Government or the railroad retirement system. In fact, it will probably mean a savings of tax dollars, since some women who lost pension benefits by laws such as this have had to turn to welfare for subsistence. In addition, the amendment has been carefully crafted to affect only the tier II portion of railroad retirement benefits, leaving unaffected the social security portion of these benefits. Finally, the amendment does not itself order the division of pension benefits; it simply says that the Railroad Retirement Board must comply with court-approved separation agreements, divorce decrees, and property settlement agreements. In so doing, the amendment takes the Federal Government out of the area of domestic relations, where it has never been and does not belong.

Mr. Chairman, I urge the adoption of this amendment.●

● Mr. BOUCHER. Mr. Chairman, I rise in support of H.R. 1646, legislation to reform the railroad retirement system and to prevent the massive reduction in benefits to current retirees that will be required without immediate passage of reform legislation.

Since 1981, railroad employment has decreased 34 percent. This massive drop in employment has drained the railroad retirement system of revenues required to finance benefits for existing retirees. Under current law, the system will be forced into balance through benefit cuts as high as 40 percent absent comprehensive reform of the tax and benefit structure.

In response to this threat, rail labor and rail management joined together to construct a reform package which protects benefits to the greatest extent possible and which would be financially acceptable to the railroads themselves. The result of these negotiations was legislation reported by both the House Energy and Commerce Committee and the Ways and the Means Committee.

The basic provisions of the reform package include increases in payroll taxes for both employers and employees, a 6-month delay in the cost-of-living adjustment for retirees, and an increase in the age at which railroad employees may retire with full benefits after 30 years of service.

During House consideration of the Social Security Act amendments earlier this year, I strongly opposed both the delay in COLA for retirees and the increase in the retirement age mandated by the amendment offered by Mr. PICKLE of Texas; I voted against final passage of the social security bill largely because of these two provisions.

Absent the support of both railroad employees and railroad retirees for the provisions of H.R. 1646, I would have severe reservations concerning its provisions which delay the COLA for retirees and which increase the retirement age for workers. Because of the impending 40 percent reduction in benefits that would occur without the passage of this legislation, however, and because railroad employees and retirees are united in their support of H.R. 1646, including these provisions, I intend to vote for final passage of this legislation.

Protecting the retirement benefits of all Americans, whether they receive social security, Federal retirement, railroad retirement, military retirement, or benefits from a private pension plan is one of the most important responsibilities of Congress. Where commitments have been made, commitments must be honored. Where changes must be made, as is the case in the railroad retirement system, every effort must be made to protect the benefits of retirees and to secure the support of those retirees for the changes in benefits.

Contrary to the constructive efforts of the labor-management committee to agree on a retirement-reform package, President Reagan has proposed massive changes in the retirement system that would be particularly harmful to retirees. In his budget proposal for fiscal year 1984, the President reaffirmed his 1983 position but indicated that he would accept a straight 17-percent reduction in tier 2 benefits affecting more than 1 million railroad retirees.

In contrast to the President's proposal, H.R. 1646 is a carefully balanced package designed to protect the benefits of current retirees, to assure benefits to future retirees, and to work within the financial constraints these difficult times have imposed on the railroads themselves.

I commend Chairman DINGELL of the Energy and Commerce Committee, Chairman ROSTENKOWSKI of the Ways and Means Committee, and those members of rail labor and rail management negotiating teams who contributed to this delicate compromise.●

● Mr. PURSELL. Mr. Chairman, as the House considers this legislation, I would like to share several comments offered by rail employees in my congressional district. These individuals have called to my attention concerns with proposed changes in the so-called 60/30 benefit schedule. Under current law, rail employees with 30 years of service are eligible to retire with full retirement benefits at the age of 60. In many instances, retirement plans often precede by several months actual retirement from employment. This means, for example, that a rail employee approaching the age of 60 may begin planning his or her retirement at age 59.

I fully realize the serious condition of the current railroad retirement system. Without corrective action, hundreds of thousands of current rail retirees will experience drastic benefit reductions. The legislation before the Congress corrects the deficiencies of both the railroad unemployment compensation account and the railroad retirement system. One such correction comes in the 60/30 benefit structure. Under H.R. 1646, provides that employees who retire before age 62, and after age 60, will receive a monthly tier I flat rate of $550. This amount will be indexed for wage increases for those who begin receiving annuities under the 60/30 requirement in subsequent years. Railroad employees retiring after the age of 62 are unaffected by this provision. I am concerned by this change because it allows no time for those very close to retirement age to adjust their retirement plans. It would have been far more to my liking to have changes in the 60/30 system phased in 6 months at a time. Under this type of procedure, employees close to retirement would be able to better adjust to the changes proposed here today.●

● Mr. BLILEY. Mr. Chairman, I rise in support of the Railroad Retirement Solvency Act on behalf of the many Richmond-area residents who are railroad retirees and employees. For them, this legislation, which guarantees a retirement system they have paid for and been promised, is every bit as important as the social security rescue plan we passed this spring.

Without this legislation, thousands of railroad retirees in the Richmond area would face a 40-percent reduction in their benefits in only 2 months. Such a reduction in the retirement benefits they worked so hard for would be through no fault of their own, but due to poor planning by actuaries and a generally poor economy. Such a reduction is, quite simply, unacceptable.

This legislation was worked out through a remarkable process of cooperation between rail labor, management, and the administration. The bill provides for very modest adjustments in benefits, similar to those enacted in the social security rescue plan. It provides for reasonable tax increases so that the railroads themselves and their employees will bear most of the burden of this plan. And, the bill does this without placing unreasonable burdens on other taxpayers and the General Treasury.

With this legislation, the railroad retirement system should remain solvent, and benefits continue being paid, for the foreseeable future. But even in the event that we are wrong, this bill makes an important change. Never again will we hold retirees hostage to funding problems they did not create, for this bill will eliminate the unfair automatic benefit reduction which today threatens the security of retirees who depend on these benefits as their only income. Instead, the Railroad Retirement Board will be charged with the responsibility of preparing annually 5-year projections for income and expenses. If those projections are unbalanced, the board will have to report to Congress with suggestions to solve the problems. Thus retirees will never again be faced with a threat of a 40-percent or greater benefit cut, and Congress will not have to legislate in a crisis atmosphere.

Finally, this plan will guarantee those still working for America's railroads that their retirement will be comfortable and secure.

I believe the railroad employees and management should be commended for coming forward with this very fair and reasonable plan, and I urge my colleagues to support its passage.●

● Mrs. COLLINS. Mr. Speaker, I rise in support of H.R. 1646, the Railroad Retirement Solvency Act.

In the past few years, as Chairwoman of the House Government Operations Committee on Manpower and Housing, I have chaired numerous hearings on the operations of the Railroad Retirement Board.

I am deeply aware of the kinds of aggravations the annuitants and dependents of the RRB constantly face. The legislation which we are addressing today will go a long way toward increasing the financial security of RRB dependents. Unfortunately, this bill is not the final step. Until the RRB begins offering the same level of service as is offered by Social Security, true parity will not exist. RRB beneficiaries will still be shortchanged.

In 1981, hearings held by my subcommittee demonstrated that the RRB field-office stucture is outmoded. RRB field offices are not equipped to handle many beneficiary services. RRB field personnel are not adequately trained. Communication between offices and the main office in Chicago are antiquated, causing beneficiaries to wait for weeks for answers to questions of critical importance.

In fact, Mr. Chairman, the Board still clings to the outmoded idea of "intinerant" offices, where beneficiaries have to meet RRB personnel at their local post office, for example, for service. While almost all insurance companies have "800" telephone numbers for toll-free calls to assist beneficiaries, the Board had yet to install toll-free customer service. Rather beneficiaries are given schedules of traveling RRB personnel in their area. The Board representative might be at the local Federal office building one day every 2 weeks, or he might stop at the post office to answer questions or deliver forms. The RRB would rather their annuitants did not call the local RRB office. Rather, they want to provide face-to-face contact.

Likewise when the local RRB office needs to transfer or receive records to or from central office, the material might travel by mail. The records themselves might be compiled by hand.

The Railroad Retirement Board has dragged its feet on the issue of modernization of equipment and procedure. Computerization and automation have been slow. The Board has ignored technological advancements which would have made the Board's operation more efficient and thorough.

I suggest that part of the reason for the short-sightedness of the agency has been the financial turmoil it has faced for the past 20 years. I know from conversations I have had with Board personnel that planning in the Board has been minimal and that upheavals in the funding and benefits structure have cost the Board dearly. For example, the process the RRB needs to follow when adjustments are made to beneficiary qualifications can

immobilize the Board's computers for months.

This is simply not the way to run as important an agency as the Railroad Retirement Board, which is the financial lifeline for hundreds of thousands of people. We have to rescue the Board once and for all.

We have got to demand that the Board be professionally run, with state-of-the-art procedures, and with permament identity.●

Mr. CONABLE. Mr. Chairman, I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule.

It shall be in order to consider an amendment in the nature of a substitute consisting of the text of H.R. 3619, which shall be considered as having been read for amendment, in lieu of the amendments recommended by the Committees on Energy and Commerce and Ways and Means, now printed in the bill.

No amendments are in order to the bill or the said substitute except the following, which shall not be subject to amendment except as herein specified:

First, amendments recommended by the Committees on Energy and Commerce and Ways and Means; second, the amendment printed in the CONGRESSIONAL RECORD of July 25, 1983, by, and if offered by, Representative FLORIO or Representative SCHROEDER inserting a new section 419 in said substitute; third, the amendment printed in the CONGRESSIONAL RECORD of July 25, 1983, by, and if offered by, Representative PICKLE to said substitute, which shall be subject to the amendment printed in the CONGRESSIONAL RECORD of July 25, 1983, by and if offered by, Representative FLORIO; and fourth, amendments printed in the CONGRESSIONAL RECORD of July 26, 1983, by Representative RIDGE and if offered by Representative FLORIO or Representative ROSTENKOWSKI.

The Clerk will designate the amendment in the nature of a substitute.

The text of the amendment in the nature of a substitute is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

H.R. 3619

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Railroad Retirement Solvency Act of 1983".

TITLE I—BENEFIT ADJUSTMENTS

SEC. 101. (a) Section 3(a) of the Railroad Retirement Act of 1974 is amended—

(1) by amending subdivision (2) to read as follows:

"(2) For purposes of this subsection, individuals entitled to an annuity under paragraph (iv) or (v) of section 2(a)(1) of this Act shall be deemed to be entitled to a disability insurance benefit under section 223 of the Social Security Act."; and

(2) by adding at the end thereof the following new subdivision:

"(3) In lieu of an annuity amount provided under subdivision (1), the annuity of an individual entitled to an annuity under paragraph (ii) of section 2(a)(1) of this Act which begins to accrue before the individual attains age 62 shall be in an amount equal to—

"(i) for each month prior to the first month throughout which the individual is age 62, a monthly rate of $550 in the case of an individual whose annuity begins to accrue before January 1, 1984, or, in the case of an individual whose annuity begins to accrue on or after January 1, 1984, the monthly rate applicable in the calendar year before the calendar year in which the individual's annuity begins to accrue multiplied by the ratio of (A) the average of the total wages (as defined in regulations of the Secretary of the Treasury and computed without regard to the limitations specified in section 209(a) of the Social Security Act or section 3(j) of this Act) reported to the Secretary of the Treasury or such Secretary's delegate for the calendar year two years before the calendar year in which the individual's annuity begins to accrue to (B) the average of the total wages (as so defined and computed) reported to the Secretary of the Treasury or such Secretary's delegate for the calendar year three years before the calendar year in which the individual's annuity begins to accrue, with such product, if not a multiple of $1, being reduced to the next lower multiple of $1; and

"(ii) for months beginning with the first month throughout which the individual is age 62, the amount (after any reduction on account of age but before any deductions on account of work) of the old-age insurance benefit to which such individual would have been entitled under the Social Security Act if all of such individual's service as an employee after December 31, 1936, had been included in the term 'employment' as defined in that Act.".

(b) Section 4(a) of the Railroad Retirement Act of 1974 is amended—

(1) by striking out "spouses" in subdivision (2) and inserting in lieu thereof "if an individual is entitled to an annuity under paragraph (ii) of section 2(a)(1) of this Act which did not begin to accrue before such individual attained age 62, the spouse of such individual"; and

(2) by adding at the end thereof the following new subdivisions:

"(3) In the case of an individual entitled to an annuity under section 2(a)(1)(ii) of this Act which began to accrue before such individual attained age 62, the annuity of the spouse of such individual under section 2(c) of this Act shall, in lieu of an annuity amount provided under subdivision (1), be in an amount equal to—

"(i) for each month prior to the first month throughout which both the individual and the spouse are age 62, 50 per centum of that portion of the individual's annuity as is, or was prior to such individual's attaining age 62, computed under section 3(a)(3)(i) of this Act, reduced to the same extent such amount would be reduced under section 202(b)(4) of the Social Security Act (in the case of a wife) or under section 202(c)(2) of the Social Security Act (in the case of a husband) as if such amount were a wife's insurance benefit or a husband's insurance benefit, respectively, under such Act; and

"(ii) for months beginning with the first month throughout which both the individual and the spouse are age 62, the amount (after any reduction on account of age based on the spouse's age at the time the amount under this paragraph first becomes payable but before any deductions on account of work) of the wife's insurance benefit or the husband's insurance benefit to which such spouse would have been entitled under the Social Security Act if the individual's service as an employee after December 31, 1936, had been included in the term 'employment' as defined in that Act.

"(4) In the case of an individual entitled to an annuity under paragraph (iv) or (v) of section 2(a)(1) of this Act, the annuity of the spouse of such individual entitled to an annuity under section 2(c)(1)(ii)(B) of this Act shall, in lieu of an annuity amount provided under subdivision (1), be in an amount equal to the amount (after any reduction on account of age but before any deductions on account of work) of the wife's insurance benefit or the husband's insurance benefit to which such spouse would have been entitled under the Social Security Act if the individual's service as an employee after December 31, 1936, had been included in the term 'employment' as defined in that Act. For purposes of this subdivision, spouses who have not attained age 62 shall be deemed to have attained age 62.".

(c) The amendments made by this section shall become effective on July 1, 1983, and shall apply only with respect to awards in cases where the individual's application was filed on or after that date or where the individual's annuity under section 2(a)(1) of the Railroad Retirement Act of 1974 began to accrue on or after that date.

SEC. 102. (a) Section 3(g) of the Railroad Retirement Act of 1974 is amended to read as follows:

"(g)(1) Effective with the date of any increase after January 31, 1984, in monthly insurance benefits under the Social Security Act which occurs, or which would have occurred had there not been a general benefit increase under that Act, pursuant to the automatic cost-of-living provisions of section 215(i) of that Act, that portion of the annuity of an individual which is computed under subsection (b) of this section shall, if such individual's annuity under section 2(a)(1) of this Act began to accrue on or before the effective date of a particular increase under this subdivision, be increased by 32.5 per centum of the percentage increase in the index which is used, or which would have been used had there not been a general benefit increase under the Social Security Act, in increasing benefits under the Social Security Act pursuant to the automatic cost-of-living provisions of section 215(i) of that Act. Any increase under this subsection shall not be deferred and shall be reflected in all payments made to annuitants after such increase under this subsection becomes effective.

"(2) The first and, if necessary, the following time or times after January 1, 1983, that monthly insurance benefits under section 202 of the Social Security Act are increased, that portion of the annuity of an individual which is computed under subsection (b) of this section as increased under subdivision (1) of this subsection shall, if such individual's annuity under section 2(a)(1) of this Act began to accrue in or before the year in

which such first increase under the Social Security Act became effective, be reduced by the dollar amount by which that portion of the annuity provided such individual under subsection (a) of this section was increased, after any reduction under subsection (m) of this section, as a result of such increase or increases under the Social Security Act until the total dollar amount of such reduction or reductions equals 5 per centum of the annuity amount provided such individual under subsection (a), as reduced under subsection (m), prior to such first increase. In no case shall the reduction by reason of this paragraph operate to reduce such portion to an amount less than $10.".

(b) Section 4(d) of the Railroad Retirement Act of 1974 is amended—

(1) by inserting "(1)" after "(d)";

(2) by striking out "3(g)" and inserting "3(g)(1)" in lieu thereof; and

(3) by adding at the end thereof the following new subdivisions:

"(2) That portion of the annuity of the spouse of an individual as is determined under subsection (b) of this section prior to any determination under subsection (c) of this subsection shall, if the annuity of such spouse is not subject to reduction under subdivision (3) of this subsection, be reduced by an amount equal to 50 per centum of the dollar amount by which the annuity of the individual was reduced under section 3(g)(2) of this Act. In no case shall the reduction by reason of this paragraph operate to reduce such portion to an amount less than $10.

"(3) The first and, if necessary, the following time or times after January 1, 1983, that monthly insurance benefits under section 202 of the Social Security Act are increased, that portion of the annuity of the spouse of an individual as is determined under subsections (b), (c), and (d)(1) of this section shall, if such spouse's annuity under section 2(c) of this Act began to accrue in or before the year in which such first increase under the Social Security Act became effective, be reduced by the dollar amount by which that portion of the annuity provided such spouse under subsection (a) of this section was increased, after any reduction under subsection (i) of this section, as a result of such increase or increases under the Social Security Act until the total dollar amount of such reduction or reductions equals 5 per centum of the annuity amount provided such spouse under subsection (a), as reduced under subsection (i), prior to such first increase. In no case shall the reduction by reason of this paragraph operate to reduce such portion to an amount less than $10.".

(c) Section 4(g) of the Railroad Retirement Act of 1974 is amended—

(1) in subdivision (1), by inserting "and without regard to any reduction under section 3(g)(2) of this Act" after "before any reduction on account of age";

(2) in subdivision (6), by striking out "3(g)" and inserting "3(g)(1)" in lieu thereof; and

(3) by adding at the end the following new subdivisions:

"(7) The first and, if necessary, the following time or times after January 1, 1983, that monthly insurance benefits under section 202 of the Social Security Act are increased, that portion of the annuity of a survivor of a deceased individual as is determined under subdivisions (1) and (2) of this subsection, or under section 4(g) of this Act as in effect before amendment by section 1119(g) of Public Law 97-35, shall, if such survivor's annuity under section 2(d) of this Act began to accrue before the effective date of such first increase under the Social Security Act, be reduced by the dollar amount by which that portion of the annuity provided such survivor under subsection (f) of this section was increased, after any reduction under subsection (i) of this section, as a result of such increase or increases under the Social Security Act until the total dollar amount of such reduction or reductions equals 5 per centum of the annuity amount provided such survivor under subsection (f), as reduced under subsection (i), prior to such first increase. In no case shall the reduction by reason of this paragraph operate to reduce such portion to an amount less than $10.

"(8) That portion of the annuity of a survivor of a deceased individual as is determined under subdivisions (1) and (2) of this subsection shall, if the annuity of such survivor is not subject to reduction under subdivision (7) of this subsection, be reduced by an amount equal to the dollar amount by which the annuity of the deceased individual was reduced under section 3(g)(2) of this Act or would have been reduced under such section 3(g)(2) if such deceased individual had been living at the time such survivor's annuity under section 2(d) of this Act began to accrue (deeming for this purpose, if such individual died before becoming entitled to an annuity under section 2(a)(1) of this Act, that such individual became entitled to an annuity under paragraph (i) of such section 2(a)(1) in the month in which such individual died). In a case where the survivor of a deceased individual is not entitled to a monthly insurance benefit under the Social Security Act, the reduction provided by the preceding sentence of this subdivision shall be equal to the dollar amount by which the annuity of the deceased individual would have been reduced under section 3(g)(2) of this Act if the annuity of such deceased individual had not been subject to reduction under section 3(m) of this Act. In no case shall the reduction by reason of this paragraph operate to reduce such portion to an amount less than $10.

"(9) That portion of the annuity of a survivor of a deceased individual as is determined under section 4(g) of this Act as in effect before amendment by section 1119(g) of Public Law 97-35 shall, if the annuity of such survivor is not subject to reduction under subdivision (7) of this subsection, be reduced by an amount equal to the dollar amount by which the annuity of the deceased individual was reduced under section 3(g)(2) of this Act or, if such survivor is not entitled to a monthly insurance benefit under the Social Security Act, would have been reduced under such section 3(g)(2) if the annuity of such deceased individual had not been subject to reduction under section 3(m) of this Act. In no case shall the reduction by reason of this paragraph operate to reduce such portion to an amount less than $10.".

(d) The amendments made by this section shall be effective on the date of the enactment of this Act. For purposes of the amendments made by subsection (a) of this section, annuity portions computed under subsections (b) and (d) of section 3 of the Railroad Retirement Act of 1974 as in effect before October 1, 1981, shall be treated as having been computed under subsection (b) of such section as in effect after that date.

SEC. 103. (a) Section 5(a) of the Railroad Retirement Act of 1974 is amended—

(1) by striking out "An annuity" at the beginning and inserting in lieu thereof "Subject to the limitations set forth below, an annuity";

(2) by amending paragraphs (ii) and (iii) to read as follows:

"(ii) in the case of an applicant otherwise entitled to an annuity under paragraph (iv) or (v) of section 2(a)(1) or under section 2(d)(1)(i) on the basis of disability, not earlier than the later of (A) the first day of the sixth month following the onset date of the disability for which such annuity is awarded or (B) the first day of the twelfth month before the month in which the application therefor was filed;

"(iii) in the case of an applicant otherwise entitled to an annuity under section 2(a)(1), 2(c), or 2(d) where paragraph (ii) does not apply, not earlier than the latest of (A) the first day of the sixth month before the month in which the application therefor was filed, (B) the first day of the month in which the application therefor was filed if the effect of beginning such annuity in an earlier month would result in a greater age reduction in the annuity, unless beginning the annuity in the earlier month would enable an annuity under section 2(c) which is not subject to an age reduction to be payable in such earlier month, (C) in the case of an applicant otherwise entitled to an annuity under section 2(a)(1) or 2(c), the date following the last day of compensated service of the applicant, or (D) in the case of an applicant otherwise entitled to an annuity under section 2(a)(1) or 2(c), the first day of the first month throughout which the applicant meets the age requirement for the annuity applied for;" and

(3) by adding at the end thereof the following new sentence: "For the purpose of determining annuity amounts provided under sections 3(a), 4(a), and 4(f) of this Act, the provisions with respect to the beginning dates of annuities set forth in this subsection shall be deemed to govern the beginning dates of monthly benefits provided under the Social Security Act.".

(b) The amendments made by this section shall become effective on July 1, 1983, and shall apply only with respect to annuities awarded on the basis of applications filed on or after that date.

SEC. 104. (a) Clause (B) of section 2(d)(1)(iii) of the Railroad Retirement Act of 1974 is amended to read as follows: "(B) will be less than nineteen years of age and a full-time elementary or secondary school student,".

(b) Section 2(d)(4) of the Railroad Retirement Act of 1974 is amended—

(1) by striking out "full-time student" each place it appears and inserting in lieu thereof "full-time elementary or secondary school student";

(2) by striking out "educational institution" each place it appears and inserting in lieu thereof "elementary or secondary school";

(3) by striking out "twenty-two" in the fourth sentence and inserting in lieu thereof "nineteen"; and

(4) by striking out "degree from a four-year college or university" and inserting in lieu thereof "diploma or equivalent certificate from a secondary school (as defined in section 202(d)(7)(c)(i) of the Social Security Act)".

(c) Section 5(c)(7) of the Railroad Retirement Act of 1974 is amended—

(1) by striking out "full-time student" and inserting in lieu thereof "full-time elementary or secondary school student"; and

(2) by striking out "22" and inserting in lieu thereof "19".

(d) The amendments made by this section shall be effective with respect to annuities accruing for months after the month in which this Act is enacted except in the case of a child who has attained the age of eighteen in or before the month in which this Act is enacted and is entitled to an annuity under section 2(d) of the Railroad Retirement Act of 1974 for the month in which this Act is enacted or, if earlier, for the month of April 1983.

SEC. 105. (a) Section 22 of the Railroad Retirement Act of 1974 is amended—

(1) so that the heading of such section reads as follows:

"REPORTING REQUIREMENT";

(2) by striking out "(a)" and all that follows through the end of subsection (a) of such section and inserting in lieu thereof the following: "(a) On or before February 1 of each year beginning in 1984, the Railroad Retirement Board shall prepare a five-year projection of anticipated revenues to and payments from the Railroad Retirement Account to determine the ability of such Account to pay benefits in each of the next succeeding five calendar years. No later than April 1 of each year, the Board shall submit a written report to the President, the Speaker of the House, and the President of the Senate setting forth the results of the projection prepared pursuant to the preceding sentence. If the projection indicates that the funds in the Railroad Retirement Account will be insufficient to pay the full amount of the benefits under this Act which are payable from that Account at any time during the five-year period, the Board's report shall include recommendations as to the increases in the rates of tax which, if imposed under sections 3201(a), 3211(a), and 3221(a) of the Internal Revenue Code of 1954, would assure that such Account would have sufficient funds to pay full benefits under this Act in each month of the five-year period. Not less than 20 nor more than 30 days after the submission of a written report under this subsection which indicates that, in the absence of any adjustments, the Railroad Retirement Account will contain insufficient funds to pay the full amount of the benefits under this Act which are payable from that Account at some time during the five-year period covered by the report, the Board shall publish such report in the Federal Register."; and

(3) in subsection (b)(2) by striking out ", including a specific proposal" and all that follows through "payable under this Act".

SEC. 106. (a) Section 2(a)(1) of the Railroad Retirement Act of 1974 is amended—

(1) by striking out "the age of sixty-five" from paragraph (i) and inserting in lieu thereof "retirement age (as defined in section 216(l) of the Social Security Act)"; and

(2) by striking out "reduced by 1/180 for each calendar month that he or she is under age sixty-five when the annuity begins to accrue" from paragraph (iii) and inserting in lieu thereof "reduced by 1/180 for each of the first 36 months that he or she is under retirement age (as defined in section 216(l) of the Social Security Act) when the annuity begins to accrue and by 1/240 for each additional month that he or she is under retirement age (as defined in section 216(l) of the Social Security Act) when the annuity begins to accrue".

(b) Section 2(a)(3) of the Railroad Retirement Act of 1974 is amended by striking out "the age of 65" and "the age of sixty-five years" and inserting in lieu thereof in each instance "retirement age (as defined in section 216(l) of the Social Security Act)".

(c) Section 2(c)(1) of the Railroad Retirement Act of 1974 is amended by striking out "the age of 65" from paragraph (ii) and inserting in lieu thereof "retirement age (as defined in section 216(l) of the Social Security Act)".

(d) Section 2(c)(2) of the Railroad Retirement Act of 1974 is amended—

(1) by striking out "the age of 65" and inserting in lieu thereof "retirement age (as defined in section 216(l) of the Social Security Act)"; and

(2) by striking out "reduced by 1/144 for each calendar month that the spouse or divorced wife is under age 65 when the annuity begins to accrue" and inserting in lieu thereof "reduced by 1/144 for each of the first 36 months that the spouse or divorced wife is under retirement age (as defined in section 216(l) of the Social Security Act) when the annuity begins to accrue and by 1/240 for each additional month that the spouse or divorced wife is under retirement age (as defined in section 216(l) of the Social Security Act) when the annuity begins to accrue".

(e) Section 2(c)(4) of the Railroad Retirement Act of 1974 is amended by striking out "the age of 65" and inserting in lieu thereof "retirement age (as defined in section 216(l) of the Social Security Act".

(f) Section 2(e)(2) of the Railroad Retirement Act of 1974 is amended by striking out "age sixty-five" and inserting in lieu thereof "retirement age (as defined in section 216(l) of the Social Security Act)".

(g) Section 2(e)(4) of the Railroad Retirement Act of 1974 is amended by striking out "age sixty-five" and "age of sixty-five" and inserting in lieu thereof in each instance "retirement age (as defined in section 216(l) of the Social Security Act)".

(h) Section 4(a)(2) of the Railroad Retirement Act of 1974 (as amended by section 101(b) of this Act) is amended by striking out "age 65" and inserting in lieu thereof "retirement age (as defined in section 216(l) of the Social Security Act".

(i) Section 5(b) of the Railroad Retirement Act of 1974 is amended by striking out "the age of 65" and "age 65" and inserting in lieu thereof in each instance "retirement age (as defined in section 216(l) of the Social Security Act)".

(j) Section 5(c)(2) of the Railroad Retirement Act of 1974 is amended by striking out "age 65" and inserting in lieu thereof "retirement age (as defined in section 216(l) of the Social Security Act)".

(k) The amendments made by this section shall be effective on the date of the enactment of this Act, except that such amendment shall not apply to annuity amounts provided under sections 3(b) and 4(b) of the Railroad Retirement Act of 1974 or to increases in such annuity amounts provided under sections 3(g) and 4(d) of such Act if the individual upon whose earning record such annuity amounts are based rendered service as an employee to an employer, or as an employee representative, before the date of the enactment of this Act.

SEC. 107. (a) Section 3(i) of the Railroad Retirement Act of 1974 is amended by adding at the end thereof the following new subdivision:

"(4) Where for any calendar year after 1984 an individual has performed service for compensation in less than twelve months of the calendar year but has received compensation in excess of an amount determined by multiplying the number of months in the year in which such individual performed service for compensation by an amount equal to one-twelfth of the current maximum annual taxable 'wages' as defined in section 3121 of the Internal Revenue Code of 1954, the individual shall be deemed to have rendered service for compensation in that number of months in the calendar year, but not to exceed twelve, which is equal to the quotient of the amount of such individual's compensation for the calendar year divided by an amount equal to one-twelfth of the current maximum annual taxable 'wages' as defined in section 3121 of the Internal Revenue Code of 1954, with any remainder produced by this computation increasing the quotient by one, but an individual shall not be deemed under this subdivision to have rendered service for compensation in any month in which such individual was neither in an employment relation to one or more employers nor an employee representative.

"(b) Section 3(j) of the Railroad Retirement Act of 1974 is amended by inserting after the second sentence thereof the following new sentence: 'If for any calendar year after 1984 an employee has received compensation of less than one-twelfth of the current maximum annual taxable 'wages' as defined in section 3121 of the Internal Revenue Code of 1954 in one or more months of the calendar year, the total compensation paid such employee in the calendar year (without regard to the limitation on the amount of compensation provided in the preceding sentence) shall be deemed to have been paid in equal proportions with respect to all months in the year in which the employee will have been in the service of one or more employers for compensation or will have performed service for compensation as an employee representative, but this sentence shall not operate to increase the employee's compensation for any month above an amount equal to one-twelfth of the current maximum annual taxable 'wages' as defined in section 3121 of the Internal Revenue Code of 1954.

"(c) The amendments made by this section shall become effective on January 1, 1985.".

TITLE II—REVENUE PROVISIONS

SEC. 201. SHORT TITLE.

This title may be cited as the "Railroad Retirement Revenue Act of 1983".

SUBTITLE A—RAILROAD RETIREMENT TAXES

PART I—INCREASE IN TIER 2 TAXES FOR PERIOD BEGINNING JULY 1, 1984, AND ENDING DECEMBER 31, 1984

SEC. 211. INCREASE IN TIER 2 TAXES.

(a) EMPLOYEE TAX.—Subsection (a) of section 3201 of the Internal Revenue Code of 1954 (relating to tax on employees) is amended by striking out "2.0 percent" and inserting in lieu thereof "2.75 percent".

(b) EMPLOYER TAX.—Subsection (a) of section 3221 of such Code (relating to tax on employers) is amended by striking out "11.75 percent" and inserting in lieu thereof "12.75 percent".

(c) EMPLOYEE REPRESENTATIVE TAX.—Subsection (a) of section 3211 of such Code (relating to tax on employee representatives) is amended by striking out "11.75 percent" and inserting in lieu thereof "12.75 percent".

(d) TECHNICAL AMENDMENT.—The last sentence of section 230(c) of the Social Security Act is amended by striking out "11.75 percent" and inserting in lieu thereof "12.75 percent".

SEC. 212. EFFECTIVE DATE.

The amendments made by this part shall apply to compensation paid for services rendered after June 30, 1984, and before January 1, 1985.

PART II—OTHER CHANGES AFFECTING TIER 2 TAXES

SEC. 221. INCREASES IN TIER 2 EMPLOYEE TAX; ANNUALIZATION OF TAX BASE.

Section 3201 of the Internal Revenue Code of 1954 (relating to rate of tax on employees) is amended to read as follows:

"SEC. 3201. RATE OF TAX.

"(a) TIER 1 TAX.—In addition to other taxes, there is hereby imposed on the income of each employee a tax equal to the following percentage of the compensation received during any calendar year by such employee for services rendered by such employee:

"In the case of compensation received during:	The rate shall be:
1985	7.05
1986 or 1987	7.15
1988 or 1989	7.51
1990 or thereafter	7.65.

"(b) TIER 2 TAX.—In addition to other taxes, there is hereby imposed on the income of each employee a tax equal to the following percentage of the compensation received during any calendar year by such employee for services rendered by such employee:

"In the case of compensation received during:	The rate shall be:
1985	3.50
1986 or thereafter	4.25.

"(c) CROSS REFERENCE.—

"For application of different contribution bases with respect to the taxes imposed by subsections (a) and (b), see section 3231(e)(2)."

SEC. 222. INCREASES IN TIER 2 EMPLOYER TAX; ANNUALIZATION OF TAX BASE.

(a) IN GENERAL.—Subsections (a) and (b) of section 3221 of the Internal Revenue Code of 1954 (relating to rate of tax on employers) are amended to read as follows:

"(a) TIER 1 TAX.—In addition to other taxes, there is hereby imposed on every employer an excise tax, with respect to having individuals in his employ, equal to the following percentage of compensation paid during any calendar year by such employer for services rendered to such employer:

"In the case of compensation paid during:	The rate shall be:
1985	7.05
1986 or 1987	7.15
1988 or 1989	7.51
1990 or thereafter	7.65.

"(b) TIER 2 TAX.—In addition to other taxes, there is hereby imposed on every employer an excise tax, with respect to having individuals in his employ, equal to the following percentage of compensation paid during any calendar year by such employer for services rendered to such employer:

"In the case of compensation paid during:	The rate shall be:
1985	13.75
1986 or thereafter	14.75".

(b) CROSS REFERENCE.—Section 3221 of such Code is amended by adding at the end thereof the following new subsection:

"(e) CROSS REFERENCE.—

"For application of different contribution bases with respect to the taxes imposed by subsections (a) and (b), see section 3231(e)(2)."

SEC. 223. INCREASES IN TIER 2 EMPLOYEE REPRESENTATIVE TAX; ANNUALIZATION OF TAX BASE.

Subsection (a) of section 3211 of the Internal Revenue Code of 1954 (relating to tax on employee representatives) is amended to read as follows:

"(a) IMPOSITION OF TAXES.—

"(1) TIER 1 TAX.—In addition to other taxes, there is hereby imposed on the income of each employee representative a tax equal to the following percentage of the compensation received during any calendar year by such employee representative for services rendered by such employee representative:

"In the case of compensation received during:	The rate shall be:
1985	14.10
1986 or 1987	14.30
1988 or 1989	15.02
1990 or thereafter	15.30.

"(2) TIER 2 TAX.—In addition to other taxes, there is hereby imposed on the income of each employee representative a tax equal to the following percentage of the compensation received during any calendar year by such employee representatives for services rendered by such employee representative:

"In the case of compensation received during:	The rate shall be:
1985	13.75
1986 or thereafter	14.75.

"(3) CROSS REFERENCE.—

"For application of different contribution bases with respect to the taxes imposed by paragraphs (1) and (2), see section 3231(e)(2)."

SEC. 224. TAXATION OF RAILROAD RETIREMENT BENEFITS OTHER THAN TIER 1 BENEFITS.

(a) PENSION BENEFITS (OTHER THAN TIER 1 BENEFITS) TAXED AS BENEFITS RECEIVED UNDER EMPLOYER PLANS.—Section 72 of the Internal Revenue Code of 1954 (relating to annuities; certain proceeds of endowment and life insurance contracts) is amended by redesignating subsection (r) as subsection (s) and by inserting after subsection (q) the following new subsection:

"(r) CERTAIN RAILROAD RETIREMENT BENEFITS TREATED AS RECEIVED UNDER EMPLOYER PLANS.—

"(1) IN GENERAL.—Notwithstanding any other provision of law, any benefit provided under the Railroad Retirement Act of 1974 (other than a tier 1 railroad retirement benefit) shall be treated for purposes of this title as a benefit provided under an employer plan which meets the requirements of section 401(a).

"(2) TIER 2 TAXES TREATED AS CONTRIBUTIONS.—

"(A) IN GENERAL.—For purposes of paragraph (1)—

"(i) the tier 2 portion of the tax imposed by section 3201 (relating to tax on employees) shall be treated as an employee contribution,

"(ii) the tier 2 portion of the tax imposed by section 3211 (relating to tax on employee representatives) shall be treated as an employee contribution, and

"(iii) the tier 2 portion of the tax imposed by section 3221 (relating to tax on employers) shall be treated as an employer contribution.

"(B) TIER 2 PORTION.—For purposes of subparagraph (A)—

"(i) AFTER 1984.—With respect to compensation paid after 1984, the tier 2 portion shall be the taxes imposed by sections 3201(b), 3211(a)(2), and 3221(b).

"(ii) AFTER SEPTEMBER 30, 1981, AND BEFORE 1985.—With respect to compensation paid before 1985 for services rendered after September 30, 1981, the tier 2 portion shall be—

"(I) so much of the tax imposed by section 3201 as is determined at the 2 percent rate, and

"(II) so much of the taxes imposed by sections 3211 and 3221 as is determined at the 11.75 percent rate.

With respect to compensation paid for services rendered after June 30, 1984, and before 1985, subclause (I) shall be applied by substituting '2.75 percent' for '2 percent', and subclause (II) shall be applied by substituting '12.75 percent' for '11.75 percent'.

"(iii) BEFORE OCTOBER 1, 1981.—With respect to compensation paid for services rendered during any period before October 1, 1981, the tier 2 portion shall be the excess (if any) of—

"(I) the tax imposed for such period by section 3201, 3211, or 3221, as the case may be (other than any tax imposed with respect to man-hours), over

"(II) the tax which would have been imposed by such section for such period had the rates of the comparable taxes imposed by chapter 21 for such period applied under such section.

"(C) CONTRIBUTIONS NOT ALLOCABLE TO SUPPLEMENTAL ANNUITY OR WINDFALL BENEFITS.—For purposes of paragraph (1), no amount treated as an employee contribution under this paragraph shall be allocated to—

"(i) any supplemental annuity paid under section 2(b) of the Railroad Retirement Act of 1974, or

"(ii) any benefit paid under section 3(h), 4(e), or 4(h) of such Act.

"(3) TIER 1 RAILROAD RETIREMENT BENEFIT.—For purposes of paragraph (1), the term 'tier 1 railroad retirement benefit' has the meaning given such term by section 86(d)(4)."

(b) INFORMATION REPORTING.—

(1) IN GENERAL.—Subpart B of part III of subchapter A of chapter 61 of such Code (relating to information concerning transactions with other persons) is amended by adding at the end thereof the following new section:

"SEC. 6050G. RETURNS RELATING TO CERTAIN RAILROAD RETIREMENT BENEFITS.

"(a) IN GENERAL.—The Railroad Retirement Board shall make a return, according to the forms and regulations prescribed by the Secretary, setting forth—

"(1) the aggregate amount of benefits paid under the Railroad Retirement Act of 1974 (other than tier 1 railroad retirement benefits, as defined in section 86(d)(4)) to any individual during any calendar year,

"(2) the employee contributions (to the extent not previously taken into account under section 72(d)(1)) which are treated as having been paid for purposes of section 72(r),

"(3) the name and address of such individual, and

"(4) such other information as the Secretary may require.

"(b) STATEMENTS TO BE FURNISHED TO INDIVIDUALS WITH RESPECT TO WHOM INFORMATION IS FURNISHED.—The Railroad Retirement Board shall furnish to each individual

whose name is set forth in the return under subsection (a) a written statement showing—

"(1) the aggregate amount of payments to such individual, and of employee contributions with respect thereto, as shown on such return, and

"(2) such other information as the Secretary may require.

The written statement required under the preceding sentence shall be furnished to the individual on or before January 31 of the year following the calendar year for which the return under subsection (a) was made."

(2) CLERICAL AMENDMENT.—The table of sections for such subpart B is amended by adding at the end thereof the following new item:

"Sec. 6050G. Returns relating to certain railroad retirement benefits."

(c) SECTION 72(r) REVENUE INCREASE TRANSFERRED TO CERTAIN RAILROAD ACCOUNTS.—

(1) IN GENERAL.—

(A) TRANSFERS TO RAILROAD RETIREMENT ACCOUNT.—There are hereby appropriated to the Railroad Retirement Account amounts equivalent to the aggregate increase in tax liabilities under chapter 1 of the Internal Revenue Code of 1954 which is attributable to the application of section 72(r) of the Internal Revenue Code of 1954 (as added by this Act) with respect to benefits received before October 1, 1988. The aggregate amount appropriated under the preceding sentence to the extent attributable to benefits other than windfall benefits shall not exceed $877,000,000.

(B) REVENUE INCREASES ATTRIBUTABLE TO WINDFALL BENEFITS RECEIVED AFTER SEPTEMBER 30, 1988, TRANSFERRED TO DUAL BENEFITS PAYMENTS ACCOUNT.—There are hereby appropriated to the Dual Benefits Payments Account amounts equivalent to the aggregate increase in tax liabilities under chapter 1 of such Code which is attributable to the application of section 72(r) of such Code (as added by this Act) with respect to windfall benefits received after September 30, 1988.

(C) WINDFALL BENEFITS DEFINED.—For purposes of this paragraph, the term "windfall benefits" means any benefit paid under section 3(h), 4(e), or 4(h) of the Railroad Retirement Act of 1974.

(2) TRANSFERS.—The amounts appropriated by paragraph (1) shall be transferred from time to time (but not less frequently than quarterly) from the general fund of the Treasury on the basis of estimates made by the Secretary of the Treasury of the amounts referred to in paragraph (1). Any such quarterly payment shall be made on the first day of such quarter and shall take into account benefits estimated to be received during such quarter. Proper adjustments shall be made in the amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

(3) REVENUE INCREASES FROM TAX ON SUPPLEMENTAL ANNUITIES NOT INCLUDED.—Paragraph (1) shall not apply to tax liabilities attributable to supplemental annuities paid under section 2(b) of the Railroad Retirement Act of 1974.

(d) OVERALL MINIMUM BENEFIT TREATED AS TIER 1 BENEFIT.—Paragraph (4) of section 86(d) of such Code (defining tier 1 railroad retirement benefit) is amended by inserting "3(f)(3)," after "3(a),".

SEC. 225. TECHNICAL AMENDMENTS.

(a) AMENDMENTS RELATING TO APPLICATION OF CONTRIBUTION BASE ON AN ANNUAL BASIS.—

(1) Paragraph (2) of section 3231(e) of the Internal Revenue Code of 1954 (defining compensation) is amended to read as follows:

"(2) APPLICATION OF CONTRIBUTION BASES.—

"(A) COMPENSATION IN EXCESS OF APPLICABLE BASE EXCLUDED.—

"(i) IN GENERAL.—The term 'compensation' does not include that part of remuneration paid during any calendar year to an individual by an employer after remuneration equal to the applicable base has been paid during such calendar year to such individual by such employer for services rendered as an employee to such employer.

"(ii) REMUNERATION NOT TREATED AS COMPENSATION EXCLUDED.—There shall not be taken into account under clause (i) remuneration which (without regard to clause (i)) is not treated as compensation under this subsection.

"(B) APPLICABLE BASE.—

"(i) TIER 1 TAXES.—Except as provided in clause (ii), the term 'applicable base' means for any calendar year the contribution and benefit base determined under section 230 of the Social Security Act for such calendar year.

"(ii) TIER 2 TAXES, ETC.—For purposes of—

"(I) the taxes imposed by sections 3201(b), 3211(a)(2), and 3221(b), and

"(II) computing average monthly compensation under section 3(j) of the Railroad Retirement Act of 1974 (except with respect to annuity amounts determined under subsection (a) or (f)(3) of section 3 of such Act),

clause (2) of the first sentence, and the second sentence, of subsection (c) of section 230 of the Social Security Act shall be disregarded.

"(C) SUCCESSOR EMPLOYERS.—For purposes of this paragraph, the second sentence of section 3121(a)(1) (relating to successor employers) shall apply, except that—

"(i) the term 'services' shall be substituted for 'employment' each place it appears,

"(ii) the term 'compensation' shall be substituted for 'remuneration (other than remuneration referred to in the succeeding paragraphs of this subsection)' each place it appears, and

"(iii) the terms 'employer', 'services', and 'compensation' shall have the meanings given such terms by this section."

(2) Subsection (a) of section 3202 of such Code is amended by striking out the second sentence.

(3) Paragraph (1) of section 3231(e) of such Code is amended by striking out the fourth and fifth sentences.

(4) The last sentence of section 230(c) of the Social Security Act is hereby repealed.

(b) CONCURRENT EMPLOYMENT BY 2 OR MORE EMPLOYERS.—Section 3231 of such Code is amended by adding at the end thereof the following new subsection:

"(i) CONCURRENT EMPLOYMENT BY 2 OR MORE EMPLOYERS.—For purposes of this chapter, if 2 or more related corporations which are employers concurrently employ the same individual and compensate such individual through a common paymaster which is 1 of such corporations, each such corporation shall be considered to have paid as remuneration to such individual only the amounts actually disbursed by it to such individual and shall not be considered to have paid as remuneration to such individual amounts actually disbursed to such individual by another of such corporations."

(c) OTHER TECHNICAL AMENDMENTS.—

(1) The following provisions of the Internal Revenue Code of 1954 are each amended by striking out "tax imposed by section 3201" and inserting in lieu thereof "taxes imposed by section 3201":

(A) Section 3202(a),

(B) Paragraphs (2) and (4) of section 3202(c), and

(C) Paragraph (3) of section 3231(e).

(2) Subsection (a) of section 3202 of such Code is amended by striking out "the amount of the tax" in the first sentence and inserting in lieu thereof "the amount of the taxes", and by striking out "such tax" in the last sentence and inserting in lieu thereof "such taxes".

(3) Paragraph (2) of section 3202(c) of such Code is amended by striking out "the tax under paragraph (1)" and inserting in lieu thereof "the taxes under paragraph (1)".

(4) Paragraph (4) of section 3202(c) of such Code is amended by striking out "such tax" and inserting in lieu thereof "such taxes".

(5) Paragraphs (2) and (4) of section 3202(c) of such Code are each amended by striking out "exceeds" and inserting in lieu thereof "exceed".

(6) Paragraph (3) of section 3231(e) of such Code is amended by striking out "such tax" and inserting in lieu thereof "such taxes".

(7) Subparagraph (A) of section 3231(e)(4) of such Code is amended by striking out "3201(b) and 3221(b) (and so much of section 3211(a) as relates to the rates of the taxes imposed by sections 3101 and 3111)" and inserting in lieu thereof "3201(a), 3211(a)(1), and 3221(a)".

(8) Subsection (h) of section 3231 of such Code is amended—

(A) by striking out "tax imposed under section 3201" and inserting in lieu thereof "taxes imposed by section 3201", and

(B) by striking out all that follows "received" and inserting in lieu thereof a period.

SEC. 226. DEPOSITARY SCHEDULES.

Effective on and after January 1, 1986, the times for making payments prescribed under section 6302 of the Internal Revenue Code of 1954 with respect to the taxes imposed by chapter 22 of such Code shall be the same as the times prescribed under such section which apply to the taxes imposed by chapters 21 and 24 of such Code.

SEC. 227. EFFECTIVE DATES.

(a) SECTIONS 221, 222, 223, AND 225.—The amendments made by sections 221, 222, 223, and 225 shall apply to remuneration paid after December 31, 1984.

(b) SECTION 224.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by section 224 shall apply to benefits received after December 31, 1983, in taxable years ending after such date.

(2) TREATMENT OF CERTAIN LUMP-SUM PAYMENTS RECEIVED AFTER DECEMBER 31, 1983.—The amendments made by section 224 shall not apply to any portion of a lump-sum payment received after December 31, 1983, if the generally applicable payment date for such portion was before January 1, 1984.

(3) NO FRESH START.—For purposes of determining whether any benefit received after December 31, 1983, is includible in gross income by reason of section 72(r) of the Internal Revenue Code of 1954, as added by this Act, the amendments made by

section 224 be treated as having been in effect during all periods before 1984.

(c) SECTION 226.—Section 226 shall take effect on January 1, 1986.

SUBTITLE B—RAILROAD UNEMPLOYMENT INSURANCE PROVISIONS

PART I—RAILROAD UNEMPLOYMENT REPAYMENT TAX

SEC. 231. IMPOSITION OF TAX ON RAIL WAGES TO REPAY LOANS TO RAILROAD UNEMPLOYMENT INSURANCE SYSTEM.

(a) GENERAL RULE.—Subtitle C of the Internal Revenue Code of 1954 (relating to employment taxes) is amended by inserting after chapter 23 the following new chapter:

"CHAPTER 23A—RAILROAD UNEMPLOYMENT REPAYMENT TAX

"Sec. 3321. Imposition of tax.

"Sec. 3322. Taxable period.

"Sec. 3323. Other definitions.

"SEC. 3321. IMPOSITION OF TAX.

"(a) GENERAL RULE.—There is hereby imposed on every rail employer for each taxable period an excise tax, with respect to having individuals in his employ, equal to the applicable percentage of the total rail wages paid by him during the taxable period.

"(b) TAX ON EMPLOYEE REPRESENTATIVES.—

"(1) IN GENERAL.—There is hereby imposed on the income of each employee representative a tax equal to the applicable percentage of the rail wages paid to him during the taxable period.

"(2) DETERMINATION OF WAGES.—The rail wages of an employee representative for purposes of paragraph (1) shall be determined in the same manner and with the same effect as if the employee organization by which such employee representative is employed were a rail employer.

"(c) RATE OF TAX.—For purposes of this section—

"(1) FOR TAXABLE PERIOD JULY 1 THROUGH DECEMBER 31, 1986.—The applicable percentage for the taxable period beginning on July 1, 1986, and ending on December 31, 1986, shall be 2 percent.

"(2) SUBSEQUENT TAXABLE PERIODS.—The applicable percentage for any taxable period beginning after 1986 shall be the sum of—

"(A) 2 percent, plus

"(B) 0.3 percent for each preceding taxable period.

In no event shall the applicable percentage exceed 5 percent.

"SEC. 3322. TAXABLE PERIOD.

"(a) GENERAL RULE.—For purposes of this chapter, except as provided in subsection (b), the term 'taxable period' means—

"(1) the period beginning on July 1, 1986, and ending on December 31, 1986,

"(2) each calendar year after 1986 and before 1990, and

"(3) the period beginning on January 1, 1990, and ending on September 30, 1990.

"(b) EARLIER TERMINATION IF LOANS TO RAIL UNEMPLOYMENT FUND REPAID.—The tax imposed by this chapter shall not apply to any rail wages paid on or after the first January 1 after 1986 as of which there is—

"(1) no balance of transfers to the railroad unemployment insurance account under section 10(d) of the Railroad Unemployment Insurance Act, and

"(2) no unpaid interest on such transfers.

"SEC. 3323. OTHER DEFINITIONS.

"(a) RAIL EMPLOYER.—For purposes of this chapter, the term 'rail employer' means any person who is an employer as defined in section 1 of the Railroad Unemployment Insurance Act.

"(b) RAIL WAGES.—

"(1) IN GENERAL.—For purposes of this chapter, the term 'rail wages' means wages as defined in section 3306(b) with the modifications specified in paragraph (2).

"(2) MODIFICATIONS.—In applying subsection (b) of section 3306 for purposes of paragraph (1)—

"(A) ONLY RAILROAD EMPLOYMENT TAKEN INTO ACCOUNT.—Such subsection (b) shall be applied—

"(i) by substituting 'rail employment' for 'employment' each place it appears, and

"(ii) by substituting 'rail employer' for 'employer' each place it appears.

"(B) WAGE BASE FOR FIRST TAXABLE PERIOD.—In the case of the taxable period beginning on July 1, 1986, and ending on December 31, 1986, such subsection (b) shall be applied by substituting '$3,500' for '$7,000' each place it appears in paragraph (1) thereof.

"(C) WAGE BASE FOR LAST TAXABLE PERIOD.—In the case of the taxable period beginning on January 1, 1990, and ending on September 30, 1990, such subsection (b) shall be applied by substituting '$5,250' for '$7,000' each place it appears in paragraph (1) thereof.

"(c) RAIL EMPLOYMENT.—For purposes of this chapter, the term 'rail employment' means services performed by an individual as a rail employee or employee representative.

"(d) RAIL EMPLOYEE AND EMPLOYEE REPRESENTATIVE.—For purposes of this chapter—

"(1) RAIL EMPLOYEE.—The term 'rail employee' means any person who is an employee as defined in section 1 of the Railroad Unemployment Insurance Act.

"(2) EMPLOYEE REPRESENTATIVE.—The term 'employee representative' has the meaning given such term by section 1 of the Railroad Unemployment Insurance Act.

"(e) CONCURRENT EMPLOYMENT BY 2 OR MORE RAIL EMPLOYERS.—For purposes of this chapter, if 2 or more related corporations which are rail employers concurrently employ the same individual and compensate such individual through a common paymaster which is 1 of such corporations, each such corporation shall be considered to have paid as remuneration to such individual only the amounts actually disbursed by it to such individual and shall not be considered to have paid as remuneration to such individual amounts actually disbursed to such individual by another of such corporations.

"(f) CERTAIN RULES MADE APPLICABLE.—For purposes of this chapter, rules similar to the rules of sections 3307 and 3308 shall apply."

(b) QUARTERLY PAYMENT OF TAX.—

(1) IN GENERAL.—Section 6157 of such Code (relating to payment of Federal unemployment tax on quarterly or other time period basis) is amended by adding at the end thereof the following new subsection:

"(d) QUARTERLY PAYMENT OF RAILROAD UNEMPLOYMENT REPAYMENT TAX.—

"(1) IN GENERAL.—Every rail employer shall compute the tax imposed by section 3321 for each calendar quarter in any taxable period in the manner provided in paragraph (2). The tax so computed shall, except as otherwise provided in paragraph (3), be paid in such manner and at such time as may be provided in regulations prescribed by the Secretary.

"(2) COMPUTATION OF TAX.—The tax for any calendar quarter shall be computed by multiplying the aggregate amount of rail wages paid in such calendar quarter by the applicable percentage determined under section 3321(c).

"(3) EXCEPTIONS.—No payment shall be required under this subsection—

"(A) for the last calendar quarter in any taxable period, and

"(B) for any calendar quarter if the tax under section 3321 for such quarter, plus any unpaid amounts for prior calendar quarters in the taxable period, does not exceed $100.

"(4) DEFINITIONS.—For purposes of this subsection, the terms 'taxable period', 'rail employer', and 'rail wages' have the same respective meanings as when used in chapter 23A."

(2) TECHNICAL AMENDMENTS.—

(A) Paragraph (2) of section 6201(b) of such Code (relating to amount not to be assessed) is amended by striking out "Federal unemployment tax" and inserting in lieu thereof "Federal unemployment tax or tax imposed by section 3321".

(B) Section 6317 of such Code (relating to payments of Federal unemployment tax for calendar quarter) is amended—

(i) by striking out "Federal unemployment tax" and inserting in lieu thereof "Federal unemployment tax or tax imposed by section 3321", and

(ii) by striking out "chapter 23" and inserting in lieu thereof "chapter 23 and 23A, as the case may be,".

(C) Subsection (e) of section 6513 of such Code (relating to payments of Federal unemployment tax) is amended by adding at the end thereof the following new sentence: "Notwithstanding subsection (a), for purposes of section 6511, any payment of tax imposed by chapter 23A which, pursuant to section 6157, is made for a calendar quarter within a taxable period shall, if made before the last day prescribed for filing the return for the taxable period (determined without regard to any extension of time for filing), be considered made on such last day."

(D) Subsection (i) of section 6601 of such Code is amended by striking out "3301" and inserting in lieu thereof "3301 or 3321".

(c) CLERICAL AMENDMENT.—The table of chapters for subtitle C of such Code is amended by inserting after the item relating to chapter 23 the following new item:

"CHAPTER 23A. Railroad Unemployment Repayment Tax."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to remuneration paid after June 30, 1986.

SEC. 232. TAX USED TO REPAY LOANS MADE TO RAILROAD UNEMPLOYMENT INSURANCE ACCOUNT.

(a) TRANSFER TO RAILROAD RETIREMENT ACCOUNT.—

(1) IN GENERAL.—The Secretary of the Treasury shall transfer from the general fund of the Treasury to the Railroad Retirement Account an amount equal to the additional railroad unemployment taxes received in the Treasury.

(2) TAXES CREDITED AGAINST LOANS TO RAILROAD UNEMPLOYMENT INSURANCE ACCOUNT.—Any amount transferred under paragraph (1) shall be credited against, and operate to reduce, the outstanding balance of railroad unemployment loans.

(b) TRANSFERS MADE MONTHLY.—Transfers under subsection (a) shall be made at least monthly on the basis of estimates made by the Secretary of the Treasury of the amount of the additional railroad unemployment taxes received in the Treasury. Proper adjustments shall be made in the

amount subsequently transferred to the extent prior estimates were in excess of or were less than the amounts required to be transferred.

(c) TRANSFERS TO RAILROAD UNEMPLOYMENT FUND AFTER LOANS REPAID.—If—

(1) the amount which (but for this subsection) would be transferred to the Railroad Retirement Account under subsection (a), exceeds—

(2) the outstanding balance of railroad unemployment loans (as of the time of such transfer),

such transfer (to the extent it exceeds such outstanding balance) shall be made to the Railroad Unemployment Account.

(d) DEFINITIONS.—For purposes of this section—

(1) ADDITIONAL RAILROAD UNEMPLOYMENT TAXES.—The term "additional railroad unemployment taxes" means the taxes imposed by chapter 23A of the Internal Revenue Code of 1954.

(2) RAILROAD UNEMPLOYMENT ACCOUNT.—The term "Railroad Unemployment Account" means the railroad unemployment insurance account in the unemployment trust fund established pursuant to section 904 of the Social Security Act.

(3) RAILROAD UNEMPLOYMENT LOANS.—The term "railroad unemployment loans" means transfers under section 10(d) of the Railroad Unemployment Insurance Act from the Railroad Retirement Account to the Railroad Unemployment Account. The outstanding balance of such loans shall include any interest required to be paid under such section 10(d).

PART II—TAXATION OF SICK PAY PAID UNDER RAILROAD UNEMPLOYMENT INSURANCE ACT

SEC. 241. TAXATION OF SICK PAY PAID UNDER RAILROAD UNEMPLOYMENT INSURANCE ACT.

(a) GENERAL RULE.—Section 105 of the Internal Revenue Code of 1954 (relating to amounts received under accident and health plans) is amended by adding at the end thereof the following new subsection:

"(i) SICK PAY UNDER RAILROAD UNEMPLOYMENT INSURANCE ACT.—Notwithstanding any other provision of law, gross income includes benefits paid under section 2(a) of the Railroad Unemployment Insurance Act for days of sickness; except to the extent such sickness (as determined in accordance with standards prescribed by the Railroad Retirement Board) is the result of on-the-job injury."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to amounts received after December 31, 1983, in taxable years ending after such date.

TITLE III—BORROWING AUTHORITY ADJUSTMENTS

SEC. 301. (a) Section 7(c) of the Railroad Retirement Act of 1974 is amended by adding at the end thereof the following new subdivision:

"(4) After the end of each month beginning with the month of October 1983, the Board shall determine the net amount, if any, which if added to or subtracted from the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, and the Federal Hospital Insurance Trust Fund would, with respect to such month, place those Trust Funds, taken as a whole, in the same position in which they would have been if (A) service as an employee after December 31, 1936, had been included in the term 'employment' as defined in the Social Security Act and in the Federal Insurance Contributions Act, and (B) this Act had not been enacted. If for any month the net amount so determined would be subtracted from those Trust Funds, the Board shall, within ten days after the end of such month, report such amount to the Secretary of the Treasury for transfer from the general fund to the Railroad Retirement Account. Any amount so reported shall further include interest (at an annual rate equal to the rate of interest borne by a special obligation issued to the Railroad Retirement Account in the month in which the transfer is made to the Account) payable from the close of the month for which the transfer is made until the date of transfer. The Secretary of the Treasury is authorized and directed to transfer to the Railroad Retirement Account from the general fund such amounts as, from time to time, may be determined by the Board pursuant to the provisions of this subdivision and reported by the Board for transfer. For such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds of the sale of any securities issued after the date of the enactment of this Act under section 3102 of title 31 of the United States Code, and the purpose for which securities may be issued under section 3102 of title 31 of the United States Code are extended to include such purpose. Each such transfer shall be made by the Secretary of the Treasury within five days after a report of the amount to be transferred is received. Not later than December 31 following the close of each fiscal year beginning with the fiscal year ending September 30, 1984, the Board shall certify to the Secretary of the Treasury the total of all amounts transferred pursuant to the provisions of this subdivision for months in such fiscal year. Within ten days after a transfer, or transfers, pursuant to subdivision (2) for a particular fiscal year, the Board shall request the Secretary of the Treasury to retransfer from the Railroad Retirement Account to the general fund an amount equal to (A) the total of all amounts, exclusive of interest, transferred to such Account pursuant to the provisions of this subdivision for months in such fiscal year, plus (B) interest (at the rate determined in subdivision (3) for such fiscal year) payable with respect to each amount transferred for a month during such fiscal year from the close of the month for which the transfer of the amount was made until the date of retransfer of such amount. The Secretary of the Treasury is authorized and directed to retransfer from the Railroad Retirement Account to the general fund such amounts as, from time to time, may be determined by the Board pursuant to the provisions of the preceding sentence of this subdivision and reported by the Board for retransfer.".

(b) Subsection (b) of section 15 of the Railroad Retirement Act of 1974 is amended to read as follows:

"(b) In addition to the amount appropriated in subsection (a) of this section, there is hereby authorized to be appropriated to the Railroad Retirement Account for each fiscal year, beginning with the fiscal year ending June 30, 1975, such amount as the Board determines to be necessary to meet (A) the additional costs, resulting from the crediting of military service under this Act, of benefits payable under section 2 of this Act, but only to the extent that such Account is not reimbursed for such costs under section 7(c)(2), (B) the additional administrative expenses resulting from the crediting of military service under this Act, and (C) any loss in interest to such Account resulting from the payment of additional benefits based on military service credited under this Act: *Provided, however,* That, in determining the amount to be appropriated to the Railroad Retirement Account for any fiscal year pursuant to the provisions of this subsection, there shall not be considered any costs resulting from the crediting of military service under this Act for which appropriations to such Account have already been made pursuant to section 4(l) of the Railroad Retirement Act of 1937. Any determination as to loss in interest to the Railroad Retirement Account pursuant to clause (C) of the first sentence of this subsection shall take into account interest from the date each annuity based, in part, on military service began to accrue or was increased to the date or dates on which the amount appropriated is credited to the Account. The cost resulting from the payment of additional benefits under this Act based on military service determined pursuant to the preceding provisions of this subsection shall be adjusted by applying thereto the ratio of the total net level cost of all benefits under this Act to the portion of such net level cost remaining after the exclusion of administrative expenses and interest charges on the unfunded accrued liability as determined under the last completed actuarial valuation pursuant to the provisions of subsection (g) of this section. At the close of the fiscal year ending June 30, 1975, and each fiscal year thereafter, the Board shall, as promptly as practicable, determine the amount to be appropriated to the Account pursuant to the provisions of this subsection, and shall certify such amount to the Secretary of the Treasury for transfer from the general fund in the Treasury to the Railroad Retirement Account. When authorized by an appropriation Act, the Secretary of the Treasury shall transfer to the Railroad Retirement Account from the general fund in the Treasury such amounts as, from time to time, may be determined by the Board pursuant to the provisions of this subsection and certified by the Board for transfer to such Account. In any determination made pursuant to section 7(c)(2) of this Act, no further charges shall be made against the Trust Funds established by title II of the Social Security Act for military service rendered before January 1, 1957, and with respect to which appropriations authorized by clause (2) of the first sentence of section 4(l) of the Railroad Retirement Act of 1937 shall have been credited to the Railroad Retirement Account, but the additional benefit payments incurred by such Trust Funds by reason of such military service shall be taken in account in making any such determination.".

(c)(1) The amendment made by subsection (a) of this section shall be effective on October 1, 1983.

(2) The amendments made by subsection (b) of this section shall be effective on the date immediately following the day in June 1984 when the total amount of money outstanding to the Railroad Retirement Account under section 15(b)(2) of the Railroad Retirement Act of 1974 is retransferred to the general fund under that section.

SEC. 302. Subsection (d) of section 10 of the Railroad Unemployment Insurance Act is amended by adding at the end thereof the following new sentence: "No transfer shall be made under this subsection from the Railroad Retirement Account after September 30, 1985, and no such transfer shall be

made on or before September 30, 1985, for purposes of paying benefits and refunds due after such date.".

TITLE IV—OTHER BENEFIT-RELATED AMENDMENTS

SEC. 401. (a) Section 15(d) of the Railroad Retirement Act of 1974 is amended—

(1) by inserting "(1)" after "(d)";

(2) by striking out "one-twelfth of the amount which the Board has determined will be the amount of the appropriation to be made to the Dual Benefits Payments Account under the applicable public law making such appropriation for such fiscal year, and the Secretary of the Treasury shall make such transfer." from the third sentence and inserting in lieu thereof the following: "the amount that the Board estimates will be necessary to pay on the first day of the next succeeding month the annuity amounts under sections 3(h), 4(e), and 4(h) of this Act and under sections 204(a)(3), 204(a)(4), 206(3), and 207(3) of Public Law 93-445, taking into account any reduction in such annuity amounts as determined under section 7(c)(1) of this Act, and the Secretary of the Treasury shall make such transfer, but at no time shall the total amount of money outstanding to the Dual Benefits Payments Account from the Railroad Retirement Account exceed the amount necessary to pay the annuity amounts under sections 3(h), 4(e), and 4(h) of this Act and sections 204(a)(3), 204(a)(4), 206(3), and 207(3) of Public Law 93-445 for one month.";

(3) in the fourth sentence, by inserting "or during" after "prior to"; and

(4) by adding at the end the following new subdivisions:

"(2) The Secretary of the Treasury—

"(i) shall transfer from the general fund as a loan to the Board on July 1, 1984, one-third of the special amount described in subdivision (3) of this subsection;

"(ii) shall transfer from the general fund as a loan to the Board on January 1, 1985, one-third of the special amount described in subdivision (3) of this subsection, plus an amount equal to the interest that one-third would have earned had it been in the Railroad Retirement Account since July 1, 1984; and

"(iii) shall transfer from the general fund as a loan to the Board on January 1, 1986, the final one-third of the special amount described in subdivision (3) of this subsection, plus an amount equal to the interest that one-third would have earned had it been in the Railroad Retirement Account since July 1, 1984.

"(3) The special amount referred to in subdivision (2) of this subsection is the amount which, as of July 1, 1984, would place the Railroad Retirement Account in the same position it would have been on that date if no annuity amounts had been paid during the period beginning January 1, 1975 and ending September 30, 1981, under sections 3(h), 4(e), and 4(h) of this Act and under sections 204(a)(3), 204(a)(4), 206(3), and 207(3) of Public Law 93-445, and no sums had been appropriated as authorized in section 15(d) of this Act.

"(4) For the purposes of subdivision (2) of this subsection, the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds of the sale of any securities issued after the date of the enactment of the Railroad Retirement Solvency Act of 1983 under section 3102 of title 31 of the United States Code and the purposes for which securities may be so issued are extended to include such purposes.

"(5) The amounts transferred to the Board as loans under subdivision (2) of this subsection shall be deposited in the Railroad Retirement Account.

"(6) The amounts transferred as loans under subdivision (2) of this subsection shall be repaid to the general fund to the extent sums are appropriated for that purpose, and there are hereby authorized to be appropriated, in addition to any other sums authorized to be appropriated for the purposes of this Act and from any sums in the Treasury not otherwise appropriated, such sums as may be necessary to make such repayments.".

(b) The amendments made by this section shall be effective upon enactment.

SEC. 402. (a) Section 1(h)(6) of the Railroad Retirement Act of 1974 is amended—

(1) by striking out paragraph (ii); and

(2) by redesignating paragraphs (iii), (iv), (v), (vi), and (vii) thereof as (ii), (iii), (iv), (v), and (vi), respectively.

(b) Section 1(j) of the Railroad Unemployment Insurance Act is amended by striking out "(i)" and all that follows through "(ii)".

(c) The amendments made by this section shall apply to compensation paid for services rendered after June 30, 1983.

SEC. 403. (a) Section 1(h) of the Railroad Retirement Act of 1974 is amended by adding at the end thereof the following new subdivision:

"(7) The term 'compensation' includes any separation allowance or subsistence allowance paid under any benefit schedule provided under section 701 of title VII of the Regional Rail Reorganization Act of 1973 and any termination allowance paid under section 702 of that Act, but does not include any other benefits payable under that title. The total amount of any subsistence allowance paid under a benefit schedule provided pursuant to section 701 of the Regional Rail Reorganization Act of 1973 shall be considered as having been earned in the month in which the employee first timely filed a claim for such an allowance.".

(b) Section 1(i) of the Railroad Unemployment Insurance Act is amended by inserting after the first sentence thereof the following new sentence: "Solely for the purpose of determining the compensation received by an employee in a base year, the term 'compensation' shall include any separation allowance or subsistence allowance paid under any benefit schedule provided under section 701 of title VII of the Regional Rail Reorganization Act of 1973 and any termination allowance paid under section 702 of that Act, but does not include any other benefits payable under that title. The total amount of any subsistence allowance payable under a benefit schedule provided pursuant to section 701 of the Regional Rail Reorganization Act of 1973 shall be considered as being compensation in the month in which the employee first timely filed a claim for such an allowance.".

(c) The amendments made by this section shall be effective August 13, 1981.

SEC. 404. Section 3(f)(1) of the Railroad Retirement Act of 1974 is amended—

(1) by inserting after "of an individual shall" in the second sentence the following "except as provided in the following sentence"; and

(2) by inserting after the second sentence the following: "If the individual's 'average monthly compensation' is determined under subdivision (2) of subsection (b) of this section, the 'final average monthly compensation' for such individual shall be the average of the compensation for the 24 months in which the compensation determined for the purpose of subdivision (2) of subsection (b) of this section is the highest.".

(c) The amendments made by this section shall be effective October 1, 1983, and shall apply with respect to annuities awarded on or after that date.

SEC. 405. (a) Section 3(f)(3) of the Railroad Retirement Act of 1974 is amended—

(1) by inserting "and divorced wife" after "spouse" the first place it appears in the first sentence thereof; and

(2) by striking out "such annuity or annuities" in the first sentence and inserting in lieu thereof "the annuities of the individual and spouse".

(b) The amendments made by this section shall be effective October 1, 1981.

SEC. 406. (a) Section 4(g)(4) of the Railroad Retirement Act of 1974 is amended by striking out "(e)(3)" in the second sentence and inserting in lieu thereof "(e)".

(b) The amendments made by this section shall be effective October 1, 1981.

SEC. 407. (a) Section 4(i) of the Railroad Retirement Act of 1974 is amended by adding at the end thereof the following new subdivision:

"(3) The annuity of any survivor under subsection (f) of this section shall be reduced, but not below zero, by the amount of any insurance benefit (before any deduction on account of work) payable to such survivor under title II of the Social Security Act, unless in computing the amount under subsection (f) a reduction was made for such insurance benefit pursuant to section 202(k) of the Social Security Act.".

(b) The amendment made by this section shall be effective with respect to annuities awarded on and after the date of enactment.

SEC. 408. (a) Section 6(b)(1) of the Railroad Retirement Act of 1974 is amended by adding at the end thereof the following new sentence: "No lump sum shall be payable under this subdivision if the employee died leaving a surviving divorced wife who would on proper application therefore be entitled to receive an annuity under section 2(d) of this Act for the month in which the employee's death occurred.".

(b) The amendment made by this section shall be effective October 1, 1981.

SEC. 409. (a) Section 2(c)(2) of the Railroad Retirement Act of 1974 is amended by striking the period and inserting in lieu thereof the following: ", except that the annuity of a divorced wife who was previously entitled to a spouse annuity which was reduced under this subdivision shall be reduced by the same percentage as was applicable to the spouse annuity.".

(b) The amendment made by this section shall be effective with respect to divorced wife annuities awarded on and after the date of enactment.

SEC. 410. (a) Section 1(h) (as amended by section 403 of this Act) of the Railroad Retirement Act of 1974 is amended by adding at the end the following:

"(8) Notwithstanding any other provision of this Act, for the purposes of sections 3(a)(1), 4(a)(1), and 4(f)(1), the term 'compensation' includes any payment from any source to an employee or employee representative if such payment is subject to tax under section 3201 or 3211 of the Internal Revenue Code of 1954.".

(b) The amendment made by this section shall apply with respect to payments made on or after January 1, 1982.

SEC. 411. (a)(1) The first proviso of subsection (k) of section 1 of the Railroad Unem-

ployment Insurance Act is amended by striking out "$1,000" and inserting in lieu thereof "$1,500".

(2) Section 3 of such Act is amended by striking out "$1,000" and inserting in lieu thereof "$1,500".

(3) Section 4(a-2)(i)(A) of such Act is amended by striking out "$1,000" and inserting in lieu thereof "$1,500".

(b) The amendments made by this section shall apply to compensation paid for services rendered after December 31, 1983.

SEC. 412. (a) Subsection (a) of section 2 of the Railroad Unemployment Insurance Act is amended by striking out "*Provided, however*" and all that follows down through the end of the first sentence and inserting in lieu thereof: "*Provided, however,* That in any case in which the Board finds that his unemployment was due to a stoppage of work because of a strike in the establishment, premises, or enterprise at which he was last employed, no benefits shall be payable for the first fourteen days of unemployment due to such stoppage of work.".

(b) The amendment made by this section shall apply with respect to days of unemployment in registration periods beginning after December 31, 1983.

SEC. 413. (a) Section 2(d)(1)(iv) of the Railroad Retirement Act of 1974 is amended by inserting before the period the following: ", but neither this proviso nor clause (B) or (C) of this paragraph shall operate to deny any parent an annuity to the extent and in the amount of the benefit that such parent would have received under the Social Security Act if the service as an employee of the individual, with respect to which such parent would be eligible to receive an annuity under this Act except for this proviso and those clauses, were included in 'employment' as defined in the Social Security Act".

(b) The amendment made by this section shall apply with respect to annuities that first begin to accrue with respect to any month beginning after the date of the enactment of this Act.

SEC. 414. (a) Section 2(h) of the Railroad Retirement Act of 1974 is amended—

(1) by striking out "(h)(1) In" and all that follows through the end of paragraph (1); and

(2) by inserting "(h)" immediately before "(2)".

(b) The amendments made by this section shall apply with respect to months beginning after the date of the enactment of this Act.

SEC. 415. Section 2(c)(3) of the Railroad Retirement Act of 1974 is amended by striking out ", if, as of the day on which the application" and all that follows through "support of such wife or husband".

SEC. 416. Section 7 of the Railroad Retirement Act of 1974 is amended by adding at the end the following:

"(f) Whenever the Board submits or transmits any budget estimate, budget request, supplemental budget estimate, or other budget information, legislative recommendation, prepared testimony for congressional hearings, or comment on legislation to the President or to the Office of Management and Budget, it shall concurrently transmit a copy thereof to the Congress. No officer or agency of the United States shall have any authority to require the Board to submit its budget requests or estimates, legislative recommendations, prepared testimony for congressional hearings, or comments on legislation to any officer or agency of the United States for approval, comments, or review, prior to the submission of such recommendations, testimony, or comments to the Congress.".

SEC. 417. (a) Section 15 of the Railroad Retirement Act of 1974 is amended by adding at the end thereof the following new subsection:

"(i)(1) The Secretary of the Treasury shall implement procedures to permit the identification of each check issued for benefits under this Act that has not been presented for payment by the close of the sixth month following the month of its issuance.

"(2) The Secretary of the Treasury shall, on a monthly basis, credit each account established in the Treasury for the payment of benefits under this Act for the proportionate amount of benefit checks (including interest thereon) drawn on each such Account more than six months previously but not presented for payment and not previously credited to such Account, to the extent provided in advance in appropriation Acts.

"(3) If a benefit check is presented for payment to the Treasury and the amount of the appropriate portion thereof has been previously credited pursuant to paragraph (2) to an Account or Accounts, the Secretary of the Treasury shall nevertheless pay such check, if otherwise proper, recharge such Account or Accounts for the amount of such check attributable to such Account or Accounts and notify the Board.

"(4) A benefit check bearing a current date may be issued to an individual who did not negotiate the original benefit check and who surrenders such check for cancellation if the Secretary of the Treasury determines it is necessary to effect proper payment of benefits.

"(b) The amendment made by subsection (a) shall apply with respect to all checks for benefits under this Act which are issued on or after May 1, 1985.

"(c)(1) The Secretary of the Treasury shall transfer from the general fund of the Treasury to each account established in the Treasury for the payment of benefits under this Act in the month following the month in which this Act is enacted and in each of the next succeeding months until May 1, 1985, such sums as may be necessary to reimburse such Accounts in the proportionate amount of all checks (including interest thereon) attributable to such Accounts which the Secretary and the Board jointly determine to be unnegotiated benefit checks, to the extent provided in advance in appropriation Acts. After any amounts authorized by this subsection have been transferred to an Account or Accounts with respect to any benefit check, the provisions of paragraphs (3) and (4) of section 15(i) of the Railroad Retirement Act of 1974 (as added by subsection (a) of this section) shall be applicable to such check.

"(2) As used in paragraph (1) of this subsection, the term 'unnegotiated benefit checks' means checks for benefits under the Railroad Retirement Act of 1974 or under the Railroad Retirement Act of 1937 which are issued prior to May 1, 1985, which remain unnegotiated after the sixth month following the date on which they were issued, and with respect to which no transfers have previously been made in accordance with the first sentence of such paragraph."

SEC. 418. The Railroad Retirement Act of 1974 is amended by adding at the end the following new section:

"INSPECTOR GENERAL

"SEC. 23. For the purposes of the Inspector General Act of 1978 (5 U.S.C. App.) the Railroad Retirement Board is an 'establishment' and the Chairman of the Railroad Retirement Board is the 'head of the establishment' with respect to such Board. For the purpose of section 2 of such Act, the Railroad Retirement Board is one of 'such establishments'."

TITLE V—OTHER AMENDMENTS

ESTABLISHMENT OF SOCIAL SECURITY EQUIVALENT BENEFIT ACCOUNT

SEC. 501. (a) The Railroad Retirement Act of 1974 is amended by inserting after section 15 the following new section:

"SOCIAL SECURITY EQUIVALENT BENEFIT ACCOUNT

"SEC. 15A. (a) There is hereby created an account in the Treasury of the United States to be known as the 'Social Security Equivalent Benefit Account'.

"(b) TRANSFERS, ETC., TO SOCIAL SECURITY EQUIVALENT BENEFIT ACCOUNT.—

"(1) NET TIER 1 TAXES, ETC.—There is hereby appropriated to the Social Security Equivalent Benefit Account for each fiscal year, beginning with the fiscal year beginning October 1, 1984, an amount equal to the sum of the following amounts:

"(A) NET TIER 1 TAXES.—Amounts covered into the Treasury (minus refunds) during such fiscal year under sections 3201(a), 3211(a)(1), and 3221(a) of the Railroad Retirement Tax Act.

"(B) INCOME TAX LIABILITIES ATTRIBUTABLE TO TAXATION OF SOCIAL SECURITY EQUIVALENT BENEFITS.—The amount which (but for this section) would have been transferred to the Railroad Retirement Account under section 121(e) of the Social Security Amendments of 1983 to the extent that the amount which would have been so transferred is attributable to taxation of social security equivalent benefits.

Amounts appropriated to the Railroad Retirement Account shall be appropriately reduced to take into account the amounts appropriated under this paragraph to the Social Security Equivalent Benefit Account.

"(2) FINANCIAL INTERCHANGE AMOUNTS.—On and after October 1, 1984, any amount which (but for this section) would have been transferred to the Railroad Retirement Account pursuant to paragraph (2) or (4) of section 7(c) of this Act shall be transferred to the Social Security Equivalent Benefit Account. On and after October 1, 1984, no transfer shall be made to the Railroad Retirement Account pursuant to paragraph (2) or (4) of section 7(c) of this Act.

"(3) CERTAIN CREDITED MILITARY SERVICE AMOUNTS.—To the extent that the authorization for appropriation contained in section 15(b) is attributable to the cost of social security equivalent benefits, on and after October 1, 1984, any reference in such section to the Railroad Retirement Account shall be treated as a reference to the Social Security Equivalent Benefit Account.

"(4) TIME AND MANNER OF CREDITS AND TRANSFERS.—Amounts appropriated or transferred to the Social Security Equivalent Benefit Account under this section shall be credited or transferred to such Account at the same time and in the same manner as such amounts would have been credited or transferred to the Railroad Retirement Account but for this section.

"(c)(1) Except as otherwise provided in this section, amounts in the Social Security Equivalent Benefit Account shall be available only for purposes of paying social security equivalent benefits under this Act and to provide for the administrative expenses

of the Board allocable to social security equivalent benefits.

"(2) On and after October 1, 1984, any transfer which (but for this paragraph) would be required to be made from the Railroad Retirement Account under paragraph (2) or (4) of section 7(c) shall be made from the Social Security Equivalent Benefit Account.

"(d)(1) Whenever the Board finds that the balance in the Social Security Equivalent Benefit Account will be insufficient to pay social security equivalent benefits which it estimates are due in any month, it shall request the Secretary of the Treasury to transfer from the Railroad Retirement Account to the credit of the Social Security Equivalent Benefit Account such moneys as the Board estimates will be necessary for the payment of such benefits, and the Secretary shall make such transfer. Whenever later in such month there is a transfer to the Social Security Equivalent Benefit Account under paragraph (2) or (4) of section 7(c) of this Act, the amount so transferred shall be immediately retransferred to the Railroad Retirement Account. The amount retransferred under the preceding sentence shall not exceed the amount of any outstanding transfers under this paragraph from the Railroad Retirement Account plus such additional amounts determined by the Board to be equal to the loss of interest to the Railroad Retirement Account resulting from such outstanding transfers.

"(2) Whenever the Board determines that—

"(A) amounts in the Railroad Retirement Account will not be sufficient to pay the annuities which it estimates are due, or will become due, from such Account, and

"(B) the transfer under this paragraph will not jeopardize the present or future payment of social security equivalent benefits,

the Board shall request the Secretary of the Treasury to transfer from the Social Security Equivalent Benefit Account to the Railroad Retirement Account such moneys as the Board estimates will be necessary for the payment of such annuities, and the Secretary shall make such transfer. No transfer under this paragraph shall be required to be repaid.

"(e) The provisions of subsections (e), (f), and (g) of section 15 are hereby made applicable to the Social Security Equivalent Benefit Account.

"(f)(1) For purposes of making payments of social security equivalent benefits, references in the Act to the Railroad Retirement Account shall be treated as references to the Social Security Equivalent Benefit Account.

"(2) For purposes of this section, the term 'social security equivalent benefits' means benefits payable under this Act which are of a kind taken into account in determining the amount of transfers made under section 7(c)(2) of this Act.".

(b)(1) The amendment made by this section shall take effect on October 1, 1984.

(2)(A) The tier 1 portion of the tax imposed by section 3201, 3211, or 3221 of the Internal Revenue Code of 1954, as the case may be, with respect to compensation paid before 1985 shall be treated as described in subparagraph (A) of section 15A(b)(1) of the Railroad Retirement Act of 1974.

(B) For purposes of subparagraph (A), the tier 1 portion of any tax is so much of such tax as is determined by reference to the rates of taxes imposed by chapter 21 of the Internal Revenue Code of 1954.

STUDY

SEC. 502. On or before July 1 of 1985, and of each calendar year thereafter, the Railroad Retirement Board shall submit to the Congress a report on the actuarial status of the railroad retirement system under various economic and employment assumptions. Such report shall include any recommendation for financing changes which might be advisable, including—

(1) any adjustment the Railroad Retirement Board recommends regarding the rates of taxes imposed of sections 3201(b), 3211(a)(2), and 3221(b) of the Internal Revenue Code of 1954, and

(2) if there are sufficient reserves in the Railroad Retirement Account, whether—

(A) the rates of such taxes should be reduced, or

(B) any part of the tax imposed by section 3221(b) of such Code should be diverted to the Railroad Unemployment Insurance Account to aid in the repayment of its debt to the Railroad Retirement Account.

INCREASE IN MONTHLY WAGE BASE

SEC. 503. (a)(1) Subsection (a) of section 8 of the Railroad Unemployment Insurance Act is amended by striking out so much of such subsection as precedes the table contained therein and inserting in lieu thereof the following:

"SEC. 8. (a) Every employer shall pay a contribution, with respect to having employees in his service, equal to the percentage determined as set forth below of so much of the compensation as is not in excess of $600 for any calendar month paid by him to any employee for any services rendered to him. If compensation is paid to an employee by more than one employer with respect to any such calendar month, the contributions required by this subsection shall not apply to more than $600 of the aggregate compensation paid to such employee by all such employers with respect to such calendar month, and each employer (other than a subordinate unit of a national railway-labor-organization employer) shall be liable for that portion of the contribution with respect to such compensation paid by all such employers which the compensation paid by him to such employee for services rendered during such month bears to the total compensation paid by all such employers to such employee for services rendered during such month. In the event that the compensation so paid by such employers to the employee for services rendered during such month is less than $600, each subordinate unit of a national railway-labor-organization employer shall be liable for such portion of any additional contribution as the compensation paid by such employer to such employee for services rendered during such month bears to the total compensation paid by all such employers to such employee for services rendered during such month:".

(2) Subsection (b) of section 8 of such Act is amended—

(A) by striking out "after December 1975", and

(B) by striking out "$400," and inserting in lieu thereof "$600,".

(b) The first sentence of subsection (i) of section 1 of such Act is amended by striking out "or in excess of $400 for any month after the month in which this Act was so amended" and inserting in lieu thereof "or in excess of $400 for any month after the month in which this Act was so amended and before January 1984, or in excess of $600 for any month after 1983".

(c) The amendments made by this section shall apply to compensation paid for services rendered after December 31, 1983.

RAILROAD UNEMPLOYMENT COMPENSATION COMMITTEE

SEC. 504. (a) Representatives of railroad labor and railroad management shall jointly establish (and jointly appoint the members of) a committee to be known as the "Railroad Unemployment Compensation Committee" (hereinafter in this section referred to as the "Committee").

(b) The Committee shall consist of five members—

(1) two of whom shall be representatives of railroad labor,

(2) two of whom shall be representatives of railroad management, and

(3) one of whom shall be an individual who shall not be in the employment of or pecuniarily or otherwise interested in any employer (as defined in section 1 of the Railroad Retirement Act of 1974) or any organization of employees (as defined in section 1 of such Act).

(c) The Committee shall review all aspects of the unemployment and sickness insurance systems provided by the Railroad Unemployment Insurance Act including (but not limited to) a review of—

(1) benefit levels,

(2) experience rating,

(3) debt repayment and interest on debt,

(4) waiting period for unemployment benefits and qualifying requirements, and

(5) alternatives to the railroad unemployment insurance system such as covering railroad employees under the Federal-State unemployment compensation system.

(d) Not later than April 1, 1984, the Committee shall submit a report to the Congress containing recommendations—

(1) with respect to the review conducted under subsection (c), and

(2) with respect to the repayment of funds which the railroad unemployment insurance system has borrowed from the Railroad Retirement Account.

Any recommendation submitted under paragraph (2) shall contain adjustments in contributions and benefits which will enable the railroad unemployment compensation system to repay all loans from the Railroad Retirement Account before December 31, 2000.

(e) The Railroad Retirement Board (and any other department, agency, or instrumentality of the Federal Government) is authorized to cooperate with, and assist, the Committee (at its request) in carrying out its duties by furnishing services, information, data, or other material which the Committee determines will be helpful in carrying out its duties.

ENERGY AND COMMERCE COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the Energy and Commerce Committee amendments.

The Clerk read as follows:

Energy and Commerce Committee amendments: Page 14, line 2, strike out "on July 1, 1983" and insert in lieu thereof "on the first day of the first month beginning after the date of the enactment of this Act".

Page 14, line 4, strike out "date" and insert "day" in lieu thereof.

Page 14, line 8, after the comma insert "or".

Page 15, strike out line 14 and all that follows through line 3 on page 17, and insert in lieu thereof the following:

Sec. 105. Section 22 of the Railroad Retirement Act of 1974 is amended by striking out "(a)" and all that follows through the end of subsection (a) of such section and inserting in lieu thereof the following: "(a)(1) On or before February 1 of each year beginning in 1984, the Railroad Retirement Board shall prepare a five-year projection of anticipated revenues to and payments from the Railroad Retirement Account to determine the ability of such Account to pay benefits in each of the next succeeding five calendar years. No later than April 1 of each year, the Board shall submit a written report to the President, the Speaker of the House, and the President of the Senate setting forth the results of the projection prepared pursuant to the preceding sentence. If the projection indicates that the funds in the Railroad Retirement Account will be insufficient to pay the full amount of the benefits under this Act which are payable from that Account at any time during the five-year period, the Board's report shall include—

"(A) the first fiscal year during which benefits under this Act must be reduced, in the absence of any adjustments, because insufficient funds (including any general revenue borrowing authority under this Act) would preclude payment of full benefits (other than benefits payable from the Dual Benefits Payments Account) for every month in such fiscal year;

"(B) the first fiscal year during which the Board would recommend suspension of the authority to borrow contained in section 10(d) of the Railroad Unemployment Insurance Act, in order to prevent depletion of the Railroad Retirement Account; and

"(C) the amount, if any, of adustments (stated in terms of percentage of taxable payroll), and any other changes such cash flow adjustments, necessary to preserve the financial solvency of the Railroad Retirement Account, if such adjustments were effective at the beginning of the next succeeding fiscal year.

"(2) Not less than 20 nor more than 30 days after the submission of a written report under this subsection which indicates that, in the absence of any adjustments, the Railroad Retirement Account will contain insufficient funds to pay the full amount of the benefits under this Act which are payable from that Account at some time during the five-year period convered by the report, the Board shall publish such report in the Federal Register.".

Page 21, line 7, strike out the quotation mark.

Page 21, line 9, strike out the single quotation mark and insert a double quotation mark in lieu thereof.

Page 21, line 25, after the period insert a close quotation mark.

Page 22, line 1, strike out the quotation mark.

Page 22, line 2, strike out the quotation mark and the period which follows.

Page 62, line 9, strike out "a".

Page 62, strike out line 16 and line 17.

Page 64, line 15, strike out "Period" and insert "semicolon" in lieu thereof.

Page 67, line 10, after the period insert a close quotation mark.

Page 67, line 11, strike out the quotation mark.

Page 67, line 14, strike out the quotation mark.

Page 67, beginning in line 16 and ending in line 17, strike out "this Act" and insert "the Railroad Retirement Act of 1974" in lieu thereof.

Page 67, line 17, Strike out "Act is" and insert "section is" in lieu thereof.

Page 67, line 19, after "May" insert a comma.

Page 68, line 5, strike out the quotation mark.

Page 68, line 12, strike out the quotation mark.

Mr. FLORIO (during the reading). Mr. Chairman, I ask unanimous consent that the Energy and Commerce Committee amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The CHAIRMAN. The gentleman from New Jersey (Mr. FLORIO) is recognized for 5 minutes.

Mr. FLORIO. Mr. Chairman, these are technical amendments that have been concurred in by the minority.

Mr. Chairman, I yield to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Chairman, we have worked these amendments out. They are technical amendments, and we would urge that they be accepted.

The CHAIRMAN. The question is on the Energy and Commerce Committee amendments.

The Energy and Commerce Committee amendments were agreed to.

AMENDMENT OFFERED BY MR. PICKLE

Mr. PICKLE. Mr. Chairman, I offer an amendment made in order under the rule, which is at the desk and which has been printed in the RECORD.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. PICKLE: Page 22, line 10, strike out "JULY 1, 1984" and insert in lieu thereof "JANUARY 1, 1984".

Page 23, line 7, strike out "JUNE 30, 1984" and insert in lieu thereof "DECEMBER 31, 1983".

Page 28, line 17, strike out "JUNE 30, 1984" and insert in lieu thereof "DECEMBER 31, 1983".

(Change in Depositary Schedules To Take Effect on January 1, 1984.)

Page 38, line 18, strike out "JANUARY 1, 1986" and insert in lieu thereof "JANUARY 1, 1984".

Page 39, line 24, strike out "JANUARY 1, 1986" and insert in lieu thereof "JANUARY 1, 1984".

Mr. PICKLE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. For purposes of determining whether or not there is a Member opposed to control the 15 minutes, the Chair will inquire, is there a Member opposed to said amendment?

The Chair recognizes the gentleman from Texas (Mr. PICKLE) for 15 minutes.

Mr. PICKLE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the amendment I am offering today would raise approximately $100 million over the next 5 years by accelerating the effective dates of certain tax provisions in the bill.

Specifically, I am seeking to move up the date by which railroad employers will be required to follow the same deposit schedule for depositing employment taxes as all social security private employers from January 1, 1986 to January 1, 1984. In addition, I am seeking to move the effective date for the first tier 2 tax rate increase provided in the bill from July 1, 1984 to January 1, 1984.

The fact that I am seeking to raise additional revenues beyond what has been reported by the Committee on Ways and Means does not mean that I am dissatisfied with the product of the Committee on Ways and Means. On the contrary, the changes made by the committee have vastly improved the bill and have significantly reduced the potential liability of the Federal taxpayer.

Last week, Congressman FLORIO notified me that he would seek to amend the provisions of the bill dealing with early retirement, the so-called 60/30 provision. I presumed at that time that the amendment would be made in order.

This amendment raised concerns in the Committee on Ways and Means that the solvency goals which we had achieved through our tax amendments would not be achieved because outlays would be higher under the Florio amendment. However, given the division of jurisdictional responsibilities in the House between the Committee on Ways and Means and the Committee on Energy and Commerce, this is a matter over which I have no legislative authority.

The only course of action left open to me as chairman of the subcommittee with jurisdiction over railroad retirement employment taxes was to seek to provide that if the Florio amendment was passed by the House, the House would also approve a revenue increase at the same time which would be sufficient to finance the slower phase-in of the 60/30 benefit change provided under the Florio amendment.

The parliamentary procedure which has been worked out with the Rules Committee and the gentleman from New Jersey provides that the benefit liberalization amendment must be offered as an amendment to my revenue amendment. As a result, the benefit change cannot be approved without

the revenues necessary to finance the change.

I would point out again to my colleagues that my sole purpose in offering this amendment is to finance the spending which is envisioned in the amendment to my amendment which Mr. FLORIO will soon offer. If that amendment is not approved by the House, I will immediately withdraw my amendment since the balance which was between revenue and outgo was struck by the Committee on Ways and Means will not be in jeopardy.

Mr. CONABLE. Mr. Chairman, if the gentleman will yield, we have no objection to the gentleman's amendment on this side. We think it is a constructive amendment.

Mr. PICKLE. Mr. Chairman, I appreciate the gentleman's cooperation, but I will finish my sentence, since I have a head of steam worked up and I hate to be derailed this early.

Let me just say specifically that the amendment raises the money that is necessary for the changes that the gentleman from New Jersey (Mr. FLORIO) will offer in just a few minutes. That is the long and the short of it.

We felt that if we give these benefits, we ought to make the provision to pay for it, and we do it by moving up the effective date of the deposit and by moving up the date of the rates.

Mr. CONABLE. Mr. Chairman, if the gentleman will yield further to me, I would like to congratulate him on having expended his head of steam so promptly.

Mr. PICKLE. Mr. Chairman, I reserve the balance of my time.

AMENDMENT OFFERED BY MR. FLORIO TO THE AMENDMENT OFFERED BY MR. PICKLE

Mr. FLORIO. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. FLORIO to the amendment offered by Mr. PICKLE:

Add at the end of the Pickle amendment the following:

Page 2, strike out line 17 and all that follows through line 13 on page 3 and insert in lieu thereof the following:

"(i) for each month prior to the first month throughout which the individual is age 62, the amount (after any reduction on account of age but before any deductions on account of work) of the old-age insurance benefit to which such individual would have been entitled under the Social Security Act as of the date on which such individual's annuity begins to accrue if such individual had attained age 62 on the first day of the month in which his or her annuity begins to accrue and if all of such individual's service as an employee after December 31, 1936, had been included in the term 'employment' as defined in that Act, using for purposes of this computation the number of benefit computation years applicable to a person born in the year in which such individual was born; and".

Page 6, strike out line 3 and all that follows through line 8 and insert in lieu thereof the following:

(c) The amendments made by this section shall become effective on July 1, 1984, and shall apply only with respect to awards in cases where the indivudal's annuity under section 2(a)(1) of the Railroad Retirement Act of 1974 began to accrue on or after that date and the individual had not completed thirty years of service and attained age 60 prior to that date. In the case of an individual who has completed thirty years of service and has attained age 60 before January 1, 1986, the amount of the reduction on account of age in the annuity amount provided to such individual under section 3(a)(3) of the Railroad Retirement Act of 1974 and the amount of the reduction on account of age in the annuity amount provided to the spouse of such individual under subdivision (3) of section 4(a) of the Railroad Retirement Act of 1974 shall be only one-half of the amount by which such annuity would be reduced on account of age except for the provisions of this sentence.

Page 57, line 2, strike out "July 1, 1984" and insert "January 1, 1984" in lieu thereof.

Page 57, line 9, strike out "July 1, 1984" and insert "January 1, 1984" in lieu thereof.

Page 57, line 15, strike out "July 1, 1984" and insert "January 1, 1984" in lieu thereof.

Page 57, line 17, strike out "July 1, 1984" and insert "January 1, 1984" in lieu thereof.

Mr. FLORIO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The CHAIRMAN. Under the rule, the gentleman from New Jersey (Mr. FLORIO) will be recognized for 15 minutes.

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this amendment I am offering to the Pickle amendment is very important. It will provide protection to those railroad employees close to retirement, by phasing in the change in the early retirement, or so-called 60/30, benefit.

Under current law, railroad employees can retire at age 60 with 30 years service with full benefits. Labor and management agreed to change this provision so that individuals could still retire at age 60, but with a reduction in the tier 1, or social security type, benefit. The tier 2 benefit would not be affected by this change. Individuals who retire at 62 with 30 years service would continue to get full benefits.

Much concern has been expressed because the original labor-management agreement proposed this change to take effect for those retiring on or after July 1, 1983. Obviously, we are past that date, and, in any event, that was too soon to make such a change. I have been contacted by many railroad employees close to retirement about this problem, and I am sure my colleagues have been too.

My amendment would protect those close to retirement. Individuals who reached 60 with 30 years service by June 30, 1984 could retire at any time with no reduction. Individuals who reached 60 with 30 years service after June 30, 1984 but on or before December 31, 1985 would receive a 10-percent reduction in tier 1 benefits for retirement before 62—half the full reduction. Finally, individuals who turned 60 on or after January 1, 1986 would receive a 20-percent reduction in tier 1 for retirement before 62—the same reduction as currently occurs for those retiring at age 62 under social security.

I want to emphasize that the revenue to be raised by Mr. PICKLE's amendment will pay for the added cost to the system of my amendment. Thus, the two amendments together would be revenue neutral.

This amendment also does two other things. First, it replaces the formula for reduced benefits for early retirement that is currently in the bill with a more equitable formula, agreed on by labor and management. The formula in the bill provides for a flat rate tier I benefit for early retirement. This flat rate would be the same regardless of an individual's creditable compensation or wage record. The alternative formula in the amendment would provide a proportional reduction based on an individual's wage record. This more equitable formula is the same one used by social security to compute reduced benefits for retirement at age 62.

Finally, this amendment conforms certain dates as a result of Mr. PICKLE's amendment. The bill provides for the repayment of the money owed the railroad retirement system as a result of the past underfunding of the dual benefit. The bill provides that this payment occur in three installments, at the same time an increase in tier II tax rate takes place. Because Mr. PICKLE's amendment accelerates the first tier II tax increase from July 1, 1984, to January 1, 1984, my amendment would similarly move up the first repayment installment from July 1, 1984, to January 1, 1984.

This is an important amendment, and if you want to provide equity to railroad employees close to retirement, I urge your support, both of my amendment and of Mr. PICKLE's amendment.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, we will be glad to accept this amendment on this side. The gentleman's amendment would phase in the change in the so-called 60/30 retirement formula. We have examined the amendment and we accept it. It does end up exactly where the bill is written at the present time.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. FLORIO. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

Mr. Chairman, I would like to direct a question to the gentleman. Will this protect those who are on the threshold of retirement at this time? Will there be a sufficient transition period under the gentleman's amendment?

Mr. FLORIO. Yes; that is exactly what this amendment is designed to do.

Mr. REGULA. I thank the gentleman.

The CHAIRMAN. If there is no opposition to said amendments, the question is on the amendment offered by the gentleman from New Jersey (Mr. FLORIO) to the amendment offered by the gentleman from Texas (Mr. PICKLE).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. PICKLE), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MRS. SCHROEDER

Mrs. SCHROEDER. Mr. Chairman, I offer an amendment which is made in order under the rule.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mrs. SCHROEDER: Page 68, after line 21, insert the following new section:

SEC. 419. (a) Section 14 of the Railroad Retirement Act of 1974 is amended—

(1) by striking out "Notwithstanding" and inserting in lieu thereof "(a) Except as provided in subsection (b) of this section and the Internal Revenue Code of 1954, notwithstanding";

(2) by striking out ": *Provided, however,* That the provisions of this" and inserting in lieu thereof the following:

"(b)(1) This"; and

(3) by adding at the end the following:

"(2) This section shall not operate to prohibit the characterization or treatment of that portion of an annuity under this Act which is not computed under section 3(a), 4(a), or 4(f) of this Act, or any portion of a supplemental annuity under this Act, as community property for the purposes of, or property subject to, distribution in accordance with a court decree of divorce, annulment, or legal separation or the terms of any court-approved property settlement incident to any such court decree. The Board shall make payments of such portions in accordance with any such characterization or treatment or any such decree or settlement.".

(b) The amendments made by this section shall apply with respect to annuity amounts payable for months beginning after the date of the enactment of this Act.

Mrs. SCHROEDER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Colorado?

There was no objection.

The CHAIRMAN. Under the rule, the gentlewoman from Colorado (Mrs. SCHROEDER) will be recognized for 15 minutes, and a Member opposed to the amendment will be recognized for 15 minutes.

The Chair recognizes the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, if I may address this amendment, it is an amendment that we have done in all of the other retirement areas that have come before this body. I think it is terribly important. What it does is, it allows Federal pensions to be subject to State court orders and obviously brings Federal pensions in line with where we have been for a long time and private pensions, and I think that is only fair.

□ 1820

For a very long time it really seems that we did not recognize the economic value of what a spouse did at home, and this says that if the court determines that during a divorce settlement, then this will allow that. We have done this for the CIA, for the military, for civil service, and now we are doing it for railroad retirement, if it passes today. I think this is a very important package.

Mr. FLORIO. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I am delighted to yield to the coauthor, the gentleman from New Jersey.

Mr. FLORIO. I thank the gentlewoman for yielding.

Mr. Chairman, I would like to identify with this amendment, say that it is my pleasure to support it. It has been a pleasure working with the gentlewoman from Colorado in perfecting it and being able to offer it.

Mrs. SCHROEDER. I thank the gentleman from New Jersey for all he has done, and everyone who has worked so hard on it.

This amendment would eliminate a provision in the Railroad Retirement Act which discriminates against divorced spouses. Under current law, a divorce court cannot even consider an individual's railroad retirement benefit in dividing property in a divorce. This amendment would allow a divorce court to take a railroad retirement benefit into account. However, tier I benefits, which are like social security, would continue to be immune from court action, as are social security benefits. This would treat railroad retirement benefits like other pension benefits.

My distinguished colleague from Colorado has been most successful in eliminating similar discrimination in other Federal pension systems. This amendment would do likewise for the railroad retirement system. Passage of this amendment will be another step in improving pension equity for women. I urge its support.

Mr. CONABLE. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentlewoman for yielding.

Mr. Chairman, I would also like to commend the gentlewoman's amendment to the attention of all Members and urge its support.

Mr. BROYHILL. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I thank the gentlewoman for yielding.

Mr. Chairman, I rise in support of this amendment. The amendment does not require a court to consider these benefits in a property settlement; is that correct? It only enables the court to do so depending on the attending circumstances?

Mrs. SCHROEDER. That is exactly correct, and then to go along with the court order, and it really says to the Supreme Court they were wrong in not saying that State law did not apply.

Mr. BROYHILL. So in effect, what it would do is to give the spouse at least a fighting chance to receive a portion of these benefits for her support.

Mrs. SCHROEDER. That is exactly correct. It treats it as property, which almost every State in the Union does. If the State court says this is property, then the Federal Government cannot say, "No, we have a different idea." I think we have always felt family law belonged at the State level and the Federal Government should not be able to duck it.

Mr. BROYHILL. I thank the gentlewoman for yielding, and I would urge that we pass this so we can get on to completion of the legislation.

Mrs. SCHROEDER. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Does any Member wish to speak in opposition to the amendment?

If not, the question is on the amendment offered by the gentlewoman from Colorado (Mrs. SCHROEDER).

The amendment was agreed to.

The CHAIRMAN. If there are no further amendments, the question is on the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr.

WRIGHT) having assumed the chair, Mr. BONIOR of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1646) to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes, pursuant to House Resolution 286, he reported the bill back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BROYHILL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 398, nays 5, not voting 30, as follows:

□ 1840

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING CLERK OF THE HOUSE TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 1646

Mr. FLORIO. I ask unanimous consent that in the engrossment of the bill, H.R. 1646, the Clerk be authorized to correct section numbers, punctuation, and cross references, and to make such other technical and conforming changes as may be necessary to reflect the actions of the House in amending that bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

GENERAL LEAVE

Mr. FLORIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey.

There was no objection.

REDUCING TO 5 MINUTES TIME FOR VOTE ON MOTION TO CLOSE PORTIONS OF CONFERENCE ON S. 675

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the yea and nay vote required by clause 6, rule XXVIII, on the motion to be offered by the chairman of the Armed Services Committee to close portions of the conference on the bill, S. 675, be a 5-minute vote. That motion will immediately follow the yea and nay vote on the motion to postpone House Resolution 256 indefinitely.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

DISAPPROVING THE PRESIDENT'S RECOMMENDATION TO EXTEND CERTAIN WAIVER AUTHORITY WITH RESPECT TO ROMANIA

The SPEAKER pro tempore. The pending business is the vote on the preferential motion offered by gentleman from Minnesota (Mr. FRENZEL) to postpone indefinitely the motion to consider House Resolution 256.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Minnesota (Mr. FRENZEL) to postpone indefinitely the motion to consider House Resolution 256, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 279, nays 126, not voting 28, as follows:

□ 1900

Messrs. WISE, BIAGGI, STAGGERS, and CLARKE changed their votes from "yea" to "nay."

Mr. HAMMERSCHMIDT changed his vote from "nay" to "yea."

So the preferential motion was agreed to.

The result of the vote was announced as above recorded.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT WEDNESDAY, AUGUST 3, AND THURSDAY, AUGUST 4, 1983, DURING 5-MINUTE RULE

Mr. ROE. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be permitted to sit for purposes of markup while the House is operating under the 5-minute rule on Wednesday, August 3, and Thursday, August 4, 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

MOTION TO CLOSE CONFERENCE COMMITTEE MEETINGS ON S. 675, DEPARTMENT OF DEFENSE AUTHORIZATION BILL WHEN CLASSIFIED NATIONAL SECURITY INFORMATION IS UNDER CONSIDERATION

Mr. PRICE. Mr. Speaker, I offer a motion.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. PRICE moves that, pursuant to rule XXVIII 6(a) of the House rules, the conference committee meetings between the House and the Senate on S. 675, the fiscal year 1984 Department of Defense authorization, be closed to the public at such times as classified national security information is under consideration: *Provided, however,* That any sitting Member of Congress shall have the right to attend any closed or open meeting.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. PRICE).

On the gentleman's motion to close the conference, a rollcall vote is required. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 396, nays 10, not voting 27, as follows:

□ 1910

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. FOWLER. Mr. Speaker, during rollcall No. 297, the vote on H.R. 1646, the Railroad Retirement Solvency Act of 1983, I was unavailable due to other business in the Capitol. Had I been able to be here, I would have voted in the affirmative.

FOUR AMERICANS INDUCTED INTO BASEBALL HALL OF FAME

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and include extraneous matter.).

Mr. ALEXANDER. Mr. Speaker, it is fair to say that while many of us who took part in the annual congressional baseball game last week may have made lasting contributions to this Congress history, that contribution did not extend to the history of excellence in American baseball, our national pastime.

Yesterday, however, four great Americans who have made substantial contributions to this national game were inducted into the baseball Hall of Fame of Cooperstown, N.Y. I am proud to say, Mr. Speaker, that two of them—George Kell and Brooks Robinson—are Arkansans, and Mr. Kell, of Swifton, Ark., is my consitutent and my friend.

Both George and Brooks achieved greatness at third base—the "hot corner" of baseball as it is called and, truly in their long and productive careers, they did more than merely entertain us. Both at bat and in the field, they demonstrated continuing excellence along with that quality Ernest Hemingway called "grace under pressure."

Baseball is our national game because within its apparently desultory time frame, it demands quick and instantaneous reaction to moments of crisis. Because of this, our baseball heroes are national heroes as well. The symbolism of the sport is the symbolism of our national life.

Mr. Speaker, I include an article from the New York Times of Monday, August 1, 1983, by Joseph Durso, as follows:

[From the New York Times, Aug. 1, 1983]

FOUR ENTER BASEBALL HALL AMID CHEERS AND TRIBUTE

(By Joseph Durso)

COOPERSTOWN, N.Y., July 31.—Brooks Robinson and Juan Marichal were inducted into baseball's Hall of Fame today in a rare kind of international fiesta that included speeches in Spanish, the singing of the Dominican Republic anthem and hundreds of Baltimore Oriole balloons, caps and banners.

They entered the Hall of Fame along with Geroge Kell and Walter Alston while a crowd of 10,000 jammed the hillsides around Cooper Park in the Leatherstocking country of upstate New York. It was the largest throng here since the Hall of Fame was opened 45 years ago, and it was a cheering, chanting crowd that roared for the old Oriole third baseman and the pitching master from Latin America.

There was so much fanfare in the two-hour ceremony, in fact, that it even subdued the impending crisis over the future of Bowie Kuhn, the commissioner, who said simply: "This is baseball's finest hour. Only 184 people have reached the Hall of Fame, and these are four of the most popular in our time."

Kuhn, whose term as commissioner ends Aug. 12, gave no hint of his future or even his mood as he presided over the induction. He spoke of the urgent need to maintain "the integrity" of baseball, one of his favorite themes in reviewing his 14 years in office. But, otherwise, he offered no clues to what might happen when the 26 club owners meet this week in Boston to decide his fate.

Instead, he stuck to the agenda and the stars of the cast, pausing frequently while the massed Baltimore fans rose for numerous standing ovations. He spoke in Spanish at one point while introducing Marichal, and Marichal in return spoke for several minutes in Spanish in an unusual departure from past procedure. In his only allusion to the sport's problems, Kuhn said:

"Whatever our failures, the game survives and bounds ahead. The public knows the greatest thing it has is its integrity. The greatest danger is from those who do not know."

ALSTON UNABLE TO APPEAR

But no serious message could diminish the holiday mood of the crowd as it cheered the

four new members of the Hall of Fame and the 25 previously enshrined members who were grouped on the platform.

The old heroes included Joe DiMaggio, Sandy Koufax, Johnny Mize, Ralph Kiner, Bob Feller, Cool Papa Bell, Judy Johnson, Al Kaline, Joe Cronin and more than a dozen others who already occupy niches in the gallery. And they seemed dazzled, too by the constant cheerleading from the audience.

The only principal missing was Alston, who suffered a heart attack in March and who was watching the ceremonies on television at his home in Darrtown, Ohio. But he was lionized with the others for his 23-year career as manager of the Dodgers in Brooklyn and Los Angeles, a career that included seven National League pennants and four World Series victories.

His grandson, Bob Ogle of San Francisco, recalled that Alston and gone to bat only one time in the major leagues and had struck out. But he added that Alston relished his years as a manager in the minor leagues and the majors, and said:

"He always said that his greatest thrill was winning the 1955 Series, the first championship for the Dodgers in Brooklyn."

Next came Kell, a third baseman and .306 hitter for 15 years with the Philadelphia A's, Detroit Tigers, Boston Red Sox, Chicago White Sox and the Orioles.

Kell, now a television broadcaster with the Tigers, said he found it unbelievable that he and Robinson had come from Arkansas and "Traveled the same path to this place." He and Robinson became only the sixth and seventh third basemen to enter the Hall of Fame.

RELAYED TO THE CARIBBEAN

When Marichal followed Kell to the microphone, Kuhn said:

"I doubt that any country in the world has produced as many ballplayers per capita as your homeland."

Speaking first in English, the husky pitcher replied:

"I accept this honor on behalf of my family, my country and all who assisted in making my baseball career a reality."

Then he repeated the acknowledgement in Spanish, and his remarks were relayed by two satellites to the Caribbean. He became the first player from Latin America to be elected to the Hall of Fame in a regular election. Roberto Clemente of Puerto Rico was inducted in 1973 after a special election that followed his death in an airplane crash. Martin Dihigo of Cuba was elected in 1977 as a star of the old Negro Leagues.

Marichal was extolled as a stylist who pitched 16 seasons in the big leagues, 13 of them for the San Francisco Giants, starting in 1960. He won 243 games, lost only 142, completed 244 and finished with a winning percentage of .621, the 11th best in baseball history.

Then it was Robinson's turn, and the Baltimore delegation had its best and loudest moments.

"I never saw a man," Kuhn said, "who so dominated a baseball event as Brooks Robinson dominated the 1970 World Series. A truly great Cincinnati team, the Big Red Machine, drove into a concrete wall at third base.

"No one owns more Gold Gloves than the 16 he earned in consecutive seasons, starting in 1960. He owns nearly every fielding record for a third baseman, including the best fielding percentage of .971 for his career."

Robinson played in 2,870 games in 23 years, all for the Orioles, and also played in 18 straight All-Star Games. Like Kell, he now works as a television broadcaster for his old team. When he rose to speak, his partisans launched dozens of orange balloons into the summer sky, then cheered while the "good guy" of Baltimore replied in an emotional speech.

"I keep asking myself," he said, "how any one man could be so fortunate. One thing I am grateful for, and it may not happen much in the future because of the changing nature of baseball, and that is I played in one city: Baltimore, my adopted hometown. They cheered me on my good days, and on my bad days."

The cheers erupted again and, from the back of the thronged lawns, one voice called out: "There were no bad days, Brooks."

MESSRS. ALSTON, KELL, MARICHAL, AND ROBINSON: WELCOME TO COOPERSTOWN

(Mr. BOEHLERT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BOEHLERT. Mr. Speaker, for the past 3 days, the eyes of the sports world have been focused on Cooperstown, N.Y., home of the National Baseball Hall of Fame.

And, while everyone was not as fortunate as I was, to be there personally, in the center or the congressional district it is my privilege to represent, the hearts and minds of kids of all ages were present. Not just American kids, but kids the world over—from the Dominican Republic to distant Japan—wherever that great game of baseball is known and loved. To know it is to love it.

The subjects of attention in Cooperstown—Walter Alston, George Kell, Juan Marichal, and Brooks Robinson—help explain that love of baseball.

These men, all of whom were formally inducted into the National Baseball Hall of Fame, are genuine heroes to literally hundreds of millions of people, young and old and in between, at a time when we need all the heroes we can get. They brought a degree of excellence to their profession that marked them among the best of the best, right up there with such immortals as Connie Mack, Ty Cobb, Babe Ruth, Joe DiMaggio, Stan Musial, and Ted Williams.

In the history of baseball, only 184 exceptionally talented individuals have earned a coveted position on the Cooperstown team.

Now on that team we have four rookies—Alston, Kell, Marichal, and Robinson. And their credential are indeed impressive. Just look at the records:

WALTER ALSTON

[Born December 1, 1911, at Butler County, Ohio—Height, 6.02. Weight, 210. Threw and batted righthanded]

Established American League records for most games played, third baseman, 162-game schedule (162), 1961 and 1964; most years, 150 or more games, league (14).

Tied American League record for most seasons leading league, chances accepted, third baseman (8).

Signed as free agent by Baltimore Orioles' organization, June 1, 1955.

[3] On disabled list, April 28 to June 25, 1957.

[4] On disabled list, May 18 to June 8, 1959.

[5] Player-coach.

[6] On voluntarily retired list, August 21, 1977.

Mr. Speaker, I extend a warm welcome to everyone to come visit Cooperstown, one of the most charming, delightful communities on the face of this Earth, to experience firsthand the thrill of an exciting walk down memory lane in the National Baseball Hall of Fame.

And I ask all my colleagues to join me in extending well-deserved congratulations to Walter Alston, George Kell, Juan Marichal, and Brooks Robinson. They have given us so much.

TRIBUTE TO RAYMOND ROEBUCK

The SPEAKER pro tempore (Mr. APPLEGATE). Under a previous order of the House, the gentleman from California (Mr. COEHLO), is recognized for 60 minutes.

Mr. COEHLO. Mr. Speaker, there are many, many people who day in and day out labor unceremoniously in service to the House of Representatives. Yet, despite the fact that they may rarely receive attention and thanks for the good work they do, they are nonetheless appreciated as well as being indispensable to the efficient and effective functioning of the House. I rise today to publicly thank and pay tribute to a special person, Ray Roebuck, who is today celebrating 20 years to this House.

Raymond Harrison Roebuck, known to most of us simply as Ray, is manager of the Democratic cloakroom snackbar. Ray's culinary talents are without equal in a town known for its fine food. While others may argue about the quality of their menus, Ray is the only chef in Washington who can honestly state that more Members of Congress regularly dine at his establishment than at any other restaurant in town!

In addition to providing nourishment to our bodies with his own special brand of cuisine, Ray also helps nourish the soul with his humor and good cheer. No matter what the hour nor the press of business, Ray can always be counted on for a kind comment and warm smile.

Ray Roebuck's friendly manner, dedication, and loyalty exemplify the spirit of service, and I am proud to call him my friend.

Many of my colleagues may not be aware of the fact that the words of our own Ray Roebuck have been immortalized in Jimmy Breslin's book, "How the Good Guys Finally Won." In this book about Watergate, there is a passage describing the cloakroom and of Raymond Roebuck "presiding over a stainless steel snackbar." In response to questions about his particular duties and his easy access to Members of Congress, Ray's articulate and modest reply was: "I don't know nothing, I don't hear nothing, I don't see nothing."

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. COEHLO. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Speaker, I am pleased today to pay tribute to Raymond Roebuck, the manager of the Democratic cloakroom snackbar, on the 20th anniversary of his employment.

Raymond's job is certainly no easy one; his working environment is one of high pressure and many demands. Yet in spite of the hectic pace, Raymond performs his duties efficiently and with a sense of humor which brightens the day of those who have the pleasure to work with him, and of those who enjoy his fine concoctions. No matter how late the hour, nor how frantic the schedule, Raymond may be counted on for a delicious snack or meal, provided with a warm smile at the "Chez Raman."

Over the years, he has been more than gracious and understanding with the hundreds of pages who work in and out of that office and to whom Raymond has always been a mentor, friend, and fine provider of nourishment.

The hard work and loyalty which Raymond brings to his work are indicative of his dedication to the House of Representatives and to its Members. We are indeed fortunate to have him, and I trust we will continue to enjoy his exceptional service for many years to come.

Mr. COELHO. Mr. Speaker, I thank the gentleman.

□ 1920

Mr. MITCHELL. Mr. Speaker, will the gentleman yield?

Mr. COELHO. I yield to the gentleman from Maryland.

Mr. MITCHELL. I thank the gentleman for yielding.

Mr. Speaker, "Ray, what time will we adjourn tonight?" "Now I can't tell you exactly but I think you should

plan on keeping your 6:30 evening engagement." "Ray, what is the time for tonight?" "I can't tell you exactly but I've stocked up enough for us to last until 3 a.m."

For 20 years, Ray has been answering our queries, providing us with the fuel to keep us going; and sustaining our morale and good humor with his ever pleasant, sometimes jovial personality. He listens to our sometimes unfunny jokes, and manages to pull us a hearty laugh even when the joke does not even deserve a half smile. He has a unique way of reminding us that we have not paid for the food we consumed. After finishing off one of his gastronomical delights, as we leave the counter (without paying) Ray will call out "Congressman, you forgot your umbrella."

Do we really know Raymond Roebuck? No, the vast majority of us do not really know him. We do not know Ray. We do not know of his service to his church, Caanan Baptist. We do not know of the love and devotion and care he gave his parents, Lillian and John Roebuck. We are not aware of the counsel, discipline, and guidance he continues to give the young pages. Is it any wonder that those pages come back year after year to see Raymond?

As we pay tribute to him, let us set the record straight. First, he actually bakes those pies himself. Second, the fried chicken, and/or crab cakes hidden from public views are for junior members, not senior members. Third, his prices are not competitive, they are below market dictated prices.

Ray, thanks for putting up with our idiosyncrasies; our incessant demands; our bad tempers; our lack of consideration, and a host of other human frailties. Most of all, thanks for being the wonderful human being you are.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. COELHO. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

Mr. Speaker, I thank the gentleman for having asked for this special order so we can pay tribute in our own way to our friend Raymond Roebuck.

The gentleman from Kentucky, who is at the microphone now, has had the honor of serving in the House now for 13 years, and about the first person I think the gentleman met when he came to Congress was the gentleman who is with us tonight, Mr. Raymond Roebuck, who runs the snack bar.

Two things I would say: One is that even the very juniorest of junior Members who could walk into this House without the knowledge of the parliamentary procedure and without the background and the experience, could always go to Raymond, as I did, and as the gentleman from Kentucky did 13 years ago, and get good advice and get a certain amount of sympathy, too, when things were really going bad.

Second, and not an inconsiderable advantage, given the late hours of the sessions sometimes, Raymond Roebuck is probably the only person in the history of culinary arts who can make a hamburger or make a hot dog taste like a piece of chateaubriand.

So I would just like to salute my friend Raymond for having made my 13 years around here a lot less burdensome than they could have otherwise been, and wish him 20 more years of good luck.

Mr. JACOBS. Mr. Speaker, will the gentleman yield?

Mr. COELHO. I yield to the gentleman from Indiana.

Mr. JACOBS. I thank the gentleman for yielding.

Mr. Speaker, as our colleague, Mr. MOAKLEY, has just said, there is no more appropriate time than special orders to talk about Ray Roebuck because he never gave anything but a special order to anybody. It had his individual touch.

I might add that for someone who does not say nothing, he has been a ray of enlightenment to almost anyone who has stood at the counter, and much of the wisdom that Congress gets credit for—I do not know how much that is—but much of the wisdom that Congress gets credit for it owes to its wise counselor out in the cloakroom, Ray Roebuck.

Mr. TRAXLER. Mr. Speaker, will the gentleman yeild?

Mr. COELHO. I yield to the gentleman from Michigan.

Mr. TRAXLER. I appreciate the distinguished gentleman from California yielding, and for taking this special order this evening.

Raymond certainly is a friend of every Member of this House. To show his generosity, he has even prepared sandwiches, et cetera, for the Republican side of the aisle.

Mr. COELHO. Really?

Mr. TRAXLER. Yes. Of course, he never extends them credit, because he has several of us.

What is really important is that we can speak of his culinary abilities with the full knowledge that none of the hostesses in Washington would dare steal him away from the Democratic cloakroom. He is an exceptional chef, and he has earned all of our gratitude for that.

He does all of this marvelous cooking in a space of 4 feet by 4 feet, and his stove is a microwave, and his sink is a one-holer. He has two knives, and I think a fork. With all of that, he manages to feed some 200-plus Democrats and the Speaker, and that is no mean task. We are all proud of him and we love him very much.

Mr. COELHO. Mr. Speaker, I thank the gentleman very much, and I know that Raymond appreciates it also.

I yield to the Speaker of the House.

Mr. O'NEILL. Everybody just knows Raymond is a beautiful individual. He is one of my closest and dearest friends.

It is hard for someone who does not serve here to know that the fellow who runs the snack bar is a confidante and often a consultant to the Speaker but that is exactly what he is. When Ray tells me, "The vote looks pretty close today, Mr. Speaker," I know that he knows what he is talking about. Oftentimes he does a better job than the whip organization.

Raymond is extremely knowledgeable in other areas. There is nobody who knows more about sports—whether it is football, baseball, or basketball.

Ray is terrific. He can tell you who was the third baseman for the Chicago White Sox so many years ago. He can reminisce on the Washington Senators and who hit a home run on such-and-such a day, and, of course, he can tell you anything about his beloved Redskins. He is a true sports buff.

Between talking about legislation and sports, Raymond can find time to make you up a sandwich, to be perfectly truthful, Ray is just a beautiful, honorable decent guy. Everybody who knows him loves him. To know Ray is to love him. It is as simple as that. I am honored, Tony, that you have set aside this time for Raymond. I would like to point out that this is one of the biggest delegations I have seen honoring an individual, any individual, on the floor of the House. That tells you something about the man we honor. The man has friends.

Mr. FOLEY. Mr. Speaker, if the gentleman will yield, I want to join in the Speaker's remarks about Raymond to say that even the Speaker's statement that Raymond knows more about the schedule than the whip organization happens to be, in many cases, true. Much as I would like to defend the whip organization against that comparison, I have to admit it is true, and the reason it is true is that over the years the Speaker and the majority leader and other ranking Members of our party leadership have been customers of Ray's, and when the question has come about what we are going to do in the evening or when we are going to adjourn, Raymond has been told the unvarnished truth; whereas, not all the whip organization is always kept totally in the picture.

With that one comment, Mr. Speaker, may I say that I think the fact that there are many of us on the floor tonight recognizes 20 years of devoted services to the House.

Mr. O'NEILL. We are happy to see the whip of the majority party back in the House. He has been suffering from a food poisoning he caught overseas. In 20 years, I have never heard of any-

body getting anything like that from Ray.

Mr. FOLEY. I absolve Raymond totally.

Mr. MOAKLEY. Mr. Speaker, will the gentleman yield?

Mr. COELHO. I yield to the gentleman from Massachusetts.

Mr. MOAKLEY. Mr. Speaker, I thank the gentleman from California (Mr. COELHO) for yielding and commend him for providing this opportunity to Members to pay tribute to Raymond Harrison Roebuck, as he completes 20 years of service as manager of culinary and related services in the Democratic cloakroom.

I am sure that many Members are participating in this special order because of the genuine affection in which Raymond is held by us all. But others are participating in this special order for fear of the special menu that may be served to those special Members who did not think Raymond was so special.

Certainly everyone has heard of Oscar of the Ritz, but it is a source of concern that so few people outside the U.S. Capitol know of the achievements of our own "Ramon of the snack bar."

Some years ago, Raymond Roebuck considered following the lead of his famous cousin from Chicago by publishing a catalog of the culinary selections available at the snack bar. However, since each day's menu is determined by what is on sale that morning on Safeway's "day-old" shelf, it was never possible to operate the cloakroom facility from a prearranged book.

Although Raymond continues to offer a wise selection of entrees, Alka Seltzer continues to be his biggest seller.

As I am sure most Members are aware, the defense appropriation authorized the U.S. Navy to undertake a research and development project with regard to Raymond's coffee. Always one willing to explore new technologies, Raymond has agreed to take under advisement many of the Navy recommendations, even the one about washing the coffee machine, occasionally.

Likewise, Raymond has always made a special effort to keep abreast of all the latest trends in cuisine, and his new "lite fare menu" has been a big success. Those who have tried it agree that no restaurant in this city offers anything exactly like his bologna and cheddar quiche.

Mr. Speaker, I am sure that I hardly need to tell any Member how accommodating Raymond can be. Under his liberal credit policies, a Member racing to the floor for a vote who forgets his wallet can still count on being about to get a bite to eat, provided, of course, that he pays up by the end of the day and does not run his tab over a dollar and a half.

But his trusting nature has never prevented Raymond from being a shrewd businessman. Members who have found themselves on the "honor system" when Raymond makes one of his rare departures from the cloakroom and leaves the snack bar on self-service, should be aware that the videocameras in the gallery are not the only ones tracking the Members.

Mr. Speaker, if a sudden change of pace can be forgiven, I would close on a serious note by thanking Raymond for his many years of service to the House, and for his friendship and many kindnesses to all its Members.

As I suspect has been the case for most Members of the House, Raymond was probably the first person I met when I came to Congress and he has been a true friend ever since. His friendly greeting and warm smile welcomes everyone he meets.

The thing I think that has impressed me most about Raymond is his interest in looking out for the young pages who work in the cloakroom. Pages who graduated a decade ago still drop him a note now and then to let him know how they are doing. And, when former pages visit Washington, Raymond is one of the first people they look up. When new pages arrive in this new city far from their family, Raymond provides them with the trust, stability, and commonsense advice that they need. Its a job we do not pay him to do but he does it well and he deserves credit for it.

Mr. Speaker, Congress is a lot more than Congressmen. And the gentleman from California is to be commended for giving the House an opportunity to pay tribute to someone whose contribution to this body is at least as important and long lasting as our own.

□ 1930

Mr. COELHO. Mr. Speaker, I yield to the gentleman from Georgia (Mr. FOWLER).

Mr. FOWLER. Mr. Speaker, it is always difficult to speak after the leadership and after the very generous remarks of the gentleman from Massachusetts, both gentlemen from Massachusetts; but I must say that many of us in this party that if we had to nominate as candidates for a renaissance man it would probably be our Raymond Roebuck.

You have heard from the Speaker about Ray's knowledge of sports. You have heard from many of our colleagues about his lack of knowledge of cuisine. He is the only man I know that believes that a hot dog is the only dog that feeds the hand that bites it, and if you reach too fast for it, he will bite your hand on the way to his dog.

He is also a man of music. He knows not only his sports, he knows not only his cuisine, he knows his music.

Raymond is eternal. I do not know how old he is. He will not tell how old he is. I know he knows when Clyde McFadden was with the Drifters. He remembers when the Howling Wolf was singing those blues in the Walla Heights.

He remembers, yea, when the Platters first strolled out of the Royal Peacock.

He remembers when Laverne Baker was out there facing Chuck Berry singing, "Jim Dandy to the Rescue."

His knowledge even goes back to Fats Domino singing, "Yes, it's me and I'm in love," 26 times before they hauled him off the stage.

He knows every song in the Broaden Hymnal. He knows "Brighten the Corner Where You Are," "Bringing in the Sheaves," "Just as I Am Without One Plea," and all of that, his knowledge of the excellence embodied in sports, the dimension that music brings to our lives, the pleasure of a meal well served, even if it is a special and hasty meal, has all been wrapped up in one whale of a fellow that is never too busy to stop what he is doing for the great or the small.

We love you, Brother Roebuck. We are thankful that they still make something of your essence, and "Though you ain't perfect, you're all we got, and we are so grateful for it."

Mr. COELHO. Mr. Speaker, I yield to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, I thank the gentleman.

I first want to commend our colleague, the gentleman from California, for taking out this special order and that, like the other acts, are tough acts to follow. They have already touched upon Raymond's music, his excellent cuisine, his sports ability.

I would just like to speak briefly about his clandestine operations in the bank. I do not know if a fellow can hide tomatoes any better than Raymond. Raymond is good at hiding that chicken. In fact, I only see chicken about once a month. It is either gone or he has hidden it well when I get back to the snack bar.

In all seriousness, Raymond is a great guy. We all love him. He has a tremendous sense of humor, always has a smile for you, a good word. He is just a delight to be around.

Raymond, it has just been great having you aboard. We just wish you 25 to 50 more years of continued success in that job.

Mr. COELHO. Mr. Speaker, I thank the gentleman from New Jersey.

I yield to the gentleman from Ohio (Mr. STOKES.)

Mr. STOKES. Mr. Speaker, I want to commend my colleague, the gentleman from California (Mr. COELHO) for taking out this special order for my friend, Raymond Roebuck.

All of us who patronize Ray are proud to pay honor to him today for 20 years of outstanding service to the House. Although he is located in the Democratic cloakroom of the House, I have often seen many of our colleagues from the other side of the aisle avail themselves of his services.

Mr. Speaker, many of us who patronized Ray over the years refer to his operation as Chez Raymond's. Not only is it a great restaurant but it is a favorite meeting place where Members can get a bite to eat and at the same time, get to know other Members a little better. It is a place to discuss legislation and reminisce as well as to hear the latest joke or humorous story circulating the Halls of Congress. It is also a place to learn of the strangest sandwiches you have ever heard of. Whatever the concoction—Raymond can prepare it. Sometimes, if the Member desires, Raymond will come up with some new and delicious concoction. But Ray is equally nice to those who, like myself, are less daring who just take the old standby meals, like tuna or chicken soup.

It is always interesting at the beginning of each new session of Congress to stand close to Ray's operation and see him greet each new Member of the House by name. That is one of Ray's great assets which is that he knows every Member of the House and greets them by referring to them by name. This uncanny ability to remember names is just not reserved for Members of Congress but includes former Members of Congress, and current and former pages.

Along with this uncanny ability to remember names is Raymond's computerized mental ability to juggle figures in calculating the cost of each Member's meal. This also includes the ability to store each person's account in his head when we forget to pay or as some of us tell him, "pay you Saturday".

Those of us who have patronized Raymond over the years have come to know that he has had certain favorites who get a little special treatment. Congressman BILL CLAY and I discovered one day that no matter how many Members were told he was out of tuna salad that somehow whenever former Member Yvonne Brathwaite Burke came up and asked for tuna, that Ray just happened to find a dish of tuna salad for her. Considering her beauty, however, none of us ever blamed Ray for this. The fact is that we had to praise his astuteness. I also learned a long time ago that on those days when Ray is not in the best of moods, that it helps you to know his best friend, Charlie Melody. Fortunately, Charlie is always around and has put in a good word for me on more than one occasion.

Another thing Congressman BILL CLAY and I used to tease Ray about is the missing pot. Back a few years ago whenever the House was not in session late, Ray would frequently cook a special dish and bring in a pot of it the following day. On one occasion, he told both of us not to eat anything until the pot arrived that he had coming and that he expected the pot any moment. That was around 12 noon. Each hour when we checked with him, he would not let us eat anything, reminding us that his friend was bringing the pot and would be there in a few minutes. Somewhere around 6 that evening, Raymond finally acknowledged that he did not know what had happened to either the friend or the pot because neither one ever showed up.

Those were the good old days and it is not very often that Ray brings in a pot anymore. In many respects, Raymond is much like a good bartender. In the course of a day's session of Congress at his snack stand, Raymond sees all, hears all and knows all, but says nothing.

What he will talk about, however, is basketball and I learned the hard way not to bet him, especially if you are betting on the Cleveland Cavaliers.

Well, Mr. Speaker, we could go on and on reciting anecdotes about Raymond. I take pride in paying tribute to Raymond for his valued and talented service to all of us and I look forward to many more years of helping Raymond locate that lost pot.

□ 1940

Mr. COELHO. Mr. Speaker, I thank the gentleman for his great remarks.

I now yield to the gentleman from California (Mr. DYMALLY).

Mr. DYMALLY. Mr. Speaker, I take pride today in joining with my colleagues in commending Raymond Roebuck on the celebration of his 20th year of service to the House of Representatives.

For many years, Ray Roebuck has been the provider of nourishment for most Members of this distinguished body as part of his responsibilities as manager of the Democratic cloakroom snackbar. Always affable, Ray has not only furnished fine food for us, but has provided a warm atmosphere and a warm sense of humor as well. His undying spirit, optimism, and zeal are refreshing examples of dedication and service of the highest order to our country.

I applaud Raymond Roebuck for his loyalty, professionalism, and character and look forward to his continued service for many years to come.

Mr. Speaker, I want to take exception to labeling Ray as an expert on baseball. Ray was humbled in 1981 when he had the audacity to take a bet against the Los Angeles Dodgers for the New York Yankees and I want to tell you that he is still paying very dearly for that experience.

Ray is a dear friend and we love him, we all love him.

Mr. COELHO. Mr. Speaker, I now yield to the gentleman from Maryland (Mr. DYSON).

Mr. DYSON. I thank the gentleman from California for taking the time today, and I, too, would like to salute Ray. I would like to thank him for the job he has done for all of us.

The chairman of the Ethics Committee I think hit upon a very important point. He knew me before I knew him. I remember my first day as a Member of the Congress coming into the Chamber and walking into the cloakroom and Ray pointing me out and asking me how the blues and the blue crabs were running in the Chesapeake Bay.

He is a tremendous individual and I again want to thank the gentleman from California for taking the time out to recognize, I think, a very special individual.

I salute you, Ray. Thank you.

Mr. COELHO. Mr. Speaker, I now yield to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. I thank the gentleman from California. I think this is most appropriate.

When I first came to the House I was expected to recognize seniority and I quickly recognized that Ray had seniority over me and still does.

I also recognized that when I really wanted to know what I ought to be doing, all I had to do was ask Ray because I did not know my way around here.

I also began to learn that he made some darn good sandwiches.

But I learned a couple of other things. Raymond was in an odd position. He had all of the Members of the House and the staff as customers but they were also in a sense his boss. So he at one point in one way had to be polite and courteous and friendly and warm, as he is by nature, but also he had to sort of keep them at arms' length to keep them from pushing him around. And he is an absolute genius at putting things in a way so that you know that he has put you in your proper place and, at the same time, has done it in a way that you cannot possibly take offense at.

Raymond has some other nice traits, one of which is he really is genuinely accommodating. I have been hooked for years on a little confection called Kitkats. I put Raymond up to stocking the 1 day. It took a little time and I urged him, but he finally did. About all I can say is that I think he got a lot of other people hooked on Kitkats around here as a result.

And I finally pursuaded Raymond that there was another confection that he ought to stock, and that is a little thing called Dannies. It is a kind of a frozen yogurt bar on a stick. Ray-

mond, I will say one thing, I may be one of your better customers for Dannies, but you have been selling Dannies like a house afire. I guess that is inappropriate because it is a frozen thing. I will say like a baked Alaska. Ever since.

Raymond is also a trusting person. If you do not have the money to pay, why, Raymond not only trusts you to pay him later but he trusts you to remember how much you owe him, although I have never been quite sure that he does not remember pretty well himself.

In any event, all this points to the fact and all of the things that have been said today to the fact that Raymond is a real, genuine article. He has no stuffiness. He knows how to deal with all of the prima donnas, and that includes all 435 of us, and at the same time he does it in such a way that we all go away loving him.

Raymond, we love you. Thank you so much.

Mr. COELHO. Mr. Speaker, I thank the gentleman from Ohio.

I now yield to the gentlewoman from Louisiana (Mrs. BOGGS).

Mrs. BOGGS. Mr. Speaker, it is with deep affection and much gratitude that I rise to pay tribute to Raymond Roebuck. I am so grateful to the gentleman from California for giving me this privilege.

Raymond Roebuck is a kind, astute, loving, serviceable, generous man. As a matter of fact, he is one of the most sustaining members of this institution.

Of course we all have our favorite Ray stories. I must say that this fine gourment allowed me to influence him into purchasing a microwave oven and thereby he doubled the specialties to Chez Raymond by being able to accommodate those of us who like a little hot food every once in a while more easily.

And speaking of hot food, I knew he was an excellent cook when he asked me to bring him a chef sized bottle of tabasco sauce.

But I suppose what we all love Ray the most for is his genuine interest in each of us, in our families, and in everything that we hold dear, and especially his interest in the pages.

All of us who love the pages, who worry considerably about the fact that they have so little direction, oftentimes, and we are concerned that they are not eating properly, they are not sleeping properly, they are not studying properly, they are not exercising properly, we know that when they get into a really difficult bind they can repair to Raymond Roebuck and he will help to straighten them out. He is their father confessor and their loving mother sometimes, and we in the Congress should give Raymond a special thanks for this very special way he has with the pages.

Ray, I really do appreciate you and love you and thank you, and I hope that you will remember this day for a very long time to come. Put it in that special calculator of yours that happens to be the best computer brain in the House.

Mr. COELHO. Mr. Speaker, I thank the gentlewoman from Louisiana.

I now yield to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. I thank the gentleman for yielding to me. I appreciate the gentleman arranging this special order so that those of us in the House who have learned to know Raymond as well as we have through the years can pay tribute to him.

Raymond is with us this evening and I want to join those frineds who are tipping their hat to him.

I join my colleagues in saluting this gentleman because he is a very true gentleman. Someone, I guess several people have referred to Chez Raymond a number of times. I want to say that in all of the time that I have been in politics or in government, wherever I have worked I have never known a man to know the succulent qualities of a bologna and cheese sandwich as much or as well as Raymond Roebuck.

Raymond has perfected a bologna and cheese sandwich to a high art form.

Whenever I go into the Cloak Room and I order a whopper, Raymond knows exactly what I have in mind, and he has never once disappointed me. Today, in fact, I told him I wanted one a little extra special because I was going to be taking some time on this special order and it better be good or otherwise I might revise and extend my remarks and say some things that would be on the negative side.

He knew I was kidding because I could think of very few things that I could say that would be negative.

I am glad that our colleague from Louisiana, LINDY BOGGS, mentioned the thing that she did on a serious note because one of the things that I have noticed through the years about Raymond is that as a part of this family, he is a part of this family, and an integral part. He cares more about the well-being of the Members, but particularly the young people who serve as pages.

□ 1950

He really does care. He takes the time to know when they are not feeling well, he takes the time to care about their education, he cares about their lives and I guess for those of us who are saluting Raymond tonight, we are saying we care about his as well.

Those bologna and cheese sandwiches are great. I can tell any colleague who listens tonight that if anyone thinks Raymond forgets who has not paid, I can guarantee them that that is wrong. Raymond does remember. More than that there is one other thing I want to say about Raymond. Raymond probably is the best man I have met in Congress in laying down a bet with. For 9 years I have made a couple of small wagers with Raymond on sports events of one kind or another. I seldom win. I am not a person who wins bets. I have gone through all my life and hardly ever won a bet on a sports event. When I came back here to Washington, joined this House, this caucus, I found that I met a man who I could lay a bet down with and frequently, if not inevitably, walk off with a sizable reward, not sizable but a small reward.

In 9 years I have lost one wager with Raymond. Raymond, I love you, wherever you are, I love you. I want you to know that. But really in all seriousness, for all that you give to all of us, every one of us is saying tonight, you are family, my friend, you are real family, we love you and we want you to stay with us for years to come.

Mr. COEHLO. The gentleman from Massachusetts, Mr. DONNELLY.

Mr. DONNELLY. I thank my good friend from California for yielding. I congratulate him for taking time this evening to commemorate 20 years of service by our good friend Raymond Roebuck.

Raymond to me represents all of the best things that career Government employees do. He is a member of this family of the House of Representatives and whether you are going through the course of your day, a good day or a bad day, it is always a pleasure to be able to walk into the cloakroom and to have a cheery word with Raymond Roebuck. There are very few people that I have met, not just in this institution, but in my 10 years in public life that have that unique quality, that unique quality to put people at ease immediately and secondarily to go about your day-to-day work in an efficient, effective, and very gratifying way.

Ray has another unique quality: He never forgets individuals who have served in this institution, nor do those individuals forget Raymond and the dear way that he carries his life and the quality of life under which he lives. In the 5 years I have served in this institution, traveling across the breadth of this Nation I have met many former Members. And one of the first things they say is, "Say hello to Ray for me."

I have met very few people that have not had a dear deep respect for this man and the way he has carried himself.

Raymond, on the other hand, never forgets Members of this institution. Constantly he will ask me about certain Members, former Members of the Massachusetts delegation no longer with us, back in private life, how are

they feeling personally, how are their families, what are they doing now for a living?

He is without a doubt a dear member of this family. In many ways those of us who are here today and those that serve on both sides of the aisle as individuals we are honoring ourselves and this institution by honoring this fine, dear man, Raymond Roebuck, who I will always consider to have been a great asset to my service in this institution and who I will always hold closely with the word friend.

Mr. COELHO. I thank the gentleman.

Mr. Speaker, I yield to the gentleman from West Virginia (Mr. RAHALL).

Mr. RAHALL. I thank the distinguished gentleman from California for yielding to me under this special order.

I am very honored, very happy to join this evening in paying special recognition to Raymond Roebuck upon his 20 years of service to the House of Representatives and to this institution of our Government.

I have been here 6 years and there is very few individuals who I have seen around this town that really know how to put Congressmen in line. Let me say that Raymond Roebuck knows how to do that. He knows how to do it in a very polite manner but yet a very forceful manner. During a rollcall, at the height of the noon rush, we are all back there trying to obtain a hot dog or sandwich, some of Raymond's delicious tuna or egg salad, and what will he tell us? "There are two or three ahead of you, Mr. RAHALL. Write your order down, get in line."

Believe me, I do. So Ray knows how to put us in line.

I have just come from a reception in Ray's honor. He was not there, but I can certainly understand his wanting to be elsewhere at this particular hour.

I must say there were more Members of Congress at that reception than I have seen at any one reception since I have been a Member of Congress.

I think that outpouring of Members who wish to stop by and say thank you to Raymond for his 20 years of service is certainly indicative of the high respect in which Members hold Raymond.

Certainly as has been mentioned earlier today we have our troubled times in this body. Each of us have our ups and downs. Each of us have our long evenings sometimes in which we are in session late or in a particular committee meeting to all hours of the night, we are here early the next morning and we do not particularly want to hear or want to talk funny items or talk about items that we may not attach the most importance to at that moment, but Raymond knows who to soothe over those feelings, get us to talking about the brighter aspects of the day coming before us. It is indeed a delight to have that type of person to talk to in the mornings following our long hours in this Chamber and in this institution. So, to Raymond Roebuck upon his 20 years of service and to his family, to his friends that are with us here this evening, I say thank you for the service you have given. I might add one further note. In all 6 years I have been here, as I have said Raymond has made a lot of them happier moments than what they would otherwise be. I can recall one especially sad one that I noticed Raymond, it has been the only sad moment in which I witnessed him during my 6 years here; that was the time he came out of the phone booth in the cloakroom with tears in his eyes upon the death of a beloved one in his family. That is the only moment I can recall in which there were genuine tears in his eyes and it was a genuine moment of sorrow, a pause, and one of deep thinking.

I recall that very well, Raymond, I know that sticks out and shall always stick out in my memory as one of the few moments in which Raymond Roebuck expressed a sense of sorrow.

Other than that, he has brought great cheer to many Members of this body and to this institution which he has served to the highest degree of respect, esteem and integrity. I thank you for it, Raymond.

Mr. COELHO. The gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. I thank the gentleman from California.

Mr. Speaker, I am privileged to pay my respects to my friend, Raymond Roebuck. Raymond is my colleague and my contemporary. We are both, more or less, celebrating 20 years of service here in this body. As long as I remember he is the only one who has taken care of us in the cloakroom, I know of no other. I met a couple who worked in the cloakroom before Raymond. There were two of them, husband and wife. So, Raymond is taking care of two jobs; one of him, two of the other. It might have been three for one; whatever the job he could do it and he has done it with such grace and pleasantness that he has endeared himself to all of us.

In my own case, I maintain my own special set of priorities about a person I would serve my secret formulas to.

When I serve chili here once a year, I get my venison chili and I would trust that secret to no one else hardly except Raymond Roebuck. But I do.

Each year for the last 20 years we have served venison chili to a group of people here who know that that is the quintessence, that is the elixir of all foods, venison chili with a little added touch of Roebuck, to say nothing of pickle and peppers at the same time.

□ 2000

I am impressed by the fact that no matter how busy you are and how fast you rush into the cloakroom to demand a sandwich or something to eat, Raymond says, without ever looking up, "Get in the back of the line. You are about tenth."

I tell you, it takes a man with a little nerve to say that to a group of prima donnas who are elected to Congress. But Raymond says it and gets away with it because we know when he says that he is just simply saying "Everybody is the same. You wait your turn. I am going to take care of these people." And I have seen him tell the Speaker that and hold my breath. He held onto his vow and the Speaker got in line. And he is a pretty good size fellow to be noticing at the end of the line, but that was Raymond's rule, treat everybody alike.

He did it with kindness. He did it with friendship, with understanding.

A lot of people come in a bar, to a neighborhood bar, and they want to have a drink and before it is over with they will philosophize and they will want somebody to listen to them. The same is true in the cloakroom. You go in to Raymond and if you do not watch it, he will get your order in, and he will listen. And the next thing you know you will get a little conversation, a little appreciation, and if you do not watch it, you will get a little advice. He has plenty of it. He will give it freely He knows what to say because he understands people. If he had not, he would not have been here and loved by so many people.

So all of us in the House salute a public servant who has given of himself and made us all feel happy that we serve here and that we are comrades working together in the public good.

Mr. COELHO. I thank the gentleman from Texas.

Mr. Speaker, I yield to the gentleman from Washington (Mr. LOWRY).

Mr. LOWRY of Washington. I thank my colleague for yielding.

I frankly cannot add an awful lot to what the gentleman from Texas just said. He really summed it up well. Except to say that Raymond Roebuck is truly an unusual person and a very, very valued member of this team that works so hard around here. And I would actually say that even if I was not afraid I would not get my tuna fish sandwich had I not said it.

The only thing that surprised me—and I am trying to say this to be funny—is I did not realize that Raymond had only been here 20 years. I thought he had been here a lot longer than that. I thought he had been here as long as the institution.

I hope he is here many more years. He is a very valuable member. And I

want to thank my friend from California for having this special order.

Mr. COELHO. I thank the gentleman from Washington.

Mr. Speaker, I yield to the gentleman from Pennsylvania (Mr. GAYDOS).

Mr. GAYDOS. I want to thank my colleague from California.

I want to say this and I think I am now in a proper position to say it. I have listened to everybody, everything that has been said has been true, accurate and I think to the point, and I verify what has been said.

But I probably have developed an affinity for Raymond over the years because he takes regular, frequent trips up to the Pennsylvania Dutch country. And up there he learns and is exposed to all the great cuisine that is prevalent in that area there for hundreds of years. So Raymond brings to us from the Pennsylvania Dutch country good recipes, good wholesome food.

And one of the Members preceding me had said that he thought that Raymond knew everything, heard everything. I just want to enlarge upon that along the lines that if I were Evans and Novak or if I were Jack Anderson, my entry into the secrecy of this House would be back in that cloakroom. And we owe a debt and I mean an unqualified, unprecedented debt to Raymond for the security that he has established back there. As long as I have been here—that is some 16 years now—nothing and I emphasize, but nothing, has leaked out of the cloakroom detrimental to this House. So Raymond does know how to keep a confidence.

Mr. COELHO. If the gentleman will yield, the gentleman may not have been here when I read Raymond's famous quote that is published. He says, "I don't know nothing. I don't hear nothing and I don't see nothing." That is his quote to the press. And the gentleman is articulating that.

Mr. GAYDOS. That is appropriate. It is apropos. And I would say if anybody would have made that statement, I would say Raymond when he makes it, is really sincere and I think the facts fit him.

Let me conclude by saying this. Most men and in particular Raymond's job, along with all the activity here in the House, most men, throughout life, are content to very seldom see their name in print. They do things in a sincere manner, but the recognition might be wanting in substantial form. And it is good, I think, basically fundamentally good and right and proper to honor a man while he is working with you. And he is going to continue to work.

So that is why I congratulate my good friend from California for taking the time at this time in Raymond's career and his services to this House and saying good things about a man while he can hear them and hopefully enjoy them and while the record is good and fresh.

In final conclusion, I want to add my congratulations to a fine man, who I have grown to respect, admire, and love throughout the years, Raymond Roebuck.

Mr. COELHO. I thank the gentleman from Pennsylvania.

Mr. Speaker, I yield to the gentleman from Michigan (Mr. CARR).

Mr. CARR. I thank the gentleman for yielding.

I just wanted to add my thank you to my good friend, Raymond Roebuck. And I say the word "friend" in the deepest sense of that term because he is a steadying force in an institution of change and he is a friend to us all.

I heard the remarks of the gentleman from West Virginia (Mr. RAHALL) and I would like to associate myself with his remarks.

I have been standing over at that reception now for almost an hour waiting to make Raymond a sandwich. Since he did not show up, I guess I have to come over here and thank him for his service to the Congress and more than that, the country, because the country will probably never realize the role that Raymond has played around here to make us all feel so well, be healthy, and be happy.

I rue the day that something happens to Raymond Roebuck and a Member of Congress has to become the real Speaker of the House.

Mr. COELHO. Mr. Speaker, I thank the gentleman from Michigan, and I thank all my colleagues for joining me tonight in this special order to a very special person, a very special character, Ray Roebuck.

All of us in the House and on the Democratic side in particular thank him for his dedication to his service here, but Ray, we are not going to let you get away with only 20 years. We are looking to celebrate that 40th year and to do more talking about some of your good deeds. And hopefully next time we will talk about some of your bad deeds. There are a lot of those, too.

● Mr. ZABLOCKI. Mr. Speaker, it is a real pleasure, as well as a privilege, to join my colleagues in honoring the 20th year of service to this House provided by Mr. Raymond Roebuck, the dedicated and indefatigable manager of the Democratic cloakroom snackbar.

Raymond has a quality, which I fear this body, in its greatness, too often lacks: namely consistency. He is not only always there when we need him, but he is invariably in good humor, at any hour of the day or night. When the rest of us grow weary and when tempers sometimes run short, it is Raymond who "turns away wrath" with his wit and restores a sense of long-range perspective to our proceedings. In fact, I am convinced that he possesses two Biblical characteristics which are absolutely indispensable for someone in his position: That is, the wisdom of Solomon and the patience of Job.

I doubt that there is any other employee of the House who has a higher sense of dedication than Raymond Roebuck. He has, I am told, an almost flawless attendance record and is generous to a fault—and he is good to everyone in equal measure, whether they be first-term pages, exalted leaders of this body, or even members of the minority party who have become, over the years, among his faithful friends and admirers. Any chairman of a standing committee must wish from time to time—as I do—that he had such compelling and pervasive influence on that side of the aisle.

In all seriousness, Mr. Speaker, we are paying tribute today to a great American who embodies all of those qualities which the House has, since its inception, come to depend upon from its most loyal and selfless employees. We owe them collectively, and Ray Roebuck in particular, our deepest gratitude.●

● Mrs. BOXER. Mr. Speaker, there is never a time that I have needed sustenance that Raymond has turned me away.

Many a bowl of chicken soup has aided in the weighty decisions made in this great House of Representatives.

Thank you Raymond.●

● Mr. HIGHTOWER. Mr. Speaker, wise people have known for a long time that the way to have friends is to be one. That explains the reason why Raymond Roebuck has so many friends. Ray is a friend.

As the "Major domo" of the cloakroom he comes into daily contact with the Democratic Members of the House. Through the long days he patiently provides opportunities for a "pause that refreshes" to Democratic lawmakers that enter his domain behind the House Chamber. There for a few minutes they can shed some of the tension that seems to be in constant attendance on the House floor.

Ray is special to us because he treats us all alike. There do not seem to be any "special" Members of the House when it comes to service in the cloakroom.

Ray is still a young man; 20 years here should be just the beginning. I am sure this House will want to take note of many anniversaries before Ray tires of the place and looks for a successor. We want to use this occasion to say, "Thanks, Ray, for the first 20 years. We hope that you will add many, many more."●

● Mr. BOLAND. Mr. Speaker, I want to join with my colleagues in commemorating Mr. Raymond Roebuck's 20 years of service to the House of Representatives as manager of the

Democratic cloakroom snackbar. Regardless of the hour, one can count on Ray to liven any day with his dry wit and tasty cuisine. Ray's dedicated service makes him an instant friend to those who meet him. "Service with a smile" is not only a motto but a lifestyle for this hard-working and loyal man.●

● Mr. ECKART. Mr. Speaker, it is a privilege for me to join my colleagues in a tribute to Raymond Roebuck who is celebrating 20 years of service to this institution.

I have not been here that long, but in the time I have served, Ray as manager of the Democratic cloakroom snackbar has provided me with more than snacks between hectic sessions. His warm smile, personality, and consistent sense of humor can make the dreariest of days more sunny.

I have often thought how is it possible for Ray to always be such a jovial fellow. The answer to my question is really rather simple: Ray Roebuck simply does not know how to be anyone else except Ray Roebuck, a friendly and enthusiastic person. For me personally, the attributes of Ray are contagious. He personifies everything that is good about serving in this institution. I truly admire his dedication to his job and his service to the House of Representatives. Thanks, Ray, for everything.●

● Mr. GUARINI. Mr. Speaker, it is with pleasure that I join with my Democratic colleagues in commemorating the 20th anniversary of Raymond Roebuck's service to the House of Representatives.

As manager of the Democratic cloakroom snackbar, Ray has always had a ready smile, a deft hand, and an understanding manner. With his quick wit and culinary art, Ray has a way of making service feel personal, even in a crowded and pressured room.

I want to thank my colleague TONY COELHO for calling this special order. But even more, I would like to thank Ray for the thousands of special orders he has served to many past and present Members over these 20 years.

I am certain he has developed a sense of politics and a knowledge of government by being present at thousands of side-door conferences.

To Ray, we are grateful for your friendship, your warm personality and your dedication to the House you have chosen for your life's work. Good luck—now and always.●

● Mr. ROWLAND. Mr. Speaker, on the occasion of Mr. Raymond Roebuck's 20th anniversary of service to the U.S. House of Representatives, I want to add my personal thanks for the many services he has provided me in the short 7 months I have been a Member of Congress.

As manager of the Democratic cloakroom snackbar, Ray is one of the "behind the scenes" persons who makes the long hours and days of debate on the House floor more endurable. He not only helps feed us, but he provides nourishment for our spirits with his friendly manner and great sense of humor.

I believe it very appropriate that we take this opportunity to commend Ray for his 20 years of dedication and loyalty of service to the House and its Members.●

● Mr. LONG of Maryland. Mr. Speaker, I would like to join my colleagues in celebrating Raymond Roebuck's 20th year of service to the House.

We are very lucky to have him. He provides us with high quality food. He maintains impeccable sanitary standards. He sustains us not only with his food but also with his unfailing good humor. His snackbar is a good place to get pepped up as well as filled up.

What would we ever do without him?●

● Mr. BEVILL. Mr. Speaker, during the many long hours of debate on the issues before this body, the Members of the House have been well served by the employees of the House. All are capable and efficient public servants. But one who has distinguished himself as a special friend and most cordial worker is our good friend, Ray Roebuck.

Ray's management of the Democratic cloakroom snackbar has brought happiness and a welcome bit of relief to us all. His service is always efficient and the food refreshing. But more than that, Ray's friendly and relaxing attitude is contagious.

More than once I have seen Ray spread his smile to the faces of our tired colleagues. His special brand of humor has always brightened the early morning hours of debate when we most needed him.

For 20 years Ray Roebuck has served the House and its Members. And for 20 years we have enjoyed his friendship. It is a pleasure to join with my colleagues in publicly acknowledging Ray Roebuck's outstanding service on this his 20th anniversary of service to the House.●

● Mr. GIBBONS. Mr. Speaker, I remember when Ray Roebuck came to work in the Democratic cloakroom snackbar, and I have counted him as a friend for these 20 years. A part of my well-padded waistline and sweet disposition are directly attributable to his culinary art.

Ray, we look forward to another 20—at least.●

● Mr. CLAY. Mr. Speaker, it is a great pleasure to join my colleagues in tribute to Mr. Raymond Roebuck, the distinguished manager of the Democratic cloakroom snackbar. Today, we celebrate the 20th anniversary of Raymond Roebuck's unrelenting service to the U.S. House of Representatives.

For the past two decades, Raymond Roebuck has provided unsurpassed attention to the real needs of this body. Giving nourishment and inspiration to Members of Congress, Ray has demonstrated a deep and abiding faith in the democratic process. Raymond Roebuck is known for his unmatched loyalty and irrepressible humor. He is praised worldwide by my friend from California, Representative ED ROYBAL, for having the foresight and ingenuity to put tuna in his tunafish sandwiches.

I am honored to be a friend of Ray's and to join in celebrating his 20th anniversary. I deeply appreciate all the help Ray has given me, and I look forward to our continued association for many years to come. I wish Ray my warmest congratulations on this momentous occasion.●

● Mr. MARTINEZ. Mr. Speaker, it is with great pleasure that I join in with my fellow colleagues in Congress today to recognize Raymond Roebuck, manager of the Democratic cloakroom snackbar.

This gentleman's outstanding record of 20 years service and his delightful personality are a fine tribute and an eloquent statement to the loyalty and dedication to the House and its Members.

I am proud to take part in this celebration and I wish Raymond a continued success in the future.●

● Mr. HANCE. Mr. Speaker, today I rise to join my colleagues in celebrating the 20 years of service of Raymond Roebuck.

Ray's friendly manner and quick smile have made him a legend in his own time as manager of the Democratic cloakroom snackbar. Of course, as you know Mr. Speaker, Ray has to have a good sense of humor. Anyone who serves up his kind of cuisine has to be able to make his customers laugh.

Like all good comedians, Ray knows the key is in the delivery and the matieral. And like Will Rogers once said, "There's no trick to being a humorist when you have the whole Government working for you."

As a young Congressman newly arrived in Washington, D.C., Ray took me under his wing and explained the power structure, the voting procedures, and the items in his snackbar you can eat and live to tell about. I heeded his advice and have enjoyed his friendship and admired his ability to apply humor to even the most touchy subjects.

I asked him recently if the Democrats should share Ray's unique insight and personality with our Republican friends. Ray thought for a moment and replied, "No, it would not be right to mix bad food with bad politics."

Ray, congratulations on 20 years, and I hope you keep us laughing for 20 more.●

● Mr. DASCHLE. Mr. Speaker, I want to join my colleagues today in celebrating Ray Roebuck's 20th anniversary of service to the House. Without question, he deserves our most sincere thanks and appreciation for a job extremely well done.

Not only has Ray provided for the care and feeding of more Members of Congress than anyone in recent history, he has taken our abuse, listened to our criticisms, and kept one of the best and most authoritative lines of the upcoming schedules in the House than nearly anyone around.

To Ray, I join all of those grateful people, who over the past 20 years have benefited in a myriad of ways from his service, in exclaiming my thanks.●

● Mr. SMITH of Florida. Mr. Speaker, I want to join my colleagues in paying tribute to Ray Roebuck, manager of the Democratic cloakroom snackbar.

Although I have only been a Member of Congress for a short time, I have come to recognize the important role that Ray plays in our hectic lives. Even in the worst of times, he is convivial, charming, and totally dedicated. Without him we could not function. He always has good nourishment for the body and the spirit.

I congratulate him on his 20 years of service to the House and hope that he will grace us with his presence for many more years to come.●

● Mr. BOUCHER. Mr. Speaker, I rise today to join in the acknowledgment in the outstanding work of Raymond Roebuck, who for the past 20 years has served as manager of the Democratic cloakroom snackbar.

Since my arrival in the House in January of this year, I have continually been impressed with the courtesy and efficiency of Raymond Roebuck, even on days when the House is in session for more than 12 hours.

Raymond always has a kind word for the Members and employees of the House who use the snackbar, and his presence contributes greatly to the cordiality of the Democratic cloakroom.

Mr. Speaker, it is my pleasure to join in this commemoration of the 20th anniversary of Raymond's service, and I sincerely hope that we will be privileged to have the benefit of Raymond's assistance for many years to come.●

● Mr. RICHARDSON. Mr. Speaker, I rise today to pay tribute to Ray Roebuck, the Democratic cloakroom's man of the hour.

With his unfailing cheerfulness, unique sense of humor, and disarming manner, Ray Roebuck has brightened many a long, arduous voting day for House Democrats. His food ranks with the very best—Washington's best restaurants cannot compete with Ray Roebuck's liverwurst sandwiches. In addition to his great personality, Ray Roebuck has one of the world's finest memories—especially if you have forgotten to pay for your chicken soup because of a pending rollcall.

Mr. Speaker, I join my colleagues in wishing Ray the very best.●

● Mr. YATRON. Mr. Speaker, I rise to join with my colleagues to pay tribute to Raymond Roebuck on this very special day.

August 1, marks the 20th year of service to the House for Raymond Roebuck. During his tenure, Raymond has, unquestionably, served with distinction. He has been a dedicated, loyal, affable, and effective manager of the Democratic cloakroom snackbar. His particular culinary talents and special brand of humor have provided Members with many pleasant moments and much-needed sustenance during some tense and difficult periods.

We all owe Raymond a sincere thank you for the fine job he is doing. That is why it is most fitting to have this opportunity to express our appreciation and to honor an individual who contributes, in a very special way, to the operation of this Chamber.●

● Mr. LEHMAN of Florida. Mr. Speaker, I am pleased to join in this special order celebrating the 20th anniversary of Ray Roebuck's service as manager of the Democratic cloakroom snackbar.

We can always count on Ray to keep up our spirits, even during the long hours that inevitably come at the end of a session when floor activity lingers into the early morning hours.

He is a great source of information as well. He seems to have a special intuition about the progress of legislation on the floor.

I personally very much appreciate all the help Ray has given over the years in a variety of ways. "Chez Raymonde" makes the cloakroom a much happier place, and I congratulate Ray on his fine service.●

● Mr. FUQUA. Mr. Speaker, I am delighted to join today in paying tribute to Ray Roebuck. I arrived on January 3, 1963, and Ray arrived on August 1 of that year and so we have the same memories of the changes in this body in the last 20 years. I also remember with great fondness the many meals he has provided to me over the years.

Through Monday sessions that lasted 2 hours to Wednesday sessions that lasted past midnight, Ray has been steady, reliable, and enduring as he has gone about his work with a smile.

Many of his multitude of concoctions are deserving of praise in song and poem but I think his pepper hotdogs are the epicurean delight I relish the most, if you will forgive the pun.

Ray has catered to the palates of many different Members over the years and as he celebrates his 20th year of service, I am pleased to say "Thank you, Ray" for a job well done.●

● Mr. MONTGOMERY. Mr. Speaker, I am happy to join with my colleagues in paying tribute to a very dedicated and sincere man, Raymond Roebuck. He has served this House well over the past 20 years.

He and I have been friends for many years and I can say that he has kept things running smoothly and efficiently as manager of the Democratic cloakroom snackbar. He always has a kind word for everyone and we all have enjoyed his marvelous sense of humor over the years.

I am glad we can take this time to pay tribute to Raymond today. It is our way of paying back the loyalty, dedication, and service he has given to the House of Representatives over the past 20 years.●

GENERAL LEAVE

Mr. COELHO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order tonight.

The SPEAKER pro tempore (Mr. HARRISON). Is there objection to the request of the gentleman from California?

There was no objection.

HONORING DR. NICK MATHEWS

The SPEAKER pro tempore (Mr. HARRISON). Under a previous order of the House, the gentleman from Virginia (Mr. BATEMAN) is recognized for 60 minutes.

Mr. BATEMAN. Mr. Speaker, on April 14, 1983, our Nation lost one of its most dedicated patriots, the late Dr. Nick Mathews of Yorktown, Va. Dr. Nick, as I so fondly addressed him, passed away en route to Pascagoula, Miss., while accompanying his wife, Dr. Mary Mathews. They were together as we shall always remember them, as she traveled to carry out her mission as the sponsor of the Aegis-class cruiser, U.S.S. *Yorktown*.

Dr. Nick was a remarkable man. He was not a sophisticate. He was not a great intellectual, though he had a very keen intellect. He never held or aspired to public office and never sought the limelight. What then makes him remarkable? In an era of cynicism and too widespread focus on what is wrong with America, his life, his energy, and so much of his resources were a celebration of what is good about America.

Born on the Grecian Isle of Karpathos near the turn of the century, Nick Mathews came to America at age 17 and as so many immigrants who came here seeking opportunity, he did not find it easily. He earned it by hard work and determination to succeed. He

worked in the coalfields of West Virginia, as a bus boy, dishwasher, steelworker, and later a chef. If the expression "work ethic" has special meaning for you, the life of Nick Mathews has special meaning, even if you were not privileged to know him. By his unstinting efforts, Dr. Nick came to enjoy great success as a restaurateur.

In 1942, Nick Mathews married Mary Mathews, and the love they shared for each other was an example that was both heart warming and inspiring. They were partners in every aspect of their lives. I have never known a husband and wife more totally devoted than this couple.

Nick and Mary came to Virginia in the early 1940's, opened restaurants in Richmond and Williamsburg and in 1944 founded Nick's Seafood Pavilion in Yorktown, Va. They could have settled and begun their successful enterprise elsewhere with greater likelihood of success, but they chose Yorktown and a site overlooking this historic "commons" of the town of Yorktown where Washington and Rochambeau and the young Lafayette laid siege to the forces of Lord Cornwallis and forced him to surrender his army, thereby winning America's war for independence.

Nick's Seafood Pavilion was built into a great success and has attracted a loyal patronage that is international in scope for the excellence of its cuisine.

As they built their success on a solid foundation of hard work and determination to earn and deserve it, Drs. Nick and Mary have shared the fruits of that success with countless individuals in need and by quiet acts of philanthropy. Their generosity was not motivated by any desire for recognition and surely not for notoriety, but the dimension of their philanthropy could not remain undetected.

Dr. Nick had a special concern for Yorktown—not as the place they chose to start a business but as the place where the blessing of liberty for the American people was won on the battlefield. How natural, even predictable, that as Virginia and the Nation began preparation for our Bicentennial of American independence, Drs. Nick and Mary Mathews donated land on a bluff overlooking the York River, valued at more than one-quarter of $1 million as the site for the Virginia Bicentennial Center. On the site of this outstanding exhibit center devoted to the commemoration of our freedom as a people and independence as a nation, Dr. Nick is now at rest.

In 1980 a young, thriving and already distinguished Christopher-Newport College in my hometown of Newport News, Va., appropriately recognized the value and meaning of Nick and Mary Mathews and what they stood for, when it conferred upon each of them an honorary degree of Doctor of Humanities. I was privileged to be present when the degrees were conferred, and what a warm and happy occasion it was.

In 1981 when we celebrated the bicentennial of the victory at Yorktown, Nick and Mary were prepared to see it was fully and properly commemorated. At their expense, they caused to be erected at a site on the York River a lovely granite monument, which bears a plaque which says:

Honoring the victory of Yorktown is offered as a lasting symbol of patriotism and gratitude by Drs. Nicholas and Mary Mathews. "To you from failing hands, we pass the torch. Be it yours and hold it high."

It is, of course, predictable that when our Navy decided to name a new cruiser U.S.S. *Yorktown*, Mary Mathews was selected as the sponsor who would christen the ship. It was to discharge that function that took Drs. Nick and Mary to Pascagoula on his last earthly journey. Equally predictable is that Mary Mathews, despite her grief at the loss of her beloved husband, went forward with all her duties as sponsor of the great ship, U.S.S. *Yorktown*. Though I have attended scores of christening ceremonies for ships, I remember none as being so meaningful as that of the U.S.S. *Yorktown*. This sentiment was shared by a shipbuilder who said:

I've seen 41 christenings in 14 years, and this is by far the greatest. And Mary Mathews made it happen. I guess we ought to say Nick too, because he was part of it.

Before concluding these remarks, I want to read for you the remarks prepared by Mary Mathews at this memorable christening ceremony:

I wish to thank all that made this great day of my life possible. I also wish to thank you, Senator Warner, John Dalton, former Governor of Virginia; and Marshall Coleman, former Attorney General of Virginia, for placing my name in nomination with the Navy for sponsorship of this great ship, *Yorktown*. And I wish to thank the Secretary of the Navy, John Lehman, for selecting me among a group of distinguished American women to sponsor this beautiful ship.

Today is one of the great days in U.S. history. As this ship is christened in the Mississippi's waters, it reminds me of the Jordan River, where Jesus was christened 2,000 years ago.

The name she gets is not just another name: it has other values and meaning: The spirit of freedom, liberty, justice, peace—the name of the birthplace of our great Nation. The name stands for authenticity of the individual and the goodness of humanity in the blessed Nation that feeds the hungry and dresses the naked.

We christen many ships, we give many names, but the name Yorktown sounds in the minds, souls and hearts of the people all over the world.

I pray to God to be with her, and protect her, and give her the spirit to be the good Samaritan, her "mission impossible" always to be possible, with pride of victory to stand on the name of her ancestors, "the Fighting Lady."

The name Yorktown means the American dream. To be free in your mind and body. To enjoy freedom, liberty, justice, peace, and happiness. Because without freedom your life is worthless. The Lady Liberty stands with pride and dignity on the top of the Victory Monument in Yorktown with her arms open, signifying the most precious gift of all, freedom, and welcomes all nationalities to enjoy this blessed land of freedom.

Today, April 16, 1983, the people of the United States of America and the free people the world over wish to this great ship the God to guide and protect her always. When she sails in the open seas with her flag flying high, she will be waving liberty, freedom, justice, and peace to the free world, and to those small nations that depend for their lives and happiness on the American flag that signifies freedom. Let the freedom ring, across the oceans and through the four corners of the Earth. God bless America, the guiding light and mother of the world. God bless Yorktown, the birthplace or our great and merciful Nation, the United States of America; and Pascagoula, where this great ship is being built, and from where her first journey will begin.

And now if it is permissible, the band will play, in behalf of my husband and me, "America the Beautiful," the song we treasure dearly.

Thank you, each and every one of you, from the bottom of my heart, and God bless you all.

Mr. Speaker. I will insert in the RECORD following these remarks selected editorials and other articles commenting on the contributions of this outstanding citizen of "America's First Congressional District" which I am privileged to represent.

In conclusion, Mr. Speaker, I salute the memory of my friend, Dr. Nick Mathews, but I cannot think of Dr. Nick apart from Dr. Mary so I salute them jointly as two Virginians and Americans of Greek ancestry whose unselfish devotion, patriotism, and love for their adopted country so beautifully exemplify the meaning of "duty, honor, country," to which sentiment they have been so completely dedicated.

Is it any wonder that Secretary of the Navy John Lehman observed:

Not so long ago one of Virginia's most distinguished citizens, Nick Mathews, said, and I quote, "Our forefathers struggled and built for us a nation which is now the light of freedom and justice for the entire world. God made Yorktown to be a place of history—of sacred soil. We must never forget the heritage of this place and this name."

Today, we add a major, new page in that heritage—in that history—as we christen the fifth ship of that name. And part of that tradition is the contribution of Nick and Mary Mathews themselves. to an understanding of what it means to be an American, an understanding of the real values, not the flag waving, surface manifestations of patriotism, of what the place and the ships and their distinguished records of the past and the men who fought there and on those ships means for the future of all mankind. The future of this ship is assured as one of the most distinguished in all of mankind. I am sure because of the spirit and the

courage that will be infused in this now cold steel by her great sponsor, Mary Mathews.

Thank you, Mr. Speaker.

EULOGY FOR DR. NICHOLAS M. MATHEWS, APRIL 20, 1983

(Delivered April 20, 1983, by John E. Anderson, Ph. D., President, Christopher Newport College, Newport News, Va.)

Miss Mary, dignitaries of the church, Father Makris, Governor Robb, former Governor Dalton, base commanders, civil leaders, loved ones and friends of Dr. Nicholas Mathews, it is with great humility that we come to pay our respects to one whose life has made such an impact on so many.

All of his friends who loved him will miss him very, very much. He will leave a great void in their lives. And it is in the nature of things that this is so, for his countless acts of giving, especially of himself, have been recognized nationally, as well as within our larger community. One cannot pass—having made so many contributions—without being missed greatly.

Among those acts—and these are just illustrations of the countless many—close to his beloved home of Yorktown were: the donation of land for the Yorktown Victory Center, the donation of property on which the Yorktown Historical Shipwreck Museum rests, the support for the U.S. Transportation Museum Foundation at Fort Eustis, and the erection of the Yorktown Bicentennial Rotunda, which is such a beautiful and visual memorialization of his patriotism.

But his acts of giving were not confined to this geographical area of his adopted land. They were further seen in his creation of a hospital, a chapel, and a church on his native Island of Karpathos. These acts of giving were the more well-known ones, and have been publicized. But those friends who knew him best can recount the more numerous, but less known—and even unknown—acts of giving that were even more a hallmark of his spirit. These acts changed the lives of individuals who had given up hope, and who had despaired for their future. These acts gave jobs, security and hope to people.

And it is in these acts of humanity that the essence of the man can be seen. That essence consisted in a giving which did not enslave, nor foster dependency, but rather engendered in the recipients the rejuvenation of spirit which comes with the opportunity to earn and return more than they had received; for he believed in the work ethic, and knew that the dignity of other humans is preserved and enhanced by that same work ethic. He thus gave opportunity and felt fortunate enough, through the freedoms of this country, to be able to pass on the benefits of those freedoms to others.

This giving reflected a generosity of spirit that was contagious, and established a tone of respect in all who were touched by his acts, and who knew him. And in these acts he revealed, not just generosity, but his true nature as a deeply religious man, whose faith in his country and in mankind, was not just parochial, but ecumenical in its outreach.

But coupled with his generosity of spirit, was his intensity of belief. His dedication to the ideals and principles of freedom were unsurpassed. He often confined in friends his fervent wish to have been with Gen. George Washington at Yorktown, to have been in the heat of battle, to have been one of those who stood up for freedom by signing the Declaration of Independence, to have been in the forefront with those who valued and protected the young American Nation, as it threw off the shackles of tyranny. For first, last, and always, Nick Mathews was a patriot, a doer, and a believer in the American dream. His patriotism was founded in fact and personal experience, because he lived it, and in so doing, he became witness to his own beliefs. He came to this land of opportunity with little but the willingness to work and a belief in the abilities God had given him. He became what he was—a great man, generous in spirit, intense in belief, and a living example of the American dream.

For his generosity and his patriotism, and his many qualities that enriched the lives of so many, he received many honors, recognition, and awards.

President Dwight Eisenhower cited him for service to the American Red Cross. President Gerald Ford named him "Director of the Bicentennial Commission, 1976–1981," the Republic of France honored him for his support in the recognition of French-American contributions during the Revolutionary War, and he was made an honorary citizen of many States, among them the Commonwealth of Virginia, of which he was proudest.

In May of 1980, Nick—along with his devoted wife Mary, was awarded an honorary doctorate by the unanimous and enthusiastic vote of the Board of Visitors of Christopher Newport College. And the word, "doctorate" is significant here. It is significant because it means teacher, from the Latin Doceo, to teach. The conferral of this degree meant for all the world to understand that Dr. Nick Mathews was, in fact, a teacher, a teacher of values and principles for all to see, cherish, and respect. It was a fitting degree for him who had taught others so much about what it meant to be an American.

In that recognition was embedded also the role of the student. He was a student of the human condition, of his country, of its customs, and of its values. As he learned more, his role as a teacher gradually evolved and he then became a preserver of those values which he so cherished. In the history of the college, Dr. Nick was only the second recipient of such an award. A fitting tribute, indeed, was the title, "Dr. Nick Mathews," to him who had earned the respect of his fellow man.

As a continuance of the increasing recognition accorded him for his life of patriotic giving, the Freedom Foundation of Valley Forge notified him in January of 1983, that he had been selected to receive the coveted George Washington Award in the category of individual achievement. It will be awarded posthumously in June 1983. This award is a true monument of a grateful society, which expects patriotism form its own native born, but which rejoices fulsomely in the patriotism of its adopted sons.

But as he took great pride in these honors bestowed upon him by governments, by the college, and the Freedom Foundation, he took even greater pride that his wife, Mary, was also deserving of honor, and in April 1983, that pride took on a larger dimension as he planned for the trip to Pascagoula, Miss., for Mary to be sponsor to, and christener of, the guided missile cruiser, *Yorktown*, the namesake of his beloved, hallowed, homeground. It was the mark of the man, knowing that he was not well, that he wanted for Ms. Mary the honor of that ceremony, and its symbolic meaning, to insist on completing—what proved to be this—his final mission in his expression of love for his country, and it is, further, a mark of the effectiveness of his impact on others, that Mary, in a manner that would have swelled Nick's chest with pride, carried out the christening amid the admiration of all assembled, thus bringing fulfillment to Nick's final plan.

If you will permit me to say so, I don't believe that any of us who were present that day, will ever forget the courage of Ms. Mary Mathews, on April 16, 1983, under the rays of the late morning Mississippi Sun, surrounded by both dignitaries and workers, listening to the patriotic songs sung by the sea chanters of the U.S. Naval Academy, as she gave her remarks in tribute to Nick, and then proceeded—with one successful blow of the christening bottle—to christen the ship, U.S.S. *Yorktown*. It was an unforgettable moment because it was such a great and fitting tribute to the man who had given so much to his country, and who will be remembered in the pages of history because of it.

In closing these brief but heartfelt remarks, I would like to pass on an observation made at the christening that fateful day, April 16, 1983. That observation is this:

It is said that the fighting spirit of a ship is implanted by the spirit of the person who christens it. If that is so—and I believe it to be true—then the great tradition of American freedom certainly will live on in the U.S.S. *Yorktown* as it carries the indomitable spirit of the Lord's servant, that American patriot known as Dr. Nick Mathews.

[Editorial from the Daily Press, Apr. 17, 1983]

NICK MATHEWS

Nick Mathews was 17 when he came to America from the island of Karpathos in Greece. It was 1920 and the only work he could find was as a coal miner in West Virginia. He later collected rent in Brooklyn and after that, became a chef. He met his beloved Mary when she was a member of a church choir. They married in 1942 and in 1944, remembering a visit to Yorktown, decided to open a restaurant near the beach. It seated 24 customers.

That began a great love story, which his death Thursday will not end. Nick Maphens—who became Nick Mathews—all his life said in gifts large and small, through acts of unsolicited kindness, that he loved America.

But he and his wife gave more than love to this land. They are remembered most, perhaps, for larger acts of charity: donating 21 acres for Yorktown's Victory Center; giving the site for a church in Gloucester; paying the electric bill so Yorktown's streets would not go dark; distributing countless flags, pins, drums, prints, and other near-necessities for Yorktown's needs; and even helping build a hospital in their native Greece.

Because of the magnitude of their sharing, it is almost too easy to overlook the small—and for them, routine—generosities. Three Boy Scouts from Seattle certainly will remember. They were winding up a cross-country bike tour several years ago with 37 others. As all 40 were eating—for free—at Nick's Seafood Pavilion, three of the bikes were stolen. Before the night was out, new bikes had been readied and all the scouts had been lodged and fed at Nick Mathews' expense.

Nick Mathews was not a splendid man just because he won awards for patriotic service,

community contributions, and good citizenship. The large-hearted immigrant exemplified for many native-born Americans the meaning of that old-fashioned word "patriotism," and in so doing made life richer and more joyous for us all.

[From the Times Herald, April 12, 1983]

NICK MATHEWS

It is difficult to think of Nick and Mary Mathews as independent individuals, so much have they been a team in all they have done—and, most especially, in their unstinting devotion to their adopted home.

The Greek couple's love affair with the United States is legendary. The generosity of Mr. Nick and Miss Mary in sharing of the manifold blessings they received from this country has been no less boundless and genuine.

Nick Mathews died Friday en route to Mississippi for the christening of the newest Navy ship bearing the Yorktown name. That his widow chose to go through with her role was expected, and proper. Their sponsorship of the vessel is an added tribute to the Mathews beneficence.

We mourn the passing of Nick Mathews for his blatant patriotism. His was a love of country that too many native-born Americans take for granted or, perhaps, consider passe. Those who come of immigrant parents possibly best can understand the force that drove Mr. Nick.

Only complete strangers, or utter recluses, can be ignorant of the contributions of Nick Mathews, in property, in money, in selfless time and energy that showed his gratitude for this nation's opportunities and freedoms.

Beyond those public deeds, though, there are the countless acts of spontaneous kindness. They are legion, the local residents, tourists, foreign visitors, persons down on their luck, caught up in emergencies or unexpectedly stranded or distressed, who have been helped or honored.

Anybody who has not known firsthand the generosity of Mr. and Mrs. Mathews undoubtedly can name a relative, a friend or a neighbor who has.

The Peninsula has many reminders of Nick Mathews, but today's Yorktown, which he helped make possible, may be in itself his greatest memorial—the heightened stature of the site of the deciding battle in this country's War of Independence, and the deeper national understanding of its meaning.

It is fitting legacy.

[From the Virginia Gazette, Apr. 20, 1983]

NICK MATHEWS

(By Carolyn Click)

It was perhaps most fitting that, if Nick Mathews had to die, he would leave this Earth enroute to one of those great patriotic events he loved so well.

If he had completed the trip to Pascagoula, Miss., no doubt he would have looked on proudly as his wife Mary participated in christening ceremonies of the USS Yorktown. One could almost picture him, standing ramrod straight, his great heart bursting with patriotism as the flag of his adopted country was hoisted high and the strains of the national anthem filled the air.

No one need recount the kind of love and respect Nick Mathews held for America and his adopted countrymen. Arriving on these shores from his native Greece, he worked and struggled at a host of jobs because he believed that the American system would work if one were diligent and earnest and enterprising enough.

His efforts paid off, probably beyond his wildest imaginings, as he saw a small lunch counter business flourish into one of the most profitable and energetic enterprises on the East Coast. His was a true American success story, the stuff of which dreams are made.

Others would look on the Greek immigrant as a self-made man, but he was not content with that title because he believed the United States had contributed as much to his prosperity as his own hard work. Always looking to the future, Nick, along with Mary, tried to return a portion of their good fortune to the people they believed had helped them the most.

The Yorktown Victory Center, situated on one of the most scenic and valuable pieces of land in Yorktown, is perhaps the most visible symbol of the spirit of Nick Mathews. In its integrity, it represents the kind of feeling both he and Mary held for their country and their state. It would be hard to imagine a Yorktown without Nick Mathews, still harder to picture a Bicentennial celebration without his ebullient and inspiring presence.

But friends and acquaintances will also remember the small gestures of friendship, the warmth expressed in gifts of baklava, of silver coins, of complimentary meals. His was a spontaneous heart-stirring kind of giving, the kind not to be refused because of its sincerity.

President Kennedy once said, "We dare not forget that we are the heirs of that first revolution." Nick Mathews never forgot, and because of his unyielding faith in the ideals perpetuated 200 years ago and won on a bloody battlefield at Yorktown, others will be able to remember.

Nick's familiar, gentle presence will be missed, but he has ensured that his legacy lives on.

[From the Ledger-Star, Apr. 19, 1983]

YORKTOWN BENEFACTOR—MR. NICK'S GRATITUDE

Nick Mathews died last week as he for so long had lived, devoting his time, energy and wealth to the honor of Yorktown.

He was flying with his wife, Mary from Virginia to Mississippi to take part in the launching of the guided-missile cruiser USS *Yorktown*, when his heart gave out. It is a testament to the Mathewses' commitment to Yorktown that Mrs. Mathews insisted on going ahead with the christening of the ship in honor of her husband even in that hour of sorrow.

And this was not surprising to those who knew them.

It is easy to describe Nick Mathews and his wife and their dream as a classic American success story, of immigrants landing on these shores who by sheer grit and hard work acquired material wealth and, yet, never forgot that this was possible because of the opportunities available to them which would not be found in other lands.

Their itinerary as immigrant restaurateurs took the couple to Chicago, Brooklyn, Richmond and Williamsburg over a 24-year period before they arrived in Yorktown in September of 1944. What they found on the shores of the York River was a quaint, rundown village crouched below the Yorktown Battlefield, as unprepossessing as the scattered ruins of a minor temple in their native Greek islands.

But in Yorktown, with their seafood restaurant as a base of operations, "Mr. Nick" and his wife and their many relatives did more than attract customers from all over Virginia and the East Coast. They became the unofficial conscience of Yorktown, hectoring all of those who would listen to the need to restore, safeguard and protect the Town of York as a symbol of American liberty.

Mr. Mathews did more than talk: Impatient with the endless mumbling of county bureaucrats, he often shelled out his own money for the Yorktown cause: When the county threatened to turn off the town's streetlights, Mr. Nick wrote a check to Vepco for the unpaid light bill; Mary Mathews came up with $700 for a surveyor's fee when county and town disputed whether there was enough land in the town for a courthouse expansion; when the Mathewses learned that neighboring Newport News had offered public land for the Yorktown Victory Center, they offered the state at no cost a site they owned, valued at $500,000, keeping the facility where it belonged—in Yorktown.

One night in 1973 when the county administrator was threatening to cut off the Yorktown streetlights, Mr. Nick sat at a table in his restaurant, denouncing the affair as an affront not only to the villagers themselves, but to the American people as well. He turned to a reporter and apologized for his heavily accented English, then sighed. "I wish so bad that I could speak better."

In Yorktown, where the street lights never went out, where the Victory Center stands as a living memorial to history's turn on the fields above the river, where the seafood is always plentiful, Mr. Nick will always be remembered as an American who spoke with a clarity few can rival.

[From the Hellenic Chronicle, May 12, 1983]

FULL MILITARY HONORS FOR NICK MATHEWS

NEWPORT NEWS, VA.—Thousands attended the funeral of Nick Mathews, 82, restaurateur, who died enroute to Pascagoula, Miss., where his wife was to christen the Cruiser *Yorktown*.

Mrs. Mathews, the former Maria Papamihalopoulou, native of Sparta, went through with the scheduled christening despite her sadness, feeling that this was what her husband would have wanted.

The couple had been instrumental in the development of historic areas of Yorktown, Va., where they had settled in 1944 following their marriage and where they had established their successful Nick's Famous Seafood Pavilion.

A number of priests, led by Bishop Athenagoras of Dorylaion, assistant to Archbishop Iakovos, officiated at the services in Sts. Constantine and Helen Church. Attending were Gov. Charles Robb, who had declared the day one of mourning with flags at half staff; former Governors John N. Dalton and Mills E. Goodwin Jr., Attorney General Balilies and former Attorney General Marshall Coleman as well as Sen. Hunter B. Andrews of the Jamestown-Yorktown foundation, as well as military leaders of each branch of the service.

Governor Robb had ordered a state funeral for Mr. Mathews and eulogized him for his outstanding patriotic and civil contribitions to the state of Virginia. The Department of Defense authorized a military funeral for Mr. Mathews. Capt. John F. Fox, USN, Naval Weapons Station, Yorktown, was officer in charge of the military ar-

rangements for the funeral. AF Major Duncan was the protocol officer. A. Jack Georgalis coordinated the church services and the program, including seating arrangements, and James Krikales represented Mrs. Mathews.

Trustees of the church were ushers, and there were 10 pall bearers and 40 honorary pall bearers.

Assisting Bishop Athenagoras were the Rev. Theodore Chelpon of St. Katherine's, Falls Church; the Rev. Charles Goumenis, Lowell native, and the Rev. Savas Constantinou of Annunciation, Norfolk; the Rev. George Paulson, former naval chaplain, of St. Nicholas, Virginia Beach; the Rev. Constantine N. Dombalis, Sts. Constantine and Helen, Richmond; the Rev. Spiro Kehayes of St. Elpis, Hopewell, and the Rev. Peter Markris of Sts. Constantine and Helen, Newport News.

Eulogies were given by Governor Dalton, John Anderson, president of Christopher Newport College; Bishop Athenagoras and Father Makris. The Marine Guard presented the flag to Mrs. Mathews, the same banner hoisted and flown on the USS *Yorktown* the day that Mrs. Mathews had christened the ship.

The body was escorted by Captain Fox and Father Makris on a plane provided by the Navy in Pascagoula.

It was noteworthy that Mr. Mathews, who never served in any branch of the service, received full military honors, and his body is lying in the historical grounds of Yorktown Victory Center, at the order of Governor Robb.

Besides the York Town Crier, papers honoring him with editorials including the Newport News Daily Presss, the Times Herald. Stories of his unexpected death were carried by the Richmond Times-Dispatch, the York Daily Press, the Times-Herald, the Daily Press, the Virginia Pilot, the Mississippi Press and the Washington Post.

[From the Daily Press, Apr. 16, 1983]

"MR. NICK" KNOWN FOR PATRIOTISM, GIVING

YORK.—Nick Mathews, who loved his adopted country so much that he pledged more support to community projects than many American natives, died Thursday just two days before participating in yet another project dear to his heart: the christening of the USS *Yorktown* in Pascagoula, Miss.

His wife, Mary, had been designated sponsor of the vessel.

The civic work of Mathews included involvement in everything from Little League to the Bicentennial celebration at Yorktown in 1981.

"I am very much bereaved at the passing of a dear friend," said Sen. John Warner, R-Va., on learning of Mathews' death.

Warner first met Mathews in 1969 when he came to Yorktown as undersecretary of the Navy.

"I've stood beside Nick during dozens of ceremonies and he must have listened to at least 20 of my speeches," Warner recalled.

"The thing I remember best were the long talks we used to have about the meaning of freedom and particularly about what this country means to people who immigrate from countries that have had occasional lapses in personal freedom.

"Nick was a true American and his actions and service to the community will be missed," Warner said.

"The contributions of Nick and Mary Mathews to the Bicentennial were well known," said York County Administrator John M. Richardson, referring to the couple's donation of land for construction of the Yorktown Victory Center.

"Nick's civic work, however, went far beyond what was done during the Bicentennial," Richardson said.

Jim Rollings, director of the Yorktown Victory Center, said the death of Mathews would be a great personal loss.

"The contributions to the Victory Center by Nick by no means stopped with the giving of the 23 acres," Rollings said. "We at the center always knew that we could count on Nick."

Jack Georgalas, president of Tri-City Beverage in Newport News and a close friend of Mathews, described him as a patriot.

"Nick was certainly one of a kind, and there were so many things that man did that will never be known to the public.

"If Nick Mathews were alive during the Revolution, he would have probably been among the people to have signed the Declaration of Independence," Georgalas said. "He will be sadly missed by all of us who loved him."

Mathews came to the United States at the age of 17 in 1920 and settled in Yorktown in 1935.

In 1944, he and his wife founded Nick's Seafood Pavilion overlooking the Yorktown beach.

The couple are known as the people who kept Yorktown lighted. When the street lights in Yorktown were cut off some years ago over an electricity bill dispute, it was the Mathewses who stepped in and paid the bill.

The couple also gave property for the Yorktown Historical Shipwreck Museum, actively supported the Waterfront Historical Restoration and helped to make possible the Fort Eustis Transportation Museum.

The couple built a hospital in their native Greece.

Three presidents have cited the couple for their national service and work in historical organizations. In 1980, Mathews and his wife were bestowed honorary degrees by Christopher Newport College.

Mathews was born at Arcasa on the island of Karpathos in Greece. He migrated to this country in 1920, working at a number of jobs: coal miner in West Virginia, a rent collector in Brooklyn and a chef in Milwaukee.

He settled in Yorktown in 1935 and married Mary Papamilhalopoulou in 1942.

Mathews, who was born Nick Mapheos, was always proud that he had "entertained kings, queens, generals, ambassadors and secretaries of state."

The last time he visited Greece was in 1957 when his mother was still alive.

"So much of Europe has got to have dictatorships to keep the communists under control," he said a few years ago. "I don't like to talk about it. I like to talk about things I can control—my business, people, friends."

President Dwight Eisenhower cited him for service to the American Red Cross, and President Gerald Ford named him director of Bicentennial Commission, Yorktown, 1976-1981. The Republic of France sent letters of appreciation for his work in recognizing French-American historical contributions during the Revolutionary War.

York Supervisor Tabb H. Smith said Mathews was "one of the true patriots of York County."

"What I remember most, though was not his giving, but his giving smile," Smith said. "It was the way he gave. He always had a smile for you."

Supervisor Rodgers A. Smith said Mathews was one of the most patriotic and generous people he ever met.

"He'll be sorely missed," he said. "He just loved all people, big and small. He loved to talk to the little people and the greats. He had compassion for the common people and felt at ease with the famous. He could relate to all."

Supervisor Benjamin M. Rush, Jr. said the wheels have been set into motion toward honoring Mathews.

"I went to Mr. (John M.) Richardson's office this morning to see what we could do. We're contemplating several things, but would not want to go into detail until we get the consensus of the whole board. This does require something more than the ordinary resolution," he said.

"Personally, I feel like we will never be able to do as much for him as he did for us," Rush said.

He visited Nick's Seafood Pavilion Friday morning.

"Nick's death has really hit them hard. His employees felt very close to him and Mary.

"You know, some of them were former army officers in Southeast Asia. The Mathews sponsored them and gave them jobs—saved them from sure death," Rush said.

The maitre d', Doug Van Khuyen, is a former three-star general and chief of staff of the Army of the Republic of Vietnam. He was given a job by the Mathews' in 1975 after fleeing Saigon in one of the last American helicopters to leave that beleaguered city before it fell to the communists.

Paul Crockett, a manager of the Duke of York Motel not far from the restaurant, said Mathews often stayed in the background while his wife Mary promoted the American ideals of freedom and patriotism.

"He was always ready to step in and help," said Crockett, who also serves as chairman of the Yorktown Trustees.

Board of Supervisors Chairman E. S. "Buck" Bingley, Jr. and Supervisor Jake Zalumas had traveled to New Orleans en route to the christening.

After hearing of Mathews' death, Bingley visited Mrs. Mathews.

"She's holding up very, very well—unbelievably well," he said.

Bingley, who hunted with Mathews, said, "You certainly have to have a great deal of respect for someone who has been able to accomplish what he has done," he said.

Zalumas siad, "I will always remember his smile and great sense of patriotism."

[From the Daily Press, May 18, 1983]

NICK MATHEWS LEFT BELOVED YORKTOWN WITH CITIZENS' LOVE

(By Parke S. Rouse)

WILLIAMSBURG.—A lot of people have written about Nick Mathews since he died in April on his way with his wife to christen the USS Yorktown at Pascagoula, Miss. I was away at that time, so I'd like to say a few words about that remarkable man.

I met Nick Mathews in the 1950s in Richmond, and I soon learned he was the most generous man I'd ever met. When I met him I was eating a solitary lunch at the old William Byrd Hotel coffee shop, on my way to the state capitol. When I asked for my bill, the waiter said, "It's already paid." and pointed to Nick Mathews across the room.

I'd seen Nick once or twice in the Yorktown restaurant he and his wife had started in 1944, but I'd never met him. I thanked him for my lunch, but he just laughed and brushed my thanks aside.

I knew him better by the 1970s, when he and Miss Mary, his wife came to a meeting

of the Bicentennial Commission at the capitol to talk about a site for the Yorktown Victory Center. The commission was considering building a bicentennial center a mile or so inland from Yorktown, on land to be given by Newport News from its waterworks tract.

Nick and Mary had already protested that possibility. When she rose to speak, her eyes were flashing indignation. I expected an outburst that would make embarrassing newspaper headlines.

Instead, Miss Mary (as Nick called her) offered the state a 21-acre tract at Yorktown, close to the York, for a permanent museum site. Nick beamed happily. He liked for his wife to do the talking.

All that is history. The Bicentennial Commission accepted the gift and built the Victory Center. It remains today as a museum. Nick and Mary could have sold that land for $500,000 or more, but they preferred to show their love for Yorktown and especially for their adopted nation. That love was their consuming motive in their latter years.

I got to know Nick and Mary well in the 1970s, and they helped me and Yorktown in many ways. They entertained many official guests at their Seafood Pavilion, always refusing payment. They sent box lunches to work crews, befriended countless bicentennial bicyclists and hikers, paid to keep street lights going on Yorktown's waterfront, and sent bunches of red roses to every bicentennial event in Yorktown from 1976 through 1981.

Red roses became their insignia. Whenever I saw a bunch on a Yorktown stage, I knew Nick and Mary had struck again.

As well as I knew Nick, I could never persuade him to let me interview him for the Daily Press. Over the years, he told me many stories about his youth in Karpathos, Greece, and his career. But not for publication. He and his wife preferred that part of their lives to be private. Recently they built a modern house on Yorktown's heights, above their restaurant, but they asked few guests there. They needed a place to relax.

I know that Nick was born about 1901, left Greece for New York in 1920 and worked as a coal miner and chef before coming to Yorktown in 1944. "I want to be American citizen," he said then, "so what better place to live than here, where independence was won".

He and his wife, the former Maria Pappamihalopoulou of Sparta, opened a lunch counter in 1944 near what was then the Yorktown-Gloucester ferry dock. It became famous for Greek salad, pastries, and seafood. Today it's a 450-seat restaurant that serves over 1,000 meals daily from 11 a.m. till 10 p.m. After closing each night, Nick and Mary would sit down and relax with their hard-working staff. They love the human race.

The couple bought property in and around Yorktown, giving much of it away for civic purposes. After all, they had no children. They gave also to the Greek Orthodox church, to civic and charitable causes, and to friends and hard-up acquaintances. In 1981 they created a $180,000 granite and marble monument on Yorktown's Water Street to honor Washington, Rochambeau, and other Yorktown victors.

Mister Nick had a great sense of humor but avoided public speaking because of his accent. He loved to tell stories of his early years. He remembered his father's indignation when a Greek returned to Karpathos with little to show for his years in America. "When he opened his trunk there was nothing," Nick recalled. "If a rat had fallen in that trunk, he'd have broken his nose." Then Nick recalled his father's words, "If you can't come home rich, don't come home at all."

And now Nick has gone home—rich in the best sense of the word. He is rich in the love of his fellow men and in the memory of those of us who come after him. What better does life offer?

[From the Richmond Times-Dispatch, Apr. 16, 1983]

NICHOLAS MATHEWS, RESTAURATEUR, DIES

YORKTOWN.—Nicholas Minas Mathews, a Greek immigrant who loved Virginia and the United States and was noted for his patriotic philanthropy, died Thursday near Mobile, Ala. He was about 82.

Gov. Charles S. Robb yesterday ordered flags at the Yorktown Victory Center flown at half-staff in honor of Mr. Mathews, a prominent Peninsula restaurateur.

Mr. Mathews and his wife, Mary, were en route to Pascagoula, Miss., where she was scheduled to christen the Navy cruiser Yorktown today. He apparently suffered a heart attack on board a Navy A-3 plane and died shortly after the plane landed at a Coast Guard training center at Bates Field near Mobile.

According to a spokesman for Ingalls Shipbuilding in Pascagoula, the christening program will continue as scheduled, and Mrs. Mathews has indicated she intends to christen the vessel.

Using borrowed money, Mr. Mathews and his wife opened a lunch counter in Yorktown across from the ferry landing in 1944. The business grew from 35 seats in a 450-seat restaurant—Nick's Seafood Pavilion—and built a national reputation on good food, good service and good prices. His seafood platter was the restaurant's most famous dish.

Mr. Mathews' years of philanthropy and patriotism became known throughout Virginia in 1972 when he donated to the state 23 acres outside Yorktown. It became the site of the Yorktown Victory Center, a state shrine to the Revolutionary War battle.

Mr. Mathews became concerned that the facility designed to explain to the nation the role of Yorktown was going to be constructed in Newport News, rather than at the battlefield. So he made the property available with only one condition—that the center always pertain to history.

A bronze plaque in the Victory Center reads: "This bicentennial memorial honoring the victory at Yorktown is offered as a lasting symbol of patriotism and gratitude [by] Drs. Nicholas and Mary Mathews. To You from failing hands we pass the torch. Be it yours and hold it high."

He was cited by three U.S. presidents—Dwight D. Eisenhower, Gerald R. Ford and Ronald Reagan—for patriotic work, and by a half-dozen governors of Virginia for his service to the state.

His financial gifts helped make possible many activities throughout the Peninsula. He paid Yorktown's electric bill several years ago when the town did not have the money. and his civic work ranged from helping Little League baseball to the national bicentennial in 1981.

The Mathewses gave property for the Yorktown Historical Shipwreck Museum, actively supported the Yorktown Waterfront Restoration and financially supported drives to establish the Fort Eustis Transportation Museum. They also built their own bicentennial monument across the street from their restaurant.

In 1980, Nick and Mary Mathews received honorary doctorates from Christopher Newport College in recognition of their service to community, state and nation. Mr. Mathews also built a hospital in his native Greece.

Born at Arcasa on the island of Karpathos, Mr. Mathews immigrated to the United States in 1920 and worked in a number of jobs—as a chef in Milwaukee, a rent collector in Brooklyn and a coal miner in West Virginia. He also opened restaurants in Chicago and New York City, before settling in Yorktown in 1935.

He married Mary Papamilhalopoulou in 1942 in New York and opened the Yorktown restaurant two years later.

Mr. Mathews was a member of Sts. Constantine and Helen Greek Orthodox Church in Newport News.

Father C.N. Dombalis, dean of the Greek Orthodox Cathedral of Virginia in Richmond, said that "with the passing of Nick Mathews, his wife, the church and America morn, for in Nick we found the noblest and truest expressions of ancient Greece practiced in his adopted land, America.

"We salute this Virginian of Greek ancestry. His thousands of friends will miss his warmth and compassionate heart. May his good deeds and memory be eternal."

His body is expected to be flown back to Virginia late today. Funeral arrangements were incomplete last night.

NICK MATHEWS DIES; DONATED YORKTOWN LAND

(By Ken Ringle)

Nick Mathews, an ebullient Greek-born restaurateur whose love for America led him to prosperity in Yorktown, Va., and a major role in the nation's Bicentennial Celebration there two years ago, died April 14 of a heart attack. He was 82.

A native of the isle of Karpathos, Dr. Mathews immigrated to New York in 1920 and spent his first years after arrival working as a coal miner and chef before settling in the sleepy historic town of Yorktown in 1944.

"I want to be American citizen," he told an interviewer later, "so what better place to live than here where independence is won?"

With borrowed money, he and his wife, the former Maria Pappamihalopoulou of Sparta, opened a lunch counter across from a ferry landing on the York River.

As nearby Williamsburg blossomed in the postwar years under the impact of Rockefeller-funded restoration, the lunch counter evolved into Nick's Famous Seafood Pavillion, now a 450-seat dining mecca festooned with fountains, Nubian statues and such specialties as lobster Dien Bien Phu.

Tourists lined up by the hundreds to get in, and Dr. Mathews, who often appeared embarrassed by his success, showered them with apologies, complimentary dishes and sometimes entire free meals.

As the restaurant grew, Dr. Mathews used its profits to buy property within the crowded limits of Yorktown and in the rural surrounding counties. One 25-acre parcel adjoined the battlefield where Cornwallis surrendered, and Dr. Mathews looked forward with anticipation to the American bicentennial.

"In 1981," he used to say repeatedly, "Yorktown going to be the eye ball of the world."

What he and his wife had in mind, however, was not cashing in on the bicentennial but helping to pay for it, in gratitude for what America had given them.

When he found that politicians and developers in adjoining Newport News were talking of engineering the occasion for profit, he went before the General Assembly in Richmond, pleading near tears with dumbfounded legislators to be allowed to donate his 25 acres—worth an estimated $500,000—for the Yorktown Victory Center.

But there would be a string attached, he said. The center to be built there could have no souvenir shops or other commercial features: it was to be a shrine to the American Revolution.

When the gift was finally accepted, officials of nearby Christopher Newport College awarded the couple honorary doctorates. Dr. Mathews, who never finished high school, was so proud he used the title Doctor whenever he could.

Today a bronze plaque at the victory center reads: "This bicentennial memorial honoring the victory at Yorktown is offered as a lasting symbol of patriotism and gratitude by Drs. Nicholas and Mary Mathews. To you from failing hands we pass the torch. Be it yours and hold it high."

In addition to the land for the victory center, Dr. Mathews had earlier donated $180,000 for a victory monument on the Yorktown waterfront, and when Dr. Mathews died, he was still at it; en route by plane to Pascagoula, Miss., where his wife had been chosen by the Navy to christen a new cruiser—the USS Yorktown.

[From the Times-Herald, Apr. 15, 1983]

MEMORIES OF SERVICE SURVIVE NICK MATHEWS

YORK.—Nick Mathews of Yorktown—a man who loved his adopted country so much that he pledged more support to community projects than did many American natives—died Thursday just two days before participating in yet another project dear to his heart—the christening of the USS Yorktown in Pascagoula, Miss.

His wife, Mary, had been designated sponsor of the vessel.

The civic work of Mathews included involvement in everything from Little League to the Bicentennial celebration at Yorktown in 1981.

"The contributions of Nick and Mary Mathews to the Bicentennial were well known," said York County Administrator John M. Richardson, referring to the couple's donation of land for construction of the Yorktown Victory Center.

"Nick's civic work, however, went far beyond what was done during the Bicentennial," Richardson said.

Jim Rawlings, director of the Yorktown Victory Center, said the death of Mathews would be a great personal loss.

"The contributions to the Victory Center by Nick by no means stopped with the giving of the 23 acres," Rawlings said.

"We at the center always knew that we could count on Nick."

Jack Georgalas, president of Tri-City Beverage in Newport News and a close friend of Mathews, described him as a true patriot who loved this country.

"Nick was certainly one of a kind, and there were so many things that man did that will never be known to the public," Georgalas said.

"If Nick Mathews were alive during the Revolution, he would have probably been among the people to have signed the Declaration of Independence," Georgalas said. "He will be sadly missed by all of us who loved him."

Mathews came to the United States at the age of 17 in 1920 and settled in Yorktown in 1935.

In 1944, he and his wife founded Nick's Seafood Pavilion overlooking the Yorktown beach.

The couple are known as the people who kept Yorktown lighted. When the street lights in Yorktown got cut off some years ago over an electric bill dispute, it was the Mathews who stepped in and paid the bill.

The couple also gave property for the Yorktown Historical Shipwreck Museum, actively supported the Waterfront Historical Restoration and helped to make possible the Fort Eustis Transportation Museum.

The couple also built a hospital in their native Greece.

Three presidents have cited the couple for their national service and work in historical organizations. In 1980, Mathews and his wife were bestowed honorary degrees by Christopher Newport College.

Mathews was born at Arcasa on the island of Karpathos in Greece. He migrated to this country in 1920, working at a number of jobs—coal miner in West Virginia, a rent collector in Brooklyn and a chef in Milwaukee.

He settled in Yorktown in 1935 and married Mary Papamilhalopoulou in 1942.

Mathews, who was born Nick Matheos, was always proud that he had "entertained kings, queens, generals, ambassadors and secretaries of state."

The last time he visited Greece was in 1957 when his mother was still alive.

"So much of Europe has got to have dictatorships to keep the communists under control," he said a few years ago. "I don't like to talk about it. I like to talk about things I can control—my business, people, friends."

President Dwight Eisenhower cited him for service to the American Red Cross, and President Gerald Ford named him director of Bicentennial Commission, Yorktown, 1976-1981. The Republic of France sent letters of appreciation for his work in recognizing French-American historical contributions during the Revolutionary War.

MODERN-DAY ST. NICHOLAS DIED AT THE SUMMIT OF A REMARKABLE LIFE

(By William Tangney)

"If you give me the pills and I feel all right or not," Nick Mathews told his doctor last week as Mary remembers, "I am going to Pascagoula. Make me all right if you can."

Nothing was going to stop him from boarding that special Navy jet, from starting his wife on the way to christen history's fifth U.S. warship bearing the gallant name Yorktown. They had been a partnership since their wedding day, and Nick knew Miss Mary wouldn't leave him.

For the sake of his own name-saint, St. Nicholas—patron of the seafarer in Greek tradition—he had to get his own "Fighting Lady" to the shipyard in Mississippi. There, waiting for its blessing from Miss Mary, was the guided-missile cruiser designed to protect a whole fleet into the 21st century against hundreds of simultaneous attacks.

He never considered postponing the trip. He and Mary were the ship's sponsors, and they would get there.

I didn't know Nick Mathews until the '70's, but he must have modeled his life after his namesake from the beginning.

In Greece, St. Nicholas is protector of children and sailors. When English colonists in America heard the Dutch say Sint Nikolaas, the English tongue produced "Santa Claus," and the saint added the principles of giving and of helping the poor to his repertoire.

Nick concentrated on those four things. With no children of his own, he made the need of all children for a heritage his special plea. He had a comradeship with all servicemen, but sailors were foremost, and he wore an officer's cap from the World War II aircraft carrier USS *Yorktown* (CV-10) on golfing outings. He and Mary sent their restaurant manager all over town in formal attire every Christmas Eve with an actual Santa's load of fine wines and Swiss chocolates. And they quietly helped any number of people without means.

Nick listed his birth date as Dec. 6, but that was actually his "name day," the birth date of St. Nicholas. That saint is modeled on the fourth century bishop of a place called Myra (now called Kale) in Turkey—but on the water's edge and facing the Greek island of Karpathos.

Karpathos is where Nick Mathews grew up, not 160 miles from St. Nicholas' town in Turkey. And through Mr. Nick's childhood the Turks were occupying his island. Nick must have heard a lot about St. Nicholas.

At noon Thursday doctors examined Mr. Nick, and they compared old and new cardiographs. The monitors didn't show that his life was in the balance. He and Miss Mary went on to Patrick Henry Airport and boarded the special seven-seat Navy VIP plane bound for the christening of Yorktown (CG-48).

Fifteen minutes before the landing near Mobile, Ala., Nick stood up, and the husband and wife reached for each other's hand. When Nick's hand didn't reach Mary's, she glanced up and saw that he was gone.

He died at the summit of his life, in action, without pain.

Miss Mary bravely christened the Yorktown. The Navy made an exception and flew an American flag at Yorktown's stern 15 months before she earns the USS in front of her name when commissioned, at Yorktown on July 4, 1984. She will fly the flag on behalf of Nick each year. The ship's "stern bar," the foremost blade of metal from the tip of her bow, is in Nick's casket.

In his right hand Mary has placed a 2x3-inch image that she bought at a dime store 40 years ago after they met. It's St. Nicholas.

FOR BETTER, FOR WORSE: A LOVE STORY ENDURES

(By Margaret Cubberly)

Nick Matheos' love for his adopted country, an outpouring of feeling that spilled over into his many acts of generosity, was documented in the news stories and obituaries that followed his death last week.

But there was another great love in "Mr. Nick's" life, one that could not be reported matter-of-factly. Anyone who had seen Nick and Mary together felt the strong bond of love, companionship and trust that existed between husband and wife.

Nick and Mary worked together 40 years, sharing the good times and the bad, joined in their patriotic and civic activities, enter-

taining with equal grace people from all walks of life.

The love story of Nick Matheos and Mary Papamilhalopoulou is not the kind that you'll find in the movies, where "love" has been distorted beyond recognition. It is a true love story.

When Nick was last hospitalized here with breathing problems, Mary stayed with him around the clock for two weeks, sleeping beside his bed in an armchair. Visitors to the hospital a few days before Nick's release saw Mary, her face lined with exhaustion, her clothes rumpled, watching anxiously over her husband.

When nurses came with a wheelchair to take him away for another in the endless series of tests he was undergoing, Mary eased him gently out of bed. She carefully combed his hair and helped him on with his robe, speaking softly in Greek. Nick's smile warmed the room.

Watching this man and woman—her tenderness, his courtliness—was a reminder that love is not just for the young. It transcends age. And, if you're lucky, like Nick and Mary, it can last forever.

● Mr. WHITEHURST. Mr. Speaker, I am pleased to join my colleague HERB BATEMAN in paying tribute to the memory of Nick Mathews. In all of my life I have never known a greater patriot.

When Nick Mathews planted his feet on our shores, he gave us his heart as well. As believers in the American dream of self-fulfillment, he and his wife Mary were the embodiment of the American success story. The restaurant that they established at Yorktown, Va., enjoys a reputation for excellence that extends beyond eastern Virginia. Countless travelers go out of their way in order to be able to dine at Nick's Seafood Pavilion.

What many of them do not realize, however, if they visit the Battlefield Park nearby, is that the land for the Victory Center there was donated by Nick and Mary Mathews. Thousands of visitors each year tour the Yorktown Battlefield site and the Victory Center, and their enjoyment and appreciation for what transpired two centuries ago is enhanced by the Mathews' gift.

Yet in so many other ways, too, Nick and Mary Mathews have been exemplary citizens. Some years ago, the town of Yorktown could not meet its public lighting obligation. Nick and Mary Mathews came to the rescue. If there is another example of private citizens paying a public utility bill, I am not aware of it, but it was typical of Nick and Mary.

As one who was privileged to be their friend, I constantly marveled at their concern and love for their adopted country. Nothing could have been more fitting than for Mary Mathews to be chosen as the sponsor of the new Navy vessel U.S.S. *Yorktown*. Appropriately, the Mathews were present for the Yorktown Bicentennial on October 19, 1981, when the great victory which led to our independence was commemorated. On that occasion, Mary Mathews and the President of the United States joined in authenticating the laying of the keel of the *Yorktown*.

Those of us in Virginia who came to know and love Nick and Mary Mathews recall the circumstances of Nick's death. He and Mary were on their way in a Navy plane to Mississippi for the launching of the *Yorktown*. While they were aloft, Nick's heart failed him, but true to her indomitable spirit, Mary Mathews fulfilled her mission, dedicating the *Yorktown* to the service of this country and to the memory of Nick Mathews.

Mr. Speaker, although Nick Mathews the man is gone, his spirit lives. His life should serve as an example to every American, whether native born or adopted. We in Virginia who have been blessed with so many illustrious native sons proudly include the name of Nick Mathews on the roll of great Virginians—and great Americans.●

□ 2010

GENERAL LEAVE

Mr. BATEMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the subject of my special order today on Dr. Nick Mathews.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

□ 2020

FAIR TRADE IN STEEL ACT OF 1983

The SPEAKER pro tempore (Mr. HARRISON). Under a previous order of the House, the gentleman from Pennsylvania (Mr. GAYDOS) is recognized for 60 minutes.

Mr. GAYDOS. Mr. Speaker, I want the record to show that for a better purpose there could not be that we were somewhat delayed this evening. We had presumed we would start special orders around 6 o'clock, but our good friend, Ray Roebuck, I believe, was a good reason why the delay did occur and I have no qualms that it did occur and I have no regrets.

I just want to, for the record, again to emphasize that this special order was authorized by the executive committee of the Congressional Steel Caucus to talk specifically and clearly on the record as to what is occuring in the steel industry, and also to explain somewhat in detail for the record what the Fair Trade in Steel Act of 1983 is or is intended to be.

GENERAL LEAVE

Mr. Speaker, I will ask at this time that all Members may have 5 legislative days to insert their remarks and introduce extraneous matter into the RECORD on this subject matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GAYDOS. Mr. Speaker, before I proceed any further, I want to yield to a member of the executive committee of the Steel Caucus, Mr. NICK RAHALL, the gentleman from West Virginia.

Mr. RAHALL. I thank the distinguished chairman of the Steel Caucus for yielding, and I want to commend him for taking this special order this evening, and the executive committee of the Steel Caucus for authorizing such special order.

Mr. Speaker, I am honored to join with my colleagues of the Steel Caucus in discussing the steel industry this evening, and this country's trade policy, and addressing the problems that face this industry. My district has several steel plants and a great deal of metallurgical coal, which is used in the steelmaking process. When the steel industry faces hard times, so does the metallurgical coal industry in southern West Virginia.

For the last several months we have heard the administration trumpet its prophecy that recovery is at hand. I say it is time for this administraton to visit the heartland of America and see first hand the so-called recovery. When I look around I find that 107,000 steelworkers still do not have a job and over 79,000 coal miners are still unemployed—a full 30 percent of the coal industry work force. How long will this administration hide behind the banner of free trade while thousands of hard working Americans are unemployed?

In my district there are four particular counties—Mercer, Wyoming, Raleigh, and McDowell—which produce the bulk of metallurgical coal. Unemployment figures in these counties at the current time is reminiscent of the Great Depression, are as follows: Mercer—13.8 percent, Wyoming—23.7 percent, Raleigh—14.3 percent, and McDowell—30.9 percent. In all of these counties, coal and its related industries are the source of income for a major portion the wage earners.

Unless there is a resurgence in our steelmaking capacity a great number of these unemployed coal miners, and others in West Virginia, will never be called back to work. I believe it to be encumbent upon our Government to review its trade policies and establish some priorities in order to alleviate these distressful situations.

I have several areas, Mr. Speaker, that I think should be addressed. I shall not go into detail at this moment, but just touch very lightly upon those areas.

First, our Government must address the problem of subsidization. For too

many years our Government, under the leadership of both parties, has moved very slowly to protect our steel industry from unfair competition. Our steel market is the only open market in the world. Yet those who preach the religion of free trade fail to mention that foreign markets are not open to American steel products. We must enact a trade law that prohibits in my opinion the importation of any product that receives a direct foreign government subsidy. Also, there should be a provision in our trade policy that prohibits a country from selling its steel products in the United States if its borders are closed to American products. Failure to take this action will further encourage foreign countries to export their unemployment to our shores and deprive our companies and reciprocal opportunity of competing overseas.

Along the same line, swift action must be taken against those U.S. firms which arrange business deals with foreign companies that receive a direct Government payment to keep the price of their commodities artificially low. The American worker can compete with anyone on an equal basis. However, when that worker must also compete against a coordinated effort by another country to take his job, the American often loses. We owe our workers the opportunity to compete on a fair and equal basis.

Just this past weekend I spoke to the Glass Protective League in Huntington, W. Va., and said to them that it is time that we get tough with our trading partners. They have gotten tough with us in the past, they are not afraid to take actions that protect their domestic economy, and I submit if what is needed in order to alleviate our current high unemployment situation in America, if it is called toughness with our trading partners, then it is time that we get tough and play hardball.

We must develop policies to further encourage investment in research and development in this country. This can be done through changes in our tax code and through the targeting of Federal research and development dollars. Congress can assist steel and many of our other basic industries by passing H.R. 3434, the Work Opportunities and Renewed Competition Act of 1983. This legislation allows unprofitable manufacturing companies to obtain a loan from the Government against their unused investment tax credits. Such a provision will enable the steel and coal industries, among others, to invest in new plant and equipment. This type of investment will enable our industries to update their facilities and compete more effectively with those foreign companies that receive direct government subsidies to lower the cost of their products.

Our lending policies to foreign governments must be reviewed. We now find that we have helped finance a worldwide overcapacity of steel production. In the future Congress must make sure that the assistance we lend overseas does not have the potential of putting Americans out of work.

I am very disturbed by the willingness of some of our Government agencies to purchase foreign commodities. Why does our Government have to spend American tax dollars on goods made overseas when they are available in the United States? Our Government must be the leader in buying American made products. How much money do we save if our workers lose their jobs as a result of such misguided policies?

Mr. Speaker and Chairman GAYDOS of the Steel Caucus, I think that the ultimate solution, despite what our recommendations may be here this evening and have been in this Congress, that the ultimate solution is going to depend upon the cooperative actions of labor, management and the Government to address the problem of subsidized imports. Working together we can devise a viable solution to this problem. We have the best workers in the world and we can make the best products in the world. We have the potential, we have the capability, we have the wherewithal and we have the desire as a nation to solve this problem and to meet it head-on.

Just as other nations have developed a coordinated government effort to penetrate our markets and displace American workers, all Americans must now work together for the survival of our basic industries.

I again commend Chairman GAYDOS and the Steel Caucus for this special order and lend my efforts in whatever way possible to meet the problem. I look forward to working with the Congressional Steel Caucus to revive our steel industry, because when the steel industry prospers, so does the metallurgical coal industry.

Mr. GAYDOS. I thank the gentleman from West Virginia (Mr. RAHALL) for his remarks, and I do want to say this for a matter of record, and I think it is proper to state for the record that he is one of the most active members on the executive committee.

I want the record to further show that we would have had and did have Members ready and willing to enter into a colloquy on the floor of the House in detail. I have all the statements of our colleagues which I will put in at the termination of the special order, but because of the schedule we are going to follow the formality and we will try to shorten it as much as we can.

Mr. Speaker, a turning point in the war in Vietnam came when an American officer was seen in the United States on a television program wherein a report was given explaining a military action. He said, "We had to destroy the village to save it." The reaction was immediate, the controversy was long, and the residue was bitter. Everybody knows what I am speaking of. It did not make sense to the people of this country.

Today we have a trade war, and unemployment is around 10 percent nationally. It still is somewhere around 15 and 20 percent in many of the industrialized areas that could be considered as Ground Zero. In steel, 107,000—and I want to emphasize that—107,000 breadwinners still are laid off. Capacity and utilization for the steel industry has been around 53.6 percent for the year to date. Last year was one of the worst on record. Capacity utilization a year ago was a little less than 53 percent.

We are led by men who say by deed we have to let this economy be destroyed before we save it. Family people know whereof I speak. We have to destroy this economy at the base to save the global economy and the world market, they say, and that is what they tell us.

But many manufactured goods in the world market amounts to little more than unrestrained access to the U.S. market for dumped and subsidized goods. Those who export here maintain barriers against imports from here, from our country to their country. This is true in steel today.

Among steel-producing nations, there is no open market save the United States, and there is nearly twice as much government ownership and coziness and intervention in all of the other countries of the world as there is here in this country under the free enterprise system.

"World Steel in 1980," and that is a book, a publication, is an excellent, far-seeing new book by our Father William T. Hogan from Fordham University, a respected steel economist and one who on many occasion has taken part intimately and completely in discussions on steel and what it means to the breadwinners in this country. Father Hogan has a renowned reputation.

Father Hogan compiles in his book the recent history of world steel and makes note of several things peculiar to this United States.

□ 2030

First he says in that publication:

> The United States is the only nation that cannot meet its domestic need for steel with domestic production ability. We have undercapacity in this country in a world where there is overcapacity for steel.

Second, he makes note in his book that it is the only market, this market of ours, in the world in which foreign producers are granted sufficient standing to refer to their definite "share" of the American market. It is a thing

taken internationally for granted by them and by our Government too many times.

And last in the book, Father Hogan says:

This country is the objective of virtually every steel producing country in the world. It is open where others are not. They design their steel capacity with exports to this country in mind. This is the largest and most lucrative market in the world.

Another of Father Hogan's findings is that approximately 60 percent of the world's steel industry today is government owned or heavily subsidized. This percentage will increase in the years immediately ahead to at least 70 percent, if not more, he goes on to say:

There can only be one result when policy pits private companies against the deep pockets of foreign governments, as it does in steel and in goods made by steel in the world today. The result is destruction of the unsubsidized which must surely profit, as in this country, or die. By their policies, our leaders have said for years we have to destroy this economy and the lives of our industrial workers to preserve this state of cutthroat international competition. Steel production generally involves only the United States, Europe, and certain limited developing nations.

Now, there are recent findings about the United States that are worthy at this time to note. For example, the American steel industry in 1981 got the same production out of 129 furnaces that it got from 263 furnaces in 1960. This is according to a recent study of the Congressional Research Service. This is a dramatic increase in efficiency for an industry that critics worldwide score for being backward, being behind the times, and lack of capitalization.

Yes, that might have been true, but things are changing here; that to again refer to the Congressional Research Service, they found the industry has been replacing old technology and has tried and has been successful to meet the challenges of foreign competition.

By the way, this improvement came in years when viscous price discounting all but prohibited the kind of profit that would have tracked domestic investment here in this country. Subsidies internationally of up to 40 percent and dumping margins of more than 30 percent were found in foreign steel during this period of time.

In addition, Father Hogan goes on and has determined in his publication that 70 to 75 percent of America's equipment for basic production and finishing is modern and is fully competitive internationally. This is on a plant-by-plant basis and comparison.

So this is not in this country, as so often has been said, a steel industry that has not been trying and not been modernizing and not been capitalizing.

It continues and we are continuing to try. Individual companies are going to extraordinary lengths to gather capital. Even if you do not like some of these deals that are trying to be made, you have to admit that the American businessman is again showing some Yankee ingenuity.

Strange things are happening in the current continuing fight against the latest binge of foreign subsidies and foreign dumping here in our country and in our markets.

For example, Bethlehem Steel last quarter sold more steel than in the corresponding quarter of a year ago. It also made 16 percent less money on that steel.

This illustrates the kind of cutthroat pricing that unrestrained foreign subsidy and dumping bring to the market. Overseas Business Doctrine calls it "excessive international competition" and roundly condemns it.

Bethlehem Steel lost almost $93 million last quarter. It plans to close about 20 percent—I repeat, 20 percent of its production capacity; yet this company is still hopefully striving to modernize.

Meanwhile, what some see as a quickening of the pulse in the economic recovery in this country is nothing more than a heart murmur in the basic industries and particularly in steel. Imports continue to take around 20 percent of the market in steel in this country. The figure is down from around 25 percent last year, but it still is at a rate that provides no stability and that provides nothing but chaos internationally and cannibalism.

Things are a little different in Europe. In preparing these special orders, I scanned with my staff my file of clippings from the Wall Street Journal on matters relating to steel where the following developments were news items in the first 6 months of the year.

Flash: British Steel which had combined operating losses of $111 billion in the last 2 years expected to receive additional Government subsidies at home of $497 million this year.

Flash: The Government of Spain decided to put $4 billion into three of its six steel operations.

Another flash: A study recommended that the Government of Belgium put another $2 billion into the operations of the Cockerill-Sambre Steel Co.

Again, the Socialist Government of France unveiled a massive investment strategy for industry which includes $935 million, almost a billion dollars more for steel.

There is an overcapacity existing today of making steel in foreign countries throughout the world.

Father Hogan, in his publication goes on and he sums up the trends in the history these things represent. He says:

Between 1975 and 1983, less than a 10-year period, the governments of Europe have put $30 billion in subsidies into their steel industries.

That is his estimate.

Mr. Speaker, $30 billion is more than a ton of money if you weigh it. A ton of money, for those of us here and throughout the Nation that are not familiar with these large amounts and sums of money. That is the equivalent of 30.6 tons of money.

If I have accurately worked out the conversion scale recommended to me by our Bureau of Engraving, mind you, 30.6 tons of money. Furthermore, it is 30.6 tons of $1,000 dollar bills, which even this country does not print anymore. That gives you a concept of the enormity, the enormous amount of money. It is about half of what our 75 percent modern industry needs to invest in our own country in the next 10 years in order to compete internationally.

The experts say that $60 billion is needed to best and to compete with the waves of dumped and subsidized goods coming into this country.

Father Hogan noted that most countries of the European Community have built steelmaking capacity well beyond their own domestic needs and they must export.

For the rest of the 1980's, he continued, the European communities will continue to export significant tonnages with the United States as its principal objective or market.

World Steel in the 1980's contains a telling line on European exports. It says, "The chairman of one of the large European steel companies, when asked why he was so adamant about shipping steel to the United States at a loss of $50 to $70 a ton said his prime worry was unemployment at home in Europe, which was in effect being exported to the United States."

Now, European governments have fallen because of unpopular domestic steel policies. That is admitted; so it looks like it will save the European portion of the world and their market, but they are going to destroy our economy and be allowed to dump and subsidize goods into our country and into our markets.

At present, the European steel trade with the United States is under an existing agreement. They sought it after their producers were found to be in massive violation of the trade laws last year, and that is a matter of record. This might indicate the situation is under control, this so-called agreement, but history indicates this kind of control is at best temporary.

□ 2040

In fact, it may be holding up only because worldwide demand is low throughout the world today.

American industry executives tell me that there is some demand in one segment of the market. It is the category

of oil country and tubular goods. They said European products will reach or exceed the agreed upon limits in that agreement this fall, if not sooner. That is at current rates of their export of these types of equipment and items into this country.

The way they treat this one category may say more about their attitude toward the overall existing agreement than anything they may say in person or in the news or in conferences. And what they are saying is not all that encouraging to those that are sensitive to this important area.

The specialty steel trade just went under administrative quotas after a proceeding under our trade law and in accordance with international agreements. The quotas were less than they should have been, as thought of in some circles, and of shorter duration than allowable under the existing trade law.

It was a lukewarm effort to offset the effects of international subsidies and dumping that is occurring in our international trade.

It recently drew the following denunciation by Sir Roy Denman, the European Community's headman here in our country. He said, "Subsidies in general are not forbidden in GATT, nor is dumping."

GATT is the General Agreement on Tariffs and Trades, the international agreement, and he wrote this in a publication in a letter from Europe and he said, "Serious injury was not shown," and he blamed the surges of exports or imports into this country and subsidized goods, and blamed that on the strong American dollar.

He did not note, however, that there is a surge in goods every time Europe's economy slows down. It is called countercyclical export. It lets them keep their mills running and their unemployment down, but not ours, and it can happen whatever the state of the dollar internationally.

Meanwhile in Europe where subsidies can run up to 40 percent they are more respectful of the world market as such, per se; faced with imports they do not want, they simply slap on quotas and they do not allow our products to enter.

According to Father Hogan in his book, he says the European economic community restrictions placed on imports involve quotas controlling the amount of steel that each country can export to the EEC as well as what prices must be charged. These are negotiated individually with each country. That is how the European communities do it. They are not like us where we try to adhere to international agreements. They do what they want to do and what is best and what is most expedient for them.

They export unemployment to this country. My colleagues on this floor do not want and have no desire, or maybe they do not have the understanding to get behind legislation and force a change if the executive does not want to make the change, and the executive in this country—when I talk about the executive I am talking about the President and the Secretary, all Secretaries directly and indirectly involved—they have the power under existing trade laws to keep these unfair imports out of this country and preserve that American job.

Let me emphasize the European practice has been to control quantities and price of imports, and this is historical, and this is a matter of fact. This is not me speaking. Controlling the price keeps their subsidies domestically from going higher, but they keep subsidizing.

The Europeans and the Japanese have operated for a number of years under mutual, formal understandings internationally in trade. They agreed, and this is a matter of record, to respect one another's markets in steel throughout the whole world, and they split up the rest of the world market. They said, "Here, Japan, you go here, you have those markets, and we are not going to compete with you." And the European communities, the Japanese said, "Here, those are yours. Here is the line of demarcation. You ship over there and we are not going to bother you."

This is intrigue. This is wrong. It is fundamentally wrong. It is wrong on international agreements and it is wrong under GATT, the General Agreement on Tariffs and Trade. It is wrong fundamentally to do that.

This is a matter of record and they did not deny it. All of this was called into question under U.S. trade law last year as a matter of record, and the Special Trade Representative to the United States—there was an adequate demonstration of the existence of a bilateral, international agreement to restrain steel exports, and that was made between the Government of Japan and the European communities, which as the Government publication went on, the agency said it is inconsistent with the General Agreement on Tariffs and Trade.

Secret agreements. I remember secret agreements made in this country when we had an ambassador of ambassador status in Washington while the Japanese fleet was on its way to Pearl Harbor. Are we going to have a repeat of the same thing?

We have the same philosophy involved. Will we say anything?

Do you think the Japanese as a nation have smarter people than we have?

What about the case recently where they were fined and they paid $10 million to cover the case up and we discovered them stealing, stealing American secrets? What kind of people are they? What kind of government would sanction that?

There were international recriminations, international statements made by the Premier of Japan all the way up from the top to the bottom. That is wrong. But they covered it up and they paid $10 million in fines.

And I remember the television case, $500 million was assessed against the Japanese because they were doing improper things on international trade agreements as far as dumping television sets in this country. This is a matter of fact, and the fine was levied against the Japanese because of international trade agreement negotiations and junk like that, for want of a better descriptive term, junk like that, and they agreed to take some paltry $10 million settlement of some sort.

It stinks. It stinks as a matter of record. And that is exactly what has been happening.

I can give you illustration after illustration of what is happening internationally. I would want the whole Nation to see it because there is no basic and fundamental insincerity with our trading partners. We practice fair trade and free trade.

But every other country under the Sun, including the Japanese and the European communities, always have excuses, formal excuses in international negotiations of why they are excluding products made in this country from their country. They have the 100 list which says you do not bring into this country meat in certain quantities from the United States, or fruits into Japan. And they answer you in international programs, in international discussions, the Japanese and the European communities, and they all say, "Well, we buy from you this and we buy from you that." But it is always in the agricultural field where it is not labor intense or where one man driving a picker or a tractor can produce enough to feed thousands of people in our modern farming methods.

No, they send to this country items as big as this pair of glasses, which are labor intensive. That is what they send.

It takes 8 people, 20 people involved in making that specialized item. That is how you beat the clock on international trade, import raw materials like timber and strip a country, take their lumber, take their material, take their farm products, because they are not labor intense, import them and compare it with what they are sending to this country, goods that are highly labor intensive, labor intensive products, and they just flood that country.

There is no magic. The Japanese, or the European communities, whether it is Belgium, Luxembourg, West Germany, Italy, Portugal, Brazil, you name them, they are doing a very simple

thing. It takes no mastermind to figure it out.

Dump on your trading partners and protect your home markets. That is what it is all about and you do not have to be an Einstein to figure it out.

□ 2050

It looks like we have—the complaint I mentioned and referred to before was that the agreement between the parties, the Japanese and the European Communities had the parties diverting a lot of their excess capacity to the United States. That is where we came in. When they said, "We will stay out of this sphere worldwide and you stay out of our market sphere or area." Then when they had excess production, both of them, no less, got together and they said, "We will dump into the United States. We will give then all the excess. Keep our employment, let them be unemployed. We will ship our unemployment to their country."

Unfortunately for some reason, it is a horse of another color and I will take it up at another time in detail, relief was denied on that problem. It looks like another case of destroying the U.S. market in this country here again to save the world market for foreign countries. Japanese industry grew in little more than 30 years from just over 1 million tons of capacity, steel capacity, to about 140 million tons this year. You consider those apples, understand the significance of that.

They built an industry far beyond their domestic needs. They now export about half of production, steel and steel products. And they must keep exporting or decline, like this Nation is declining. They are able to grow because of a system that let them finance up to 85 percent of their industry by government loans, including loans from the government Postal Service Savings System which exists in Japan. This represents a saving of the people. Its assets are larger than the largest commercial bank in the entire world. Mind you, assets larger than any lending institution in the whole world, Postal Savings over in Japan.

A Japanese banker explained in Father Hogan's book, "The lenders recognize" talking about Japan internally, "that the steel industry was basic to the Japanese Nation's economy and to the strong confidence they placed in the growth potential and safety of the steel industry as an investment."

That is a matter of formal record. Thus, he goes on, "The nation's private financial institutions continuously mete out the huge investment fund requirements of the steel industry in Japan whose equity ratio was at a low level and whose earning power could hardly be rated as sufficient, yet they rallied around the flag.

In the mouth of the banker, Mr. Speaker, the industry could not make enough to get the investments in Japan, so, the government got into the money act. That is where MITI came from. The whole system of high finance; they financed it.

Our Japanese partners are efficient and aggressive. They had good teachers and they learned. You got to give them credit for that. Any view of this efficiency should properly be tempered by the record and this is the record.

Big Japanese corporations were found to be selling here in the late 1970's with dumping margins of over 30 percent. That is not me speaking, or the Steel Caucus, that is a matter of record.

The only criminal dumping charges returned with regard to steel were returned in 1882. I mentioned that before, I mentioned $10 million, but the record shows $11 million was paid in fines to close that case so there would not be international embarrassment as to the Japanese stealing our trade secrets, improperly and contrary to international trade law.

Dumping findings routinely were returned against Japanese producers in small cases in this country in record numbers of filings last year. That is a matter of record, not me speaking. In one product line the margin was over 20 percent.

This indicates to me and to our Government and to the world that the Japanese will dump whenever they feel it is necessary to keep their own factories going and to keep employment going in their country.

Year in, year out, Japan exports directly about 30 percent of its production. We are always the best or the second best customer of theirs. Remember, they built for export in the first place. So, in a way we are asking today to destroy a large portion of our own domestic economy in order to preserve the lifetime employment ideal in Japan.

They have a record of dumping, a formal record of dumping and of insidious activity. Yet this country through our international policies actually pays the lion's share of the defense of Japan.

Every time we ask the Japanese formally or informally to increase their defensive posture, to take in some more exports, to balance the $16 billion trade imbalance between us and them, their answer is, "We will try."

And they have been trying, for 35 years they have been trying. You know how they have been trying.

Maybe their bitterness still persists today. Maybe they did not like that defeat which happened 35 or 40 years ago. But, remember, the moving party in that last war was the Japanese and not this country. And that too, is a matter of fact, a matter of history. That is what the Japanese Government tried to change here last year, if you remember the international hullabaloo that occurred particularly from the Filipinos, South Koreans, and the Chinese, when the Japanese educational department wanted to change the history books. Do you know what they wanted to say? They wanted to say that Japan was not the moving force or the invaders. That is what they wanted to say. And they did say it. They changed their textbooks until the pressure got so great they made them change it back.

Again, you count those apples. If you have common sense, you do not have to be a Houdini or Einstein to figure out who is doing what to whom internationally. Just read the facts and read the record.

If I had it my way that would not be occurring, but unfortunately I am just a small Member of Congress. I know what I would do. People in this country might hate President Nixon, that is their prerogative and they have to analyze the record as they see fit. But let me tell you something I want the record to show here and now: It was President Nixon who had the courage many years ago when the Japanese started flooding this market with automobiles and he put on a 10-percent surtax. Under a law that still exists today, he had the courage to do it and effectively blocked them there. If it was not for President Nixon at that time doing that we would have had unemployment a lot earlier than we have now and to a greater degree. Love him or hate him, you have to give him his rightful due; that is that he understood international politics and international law and he had the courage of his convictions and he represented this country. He did not care who said what. He looked at the law, the power it gave him and he acted accordingly.

He was the President who put the first multifiber agreement together limiting textile flooding in this country from producers like Romania, places like that, Hong Kong, all that junk. Again, I say for matter of emphasis, junk, because I do not want to go into the repeated explanations I have over the years on this very floor, trying to alert the American people and our Government as to the dastardly results that we are encouraging and we are going to suffer.

Father Hogan in his publication notes that because of their dependence on exports the Japanese are very interested in ending the chaos, getting down to the idea of stability and orderly marketing today in the whole world. This takes me to the Third World. I have taken care of the Japanese and complained bitterly about the European Community nations,

and now let us take a look at that Third World, that we call it.

□ 2100

Places like Brazil, Korea. They are emerging, they say, emerging at our expense, I say. The Japanese historically have taken over more than 200,000 tons of imports, according to Father Hogan. And steel from Korea and Taiwan pushed imports above a million tons recently in Japan. It was called a dramatic increase by the Government of Japan. Mind you, dramatic increase. Chaos in the streets in Japan. They are going to kill our industries. Why? Because they have got a stinking 1 million ton import from those countries which I just mentioned, Korea and Taiwan.

There were grumblings in Japan about subsidies over there in Taiwan and Korea. There were complaints about the defects in the material and international trade violations and all that. One million tons which the Japanese complain about so bitterly equals about seven-tenths of 1 percent—seven-tenths of 1 percent of Japan's total capacity. That is their yearly steelmaking capacity. That is what it amounts to. I have got to give those figures again. I have to. Seven-tenths of 1 percent of what the Japanese manufacture. That is what they were grumbling about. And getting all hyper because they were being flooded by steel from Korea and Taiwan.

On the other hand, look at this comparison. We imported more than 1 million tons in the month of May, this last month, alone. Who is crying crocodile tears? You answer that.

Father Hogan in his book concluded, "It is doubtful Japan will ever import more steel than it does now." Is that not nice? 145 million tons of capacity, half of which goes all over the world, and from all things that this expert concludes is that they are not going to import any more over there.

So if the world is going to be safe for democracy and in the Caribbean, and in South America, and in South Korea, and in Taiwan, go over and jump across the river, if any of those places are going to earn enough in international currency it is going to be from exporting steel to this country, not to Japan. Japan cannot get it. They only had a surplus in their trade with us this last year on $16 billion. I understand it is heading for close to $30 billion this year. Close to $30 billion excess, surplus of trade.

Again, you check those potatoes. You analyze. You draw your own conclusions.

If the Europeans will not take their developing world capacity—they are making steel, down in Brazil, over in Korea as I mentioned, Taiwan, Spain, South Africa, Luxembourg, which is not developing, it is an old place, that if meanwhile in this world if the Europeans are not going to take these imports, if the Japanese are not going to take these imports, where are they going to go? They are going to come right here. Right in this country. They will be in. In fact, the developing nations have become the leading source of imported steel in recent months in this country. Imported steel took 19 percent of the U.S. market in May of this year. As in Brazil, as in Taiwan, as in South Korea, the hand of government direct virtually all of the steel coming from the Third World countries. Despite any advantage in labor costs, it is subsidized by those nations. And when developing nations have been investigated on formal complaints, subsidies generally have been found. And this is a matter of record.

The trend is toward more foreign subsidies in the world, not less. There is over capacity for making steel in the world. And more is being built ironically. Every steel producer is growing or seeking stability in some foreign country.

Meanwhile the United States lost 12.5 million tons capacity, steelmaking capacity in this country between 1977 and 1981 and may wind up losing at least that much again between 1981 and the end of the present binge.

Mind you, all that capacity down the drain. World steel looks to the future and made some predictions. That is what Father Hogan did in his book.

No. 1. Here is what he said. "The Third World countries will cut imports and offer increasing export competition to our country." He made another observation: "Japan must continue to export or watch its industry decline." And they have publicly stated they are not going to stand for unemployment in Japan. They are going to export. They have said this repeatedly.

"The Europeans will continue to export," Father Hogan goes on to say. And he bases that upon fact.

Most countries will continue to protect their steel markets unless a worldwide shortage develops. The U.S. steel market will continue to be the target of exports from Europe, Japan, and all Third World countries.

Again in this lineup, the United States is the only country incapable of meeting its domestic needs with domestic production.

Mind you, the greatest country in the world has been—now cannot even supply steel because of what has happened to our antiquated and our eroding productability. We are not even going to be self-dependent. Yet every nation in the whole world looks to this country. Example, for their defense. Example, Israel. And the war which she had with Egypt some years ago, when her tanks were destroyed, you know what we did in this country? We stripped all of our National Guard units of all the available tanks and put them in C-5A's and sent them to Israel because they were complaining bitterly that they were about to fall, that Israel would fall. And the whole balance of power in the Mideast would be disrupted.

Mind you what is going to happen when we cannot even meet our own steel production needs. Who is Israel going to turn to if and when she should need tanks again? Is she going to turn to Russia? Sure, France will not hear her.

Another thing you should think about. So U.S. customers will be cracked viciously when there is a worldwide shortage. What little production we have left. And there will be one, according to Father Hogan.

One analyst this year predicted a $600 a ton rise in the spot export price when the shortage does come.

Several years ago when we had an international shortage of steel the Japanese, as a matter of record and I have a document in my file, and the Europeans, and all exporters were putting $200 and $300 premiums on a ton of steel because there was a shortage. And before they would ship it to you, the Japanese in particular, would make you pay that premium over and above, as a bonus, and second, they would make you enter into a long-term agreement, like 5 years. They would say to you, "We have steel now and if you want this steel now you are going to enter into an agreement for 5 years to buy from us." And they did that and I have it verified as a matter of record. And that is illegal according to GATT. We do not do that in this country. I am not saying this country is perfect, but we do not do some of those obvious things that are being done.

You can see how obvious it is when it becomes a worldwide shortage all the subsidies which all these countries gave and when they sold their steel by dumping it, meaning selling it below production costs and all that loss which they carried over those years, they make up when the big world shortage comes. And they charge their premium. And they get that money back. And they gouge. And they do not care whom they gouge. They gouge the American businessman. He is complaining now that he cannot compete. What is he going to do when he gets gouged? In making refrigerators and washers and dryers, all utilities, let alone big steel planking and all forms of steel and bridge material and I-beams. He will not compete, he will be less of a competitor. He will be paying that premium. They will gouge his eyes out. They have done it in the past and they will do it to a greater degree in the future.

Where 1982 saw a $7 billion trade deficit in steel alone, a world shortage could double that, maybe triple it.

Once capacity is destroyed and particularly in the high cost intensive steel area, because all steel investment production facilities are brutal, they are very expensive, very massive in form, as you well know.

□ 2110

Once you lose your capacity, it is gone forever. It is too difficult to get back. Why, the estimates on Conneaut, the first integrated steel plant in this country, fully integrated, up at Conneaut—that is on the borderline between Pennsylvania and Ohio—it is now estimated it costs $8 billion to $9 billion to put that into effect. How can an industry which has not made any money, no more than 6 percent in the last 20 years, take from their shareholders $9 billion and invest it at Conneaut? And you have to have it. It is a fully integrated concept in Conneaut. Unless you have one, you cannot compete in the steel arena internationally. Japan has their integrated steel works—and, yes, much of which has been paid for by this country, the technology and everything.

The longer the U.S. modernization is held off by the cutthroat price-cutting possibility under subsidy, the more capacity will be forced to close and the greater the gouge when the shortage occurs.

Father Hogan sees the solution to this chaos in some kind of tonnage limitation in trade, stability, and price. Past attempts at voluntary restraints were failures. Restraints were abandoned. We all know the history. The trigger price mechanism was simply ignored and circumvented, and there was no wheel by the administration to enforce it.

On the other hand, the Government is seeking to stabilize the sugar industry with quotas and price supports, and there is consideration of quotas on red meat coming into the country. And, going further, the Europeans certainly must understand and appreciate quotas because they have made wide use of quotas themselves.

The Japanese want stability. They use quotas on other things. So they understand them, too.

In addition, the United States Steelworkers of America have endorsed quotas.

Quotas also have the endorsement of United States Steel, Bethlehem Steel, and Jones & Laughlin Steel. And leading producers that rank below these big three also like the idea of quotas in this country.

For these reasons, the leadership of the Congressional Steel Caucus today introduced the quota bill limiting imports to 11 percent of this market for steel imports. We introduced that bill today.

The quota system is preferable to anything else, because almost everything else has been tried and has, unfortunately, failed to date. In the past, all depended upon international cooperation and good will. And you know what happens there. An administration in power at any given time lacked the will to enforce whatever system was then being tried, whether it was a limitation, a voluntary agreement of limitation, whether it was the multifiber agreement or whether it was steel for specialty or carbon steel or whether it was trigger price mechanism, what have you. There was never a wheel to enforce it.

This bill which the Steel Caucus introduced today would reestablish a steel tripartite advisory commission to advise the President. Its membership would be drawn from labor, management, and government. It would be balanced and it is needed.

In addition, quotas on steel coming into the United States would give our trading partners some international stability. They would have a basis upon which to plan in the coming worldwide rationalization of steel prices. They could do things. They will not have to be cut short. This is necessary because right now the United States is about the only producer that is using good reason and rationalizing. Others are merely talking about it. Many are still continuing to build steel capacity, such as South Korea, which last month—and this is a matter of record—added half a million production tons capacity. What is going to happen to that?

Furthermore, quotas would not come close to closing our market, even though no one else worries about keeping an open home market. Quota could not be offset or circumvented by currency differences, whether they stem from natural causes of international manipulation of currency. This ought to satisfy Sir Roy, whom I mentioned earlier. In fact, quotas are not easily circumvented in any fashion. This is part of their attraction and effectiveness. They will ease or avoid the price gouge that is certain to accompany a world shortage as our capacity falls gravely below domestic demand.

And above all, and in conclusion, quotas mean—and I say this on behalf of all of us in this House who support it—quotas mean and say that it is not necessary to destroy the foundation of the economy in this country in order to save the world. All we want to do is have our fair share and participate in an orderly and equal fashion.

Mr. Speaker, I now defer to the gentleman from Ohio (Mr. REGULA) who is the vice chairman of the full caucus, who has given yeoman service for the last 6 years of the Steel Caucus, a dedicated caucus member and one who has brought much wisdom and much patience to our deliberations on the executive committee, and as a matter of record I want to thank him for his patience in my long dissertation.

Mr. REGULA. Mr. Speaker, I thank the gentleman for yielding, and I want to commend the gentleman from Pennsylvania (Mr. GAYDOS) for reserving this time to discuss the problems affecting the domestic steel industry.

For some time now the industry has been plagued by unfair import competition such as dumping, subsidies, and targeting. These practices have led to declining productivity in the U.S. steel industry, plant closings, and increased unemployment, not to mention their effect on the Nation's overall economic health.

These problems affecting the domestic steel industry are merely symptoms of a much greater, potentially more onerous and pervasive problem. They are symptoms of escalating global trade tensions.

Trade is no longer relegated to the back pages, but increasingly has become a page 1 story.

In a recent article in Foreign Affairs entitled "Double or Nothing: Open Trade and Competitive Industry" it was put this way:

> In the narrowest sense it is a question of which countries will create substantial commercial advantage in growth industries of the future, which countries will be able to defend employment in today's mainline industries during that transition, and which countries will move up to substantial roles in traditional sectors. More broadly, the very international rules determining the appropriate roles for government in national and international economic life are being challenged and the premises of multilateral trade arrangements are being questioned by a series of state-centered industrial development and trade strategies.

Trade conflicts are generating global tension. America's open trade system has been a hallmark of our national leadership, but it has necessitated that our economy be able to absorb imports as other countries pursued industrial development strategies.

America's open market has come to be expected, but in recent years we have begun to pay a steep price for our generosity. Increasingly, pressure is being brought to bear for us to respond to the competitive threats to our basic industries which are hurting many sectors of the economy, as well as hindering economic recovery. To respond threatens the stability of free trade. To not act we risk substantial damage to many sectors of our economy, particularly to our basic "smokestack" industries such as steel.

The practice of U.S. policymakers has been to respond to trade problems in an ad hoc manner, imposing restrictions or negotiating deals on a case-by-case basis. When domestic sugar growers were threatened, a quota was slapped on imported sugar. When the American automobile industry was severely depressed, voluntary import restraints were negotiated with Japan.

With no single, strong voice pushing our trade objectives above all else, whenever a question arises that pits trade against other policy goals, trade comes up short. For example, the trade weapon was used as an instrument of foreign policy in imposing a grain embargo on the Soviet Union to retaliate against that country's invasion of Afghanistan, leaving U.S. farmers devastated by the long-term loss of foreign market share. This is only one example of how trade is sacrificed on the altar of foreign policy.

At least eight different departments and agencies have some hand in U.S. trade policy. This trade policymaking apparatus is a holdover from the days when the United States could take its commercial competitiveness at home and abroad for granted. This strategy of "free trade, but" will no longer work.

First, the problems have gone so far that the demand for protection is unprecedented. Second, the recession and structural shifts are causing dislocation in basic U.S. manufacturing and are threatening the development of new U.S. industries.

In short the trade scene is shifting. More players are entering the game, the rules, as well as the stakes are changing.

We too must change our posture to meet the new challenges of world trade. The United States must clarify its international trade objectives and priorities and improve its trade policy making. To do this we must consolidate trade functions.

In a recent article in Foreign Affairs, Tom Graham, a former deputy counsel with the Office of U.S. Trade Representative put it well: "At present, America acts like a blind, lurching elephant on the field of international competition."

I could not agree more. Despite several reorganizations undertaken during previous administrations, bits and pieces of our foreign trade apparatus are scattered throughout a variety of Federal departments and agencies. No one, least of all our trading partners, knows who is responsible for trade. The most devastating consequence of this disorganization is it allows our foreign competitors to successfully shop around the various agencies involved until they find the one most sympathetic to their views.

Trade policy formulation, negotiation, regulation, and promotion are closely intertwined. They cannot efficiently or effectively be artificially separated in different agencies.

The importance of trade to the welfare of our Nation cannot be overstated. It is not just a steel issue, it is not even just an industry issue. Declining exports accounted for 40 percent of the U.S. rise in unemployment between 1980 and 1982. With total trade in goods and services now standing at over 22 percent of GNP and every $1 billion worth of trade producing approximately 25,000 jobs, trade means jobs.

Trade is crucial to an accelerated national recovery. Between 1977-80, four out of every five new jobs in manufacturing were export related. In 1982 alone, 5 million jobs in the United States were supported by our exports. This rapid growth of trade in our domestic economy necessitates the creation of a Department of Trade. Only by consolidating the dispersed trade functions under one strong head can the United States begin to effectively address such problems as the decline of basic industries and the competitive impact of industrial policies.

I have introduced legislation, and the administration has endorsed the concept of a Department of International Trade and Industry which would consolidate the principal executive branch trade functions, incorporating related economic affairs and business elements of the present Department of Commerce.

This reorganization would enable us to fully develop our international trade opportunities and defend our international trading rights. For the first time, a single Cabinet Department would be responsible for both policymaking and policy implementation. It would enable development of a policy that emphasizes anticipation and coordinated action, rather than reaction and ad hoc trade restrictions.

Such a reorganization would recognize the important link between international trade and domestic industry activities as American businesses compete more in world marketplaces. It would also send a signal to our trading partners that we are serious about trade, serious about stopping unfair trading practices, and serious about increasing our export market.

The challenges we face today in international trade are not unique. However, the prospects for slow economic growth and stresses on the world financing system are placing greater strains on the world trading system than at any time since World War II. An estimated 30 million workers are unemployed in the industrial nations. There is growing sentiment, worldwide, for protectionist measures.

The United States must be prepared to meet these challenges. To do so we need the most effective Federal organization possible for trade. Today no such organization exists, but a new Cabinet-level Department of International Trade and Industry would fill that need and establish international trade as a permanent, national priority. It will bring accountability for trade policymaking and implementation under one roof. This is the case for all other critical policy areas in the Federal structure and is also the case for virtually all of our important international competitors.

Increasingly participants in world trade are employing State strategies to shape markets and these strategies are having a growing impact on the future shape of the international economic order.

Japan is one of the most successful. There, systematic government policies have moved the economy away from production of labor-intensive goods such as textiles, into the field of consumer durables, such as televisions and automobiles, and increasingly into high-tech.

This was accomplished primarily by the Ministry of International Trade and Industry (MITI). Although government bureaucrats do not strictly dictate to an administered market, they have consciously contributed to the development of particular sectors. Government policies helped provide cash for investment, tax breaks to sustain liquidity, research and development support, and aid to promote exports.

The Japanese Government also exerted influence on the economy during its boom years of the 1950's and 1960's by controlling imports and exports.

While I do not advocate the Japanese approach, there can be no denying its success. Much of our own recent problems stem from the Japanese success. This success, however, would not have been possible without a coordinated policy, promoted and promulgated by MITI.

We too must be better prepared to make the strategic choices about the primary needs of our economy. Opening foreign markets is more than a question of quantities, it is a question of strategies, and a strategy is something we sadly lack.

Moreover, without an independent ability to analyze the dynamics of the world marketplace, we are entirely dependent upon the views of firms and sectors seeking assistance, forcing a continuation of the present ad hoc approach.

Expansion and international competitiveness must be made principal national goals. Our ability to compete in international trade is central to our future economic growth, our domestic welfare and our national security. If we are to meet the challenges of foreign competition we must take the institutional steps necessary to meet those challenges by consolidating trade responsibilities and elevating trade to its proper place at the top of our national agenda.

Mr. KOSTMAYER. Mr. Speaker, I take pleasure in joining my colleagues from the Congressional Steel Caucus in this special order today, and commend my colleague from Pennsylvania (Mr. GAYDOS) in his continuing effort to keep the House informed of the

crisis which threatens our domestic steel industry.

In my district, Mr. Speaker, the steel industry is of vital importance. The Fairless Works in Fairless Hills, Bucks County is a major employer, and its health is of tremendous importance to the whole region.

We in Bucks County are concerned, therefore, about the proposed agreement between the United States Steel Corp., the owner of the Fairless Works, and the British Steel Corp. to import unfinished slabs from Britain and terminate steelmaking activities at Fairless. The imported slabs under the plan would merely be finished at Fairless, United States Steel's only major plant on the east coast.

When this proposal was announced several months ago, Mr. Speaker, I went to England and Scotland at the behest of the chairman of the Foreign Affairs Committee to investigate the implications of the proposal on our steel industry and to report back to the committee. I would like to share that report with the full House, Mr. Speaker, and ask that it be inserted at this point in the RECORD.

HOUSE OF REPRESENTATIVES,
Washington, D.C., April 21, 1983.

Hon. CLEMENT J. ZABLOCKI,
Chairman, Committee on Foreign Affairs
Washington, D.C.

DEAR MR. CHAIRMAN: There is transmitted herewith a report of my study mission to Glasgow, Scotland and London, England during the period April 3-5, 1983. At your request, I undertook this mission to explore the implications of a proposed supply and financing arrangement by the U.S. Steel Corporation and the British Steel Corporation.

During the course of my visit I met with U.S. diplomatic officials, British steel and government officials, and labor leaders in Scotland. I also held discussions with U.S. labor leaders and U.S. Steel officials, both in Pittsburgh and Washington, D.C. I would like to express my appreciation for the assistance and cooperation I received from all of these officials.

The subject of my investigation has serious implications for U.S. steelworkers and for the foreign policy and national security of the United States. I therefore hope that this report will be helpful to the members of the Foreign Affairs Committee and the Congress in their deliberations on steel imports.

Sincerely,

PETER H. KOSTMAYER.

KOSTMAYER STUDY MISSION REPORT

OVERVIEW OF THE U.S. STEEL INDUSTRY

In the past two years, the U.S. steel industry has suffered its worst slump since World War II. While this is partially attributable to the recent recession and the resulting weak domestic demand for steel products, it is also a reflection of structural problems in the steel industry. Many U.S. steelmakers have failed to modernize their mills, and thus rely on inefficient and outdated production methods such as open hearth furnaces. The combination of obsolete production methods and higher labor costs than those abroad have made it difficult for U.S. steelmakers to compete effectively with foreign steel producers. As a result, U.S. steel exports have declined and U.S. steel imports have increased.

U.S. steelmakers have fought fiercely against foreign imports. Foreign producers have the advantage not only of more modern plants, but also in many cases substantial government subsidies which make their products even more competitive in world markets. American steel producers maintain that it is impossible for them to compete against subsidized steel, and have used a variety of mechanisms available under U.S. law to curb such imports. In 1982, several American steel companies, led by U.S. Steel, filed for import relief from steel imports in one of the most comprehensive claims for protection ever made by a domestic industry. The resulting investigations by the Department of Commerce and the U.S. International Trade Commission produced a final determination that many of the eleven countries cited in the petitions for relief were subsidizing certain steel products, and a preliminary determination that some countries were guilty of "dumping" as well (selling products at less than market value). The petitions were ultimately withdrawn in exchange for an agreement between the United States and the European Economic Community which limits most steel exports (though not semifinished, or "slab" steel) from the E.E.C. to the United States through 1985. (During this "breathing spell", the EEC governments are committed to phasing out subsidies to their steel producers.) However, the import relief cases clearly established the desire of the American steel producers to demand protection from imports. The cases also demonstrated conclusively that EEC countries were subsidizing their steel companies, and that the United Kingdom was one of the worst offenders in providing subsidies.

While U.S. Steel and other companies have been fighting imports (the most recent example being a petition filed against Japanese steel imports), U.S. steelworkers have made strenuous efforts to accommodate the steel companies during the industry's slump. On March 1, 1983, the United Steelworkers of America (U.S.W.A.) agreed to give up an estimated $2.9 billion worth of compensation over the next 41 months on the understanding that the savings would be utilized by the steel companies, for plant modernization. For many individual steelworkers, this concession amounted to several thousand dollars per year in pay cuts.

OVERVIEW OF BRITISH STEEL INDUSTRY

The British Steel Corporation (BSC), a government-owned company formed in 1967 from nationalized steel companies, has made dramatic strides in modernizing the British steel industry with the help of direct financial assistance from the British government. All five of its big steel plants are integrated, and utilize basic oxygen furnaces and continuous casting to produce steel (the last open hearth furnace was closed in the mid 1970's). The decision by BSC to nationalize its steel production based on the Japanese approach has been achieved only through massive government subsidies: more than $6 billion since 1975, according to some estimates.

The current chairman of BSC was hired to turn BSC into a profit-making enterprise. While BSC's losses have been cut over the past few years, they still amounted to more than 500 million pounds ($750 million) in the past year, all of which were covered by the government. In addition, the BSC receives a wide range of benefits which the U.S. Department of Commerce has determined to constitute subsidies. These include National Loans Fund loans and loan conversions, industrial investment loans from the European Coal and Steel Company, loans from the European Investment Bank, regional development grants, interest relief grants, Iron and Steel Industry Training Board grants, Export Credit Guarantee Department loans, Industrial and Commerical Finance Corporation loans, and preferential rail rates.

The Current plan of the EEC calls for member governments to eliminate operating subsidies for steel by December 31, 1984. Although BSC claims it will meet this goal, it will be difficult to achieve without further layoffs and plant closings. In fact, in an effort to stem its losses, BSC attempted last year to close its Ravenscraig integrated steel mill in Glasgow, Scotland. The resulting outcry from Scottish organizations and Members of Parliament made the closure politically impossible, and forced the BSC to seek other means to cut its losses: namely negotiations with U.S. Steel for a supply and financing arrangement.

BRITISH STEEL CORPORATION-U.S. STEEL NEGOTIATIONS

In late March 1983, reports began to appear in the U.S. media that BSC and U.S. Steel were conducting negotiations which would result in BSC shipping slab steel from its Ravenscraig plant in Scotland to U.S. Steel's Fairless Works plant in Southeastern Pennsylvania. Given the potential domestic and foreign policy implications of such an arrangement, the Chairman of the House Foreign Affairs Committee requested the study mission to investigate the proposed arrangement. The study mission therefore visited the Fairless Works and the Ravenscraig plants, and held discussions with the Chairman of U.S. Steel and BSC, and with U.S. and Scottish labor representatives, as well as other appropriate officials from both governments. Although some of the participants in the negotiations were reluctant to explain all of the details of the arrangement, the study mission obtained important information on the negotiations which raises serious questions about its propriety.

The basic elements of the arrangement would include a three year contract (with a three year renewal option) for BSC to supply Fairless Works with slab steel at the rate of 3 to 3.5 million tons per year. The majority of the slab would be supplied from the Ravenscraig plant, with lesser amounts supplied by other BSC mills. The slab would be transported in U.S. ships. In addition, BSC would invest an unspecified amount of money in the finishing operations at Fairless Works. If the negotiations are successful, they would permit U.S. Steel to close down the "hot" end of its Fairless Works plant, while BSC would close the finishing end of its Ravenscraig plant. Some 2,000-3,000 jobs would be lost at each plant from the closings.

BSC officials made it clear that the proposed venture was being legally structured to avoid U.S. penalties on subsidized steel products. It would be virtually impossible for BSC itself to participate in such an arrangement without being subject to import relief actions in the United States. Therefore, BSC proposes to form a private corporation financed from $400 million to be raised through a private stock offering. The company would gain ownership of the Ravenscraig plant, which would be "spun off" from BSC. None of the funds would be pro-

vided by the British government, although government approval of the plan is required. BSC officials expressed confidence that government approval would be granted.

BSC and U.S. Steel officials argue that such an arrangement makes good economic sense, at least in the long run. Ravenscraig, it is claimed, can produce slab steel economically, but the finishing end of the mill is too costly to operate due to low demand. Fairless Works, on the other hand, cannot produce slab steel as efficiently because of its outdated production methods, but it is an efficient producer of finished steel. BSC officials also stated that even though the slab steel would be provided on a "full cost" basis with no subsidy, it would still be cheaper than that produced by Fairless Works. Both companies argue that shutting down the less productive parts of their plants will ultimately save more jobs than are immediately lost as a result of the arrangement, on the premise that if they are not permitted to cut their losses on their less productive operations they may be forced to completely close the plants.

Both Scottish and U.S. labor unions are opposed to the proposed venture. Labor leaders at Ravenscraig stated that the most recent statistics on their mill show that it is now operating at a profit. They also pointed out that there is a high demand for slab steel in Great Britain, which might have to be supplied from imports if Ravenscraig's slab production were devoted to exports for the U.S. market. Furthermore, employment in the U.K. steel industry has already been cut more than in half, and Glasgow's unemployment rate stands at 18 percent. Given these factors, and the political importance of retaining a steel mill in Scotland, labor leaders are confident they can prevent the proposed arrangement. U.S. steelworkers have condemned the plan for the loss of jobs it would produce in an already depressed industry. They also point out U.S. Steel's hypocrisy in lobbying against steel imports while arranging a deal which would make Fairless Works dependent on steel imports, and its deceitfulness in forcing wage concessions from U.S. steelworkers while negotiating behind their backs to eliminate more jobs. They have vowed to use every possible means to oppose the arrangement.

IMPLICATIONS FOR U.S. FOREIGN POLICY AND NATIONAL SECURITY

U.S. Steel's leading role in demanding protection from steel imports had been seriously undercut by the announcement of the current negotiations with BSC. Its crass "flip-flop" on steel imports could well lead the current Administration to regard further requests for import relief much less sympathetically, thereby loosening the restrictions on even more imports. Any such development could provoke protectionist efforts in the U.S. Congress, with unfortunate consequences for U.S. trading partners.

The proposed arrangement poses even more serious long-term consequences for U.S. national security, however. Other steel companies have already shut down their raw steelmaking facilities and are relying on imported slab steel. Should this trend continue, the United States may find itself eventually dependent on foreign producers for steel. This prospect raises serious questions not only in regard to lost jobs but to the very security of the United States, particularly in the construction and transportation sectors.

CONCLUSIONS AND RECOMMENDATIONS

(1) The proposed arrangement between U.S. Steel and BSC is an attempt by BSC to circumvent U.S. restrictions on subsidized imports. BSC officials admitted freely that the venture is being structured to avoid U.S. penalties on subsidized steel. Even if a "dummy" corporation with a new name takes ownership of Ravenscraig, however, the fact remains that the British government has subsidized the construction and operations of the Ravenscraig plant. The capital which Fairless Works needs to modernize its slab production has been provided to Ravenscraig by the British taxpayer.

(2) BSC is trying to solve its own domestic problems at the expense of the American industry. BSC was prevented from closing the Ravenscraig plant for domestic political reasons. Because that closure was prevented, it has targeted an American plant to absorb its excess production capacity.

(3) U.S. Steel is backing away from its promises to U.S. Steel workers to modernize its plants and fight imports. U.S. Steel has failed to take the necessary steps to modernize its plants. It is now asking the steelworkers to pay for its mistakes.

(4) The loss of jobs which would result from the arrangement negates the limited economic benefits which would accrue to the two companies.

(5) The proposed arrangement poses serious questions about U.S. dependence on imports of foreign unfinished steel.

(6) Given the factors outlined above, the study mission recommends that the Foreign Affairs Committee and the U.S. Congress enact legislation which would prevent a successful conclusion of the negotiations. Specifically, the mission recommends legislation which would restrict foreign investment of the type contemplated in vital industries such as steel. The Committee should also request the Committee on Foreign Investment in the United States to review the proposed arrangement.

The study mission further recommends enactment of legislation to tighten the Trade Act of 1974 to ensure that subsidized steel such as that produced at Ravenscraig cannot be brought into the United States under a loophole which would not cover the situation created if the British Steel Corporation spins off the Revenscraig plant to a new entity.

Since that time, Mr. Speaker, as I am sure my colleagues are aware, a second major negotiation is underway, this between the Wheeling-Pittsburgh Steel Corp. and the subsidized company, known as Steelmaker Brazil Corp. It is clear that a pattern is being set, and that such arrangements pose a serious threat to America's steelmaking capacity. Foreign steel is subsidized in contravention of our trade laws, and its importation into our country means that American steelworkers will lose their jobs so that foreign workers can keep theirs. It is as simple as that.

At this point in the RECORD, Mr. Speaker, I would like to share with my colleagues an editorial that appeared July 31, 1983 in the Bucks County (Pa.) Courier Times on the implications of the Wheeling-Pittsburgh move, coming as it does on the heels of the U.S. Steel/British Steel negotiations.

[From the Bucks County Courier Times, July 31, 1983]

IMPORT CHAIN REACTION

Quote of the week belongs to an unnamed business associate of Dennis J. Carney, chairman of the board of Wheeling-Pittsburgh Steel Corp.

Carney was in Brazil last week trying to negotiate an import deal with the state-owned Brazilian steel company similar to the one U.S. Steel is working on with British Steel Corp.

Wheeling-Pittsburgh wants to buy 300,000 tons a year of semifinished steel from the Brazilians for finishing at its plant in Stuebenville, Ohio. In exchange, Wheeling-Pittsburgh would receive $40 million for capital improvements.

The funny thing about all of this is that Carney has been one of the most outspoken critics of subsidized steel imports.

All of which brings us to the memorable quote of the business associate who was asked to explain the rationale for Carney's actions. "Dennis isn't going to be taken down on principle," he told a Wall Street Journal reporter.

It may be funny if the consequences weren't so serious. Steel industry officials who consider principles dispensable have jeopardized the jobs of thousands of steelworkers here in Lower Bucks County and across the nation.

The critics who feared U.S. Steel's Import deal would set off a chain reaction in the industry are being proven right.

There's a message there for the Reagan administration, which purports to be vitally concerned about matters of national defense. An industry chain reaction which diminishes U.S. capacity to manufacture basic steel will open this nation's "window of vulnerability" far wider than any gap in missile throw-weight.

In response to massive steel industry layoffs in the late 1970s, the Carter administration created a special commission of steel management, union and government representatives to analyze industry problems and recommend solutions. The Steel Tripartite Advisory Committee was disbanded by President Reagan.

A U.S. Steel executive told a House subcommittee last week that his company could support reactivating the tripartite committee. The United Steelworkers union already has called for its re-establishment.

Putting the committee back to work could be the first step toward development of a much-needed national steel policy. The Wheeling-Pittsburgh deal reinforces the conviction that something must be done to ensure that this nation does not become dangerously dependent on foreign sources of supply.

As the Courier Times correctly notes, "there's a message there for the Reagan administration." Unless these proposals are stopped, the Reagan administration will have to answer not just to thousands of steelworkers who lose their jobs, but to all those who believe, as I am sure all my colleagues do, that it is important for our country to have a steelmaking capability to meet all our needs, especially in the area of national defense.

In September the Subcommittee on International Policy and Trade under the chairmanship of Representative DON BONKER will hold hearings on the

proposal between United States and British Steel. Foreign investment in our steel industry demands the attention of the Congress because of its potential impact. I urge my colleagues in the Steel Caucus, as well as all others, to help insure our trade laws are enforced, and to support efforts to end the displacement of American workers, and to strengthen our domestic steel industry.

● Mr. BEVILL. Mr. Speaker, America's steel industry still suffers from a combination of problems which have been sapping its vitality for the past several years.

Among the most serious challenges are subsidized imports, aging physical plants and unnecessarily complex and costly federally imposed regulatory burdens. These and other forces have nearly finished off this country's steel industry.

Steelworkers with 20 and 30 years of seniority find themselves on unemployment for the first time in their working careers. These people are the solid bedrock of America. They are the ones who have paid their way all of their lives. They have produced quality products for this country and the world. And they have been strong supporters of America. And now, they are unemployed.

The steel industry itself has been one of the pillars of our economy. And while it has suffered, our economy has suffered.

As a member of the executive committee of the Congressional Steel Caucus, I have been searching for legislative methods of helping our steel industry regain its strength so that it can put America's steelworkers back on the job.

I am strongly supporting the Fair Trade in Steel Act of 1983 because it contains several provisions which I feel are needed to get steel back on its feet.

The key ingredients in this act, which I feel would contribute to steel's recovery, are the creation of a steel tripartite advisory council and establishing and enforcing quantitative restrictions on steel imports and iron ore imports.

This act directs the President to establish a Steel Tripartite Advisory Council composed of management, labor, and members of the steel service center segments, in the basic steel industry. This Council would advise the President and the Congress on the problems facing the steel industry. And this advice is sorely needed.

Placing restrictions on the amount of imports of carbon and specialty steel is needed to prevent domestic steel production jobs from being stolen away from us by unfair foreign competition.

And the restrictions for the last half of 1983 of limiting iron ore imports to 7 million tons is necessary.

I believe the method of imposing these limitations contained in the act is a fair one to this country and to its steelworkers.

Our steel industry is one of America's most essential economic contributors. It has accomplished a great deal toward building this Nation and it can still make a significant contribution to maintaining the United States as the strongest country in the world. But only if we do not sacrifice it to unfair foreign competition.●

● Mr. NOWAK. Mr. Speaker, I would like to commend the leaders of the executive committee of the Congressional Steel Caucus for scheduling this discussion to again focus our continuing concerns on the deteriorated condition of America's steel industry.

Just last week, United States Steel reported a $112 million loss in the quarter ending June 30, 1983. Republic Steel, whose plant in my district in Buffalo has been indefinitely closed since May 1982 with no reopening imminent, reported a $45 million loss. Bethlehem Steel, which is proceeding with plans to sharply curtail its production at its Lackawanna facility by the end of this year, reported a $93 million loss. Unemployment among American steelworkers, as of July 16, 1983, remained beyond the 100,000 level, and production capacity was at 53.6 percent. Yet, foreign imports continue to capture 18.3 percent of the U.S. market.

Unfortunately, despite the repeated efforts of the Executive Committee of the Steel Caucus to meet with President Reagan to discuss the critical problems facing this vital industry, no such appointment has been scheduled. Therefore, we have requested this special order to dramatize our concerns about the needs of the steel industry and to suggest appropriate remedial actions.

In order to solve the crisis facing the domestic steel industry, our Government must formulate and implement a comprehensive steel policy. First and foremost, we must increase the demand for domestic steel. This involves the strict governmental enforcement of the "Buy American" clause. Those who oppose "Buy American" argue that this measure would raise the cost of projects using American-made materials. I believe that, despite possible increased costs of these projects, this is a worthwhile investment because it is maintaining jobs and providing essential services, and is far cheaper than paying unemployment benefits to laidoff and displaced steelworkers.

Over the past year, a number of antidumping and countervailing duty suits have been filed with the International Trade Commission exhibiting the violations of foreign steel producers. However, small industries, including some of our smaller steel companies, cannot afford the expensive and lengthy procedures necessary to fight the unfair trade practices of their foreign counterparts. Therefore, our Government must not only aggressively enforce existing trade laws, but streamline new legislation toward assisting these smaller industries. The trade remedy legislation to be introduced by the House Ways and Means Committee later this year should address the concerns of these small industries as well as supporting our larger steel companies. The reestablishment of a Tripartite Advisory Council would provide continuous communication and monitoring of the entire steel industry, thus avoiding crisis management and decisionmaking. Import quotas will allow domestic steel the opportunity to recapture a competitive position in the international market, as well as providing sufficient time to modernize plant and equipment. All of these steps would reemphasize to our foreign competitors that violations of existing trade procedures will not be tolerated.

Import quotas would help provide an essential period to implement our domestic industry's modernization process, but upfront capital is also needed to purchase new equipment and update present steel facilities. I advocate tax laws which allow companies to reinvest unused tax credits in plant and equipment. I have cosponsored the Work Opportunities and Renewed Competition Act of 1983 (H.R. 3434) introduced in June by my colleagues from New York and Oklahoma (Mr. CONABLE and Mr. JONES), which targets capital investment from tax credits to plant and equipment modernization. Without this upfront capital investment in steel facilities, the modernization process cannot be completed.

The present steel crisis has forced numerous plant closings. The formerly productive steel worker, thus, faces great discouragement and distress. Today's displaced worker is envisioning the prospect of losing home and property, as well as being unable to support his family. I have continuously supported and encouraged job training assistance from the Federal Government, and provided provisions for the retraining of the displaced worker in legislation I recently introduced, the Enterprise Development and Industrial Revitalization Act of 1983 (H.R. 2375). If our country is going to solve the present unemployment situation, particularly among former steelworkers, the Federal Government will have to implement and expand such targeted job training programs.

Our domestic steel industry desperately needs help from our Federal Government if it is to remain a viable competitor in the international economy. The U.S. steel industry is encountering fierce competition from govern-

ment-assisted members of the European Economic Community, as well as from Japan. In the years ahead, our steel industry will face the newly developed industries of such Third World countries as South Korea, Brazil, and Mexico. America's steel industry, although it will never return to its production capacity of the 1950's and 1960's, must modernize and be protected if it is to be a viable part of our Nation's future economy.●

● Mr. APPLEGATE. Mr. Speaker, I am pleased to join my colleagues from the Steel Caucus in support of the Fair Trade Steel Act of 1983.

The domestic steel industry suffers from the depressed state of the economy and is unable to make a profit in steelmaking operations because of the flood of imported steel at prices below the cost of production. The loss of business by domestic producers from unfairly imported steel products has added to the number of unemployed and indefinitely delayed multibillion-dollar and modernization plans which are vital to the long-term future of the steel industry. U.S. steel plants are now operating at 53.7 percent of capacity. Yet, despite these figures, our trading partners are maximizing their steel exports to the United States.

Meanwhile, the administration drags its feet in protecting U.S. jobs from unfair foreign subsidization. This failure to act expeditiously on requests by the steel industry for relief from low prices, subsidized steel imports adds further insult to the injury already incurred.

The only hope is to introduce stability into the marketplace by establishing orderly import restraints on steel and iron ore. This bill, the Fair Trade in Steel Act of 1983, would reestablish the Steel Tripartite Advisory Council to develop information and advice on matters concerning the domestic steel industry. Further, it would allow expansion or contraction on the basis of inflation, shortages, and steel unemployment of quantitative restrictions of imports for 5 years. I believe this strong quota system is the only way to stem the tide of cheap steel imports into this country. While the steel mills of our foreign trading partners are running at full strength, plants here at home are closing and this pattern is threatening the very fabric of our industrial base and national security.

I am confident that the domestic steel industry can experience a full recovery, but our Government must do its part to guarantee that American producers will operate in a trade environment that is both competitive and fair. I ask all Members of this body to join me in achieving that objective by supporting this legislation.

But even with this legislation no sustained and real trade balance can be achieved unless the administration's economic policies are brought under control. The continuing huge deficits brought on by excessive spending and revenue loss through tax cuts to big business and high income earners is the primary cause, though not usually mentioned, of the large trade, deficit we suffer because the budget deficit keeps the value of the dollar too strong against foreign currency thereby inviting imports of foreign goods.

We have much work to do but the Fair Trade in Steel Act of 1983 is an important step.●

● Mr. MURTHA. Mr. Speaker, economists advise us that the recession ended late last year. Such news is premature if you have observed the condition of the domestic steel industry in the past few months. The current operating rate of the industry is 53.6 percent.

Earlier this year, my colleagues and I presented testimony before committees of the House regarding the need for trade reform and the development of an industrial policy. In my testimony, I referred to Mr. Eliot Janeway a well-known political economist, who expressed concern about the prospects for a full economic recovery in our country. I would like to bring several of these quotes to the attention of my colleagues now, because I believe they were a fairly accurate description of what is occurring today.

According to an American Metal Market article in which Mr. Janeway was interviewed:

> The administration is unwilling to develop a "national industrial policy" to maintain the economic viability of basic industries in the United States.

> Congress will have to take the lead in supporting the restructuring and revitalization of basic industries.

> If there is a strong recovery without the effort to restructure and revitalize domestic industries, "the foreigners will rip off chunks of the U.S. market with low import prices like you've never seen to get their people working and their plants running at full capacity."

I can report to you that in at least two respects, Mr. Janeway's assertions are accurate—now that a recovery is gathering momentum, steel imports are beginning to rise dramatically and second, the Congress is taking the lead to help revitalize basic industries.

In this special order today, I would like to trace the recent history of the domestic steel industry's efforts to obtain relief under our trade laws. Then, before exploring the elements of the legislation which we are proposing, I would like to touch on certain aspects of one of our trading partners industrial/trade policy which should provide insight on the issues we are discussing today. I will concentrate on Japanese industrial policy since it has been the most successful—approximately $20 billion of our $40 billion trade deficit last year existed with Japan.

Last year, the domestic steel industry had one of its worst years in history. The industry produced only 61.5 million tons of steel at an average operating rate of 48.4 percent. In 1982, steel imports accounted for an unprecedented share of the U.S. market. Although total import tonnage declined from 19.9 million net tons in 1981 to 16.7 million net tons last year, import penetration accounted for nearly 22 percent of the domestic market last year compared to almost 19 percent in 1981. This penetration occurred at a time when the U.S. economy was being wracked by a deep economic recession and the steel industry was operating at the lowest rates and employment levels since the Great Depression.

At the peak of the 1982 steel depression, approximately 166,000 workers were laid off with some 30,000 on short work week—approximately a 35 percent unemployment rate for domestic steel workers.

For the first 5 months of this year, imports have increased each month—today imports have captured 18.3 percent of the domestic market. So far this year, the industry has operated at an average operating rate of 54 percent of capacity—70 percent is the breakeven point for steelmaking.

As we have learned over the past several years, steel imports are not necessarily fairly traded in our market. In the aftermath of the 132 trade cases filed by the steel industry last year, we have become abundantly aware of the various unfair trade practices that our trading partners have implemented to keep their people working and their plants running at full capacity, while our workers are laid off and our plants closed down. We learned of government subsidy in the range of 20 to 40 percent, dumping margins ranging from 20 to 30 percent as well as techniques such as targeting and abuse of exchange rates.

Last October as a result of the steel trade cases, an arrangement was concluded with our European trading partners in which they were guaranteed about 5.1 percent of the domestic market in certain steel product categories. In addition, they are entitled to export no more than a 5.9-percent share of the domestic market in pipe and tube products before a consultation procedure can be initiated. Most recently, the specialty steel producers together with the help of the steelworkers and the members of the caucus were able to obtain partial relief from unfair imports with a modest 4-year import restriction program on rod, bar, and alloy specialty steel and a tariff arrangement on stainless sheet, strip, and plate products.

This effort has not been painless for the industry and its workers. These proceedings have taken time and considerable expense—an average dumping case costs approximately $125,000 while an average subsidy case costs about $100,000.

In my judgment, this industry should have been allowed to focus its efforts on production, modernization, and investment instead of filing trade cases. Rather, at a time of deep recession with unemployment as high as 50 percent in some plants, specialty steel producers spent over a year and a half in court and hundreds of thousands of dollars seeking remedy from unfair trade practices.

To aggravate the situation, I hear that our European trading partners are extremely upset over the level of relief which the industry achieved fair and square and intend to appeal the matter to GATT. Let us be blunt. To date, the pursuit of relief under our trade laws together with the various negotiated settlements have proven largely inadequate and ineffective in responding to the trade problems of the domestic industry. Experience indicates that even when our trade laws are enforced, our trading partners with their respective industrial policies find ways to continue the abuse through every means available—from Government subsidization, dumping, and coordinated industry targeting to abuses of the exchange rates.

If some of our trading partners had been serious about living up to the various international trade agreements to which they are signatories, we might not have had a problem. Unfortunately, they have not. Therefore, I believe that members of the Steel Caucus are taking a critically important step in offering legislation to deal with the issue comprehensively.

It is an appropriate time to announce that we will no longer tolerate the plundering of our domestic steel market. Through this legislation, we intend to temporarily restrict access to the last free open market in the world in order to give the domestic industry time to recover and modernize their facilities. This bill will require our trading partners to deal with their excess capacities and inefficiencies. Clearly, further systematic liquidation of our industry must be prevented and the jobs of its workers preserved if we are to maintain a viable steelmaking capability.

In certain respects this legislation could be a first step toward an industrial policy for steel. Before examining this proposition and explaining the basic provisions of the bill, I would like to direct my colleagues attention for a moment to a brief analysis of Japanese industrial policy for purposes of comparison.

Since World War II, the Japanese Government has played a major role in assisting its basic steel industry. It has been inextricably involved in promoting, protecting and sustaining its industry. The cornerstones of Japan's industrial policy for steel are the use of protection to generally neutralize the adverse effects of competition and the development of international competitive advantage through a range of assistance programs.

The concept of a free market economy where risks are a natural part of the system tends to be distorted when one examines the nature of Japanese steelmaking. Specifically, in Japan the government intervenes when it is apparent that the natural consequences of risk in steelmaking appear imminent.

For example, when demand is falling, the Japanese Government allows the formation of cartels to limit steel production. (A matter which would quickly alarm our antitrust lawyers at the Department of Justice.) Further, due to a practically closed distribution system, imports have been virtually eliminated from the domestic market—analysts attribute this phenomena more to the large trading company control over the distribution channels than to direct government intervention. Nevertheless, this type of protection has given the Japanese space to expand their production, and thereby, unload their excess capacity on the world market, particularly the United States.

It is important to note that the consistently undervalued yen has aggravated this problem and has put U.S. steel products at a disadvantage in terms of price. Beyond import protection, Japan has adopted a number of policies to enhance the competitive advantage of its steel industry. MITI has promoted mergers and joint ventures to improve the efficiency of its large-scale producers; it has provided direct and indirect financial assistance for investment in equipment and funded major construction projects to accelerate domestic demand; it has fostered the development and adoption of advanced technologies in steelmaking and subsidized the acquisition and allocation of raw materials.

In concluding my comments about Japanese industrial policy, I would like to quote a recent report entitled "Japanese Government Promotion of the Steel Industy." At present the Government buys surplus steel from Japanese makers and gives it away to least-developed nations; makes virtually unlimited low-interest loans to steelmakers through the Export-Import Bank of Japan for overseas raw materials purchases; subsidizes steelmaking research and development projects; and is currently contemplating a massive new aid program to help Japanese steelmakers undertake a "wholesale renovation of equipment * * * with the object of maintaining international competitiveness."

As you can see, the Japanese have a formidable and comprehensive approach to steel industrial policy. I am not suggesting that we emulate the Japanese in our search for an American industrial policy, but we should at least consider their experience.

The passage of the "Fair Trade in Steel Act" would certainly signal a positive step in the effort to develop a coordinated approach to steel problems and possibly help chart a course where industrial policy can become a guiding force in the renewed growth of our economy.

Title I of the legislation would direct the President to establish a Steel Tripartite Advisory Council, similar to the Steel Tripartite Advisory Committee under the Solomon report. This council would include representatives of labor, management, and the Government. The council would be charged with the responsibility of advising the President and Congress regarding steel problems and conducting research on trade, tax, environmental, health, safety, and readjustment issues.

Title II establishes quantitative restrictions on all imports of carbon and specialty steel products. Imports could take no more than 11 percent of the domestic market based on apparent consumption projections set twice a year. The implementation of quantative restrictions will be subject to an official finding by the Secretary of Commerce that the domestic steel producers are engaging in, and have, verifiable investment plans to modernize the domestic industry. In addition, each year the Secretary will conduct an annual review to insure that a satisfactory level of progress toward steel industry modernization is being achieved. If the Secretary makes a negative finding, he may terminate the quantitative limitations.

Title III sets quantitative limitations on iron ore imports to 14 million tons per year. All import restrictions would be in place for 5 years.

I believe this legislation is critical to the continued health of our domestic steel industry. It may seem harsh but it is necessary, as necessary as the policies which our trading partners have adopted in the past. I urge my colleagues to support and cosponsor the "Fair Trade in Steel Act of 1983."●

● Mr. SHUSTER. Mr. Speaker, I rise today to join with my colleagues who are concerned by the problems facing our Nation's steel industry. I would particularly like to bring to the attention of the Members of this House the situation of the railroad wheel and axle industry. One manufacturer of railroad wheels and axles, Standard Steel of Burnham, Pa., is located in the district that I represent. I have

had the opportunity to see the great difficulties experienced by this company in recent years.

Domestic manufacturers of railroad wheels and axles have been plagued by rapidly growing imports from Japan, France, Brazil, and others. This rapid growth in imports has taken place in a period of depressed activity in the railroad industry in general, resulting in only very modest growth projections for the domestic market for the next several years.

The United States imposes no import duty on wheels or completed wheel and axle assemblies, and only a small duty on axles. The duty of approximately 20 percent which was formerly imposed on railroad wheels was phased out during multilateral trade negotiations in 1966; a time when vertually no wheels and axles were being imported into this country. In the early seventies, imports began to grow at an alarming rate. In the year 1974 alone, the quantity of wheels and axles imported increased by 117 percent. Rapid growth continued through the decade, with a 400-percent increase in wheel imports and a 1,600-percent increase in axles for the period 1976 through 1981.

While there are virtually no barriers to imports entering our country, our manufacturers have found it impossible to export to other countries. For instance, while we place no duty on these products entering our country from Canada, our producers are faced with a 17-percent Canadian duty if they wish to market their products in Canada. Although our producers feel that they could sell products profitably at domestic prices in Japan, officials of Standard Steel were advised by the Japanese national railway that in Japan, all railroad wheels are Japanese wheels.

I feel that we can only be as fair with our trading partners as they are with us. We cannot afford to follow a one-sided policy of free trade that redounds to the detriment of our Nation's industries. Standard Steel has already felt the sting of this policy. From an employment level of approximately 2,000 in June 1981, they have declined to under 900 today.

Railroad wheels and axles are a basic industrial product necessary for our transportation system. They would be sorely missed in time of war if they were unavailable domestically. This is true of many steel products as well as basic carbon steel. I urge my colleagues to take a hard look at the problems in this industry and to support congressional action to identify and enact a solution. We must let our trading partners know that we will not allow American industry to be unfairly compromised.●

● Mrs. HALL of Indiana. Mr. Speaker, I join with my colleagues of the Congressional Steel Caucus tonight in speaking on behalf of our Nation's steel industry, an industry that is at the heart of our American way of life. It is an industry which produces a material used in our private and public lives as well as a material critical to U.S. economic and military security. Steel is also a necessity for the construction industry which is now faced with the staggering task of rebuilding our Nation's crumbling infrastructure.

Steel is also a way of life for the five Midwestern States—Pennsylvania, Ohio, Indiana, Illinois, and Michigan—where the majority of American steel is produced. My home State of Indiana was recently ranked as the Nation's top steel producer although it is now producing one-third less than it did 5 years ago.

Northwest Indiana saw its reliance on the metal industries result in the loss of one of every six jobs by the end of the last year. Many of these layoffs in turn affected service industries dependent on steelworkers' and automobile workers' paychecks. Overall, approximately 30,000 steelworkers in northwest Indiana and south Chicago lost their jobs. Even worse for the Midwest is the knowledge that its industrial sector will never return to its former strength and will share much less in any eventual economic recovery.

In 1982, the steel industry endured its worst year since the postwar period, with losses totaling $3.2 billion. Shipments of finished steel products were the lowest in several decades. Last month production capacity, although slightly improved from this time last year, was still only 55.7 percent of total capacity, and unemployment in the industry was 107,000.

Although some of the problems faced in the industry in 1982 were due to the severe economic recession and resulting reduced inventories by steel purchasers, there was another major cause—an unprecedented level of market penetration by imports. Nearly 22 percent of the U.S. market—(or 16.7 million tons of steel)—went to imports as compared to 2.3 percent in the 1950's, 9.9 percent in the 1960's and 15 percent in the 1970's. Most of these imports were either dumped or subsidized and hurt the U.S. steel producer by, first reducing sales volume: second, artificially depressing revenues; and third, raising average unit costs of production. The result was that, in 1982, more than 150 unfair trade petitions were filed. In the words of a colleague, "Free trade? Only in the U.S.A."

There is yet another controversy which theatens the future of the steel industry and establishes a dangerous precedent. I am speaking of the proposed United States Steel-British Steel joint venture for the purchase of semifinished steel slabs from Britain to be finished in the United States.

This venture, although purported to save otherwise soon-to-be-lost jobs at the United States Steel Fairless facility, would violate the recently signed labor agreement with the United Steelworkers and would also violate the agreement between the United States and the European Economic Community (EEC). In addition, I am convinced that the imported slabs would in fact be subsidized and that in some instances the matter could threaten existing "Buy American" provisions. The venture is also a serious concern to national security.

The real danger lies in the establishment of a precedent spreading to other companies and countries, encouraging imports and allowing those countries to get yet another share of the domestic steel market. And, it appears that this internationalism is already beginning, as I read with dismay in last Thursday's Washington Post that Wheeling-Pittsburgh Steel Corp. is evidently negotiating with Steelmaker Brazil to import steel slabs for domestic finishing.

What we see here is that United States Steel and other companies are abandoning their long-standing position regarding imports and trade policy. In the words of Lloyd McBride of the United Steelworkers, the companies would have us believe "that the remedy to the cash flow crisis caused by import penetration is to join hands with the importers." Mr. McBride rightly believes that this is not the solution to the problem but the abdication of a responsibility.

It is clear that the current trade laws on the books are difficult and time-consuming to enforce, if in fact they are even enforced. They do not provide adequate relief. Consequently, there are several different alternatives which I and my colleagues of the Steel Caucus urge the Congress to consider and support.

The Steel Caucus introduced today the Fair Trade in Steel Act of 1983. Title I of the legislation would establish a Steel Tripartite Advisory Council to advise the President and Congress regarding steel problems and to develop information on trade, tax, environmental, health, safety, and readjustment issues.

The Steel Tripartite Advisory Council would be similar to its earlier counterpart of the latter 1970's, the Steel Tripartite Advisory Committee, which produced the Solomon report in 1977 and was later abolished by the Reagan administration.

Title II establishes quantitative restrictions on all imports of carbon and specialty steel to be calculated by taking no more than 11 percent of total expected apparent domestic consumption for each year. The limitations will be implemented subject to an official finding by the Secretary of

Commerce that the beneficiaries of import relief are engaging in, and have, verifiable investment plans to modernize the domestic steel industry.

Thereafter, prior to the announcement of quantitative limitations on the first day of April each year, the Secretary shall conduct an annual review and insure that a satisfactory level of progress toward steel industry modernization is being made. If the Secretary makes a negative finding, he may terminate the quantitative limitations.

Title III establishes quantitative restrictions on iron ore imports which shall not exceed 7 million tons for the last half of 1983 and for each year thereafter may not exceed 14 million per annum. The Secretary may permit exceptions if he determines there is insufficient quantity and quality to allow production at an individual plant.

The Ways and Means Subcommittee on Trade is also in the process of designing legislation to, first, improve access to trade remedies for all domestic industries potentially affected by unfair trade; second, to provide an easier-to-administer, less costly procedure for all groups, domestic and foreign; and third, to deter the spread of unfair trading practices by our trading partners, particularly such measures as industrial targeting and subsidy schemes.

Another group of organizations have joined together to form the Trade Reform Action Coalition (TRAC), an alliance of U.S. companies and workers in the chemicals, footwear, leather goods, metalworking, nonferrous metals, steel, television, and textile and apparel industries. TRAC was formed because of a common interest and concern in these industries about how our trade laws are working and how they can most effectively be changed. TRAC members believe that the Trade Act of 1974 and the Trade Agreements Act of 1979 provided needed improvements to our trade remedy laws but that domestic industries are prey to predatory targeting of the U.S. market by foreign producers and their governments and are also victims of unfair trade practices. TRAC proposals to resolve these practices include:

First, reduce costs and data requirements for trade case petitioners in countervailing duty and antidumping investigations;

Second, shorten the length of time to obtain relief in antidumping and countervailing duty cases;

Third, deal with the problem of "downstream dumping";

Fourth, reduce administrative discretion in antidumping and countervailing duty proceedings to make them less arbitrary and more fair;

Fifth, modify section 301 to enable the United States to take action against foreign governments that engage in "industrial targeting";

Sixth, depoliticize section 301 proceedings by placing such investigations and decisions in an administrative agency and subjecting them to judicial review;

Seventh, reduce the injury causation test under section 201, the "escape clause," so that this test is no more severe than the standard required under GATT.

All of these proposals would help to resolve some of the steel industry's problem. If the flood of imported steel continues, the industry will not be able to recover quickly and continue to lose overall capacity as additional plants close. And, we must stop joint ventures which threaten the future of the domestic steel industry. If we do not develop some kind of strengthened policy immediately, there will be little left to save. If our trade laws cannot be adequately enforced, then we must pass such laws as the quota bill introduced today to remedy the problems and overcome inequities.

I lend my complete support to the passage of proposals that will result in a healthy, viable steel industry which produces American-made steel for America.●

● Mr. O'BRIEN. Mr. Speaker, I rise to speak today in support of reestablishing a committee similar to that which was once known as the Steel Tripartite Committee.

The Steel Tripartite Committee was the brainchild of the Solomon report and was established by President Carter on July 26, 1978. In the report, the committee was given a clear mission—to insure cooperation in the face of the myriad problems associated with developing a viable steel industry.

After formally mandated by President Carter's Executive order, the Steel Tripartite Committee was to advise the Secretary of Commerce and Secretary of Labor on international and domestic issues such as trade and trade adjustment questions, taxes, environmental protection and controls, occupational safety and health regulations, and structural readjustments with respect to plants and labor. It was also to review data relating to these issues, propose solutions, and examine other proposals for their impact on the steel industry.

Representatives on the committee were appointed by the President and included the following: eight representatives from industry; eight representatives from labor; one representative from the U.S. Trade Representative's office; one representative from the Treasury Department; one representative from the Commerce Department; one representative from the Labor Department, and one representative from the Environmental Protection Agency.

The committee's report was submitted on September 25, 1980. Since that time a number of their recommendations have been enacted into law, including accelerated capital recovery and delaying the deadline for compliance with Clean Air Act pollution control requirements.

The committee was disbanded following its report. However, the need persists for a continuing cooperative dialog.

The committee provided an excellent, unmatched forum for all interested parties—Government, steel management, and labor—to work together in resolving the steel industry's long-term problems. The committee is now gone, but the cooperation and healthy working relationship it provided is still needed, perhaps now more than before.

Indeed, there are many additional factors to be considered today that were not as conspicuous in 1978 when the commission was formed. One of these is the importance of education—retraining, relocating, and retooling—in the blueprint for the steel industry's future. I would urge that if such a committee is created again, that there be a representative from the educational community.

The committee was successful in its mission. No one disputes this fact. So why not continue with a good thing, instead of letting it die off for no reason? This time we need a permanent committee so that we can work toward maintaining a healthy steel industry—permanently. The committee will go a long way toward helping plan for both the short and long term, with all interests at heart.

It seems like everybody today talks about the need for Government, industry, and labor to work together. If we are really serious about this—which we should be—a new Steel Tripartite or Quadpartite Committee is the answer.●

● Mr. KOLTER. Mr. Speaker, before I begin, it is a great pleasure to participate in this special order. I want to thank my colleagues from Pennsylvania, Mr. GAYDOS and Mr. MURTHA, for giving me the opportunity to speak. Serving with such fine gentleman is a privilege of the highest degree.

Steel imports have been an increasingly serious problem for the last two decades. All one has to do is read the business and economics section of any major newspaper, and the story becomes quite apparent. We have companies going bankrupt, plants being closed, workers being laid off, families being disrupted, and communities suffering devastation. Despite reading about these problems and seeing the results in my district and elsewhere in western Pennsylvania, I have never actually seen imported steel. To me, it

was like an invisible enemy that only moved with the cover of darkness.

Well, Mr. Speaker, now I know what the enemy looks like. Let me explain. Last Friday evening, while driving home on Interstate 70, I passed five or six flatbed trucks, carrying rolls of what appeared to be galvanized steel. Usually one sees two or three rolls of steel on a flat bed trailer. In this instance, each trailer was carrying six rolls. My legislative assistant pointed out a disturbing fact. Lettered prominently on each roll were the words "Made in Japan." From a distance, those steel laden trucks were reminiscent of a military convoy, steadily advancing toward its target. Besides hauling steel, those vehicles were carrying unemployment and the tragedy that accompanies it. For me, the cycle is complete, albeit in a reverse fashion. First, I viewed what unfair imports have done. Now, I have actually seen a substantial part of the cause.

My primary reason for mentioning that string of steel haulers is to continue directing attention to a very alarming situation. Quite frankly, if our trade laws continue being ignored and walked on with muddy shoes, I am confident that many more flatbed trucks and railroad cars will be delivering unemployment to our mill communities.

In fact, Mr. Speaker, ominous signals have already been sounded. I refer you to reports that Wheeling-Pittsburgh Steel; plans to import approximately 300,000 tons of steel slabs annually from Brazil for finishing at the firm's Steubenville, Ohio, facility. First, United States Steel set the industry trend by attempting to negotiate for semifinished steel from Ravenscraig, Scotland, to be finished at the Fairless Hills, Pa., works. Now, the eighth largest steel producer is trying to make a similar arrangement only on a smaller scale. The question is, "who will be next?" or better yet, "who won't eventually seek such an arrangement in order to survive?"

Is it not rather ironic that we have been considering legislation that would increase the U.S. quota to the International Monetary Fund, while at the same time, Wheeling-Pittsburgh Steel is negotiating with Brazil? This fact leads me to highlight a very interesting parallel. Wheeling-Pittsburgh is facing tremendous financial problems. The company lost some $18.9 million in the second quarter of 1983. Last year, the firm suffered a $75 million pretax loss. In human terms, about half of Wheeling-Pittsburgh's employees are laid off. That translates into about 10,000 individuals. Brazil, a centerpiece in the massive world debt crisis, owes some $90 billion to banks. That is more than any other developing nation in the world. Both entities have exhausted already tenuous lines of credit. It seems that the only difference is that when discussing Brazil's financial woes, one talks on terms of billions. When we mention Wheeling-Pittsburgh and the industry in general, we use millions.

My question from all of this is, Why are we not debating a bill that would help our industries and workers? I acknowledge the necessity of international liquidity, a structured balance-of-payments system, world trade and the jobs it creates, but could it be that an IMF quota increase just might contribute to the demise of our own industrial base? After all, money is a fungible item. Can we be assured that our tax dollars would not finance Brazil's new steel capacity, and perhaps even the exporting of semifinished slabs to the United States? I think not.

Mr. Speaker, I would like to conclude on a somewhat brighter note. On July 5, 1983, the President granted limited relief to the embattled specialty steel industry. The imposition of tariffs and quotas on foreign produced specialty steel has been criticized by the industry, the steelworkers, our trading partners, and Members of Congress, including this Member. However, in reviewing the President's free trade philosophy, and the fact that several key members of the Trade Policy Committee favored granting no relief at all, I think the industry was fortunate.

I am firmly convinced that relief was granted because of the tremendous effort made by the industry, the union, the communities, and the Congressional Steel Caucus. The President could not ignore us.

I would like to extend my congratulations to everyone who helped make me aware of the industry's desperate need for relief. Also, I want to thank my colleagues who signed a letter I wrote to each Member of the Cabinet-level Trade Policy Committee in support of the industry's plea for relief.

Now that tariffs and quotas are in place, we must continue our vigilance against imports of unfairly subsidized foreign steel for many years. This acknowledgement represents a first step. We must not grow complacent because of this symbolic victory. I, for one, pledge to continue doing everything possible to promote the health of the specialty steel industry and its talented employees.

Also, I want to make it clear that I am prepared to try everything legally possible to prevent the importation of semifinished steel into the United States. We must signal our intentions to the world that regardless of the dark cloud hanging over our steel industry, we will not give in without a fight.●

● Ms. KAPTUR. Mr. Speaker, I would first like to commend the executive committee of the Steel Caucus for organizing this special order. Although it has not been a secret that the U.S. steel industry is in grave trouble, Government policies to address this problem still need to be formulated. This special order will hopefully provide some needed impetus for change in the steel industry.

In particular, I hope this special order will help move the industrial policy debate forward. Our country's lack of a systematic industrial policy is especially apparent with respect to the steel industry. A number of Government actions have been taken in the past 20 years to aid the steel industry. These actions, however, have not been coordinated and they have not been tied to any long range view of what the role of the steel industry should be in the American economy.

The result of the happenstance industrial policies of the past, coupled with some poor management decisions, slaps us in the face. Unemployment rages at intolerable levels in the steel industry. A great proportion of production occurs at hopelessly outmoded plants and imports continue to plague us. Communities across the Nation remain in shambles because of plant shutdowns.

I believe a systematic industrial policy with positive adjustment strategies would enable the steel industry and other troubled basic industries in our Nation cope with their economic difficulties in a more effective manner. Necessary quid pro quos, involving both labor and managment, should have accompanied actions such as the institution of trigger prices. Measures designed to protect the steel industry should not merely delay necessary management and production changes but, instead, they should be tied to guarantees by steel companies to modernize their facilities.

In addition, if plants must close down, steps should be taken to help affected workers and communities to absorb the brutal shocks. Workers should be forewarned and thus able to plan ahead. Retraining and other job assistance programs can then be provided. Communities would be better prepared to aid the newly unemployed, with the Federal Government also lending a necessary helping hand. Such actions should not occur on an ad hoc basis. They should be a matter of course.

I recently had the opportunity to hear John Sheehan, legislative director of the United Steelworkers of America, testify before the Subcommittee on Economic Stabilization. Mr. Sheehan outlined quite effectively the need for an industrial policy in general, and a steel policy in particular. I urge my colleagues to read the following reprint of Mr. Sheehan's remarks. I have also included the testimony of F. Kenneth Iverson, CEO of Nucor Corp. (a mini-mill). Mr. Iverson de-

scribes why a different approach to steep production can succeed:

TESTIMONY OF JOHN J. SHEEHAN, LEGISLATIVE DIRECTOR, UNITED STEELWORKERS OF AMERICA

At the outset let me say that while our union welcomes these hearings on industrial policy, the time is soon approaching when definitive legislative decisions must be made.

Workers in such basic industries such as steel, along with their communities, can ill afford to wait much longer for effective relief in the form of effective industrial policies.

For almost five years now, our union has been raising the industrial policy issue and the need for an industrial steel policy. In testimony before the Senate Select Committee on Small Business on February 5, 1980, for example, we stated:

The United Steelworkers of America believes that we are approaching a critical stage in the future of the American steel industry. Over the next several years major decisions will be made with respect to this most basic of all our industries . . . The decisions will impact greatly on the American public and, therefore, should be subject to public policy considerations . . . Given the dimensions of the steel problems facing us, the time has come for a national steel sector industrial policy . . .

Unfortunately, many of the critical decisions that we foresaw in 1980 have been made with little or no public input. Steel plants have been closed, steelworkers have been laid off, and steel communities have been devastated.

The worker and community adjustment assistance programs we called for in 1980 were not forthcoming. On the contrary, unemployment and community assistance programs have been cut drastically under the Reagan economic programs. As a result, the industry, its workers and their communities are far worse off today than in 1980.

Mr. Chairman, I would like to focus the remainder of this testimony on four specific areas:

(1) the current status of the American steel industry;

(2) the debate over the proposed U.S. Steel-British steel deal for the importation of raw steel;

(3) what we believe are the essential components of an adequate industrial policy; and

(4) some specific recommendations for an effective steel policy.

STATUS OF THE AMERICAN STEEL INDUSTRY

Since 1974, some 200 steel or steel-related facilities in the United States have been permanently shutdown (see attachment). While most of these closings involved facilities within existing steel plants, in at least 24 cases entire steel mills have been closed.

Over the next year, the large integrated Bethlehem steel mill at Lackawanna, New York, will be closed resulting in a direct job loss for 7,000 steelworkers. Unfortunately, we expect even further such shutdowns over the next several years.

Production employment in basic steel has dropped from over 400,000 in 1974, to about 200,000 today. Nearly all of this decline represents permanent job loss. Many of the 150,000 steelworkers currently on layoff may never go back to their former jobs.

Capacity utilization in the steel industry declined from 93.7 percent in 1974 to 47.3 percent in 1982. At one point, it fell as low as 34 percent. For the first five months of 1983, the utilization rate averaged 52.9 percent. In order to approach the "breakeven" point, the industry estimates that a 65 percent capacity utilization rate is required.

Domestic steel shipments in 1982 were 61.5 million tons, the lowest level since the 1930s, and there has been little improvement thus far this year.

Steel imports in 1982 accounted for 21.8 percent of the American market, the highest level on record. So far this year, imports have averaged 18.6 percent of the market and there appears to be some further moderation on the part of both the Japanese and Europeans. Indeed, imports for the first five months of 1983 are 22.6 percent lower than the comparable period in 1982.

In March of this year, our union signed a new 3-year contract with the basic steel industry which, among other things, included a wage cut amounting to some $3 billion, which, in effect, is our contribution toward a steel recovery.

Last month, our union announced an across the board 20 percent staff layoff.

Depending upon whose numbers are used, steel capacity in the United States has been reduced by 7 to 10 million tons over the last several years, and this does not include the shutdown of the Bethlehem Lackawanna plant.

From our perspective, the situation in the steel industry is not going to improve much in the very near future. Indeed, in spite of Reagan's widely touted "economic recovery," it appears that the industry will be lucky to approach the break-even point later this year. Moreover, steel-related unemployment is expected to remain very high for some time to come.

U.S. STEEL-BRITISH STEEL PROPOSAL

A great deal of what happens to the American steel industry depends upon the outcome of the current controversy involving the U.S. Steel Corporation and its proposed plans to import some 3.5 million tons of subsidized steel slabs from the British Steel Corporation.

If U.S. Steel is permitted to proceed with this plan—which we vigorously oppose—it will not only mean the closing of the hot metal operations of the Fairless Works outside Philadelphia, and the direct loss of 1,800 jobs, but it could threaten the future of this Country's entire raw steelmaking capacity.

Indeed, if U.S. Steel can import cheap subsidized steel for refinishing and sale in this market, it will interject a new unfair competitive element into the domestic steel market. Other American steel companies, because of the competitive disadvantage, may be compelled to do the same, thereby further reducing national steel-making capacity.

This issue raises serious policy questions concerning public protection from narrow corporate decisions that could have far reaching consequences on our industrial future. It also raises questions concerning the need for industrial policies that are based upon public as well as corporate interests.

Our union intends to resist the proposed U.S. Steel-British Steel plan with all the legal resources at our disposal.

INDUSTRIAL POLICY COMPONENTS

Every industrialized country (except perhaps for the U.S.), and many Third World nations, have coherent and articulated national industrial policies.

While each of these industrial policies differ in terms of approach and character, common to all of them is the active role of government as a central force in directing and regulating the national economy. Although the degree of government intervention varies from country to country, it is an accepted fact of economic life that government serves as a primary economic planner and decision maker.

In its simplest form, industrial policy is the development and implementation of a strategy to revitalize, improve and/or develop an industry or industrial base. Industry needs to be revitalized in order to be competitive and remain viable in a market contest which is increasingly international. Revitalization, while it means a renewed and accelerated modernization program for many of our existing industrial facilities, also encompasses the factor of restructuring and retrenchement. Decisions relating to modernization and restructuring because of their enormity inevitably have noneconomic conseqences. They impact upon communities and the workforce. There will result drastic shifts in manpower policies—shifts which in the short run immediately affect the lives and livelihood of individual workers. Hence, an industrial policy must entail employment considerations and comprehensive worker-community readaptation program. We realize, however, that, on the bottom line, the more productive job is the more secure job. The labor movement views, therefore, an industrial policy as one which assures a continual manpower base providing job opportunities at a high standard of living and, most importantly, one which can make more secure the current job base in our industrial sector which has delivered high wages and a decent living opportunity.

Usually, it is a strategy developed collectively by government, business and labor through some sort of tripartite consultation process. It is based upon the recognition that industrial decisions affecting the nation as a whole are far too important to be left to a few private individuals or corporate managers alone.

Most industrial policies have at least six common policy components, including:

(1) a public mechanism for defining industrial goals;

(2) an investment policy for targeting and allocating capital resources to selected industries;

(3) a labor and employment policy that seeks adjustments in the workforce to better accommodate industrial restructuring while at the same time providing unemployment assistance and retraining;

(4) a technological research and development policy which may be publicly financed and directed, and jointly conducted on an industry-wide basis;

(5) a trade policy that seeks to shelter selected domestic industries from international competition, at least while such industries are developing or restructuring. Many such trade policies also include aggressive export promotions;

(6) a public policy management system designed to coordinate industrial policy with other social and economic policies so that the policies reinforce, or at least do not conflict with one another.

We believe that these six policy components are essential to any coherent industrial policy. While the details and specific policy tools may vary, and while some policies may be more successful than others, the industrial policies of other nations have had a profound impact on the world economy.

In this respect, nearly every industrial nation has made some level of public commitment to its basic industries such as steel, chemicals, autos, transportation, communications and other important manufacturing sectors.

Given the fact that some 70 percent of U.S. industrial output is subject to international competition, we believe that the time has come to make similar commitments to American industries.

A NATIONAL STEEL POLICY

Steel, of course, is a primary example of a basic industry subject to national industrial policy considerations. Again, except for the United States, every steel producing nation has a coherent sectoral policy governing steel.

The various steel policies use a combination of trade, investment, employment, research and development and other policy tools to protect, modernize and/or restructure their steel industries on the one hand, and to export surplus steel production on the other.

The availability of large amounts of surplus steel production capacity is, of course, the single greatest problem confronting the international steel community. Indeed, the socially painful steel restructuring process now occurring within the traditional steel producing nations is the direct result of global overcapacity. This whole question of excess capacity, restructuring and its social and economic consequences has been under intensive study by the OECD Steel Committee for some time.

However, even as the traditional steel producers undergo this restructuring and the elimination of capacity, the developing nations are exacerbating the problem by adding new production capacity far beyond what they need for domestic consumption. The result is surplus steel sent into the international steel markets, often at depressed prices. The primary goal of these producers is to maintain production for a whole host of noneconomic social and political reasons.

Much the same can be said for the more traditional steel makers, particularly in times of world recession when levels of steel production are maintained for other than purely economic reasons. Thus, during periods of economic downturn, the Europeans, Japanese, and others will continue steel production often at a loss or at marginal profit levels, while American steel companies reduce production, close facilities, and layoff workers. It should be noted, however, that in recent years the Europeans and, to some extent, the Japanese, have begun to experience the same problems as Americans.

In any discussion of industrial policy, the question naturally arises: should the U.S. have such a policy and, if so, what should it include?

Our union has long believed that the problems facing the nation, the steel industry, its workers and their communities, cannot be solved without a sectoral steel policy. Thus, we have called for a steel policy which includes:

(1) The reestablishment of the Steel Tripartite Committee to:

Define the industrial objectives of the steel industry;

Identify the specific problem areas confronting the industry, workers, and communities;

Develop a rational modernization program for the industry;

Provide a continuing policy forum to address steel issues.

(2) A steelworker and steel community adjustment assistance policy to:

Provide assistance to deal with the economic consequences of restructuring and plant shutdown; and

Develop creative economic alternatives for reemployment, retraining, and community revitalization.

(3) An industrial investment and capital formation policy that:

Uses either the tax system and/or a public investment agency such as the Depression-era National Reconstruction Finance Corporation to generate and target the capital necessary to modernize and stabilize the steel industry;

Ties any tax or public financial loan assistance to the development and implementation of an acceptable modernization plan; and

Forces steel companies that receive such assistance to re-invest the funds back into basic steel and, where possible, in traditional steel communities.

(4) A steel industry research and development program aimed at both basic and applied research into new steel technologies which may be public funded and carrried out on an industry-wide basis.

(5) A reasonable and effective trade policy that is designed to:

Vigorously enforce U.S. trade laws and strict adherence to international trade agreements;

Provide trade relief during periods of world economic recession; and

Provide some level of market insulation from steel imports during limited periods of steel industry modernization and restructuring;

Respect the integrity of domestic as well as international steel markets.

CONCLUSION

Mr. Chairman, the time is rapidly approaching when fundamental public policy decisions must be made with respect to the future of America's basic industries. For the steel industry, labor, management and government simply must confront the question of whether and when a public policy commitment will be made to protect and preserve this most basic of all our industries.

For our part, we do not believe that the public and political structure of this country will permit the extinction of basic American industries and that being the case, we should stop all the posturing on this issue and get on with the task of developing sound, workable, and publicly responsible industrial policies.

TESTIMONY OF F. KENNETH IVERSON, PRESIDENT AND CHIEF EXECUTIVE OFFICER, NUCOR CORP.

BASIS OF COMMENTS

Nucor Corporation is a manufacturer of steel and steel products. Over the last 13 years we have constructed seven steel minimills on four sites. In 1982 we produced 1,100,000 tons of steel. We are the 10th largest steel company in the U.S. and have an annual capacity close to 2,000,000 tons. We obviously are a medium-size producer. What does set us apart from the rest of the steel industry?

1. All of our mills use the latest steel technology. 100 percent of our steel is continuously cast.

2. For more than 10 years, the price of the steel products we produce, FOB our mills, has been equal to or less than the dockside price of these products from foreign suppliers.

3. We have continually maintained our work force. We have not closed a single operation nor laid off a single employee for lack of work.

4. We operate profitably. Since constructing our first steel mill in 1970 the company has never had a loss quarter. In 1982 we had a 10 percent return on stockholders' equity. For the last five years our return on stockholders' equity has average more than 20 percent.

If we can meet foreign steel competition and operate profitably, then what is wrong with the major portion of our steel industry?

PROBLEMS OF THE U.S. STEEL INDUSTRY

There are two reasons why our primary steel industry has lost advantages it once had in the marketplace. One is that many of our steel plants are old and inefficient. About 8 percent of our steelmaking capacity is still so outdated and so inefficient it should be shutdown—the cost of modernizing or making it environmentally acceptable is prohibitve.

In this country, for many generations, a continuing stream of new invention and new manufacturing techniques allowed us to far outpace the rest of the world in both volume and efficiency of production. In a number of industries this is no longer true—and particularly in the steel industry. In the last three decades, almost all of the major developments in steelmaking were made outside of the United States.

Many of our larger steel companies have not quickly accepted technological advances and in some cases have adopted new techniques only when the economic evidence was overwhelming.

Continuous casting is a method of producing a billet which can be rolled directly into a finished product. It eliminates ingot pouring, soaking pits, reheating furnaces and break-down mills. The yield from molten metal to finished product is significantly improved. It reduces energy costs.

Last year the U.S. produced about 25 percent of its steel by the continuous casting process. In Japan more than 80 percent of the steel was continuously cast. Italy, Austria, West Germany, Sweden, France, Canada, Belgium and the United Kingdom all had a higher percentage of continuously cast steel than we did in the U.S.

About 10 percent of the steel in the U.S. is still produced using old open hearth furnaces. The Japanese shutdown their last open hearth furnace more than five years ago.

I would be negligent if I did not recognize the contribution that the government has made toward the technological deterioration of the steel industry. Unrealistic depreciation schedules, high corporate taxes, excessive regulation and jawboning for lower steel prices have in the past made it difficult for the steel industry to borrow or generate the huge quantities of capital required for modernization.

The second problem of our major steel producers is in the area of labor costs and productivity.

Total hourly compensation for production workers in the U.S. is still about 80 percent higher than the average manufacturing wage. This has been cited as one of the major reasons U.S. mills are not competitive. Steel mill work is hard, hot, skilled, dirty and dangerous. In every industrialized country steel workers earn more than the average manufacturing worker. In Japan the premium is close to 50 percent. Obvious-

ly, higher wage rates are a factor in the competitive picture, but they are not as significant as productivity. Newer Japanese mills report productivity in the range of 700 to 1,000 tons per employee per year. The productivity in older integrated mills in the U.S. is half of that. The U.S. steel industry's problems in productivity stem from the outdated plants mentioned earlier and is aggravated by restrictive union work rules and an excessive number of people—and here I include clerical, administrative and management as well as production workers.

FUTURE OF THE STEEL INDUSTRY

I am not pessimistic about the future of the steel industry. We have enough comparative economic advantages to have a steel industry that can compete in the international marketplace. We have an ample supply of iron ore and an ample supply of coke. Our electric costs are considerably lower than those in most industrialized countries; we have low cost steel scrap, plus the advantage of lower freight costs in most areas of the U.S.●

● Mr. WALGREN. Mr. Speaker, a recent headline last week in one of our newspapers in Pittsburgh began, "Skid in Steel Productivity." Perhaps the headline would have better read, "Steel Industry on the Skids."

Losses in the steel industry in 1982 were some $4 billion—the most disastrous loss in the history of our steel industry. Some 200 American steel facilities have been closed permanently in recent years, and five steel companies in existence in 1978 have either closed down or ended in bankruptcy.

In 3 years, employment in the steel industry has been cut nearly in half. More than 150,000 steelworkers are laid off, tens of thousands have been given early retirement, and more than a half million employees in supporting industries like coal mining, railroads, and river transport are suffering the jobless consequences of an unhealthy American steel industry.

The numbers are bleak, and the pain is very real.

How can we wake up this administration and this Congress to a tragedy occurring within our own borders before our very eyes?

Last week I voted against further funding for the International Monetary Fund. The administration has urged the Congress to give an additional $8.4 billion to IMF to assist certain Third World countries pay the interest of their high-interest loans from American banks. The American banking industry, which made high-interest loans to risky nations, is the principal beneficiary of this legislation.

But the same administration which pushes for $8.4 billion to bail out foreign debtor nations and their American lenders refuses a single penny for health insurance for the families of unemployed American steelworkers and has blocked efforts to save the homes of American steelworkers from mortgage foreclosure.

The same administration which urges billions for countries abroad—many dollars of which have been used to build foreign steel mills—refuses to give the American steel industry any kind of meaningful protection from unfair, illegal foreign trading practices.

I believe that America's trade policy is in total disarray. While food banks and soup kitchens have overflow business in the Mon Valley and other parts of western Pennsylvania, this administration with the support of many in the Congress insists on spending billions of dollars on bailouts for banks and military adventures overseas and virtually nothing on an industry critical to the economic health and security of this country.

I think it is time for balance and fairness in our relations with the world. I have no objection to helping Third World nations develop their resources, and I am fully behind reciprocal trading agreements with our Western allies in Europe and Japan. We live in an interdependent world, and a return to the isolationist "America first and only" policies of another generation would not be helpful. But balance and fairness surely require some willingness to help Americans damaged by the recession.

I applaud my colleagues for their leadership in scheduling this time to make us all focus on the problems of our steel industry. But, frankly, the talk falls on deaf ears. Maybe it is time for us to use our votes in a coordinated, effective way to send a message that this administration will not mistake. With so much suffering here at home, with an industry vital to our national interest clearly on the skids, I cannot vote to keep sending our resources abroad—at least not without some measure of concern for the hard-working, taxpaying American in our steel valleys. When we begin to take care of our families here at home, this Member of Congress will be more willing to extend understanding to economic problems abroad.●

● Mr. OBERSTAR. Mr. Speaker, I rise today not to detail the devastation of the American steel industry in the past decade. We in Congress are well aware of the flooding of our domestic market by subsidized imports. The unemployment statistics are too painfully familiar. Over two-thirds of the miners in my native northeastern Minnesota are unemployed and another mine in Eveleth, Minn., shut down again last week. These steelworkers are running out of unemployment benefits and are applying in record numbers for food stamps and local assistance. They want to go back to work but there is none.

Here, in Congress, the Steel Caucus has worked vigorously for a strong steel industry. We have supported tariffs and quotas to protect our domestic market from unfair foreign competition. We have worked to pass responsible buy American legislation. We have supported petitions to the International Trade Commission. Both enforcement and reform of our existing trade laws are vital to our steel industry.

Since the 1950's, the Federal Government has provided basic industries, such as steel, with a myriad of special tax provisions, depreciation allowances, subsidized loans and loan guarantees. For all industries, this special treatment represented $66 billion in 1980, 3.1 percent of the GNP.

Favorable tax treatment of American steel has been vigorous, consistent—and misguided.

Misguided because it has allowed the steel industry to abandon their outdated plants and their workers. Misguided because, while offering financial incentives to industry, it has allowed the steel industry to diversify and divest itself of steel operations. Misguided because Congress, in extending tax relief, has not tied that relief and import relief to requirements that the steel industry use the benefits to reinvest in new, or upgraded steelmaking capacity.
